Modernistic look is featured in new Foamy gel tv spots.

Gillette's Foamy starting to gel

By GAY JERVEY

Gillette Co. tonight will break a $5 million tv advertising campaign for its new Foamy gel designed to bring a little sophisticated sex appeal to shaving ads.

The Boston-based company hopes that its new entry—which comes from the personal care division (AA, Aug. 1)—will not only hone in on S.C. Johnson & Son's category pioneer and leader Edge, but also attract new users to gels.

The introductory Marschalk Co.-created commercials use a steely, fashionable sell. The slickly packaged product rolls across corrugated steel. A man is alone with his mirror, strobe lights and Foamy gel. Splashing water dances slowly across his 5 o'clock shadow. On goes the gel.

These fast-paced segues are accompanied by synthesized music that Andrew Langer, Marschalk's president and top creative executive, compares with the instrumental theme to the movie, "The Good, the Bad and the Ugly." The pitch is: "Introducing new Gillette

(Continued on Page 90)

Competitors study plans to battle PCjr

By ROBERT RAISSMAN

IBM's PCjr has yet to reach retail shelves, but the computer giant's newest baby already is muscling the competition and giving the home computer industry time to pause and reflect on what the future holds.

IBM has taken the wraps off the product but elected to keep it off the market until the first quarter of '84, giving hardware and software marketers a number of questions to ponder, including:

- Did IBM forego having PCjr on the market for Christmas to stall home computer-buying decisions, thus tying up the competition?
- What effect will the introduction have on software marketers, and which ones will benefit?
- Is there a chance that PCjr could take market share away from IBM's Personal Computer?

Timing continues to play a key role in the PCjr saga. An IBM spokesman said any ad campaign would reflect the timetable created for bringing the unit to market: Introduction last week, delivery of demos in December and delivery to customers during the first quarter of 1984.

Initial publicity releases indicate PCjr will be promoted for offices as well as home and classroom use.

However, sources said that the PCjr ad agency, Lord, Geller, Federico, Einstein, has not been told when to break the campaign.

The competition is anxiously awaiting that moment as they plot their own counterattacks.

Apple Computer executives were not talking, and Coleco executives were too busy worrying about the fate of their Adam—shipped three weeks ago—and would not comment on the introduction.

PCjr magazines sprout—Page 90.

Both companies are seen as the most direct competition to PCjr.

An Atari spokesman said PCjr would not compete directly with the company's two home computers because they are lower-priced. Atari already has postponed the introduction of two higher-price home computers.

David Harris, Commodore International vp, said his

Holds slim lead over ABC in 5-week average

CBS ratings top another week

By JAMES P. FORKAN

New York—CBS-TV remained the ratings front-runner as the new fall season began its sixth week, a season in which the new series again are proving to be chumps rather than champs.

Only three new shows contributed to CBS' leadership; three other series entering their second seasons also assisted. The freshman and sophomore crop at ABC and NBC were less influential.

Among the tv newcomers, only three series are above the 30-share mark (CBS' "AfterMASH" and "Scarecrow & Mrs. King" and ABC's "Hotel"), whereas 17 entrants had 25 or less shares after five full weeks.

CBS' fourth weekly victory of the season once again was described by CBS executives as a "decisive" margin—1.3 rating points ahead of ABC's 16.6 average and 2.9 points ahead of NBC's 15.0. In winning Monday, Thursday and Friday and tying ABC on both Saturday (usually an ABC night) and Sunday, CBS consolidated its season-to-date lead; ABC, which snared Wednesday but lost Tuesday to NBC in the latest week, took the season lead only briefly when the World Series lifted its Nielsens.

In the five-week averages, CBS (with a 17.9) held a three-tenths-point lead over ABC; the gap between CBS and NBC was 2.6 points. CBS was 1% off its five-week pace of a year ago (18.0) and NBC was down 8% (from 16.7), while ABC jumped 8% from 16.3; the World Series figured in those changes, NBC having had that baseball event a year ago. NBC, however, pointed out that, excluding baseball, its five-week average rose 6% to 15.4, as ABC also gained 6% to 16.9.

The fifth week also found homes using television levels at 62.7, up from 60.9 during the comparable week a year ago, network researchers noted.

The season-long averages for newcomers were, in some cases, slightly misleading, because they

Swift eyes split 30s for 2 foods

By JANET NEIMAN

Chicago—In time for the Thanksgiving holiday, Swift & Co. will break a new campaign this week for Butterball turkeys—the first effort from Grey Advertising, New York, which took over the business in August of last year.

"America's first turkey," is the theme of the advertising.

The company also is considering using split 30-second spots for its Soup Starter line and Peter Pan peanut butter.

The 15-second Soup Starter segments would use new advertising for the line that began last week, paired with new commercials of the same length for Swift's Peter Pan.

"Depending on what you want to communicate, different commercial lengths can be appropriate," a Swift marketing official said.

Using split 30s "really is not unlike what happened in magazines in the last 20 years," he continued. "It used to be you could only buy full pages or half-pages. Finally somebody decided to give the consumer what he needed. This is an evolutionary thing."

He refers to the fact that magazines today sell various sizes and

(Continued on Page 90)

Agency media heads approach '84 with caution

By Herbert Zeltner

The media outlook for 1984 can best be summed up in one word—"caution." And caution to a surprising degree in view of the brightening economic scene for business in general.

At least this is the belief of seven top agency media executives as they survey budgets and strategies for the coming year. Combined, these seven (*see accompanying listing*) are responsible for watching over media investments totaling well over $5 billion. Thus, their views on emerging trends, new alternatives, difficulties and pressures are important in sketching the national media scene in coming months.

In commenting on next year's media budgets, those willing to estimate totals for established brands see increases restricted pretty much to the 4% to 8% range—either "holding" or not much above an anticipated 5% to 6% rate of inflation.

Advertisers are looking to establish strong profit records and will be slow to loosen their purse strings, according to our panelists.

Herbert Zeltner is chairman of the Advertising Age *Editorial Sounding Board.*

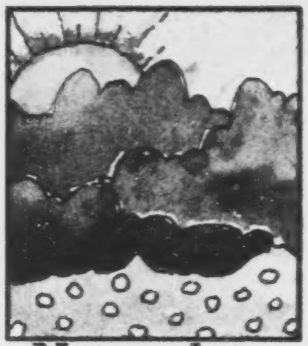
Why this somewhat surprising lag? One member of our panel, Gerald Moody of Ross Roy, sums up the feeling of the group: "There's simply no enthusiasm for the solidity of this economic upturn."

Several others support his view, suggesting there's a great deal of client caution in moving out more aggressively, at least as far as advertising investments are concerned. Additionally, they see new product introductions and rollouts as moving very, very slowly.

One media director notes that he has seldom seen clients as "tight-fisted" as they are this budget and planning season. He believes advertisers are looking to establish strong profit records right now as conditions improve. They don't want to spend all the money saved through cost cutbacks and productivity improvements forced on them by the difficult business conditions of the past two years.

Cable tv

Robert Geis of Wells, Rich, Greene sees, as an outgrowth of this conservative advertising investment climate, many headaches ahead for mass, general audience advertisers. With expensive, broad-brush media losing some of their traditional popularity—and with continuing fractionalization in all categories into narrower alternatives—cost-conscious advertisers and agencies will be facing the loss of some economies of scale. As a result, costs per thousand are likely to be noticeably higher than ever before.



Network tv

Although the media executives in our panel are pleased with the rapidly growing number of smaller, more-specialized media choices available, they register frustration and reflect client irritation about the erosion of efficiency involved in this shift.

The group is just about unanimous in believing that 1984 media plans will be more complex and detailed than ever before—with more emphasis on targeting particular geographic markets and concentrating weight in more precise demographic subsegments. While certainly not a new trend, moves in this direction seem to be more wide-ranging and intense than before. This emphasis is bound to affect all media categories—and most product sectors—in significant ways.

Next year's cost increases may average only 6%

By Robert J. Coen

The era of annual double-digit price increases for the major media has finally ended.

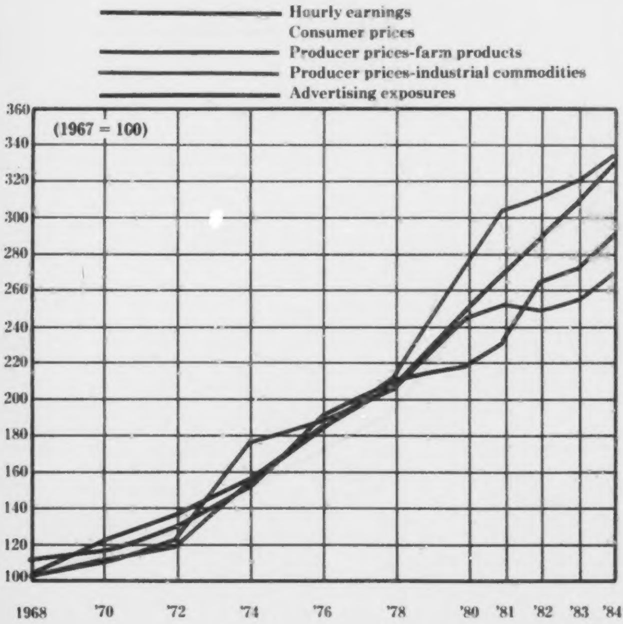
The increase in unit costs in 1983 is less than 10% for all media except two minor ones. The media unit cost index for direct mail, which is reported for the first time this year, actually posted a decline.

Robert J. Coen is senior vp-director of media research, McCann-Erickson, New York. He often writes about media costs for Advertising Age.

The composite media unit cost rise for 1984 is projected at a rate of approximately 6%, which is much smaller than the increase of nearly 12% last year.

From 1976 to this year most major media were able to pass along higher operating costs in the form of higher prices. But now this practice is being challenged by marketers, which have been forced to drastically modify their own pricing policies.

Various cost indexes



*Estimated
Source: McCann-Erickson

As the inflation rate has moderated, many industries have experienced sharp drops in their annual price rises. There have been price rollbacks in some areas of the economy and even givebacks by some labor unions. Buyers of time and space, therefore, do not look kindly toward any medium announcing a percentage increase that is double or triple the recent changes in the consumer price index (CPI).

Media cost indexes

The three accompanying charts and one of the two data tables are in the index format. The year 1967 is used as the index base year of 100 because it is still the most commonly used by the government for a multitude of economic indicators, such as the CPI.

For more than three decades, McCann-Erickson has tracked media unit costs, audience delivery and the changes in cost-per-thousand. This year for the first time, we have included price trend data for advertising messages distributed by mail—the direct mail medium. The direct mail index reflects the trend in postage costs for mailing third-class advertising mail in bulk with maximum presort discounts.

The McCann-Erickson annual advertising expenditure reports have been one of the main sources for developing the indexes because the yearly change in expenditures is often a function of the change in the price of time and space, combined with the change in the volume of units purchased. Synthesis of data from different sources is necessary when actual prices are not publicly known.

Each of the major media has experienced a different price trend in the past, and each faces a different set of future conditions. These trends and the possible projections for each medium are as follows:

Forecasts indicate that the composite media unit price jumps in 1984 will be the lowest in many years, in part because of the slowing rate of inflation.

Newspapers

Newspaper advertising rates now are about 3⅓ times higher than in 1967. We expect a significant increase again in 1984 with rates for many papers getting to a level nearly four times higher than 1967.

Over the years, newspapers have been plagued by soaring costs for labor, paper and distribution. Circulation growth slowed, and the papers were not able to raise the price per copy as much as their rising costs would justify without risking a serious loss in readership and influence. As a result of these conditions, in many markets newspaper advertising rates rose at a much faster rate than most other marketing costs, and the retailers and key manufacturers are reexamining their scheduling practices.

In 1982, newspaper ad revenue growth was stunted by large declines in classified and retail linage, and sizable rate increases for 1983 were announced as compensation in case the trend continued. But now newspapers are faced with reactions from many key advertising clients, and, therefore, rate increases should gradually moderate.

In 1984 we expect the U.S. inflation rate to be very close to 5%, yet many newspapers will still be tempted to impose double-digit rate increases for next year.

However, we believe newspapers in many markets are reexamining rate strategies. They finally are becoming aware of the lower inflation rate, a growing number of disgruntled customers and the threat from the direct mail medium. In 1984 the cost of newspaper advertising linage is expected to rise by about 8% in most major markets.

Magazines

Magazine advertising rates traditionally have increased more slowly than those of other media. Individual magazines usually find themselves competing with several others for the ad dollars directed to the market segment they are edited to serve. The competition is intense, and the magazine that raises prices too fast is likely to lose important page volume. Many magazines also are able to pass along a sizable share of their cost to their readers without risking too much in circula-

Out-of-home

This over-all view became even sharper as each major media form was checked with these experts.

Television

Every media director to whom we spoke underscores the point that usable tv alternatives continue to multiply. Cable is now available in more than 40% of U.S. tv homes and, although cable programing services are in flux, advertiser-supported cable "avails" are continuing to increase in significance.

But there is a big change in attitudes toward the established networks this year. Marcella Rosen of N W Ayer terms it a period of "network recovery," not too surprising in her view because they were expected to fight back strenuously from the setbacks and competitive pressures of recent years. The network share erosion characteristic of the past few seasons seems to have slowed markedly—a pattern pointed out by Jay Schoenfeld of Backer & Spielvogel and confirmed by others. In a sense, this offers a reprieve for the networks, as well as other traditional tv outlets—at least through 1984.

Helping strengthen the networks' hand in the coming year is the scheduling of extensive air time for the Olympics, as well as the political conventions and the presidential campaign.

Further accenting the positive, the group agrees it is unlikely we'll see a repetition of the turmoil and aggravation of 1976, when prices escalated because large amounts of commercial inventory were unavailable. With many more alternative ways to get tv exposure now possible—and with independents showing a great deal more skill in counterprograming—these agency media heads don't foresee a seriously damaging dislocation in the tv buying marketplace for 1984. But a cloud still remains on the supply-demand front in that network costs are expected to go up significantly. Estimates center on the 15% area—and in view of the tightness of budgets, there is noticeable concern that the networks and key stations in major markets might be unrealistically short-sighted as a result.

But despite pricing irritation, another positive point is seen for traditional broadcast tv in the year ahead: A marked improvement in programing stability, a point volunteered by all but one of our panel. Led in no small measure by NBC's continued commitment to better-quality programing, there's an expectation that the new season will be more predictable and steady, improving the buying atmosphere considerably over the churning seen in the advertising market in recent seasons.

But all is not sunny and upbeat on the tv front. There's a widespread concern among our panel not only about cost escalation, but also with a resurgence of clutter as a serious headache for planners and advertisers. With deregulation sweeping the industry and with the demise of the National Assn. of Broadcasters' Code, there's renewed interest in 15-second and other short length commercials.

Combined with the moves of networks and stations to schedule additional commercial time, there's a feeling that viewer irritation, inattention and "tune-out" will increase. Six of the seven media executives made comments about "zapping"—viewers using their remote control buttons to change channels or turn the set off if they get annoyed with commercial breaks. A recent Nielsen study minimizing the importance of tune-out, while a reassurance to some, doesn't ease a great deal of anxiety about deterioration in actual exposure and attentiveness.

To several of our experts—particularly Allen Banks of Dancer Fitzgerald Sample and Joseph Ostrow of Young & Rubicam—this intensifies the need for modifications in traditional audience research measurements. A majority of the panel note growing interest in the "people meter" concept, a device used in Britain that permits individual viewers to log in their presence before the tv set. Whether improved devices will permit more accurate and reliable measures of actual individual viewer availability or not, the pressure is clearly on established broadcast rating services to track actual viewing, says Gerald Moody.

> **Although our panel members are bullish about radio, their doubts about the medium include its instability and audience tracking problems.**

Also noted was strong growth in worthwhile syndication availabilities. Agencies and advertisers seem to be moving more actively into either the actual creation and financing of programing for placement on individual stations or in supporting a variety of ad hoc networks offering programs of their choice.

With the proliferation of choices in cable, pay, satellite and other electronic forms, the tv media market continues to be in flux. More experiments are noted with "crossover" programing—the adaptation of established consumer magazine material to selective cable audiences to custom-tailor new programing efforts. The accelerating moves of major media corporations into other forms—publishers into broadcasting and tv and radio interests into print—suggests much more activity in synergistic approaches.

Thus, 1984 shapes up as a particularly interesting year for tv, a category whipsawed by opposing forces.

Jay Schoenfeld sums up the crosscurrents for major national advertisers in this medium: "There doesn't seem to be a better alternative to network television—right now."

Radio

The panel members are bullish about radio as far as national advertising is concerned in 1984. Several point out that more of their major clients are using the medium to provide weight in field tests in such markets as Kansas City, San Diego, Phoenix and Albany, N.Y.

A more widespread reason for growing client interest in radio is not so much its limited role, but because it is an attractive corrective to media problems seen

(Continued on Page M-22)

---

tion losses.

These factors explain why magazine rate increases in 1983 are smaller than those of most other media and why rates will only rise 7% in 1984. This increase is still slightly ahead of the general inflation rate, but the difference is smaller than all other media.

Network tv

Because the number of network time slots is practically fixed while the demand has been rising, it is not surprising that the unit cost index for network tv reached 365 in 1982 when the consumer price index was only up to 289. It has been a seller's market for years, but audiences also have grown so that the high price levels are not unexpected. When audience growth is factored in, the index of cost per thousand for the networks is reduced to a level more in line with the consumer price index in 1982.

This year the tv networks are not realizing any audience growth, while inflation, as measured by the CPI, has moderated to just 3.3%. Annual network tv price increases finally have fallen below the double-digit levels of recent years,

Our panel members

This is the fifth year that Advertising Age Magazine has carried the results of discussions between Herbert Zeltner, chairman of the ADVERTISNG AGE Editorial Sounding Board, and a panel of media experts on the subject of the media outlook for the upcoming year.

This year's panel, made up of seven advertising agencies' top media executives, participated by means of extended one-on-one discussions with Mr. Zeltner. These are the members of the panel:

- **Allen Banks**, executive vp-media director, Dancer Fitzgerald Sample, New York (assisted by Betsy Frank, vp-associate research director).
- **Robert Geis**, senior vp-corporate media director, Wells, Rich, Greene, New York.
- **Kenneth Lane**, senior vp-media service division, Leo Burnett USA, Chicago.
- **Gerald Moody**, senior vp-director of marketing services, Ross Roy, Detroit.
- **Joseph Ostrow**, executive vp-director of communication services, Young & Rubicam, New York.
- **Marcella Rosen**, senior vp-media director, N W Ayer, New York.
- **Jay Schoenfeld**, senior vp-media director, Backer & Spielvogel, New York.

Costs

(Continued from Page M-11)

but this has resulted mainly because of a significant shift of some buying demand from the networks to nonnetwork syndicated programs.

Buyer resistance and the uncovering of additional alternatives is holding the network tv unit increase to approximately 8% for this year.

Next year, the national elections and the Olympics will cause network prices to rise more than they would in a year when these events are not present. Thus, despite buyer resistance and an expected inflation rate of about 5%, the cost of network tv time is likely to rise at the double-digit pace of 10% in 1984. But in the following years we expect a return to more moderate price increases.

Spot tv

Price trends in the spot or non-network sector of the tv medium are influenced by many of the same factors that effect network tv prices.

Double-digit annual price increases for spot tv announcements had been customary up to this year, when moderation returned. For 1983 as a whole, we expect the increase to average about 8%.

In 1984 the spot tv sector also will enjoy the extraordinary demand because of the elections and Olympics, and the moderation in spot rate growth also will be temporarily interrupted with a 10% price increase. In 1985 and for the rest of this decade, we expect to see spot price growth closer in line with the annual inflation rates ranging from 6% to 8%.

Radio

Less than 10% of all radio advertising dollars are spent on the regular national radio networks, but demand for network time has been accelerating, and a growing amount of affiliate time is being turned over to the networks. This expanding demand explains why the network radio cost increase of 12% this year was the highest for all media. We believe another relatively large increase of 9% could occur in 1984.

Cost trends for the nonnetwork or spot segment of radio are heavily influenced by local business conditions, and price indexes are lower than those for the networks.

Many local retailers suffered business losses during the 1982 recession and, although conditions have improved, they are still reluctant to expand their promotional activities. For these reasons, spot radio rate increases in 1982 and 1983 have been lower than most of the other mass media. In 1984 extra political advertising and expanded promotional activity by retailers are expected to prompt a surge in demand for radio time and an accompanying rate rise of about 9%.

Although the energy-related costs of doing business have leveled off, outdoor advertising has continued with annual double-digit rate increases.

Outdoor

When inflation exploded in the mid-1970s, the outdoor plant operators cited the greatly increased lighting, labor and fuel costs for their trucks as justification for very large rate increases. For nearly a decade, many plants have imposed double-digit price increases as standard operating procedure.

For the last few years many of the energy-related costs of doing business have leveled off, but many outdoor plants still had double digit rate rises in 1983.

A number of key users of the outdoor medium are reacting strongly, and it is unlikely that they will raise their budgets to accommodate such increases indefinitely. The price increases in the future should be more in line with those of the other media, although next year's election activity may hold the moderation off until 1985.

Direct mail

From 1967 to 1978, the cost index for this medium rose faster than all the others, and growth in the number of pieces of regular third class mail slowed perceptively. But in 1979 the U.S. Postal Service initiated discounts for presorting and the cost for using the mail as an advertising medium dropped, while those for other media continued to spiral upward and eventually exceed direct mail.

The index for direct mail continued to decline through 1981, but then a sharp increase in the rate structure occurred so that the index for 1982 rose nearly 18%. However, in 1983, new discounts caused a 4% decline in unit costs.

The Postal Service has had a surplus for two years, and no significant rate increases are anticipated until possibly late in 1984, when rising operating expenses may threaten a return to deficits. But even if this does occur, the higher discounts approved this year will probably offset any increase with the result that the net change will be zero for the year.

Summary

Price changes for each medium have differed, but they all generally correlate with inflation and the short-term shifts in media supply and demand.

The annual price rises for most major media have finally moved down into the single-digit range this year. But this is to be expected because this year's general inflation rate of about 4% is the lowest in more than a decade.

Next year the downward drift in the size of the price increases will be temporarily stalled because of the Olympics and the election campaigns. But the interruption will only be temporary. For the second half of this decade, annual inflation rates should be between 5% and 6%.

We expect advertising usage to outpace the economy, and above-average demand for time and space is likely to result in media price rises somewhat above the inflation rate. However, a growing number of new media options will arrive through new publications, the mail, more independent tv stations and cable tv. The expanded alternatives will help to keep annual media price growth within a point or two of inflation rates.

MEDIA OUTLOOK

'Launch fever' still lives in the magazine game

Look for a bundle of new publications to debut in 1984

By Stuart J. Elliott

The magazine industry was so busy bringing out new products this year that it's surprising no slick public relations campaign has yet surfaced touting "launch fever." And by all indications, next year will be more of the same.

What follows is a look back at the major magazine startups of 1983, with a look ahead at next year.

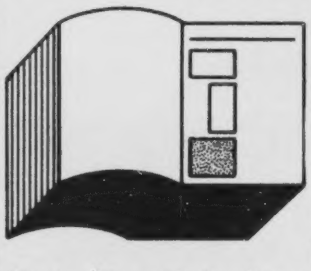
- *TV-Cable Week*: "It's the first thing that hits anyone's mind when you ask about the new magazines of '83," says Page Thompson, senior vp-media director, New York division, Needham, Harper & Steers. "Everyone looks at it and says, 'Oh, God.'"

The rise and fall of the Time Inc. weekly, which lasted five months and lost $47 million, "is a shame," says David Lehmkuhl, vp-group media director, N W Ayer, "but in a lot of ways, it's good. It shows that to launch a new magazine is a herculean chore, and that no matter how much money you put behind it, if the public doesn't want it, you aren't going to be a success. The buyer has the final say, not the agency, not the client, not even the guy who puts out the magazine. If you're not pleasing the reader, you're dead."

- *Vanity Fair*: "I happen to be one of those people who believe *Vanity Fair* is going to be successful," says Gladys Oshins, associate media director, Della Femina, Travisano & Partners.

The Conde Nast monthly made its debut—or return, if you consider its first incarnation—last March. "The recent changes made in editorial are a great improvement," says Ms. Oshins, referring to the new regime of editor-in-chief Leo Lerman, the replacement for the first editor-in-chief, Richard Locke, who was fired.

Mr. Lehmkuhl echoes her thoughts. "I think it's great and is going to be a huge success," he says, "because it is simply filling a void. The audience to whom it's aimed is an ideal audience for any quality goods." While he also agrees the magazine has improved, "it was not that bad at first," he contends. "I think the 'shaky start' was more critical than real. It was not really shaky, if you read the first three issues."



"To launch a new magazine is a herculean chore, and no matter how much money you put behind it, if the public doesn't want it, you aren't going to be a success."

But to Mr. Thompson, *Vanity Fair* "is a really tough call right now. To keep the audience coming back, you need a clearly defined position.

"Like it or not, the advertising community looks at publications and often visualizes the positioning. I think *Vanity Fair* is still searching for it. That kind of publication needs time—I'm not talking two years, I'm talking a long time."

- *House & Garden*: Another Conde Nast venture, technically not a launch because the magazine is a longtime title. With the January issue it was revamped into a more upscale publication to challenge Knapp Communications' *Architectural Digest*.

"Certainly the marketplace can be served by more than just *Architectural Digest*," says Ms. Oshins. "It looks like it's going to be successful." The new *House & Garden* "is a very classy-looking publication," says Mr. Thompson. "I think they really have something, though they have to fine-tune it."

William Bondlow, *House & Garden's* publisher, asks rhetorically, "Is there really room for another upscale magazine? The circulations of *House & Garden*, *Architectural Digest*, *Connoisseur* and *Town & Country* don't begin to approach the 5 million homes with $50,000-plus household income, a figure that's growing. So there *is* room for expansion."

As each issue of the remade *House & Garden* comes out, "the total package looks better and better," says Mr. Bondlow. "It's shaking out very, very well." While total ad pages this year won't equal the 965 sold in 1982, when the magazine was for more of a general audience, display pages will top 800, he says, compared with the 722 display pages carried in 1982.

- *M*: The Fairchild Publications monthly, meant to capture an audience of older, more affluent men, made its debut with an October issue. "I was a bit surprised it was as fashion-oriented as it is," says Ms. Oshins. "If it's tailored to the older man, and it continues to be fashion and so-

1. HOSPITALS

HOSPITALS is read by the people who manage hospitals and related health care facilities. In every U.S. hospital. Received twice a month by more than 82,500 decision makers – influential executives who can act on your advertising message.

2. MULTIs

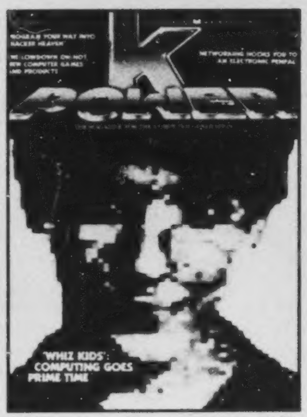
Written exclusively for corporate-level management in the complex multihospital system environment. MULTIs serves the area of greatest growth in the health care market as a freestanding magazine and as a quarterly HOSPITALS supplement. MULTIs reaches an additional 4,900 top multihospital system executives — the only magazine targeted to this prime audience.

PREMIER ISSUE

Vanity Fair: *Opinions about its future vary among agency people.*

HOUSE & GARDE

House & Garden: *Revamped into a more upscale publication in '83.*



K-Power: *Computer publication for young people due out in'84.*

Family Computing: *Part of the "tidal wave" of computer books.*

SPORTSTYLE
PREMIER ISSUE
PERSONAL TRAINERS

Sportstyle: *The Fairchild publication has called it quits.*

cially directed, they may have a problem. I'm not sure the older male audience is that interested in fashion; it's different among younger men."

While *M* needs to find "the right mailing list and subscribers," says Mr. Lehmkuhl, "they certainly have a package to take out and sell. It's neat and well done. If John Fairchild can't put out a fashion book, who the hell can? It could be another *Vogue*."

• *Sportstyle*: This monthly for enthusiasts of active sports, also from Fairchild, came out in March. The ad community seemed less than enthused with it, however, and there were changes in editorial and cuts in rate base and ad rates. "I don't really hold out too much hope," Ms. Oshins said in October. "I don't really know what they're trying to accomplish."

Mr. Lehmkuhl "liked where it was when it came out," he says, "and I am getting a lot less enthralled with it. I, in fact, subscribed to it, and now I regret paying the 12 bucks."

***One new entry, XL,* a general interest men's monthly, is available only in 7-Eleven stores. Another, *Sportstyle,* lasted less than one year before ceasing publication.**

Apparently other readers and advertisers had similar feelings. Fairchild recently announced that *Sportstyle* would cease publication after the December issue, a victim of the magazine wars after less than one year in the marketplace.

• *XL*: Introduced in August by Power Publishing, *XL* is a general interest men's monthly that, to paraphrase the late-night tv pitch, is not available at all stores. In fact, it's only on sale at Southland Corp. 7-Elevens. The goal is to replicate the success enjoyed by the women's service magazines sold mostly at supermarkets, *Family Circle* and *Woman's Day*. "It's a fascinating concept," says Mr. Thompson.

• Computer magazines: A veritable tidal wave of new titles is pouring from this category, including several Ziff-Davis Publications titles spun off from *PC*; David Bunnell's *PC World*; Scholastic's *Family Computing*, *Teaching & Computers* and *Electronic Learning*; *Personal Software*; *Enter* and *Microkids*.

"There are new ones every other day," says Mr. Thompson. "A lot of these people thought, 'This is a new area,' and they all jumped in. But it's going to shake out, like the computer industry."

This is "one category where there could really be survival of the fittest," says Mr. Lehmkuhl. "The ones with the most money can hang on and, if you can hang on, three-quarters will fall by the wayside."

One of those hoping on land among the other one-quarter is Eileen Markowitz, general manager of the Ziff-Davis consumer computers and electronics mag-

Three smart ways to reach the $137 billion health care market

Smart, because these are the magazines that decision makers read. Administrators. Directors. Professional department managers. Corporate officers. Executives at every level of hospital management, including the involved business professionals in the hospital board room.

Smart, because with HOSPITALS, MULTIs and TRUSTEE you reach the people with authority and accountability. The individuals with purchasing power for the thousands of products and services that hospitals use.

Smart, because your advertising has more impact surrounded by the influential editorial inside HOSPITALS, MULTIs and TRUSTEE. Where decision makers go for information they need to provide the highest quality patient care. Through twice-monthly coverage of current health care developments. Through business-oriented briefings. Through the fast-breaking news headlines for what's affecting them now. And through in-depth features that have earned awards and recognition for valuable insights they won't find anywhere else.

If your business is in the $137 billion health care market, call us now. It could be your smartest move yet.

Toll-free: 1-800-621-6902
(in Illinois call 1-312-951-1100)

HOSPITALS, TRUSTEE, MULTIs are published by American Hospital Publishing, Inc., a wholly owned subsidiary of the American Hospital Association.

3. TRUSTEE

TRUSTEE is the only publication that takes your advertising inside the hospital board room. Every month, it focuses on the interests of the hospitals' highest level decision makers – a sophisticated audience of nearly 47,000 working executives and professionals. These paid subscribers value TRUSTEE as the magazine that helps them with their tough responsibilities as hospital trustees.

Can *Inside Sports* make it this time around?

By Neesa Sweet

Has *Inside Sports* been born again? That's what the tag line on the ads for *Inside Sports* magazine is saying these days. The question is, can Norm Jacobs of Century Publishing of Evanston, Ill., succeed where the Washington Post Co. and Active Markets already have failed?

In 1979, the Post Co. started *Inside Sports* as a more in-depth publication than Time Inc.'s *Sports Illustrated.* Last year, publication ceased, and the national press was treated to the spectacle of more than 60 employes, originally hired by the Post Co. and Bellevue, Wash.-based Active Markets, refusing to leave a Manhattan bank unless their paychecks were cashed first.

That's hardly the stuff of glory. But, despite that, says Mr. Jacobs, when he looked at the magazine's history, what he actually found was a success story. It all depends, he suggests, on your interpretation of failure.

Inside Sports was launched by the Post Co. as a magazine that would look at sports as a culture. Using high-quality writers and graphics, it was to go beyond scores and game analysis to the life styles of the people involved.

In 1979, a total of 125,000 copies of a test issue were placed on newstands in the East with a cover price of $2, and 80% were sold. The magazine's rate base was set at 550,000 and in December, 1980, the Audit Bureau of Circulations audit placed circulation at 450,000. Ultimately, circulation grew to 541,000, but that number fell 9,000 short of the announced advertising rate base.

"For any other company, that would have been a success story," says Mr. Jacobs. "But *Newsweek* [which the Post Co. owns] felt that they could sell a million or more copies on the newsstand.

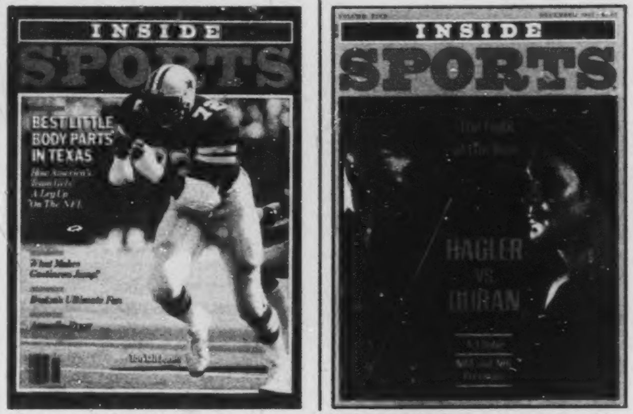
"The original goal was to compete directly with *Sports Illustrated*, and they geared up their entire operation to that size publication. They had to switch horses in midstream and start developing subscriptions."

The rate base failure was a big disappointment. And then the Washington Post Co. took a close look at *Inside Sports* and decided to fold the magazine or sell it.

At this point, Active Markets, which published an athletic magazine for high school students, decided to negotiate and buy the magazine.

It was backed by venture capital, and it published its first issue in January, 1982.

According to Mr. Jacobs, Active Markets took over the entire staff, which was still housed in *Newsweek* offices, and, in addition, it started building its own staff in Bellevue, Wash.



Century Publishing, the publisher of the reborn **Inside Sports,** *(right) has kept the appearance similar to when the magazine was part of the Washington Post Co. or Active Markets (left) stables.*

But the advertising community pulled back on its schedules, and the money Active Markets had budgeted suddenly wasn't enough.

By fall of 1982, it ran out of funds and had to shut down. That was when all those people went to the bank.

"When we learned the magazine had folded, we called Active Markets to see if we could buy their subscription files," says Mr. Jacobs. "At first we didn't hear from them. But in January, their Midwest manager called me. Apparently, they'd been running all over the country trying to sell the title, the magazine

and the company without much success."

So Mr. Jacobs took a look at the offer. And this, he says, led him to a discovery. "When I started to look at the property, what I really found was a success story," he notes.

"That seems strange in that the company was in the throes of bankruptcy, but I saw that *Inside Sports* had sold more copies on the newsstands than any other sports magazine in history, including *Sports Illustrated*, *Sport*, *Baseball Digest* or anything else. The articles were personal, in-depth and by major writers. Graphically, it was a fine publication. In addition, *Newsweek* had already invested some $25 million and had developed a brand name awareness. My decision to buy the company was influenced by this investment in quality."

Why does Mr. Jacobs think he can make a success of the venture when the other two companies couldn't?

"For one thing, *Newsweek* had very high sights and switched management in midstream. Any other publisher would have been delighted with the progress made in a year and a half," Mr. Jacobs says. Active Markets, he believes, was undercapitalized.

As for Century Publishing, *Inside Sports* fits right in to its plans.

"We publish seven national sports magazines—vertical magazines, each covering just one sport—with a [combined] paid circulation of 877,000," says Mr. Jacobs. "For the last several years, we've thought of starting a broad-based general interest sports magazine to complement our lineup."

Mr. Jacobs did not rehire the 60-plus people who had worked for the old *Inside Sports*. Instead he opened New York and Los Angeles sales offices and added a few support staff in Evanston. Free lancers, many who contributed to *Inside Sports* previously, are writing most of the magazine.

According to Mr. Jacobs, there is very little difference in the look and content of the new book.

"We purposely wanted to keep everything much the same," he says. "We did research, talked to newsstand distributors, retailers, editors, readers, advertising and marketing people and found that everyone loved the magazine. So the logo is the same, the departments are intact and the design is the same as before."

"We offered free ads to advertisers on a month-for-month basis," says Mr. Jacobs. "Any advertisers running ads in the four issues which are coming out in 1983 would have free space if they agreed to run the same space in 1984 on a paid basis. To participate in the program, advertisers had to agree to come in at least the first two issues.

"We utilize that plan to overcome the 'what makes you think you can do it when *Newsweek* couldn't do it?' objection. What we're saying is that you don't have to risk your money in determining whether we can do it or not. If we're not around in 1984, there won't be any liability."

Mr. Jacobs has guaranteed a conservative rate base of 200,000 and says he already has 30,000 subscribers in place. Advertisers for the October issue included Adidas, Nautilus, Northwestern Mutual Life Insurance, Mennen and J.C.Penney.

magazines launched this year, at least two due out next—"sounds pretty ambitious," he says, "but if it's crazy, it's smart crazy."

And what of next year? "There will always be more launches," says Ms. Oshins, "particularly in the special interest areas in the upper end of the scale, delivering smaller circulation bases. From where I sit, it seems the magazine industry, which had a good '83, will continue to have a good '84." NH&S, according to Mr. Thompson, is "looking at expanding a lot of our clients into magazines" next year.

These are among the publications scheduled to be launched in 1984:

- *Adam Family Computing*, from Scholastic, due in January or February, tied to Coleco's new Adam computer system.
- *Art & Antiques*, from Allison Publications, due in February, actually a relaunch of a trade magazine that will be reborn as an upscale general interest consumer publication.
- *Chocolatier*, from Haymarket Ltd., due in January, for chocolate lovers.
- *K-Power*, from Scholastic, due in January, for teens and preteens proficient in computer usage.
- *Home Computer Review*, from Viare Publishing, due in February, for prospective buyers of home computers.
- *New England Monthly*, from New England Monthly Inc., due in April, for residents and devotees of that region.
- *PC Home Computing*, from Ziff-Davis, due in January, another spinoff from *PC*, aimed at home users of the IBM Personal Computer.

KNIGHT-RIDDER NEWSPAPERS
THE BIG NEWS TODAY ISN'T JUST IN THE PAPER

It's about the paper

New Simmons' and Scarborough findings have increased your media planning opportunities.

Great news for advertisers.

Now there are two syndicated newspaper audience studies on the books (and in the computer) and they have changed the way you'll look at newspapers forever.

Simmons' study of the top 40 ADIs and Scarborough's study of the top 50 have proved that today's newspapers deliver an average of more than *2.7* readers per copy.

Monitored by ARF, these studies now provide local audience data—detailed reach and frequency, along with audience demographics—for more than 150 dailies and 113 Sunday newspapers; no other medium provides such complete information for so many local markets.

And more importantly, now you can evaluate newspapers against broadcast and magazines using *the same criteria*—great news for media decision-makers.

Unquestionably, newspaper planning has just entered an exciting new era. So, the next time you start to consider the most effective way to reach an advertising audience, we hope you will consider this: the printed word is powerful. And it now allows you to make a more precise media buy than ever before.

Call your Knight-Ridder sales representative to learn how newspapers can work best for you.

Why marketers like the sales promotion gambit

Its advantages often overshadow the attraction of advertising

By Don E. Schultz

Over the past few years, there has been increasing concern among advertising managers and agencies, and increasing glee among sales promotion managers and organizations, over the shift of funds from media advertising to sales promotion activities. Where 15 to 20 years ago advertising accounted for the lion's share of most national marketers' budgets, sales promotion now is commonly the dominant force. The graph below illustrates the share of advertising and sales promotion investment by U.S. marketers.

While much attention has been given to the shift, seemingly little has been done to discover why this change has occurred and even less to whether the trend is likely to continue. This reallocation of funds is an important issue for all marketers but particularly those who are or have been committed to investing the majority of their funds in traditional media advertising. By taking a look at what is driving the growth of sales promotion, perhaps it will give marketers some view of what is likely to happen.

In fact, it may well be that manufacturer-originated advertising has reached its high-water mark and will continue to decline as a percentage of total marketing investment for the rest of the century.

There appear to be some definite reasons marketers shifted from media advertising to sales promotion in the 1970s. There are some even more compelling reasons why that shift will probably continue. In fact, it may well be that manufacturer-originated media advertising has reached its high-water mark and will continue to decline as a percentage of total marketing investment for the rest of this century.

Why the shift in the 1970s

The shift in emphasis from advertising to sales promotion seems really to have started in the early to mid-1970s. The factors that contributed to this reallocation of funds were:

• **Increase in short-term marketing management view.** Management's approach to marketing almost dictated the shift in emphasis from media advertising to sales promotion during the past decade. From the time right after World War II up until the early 1980s, the American market grew almost constantly. Management became accustomed to that and assumed it would continue indefinitely. As a result, most management and particularly most marketing reward systems were predicated on continuing growth and prosperity.

Pay scales and promotions were based on sales volume increases not only for the coming year but even for the next quarter. Management developed an increasingly short-term view of success, and that view permeated the entire organization. In marketing, the product or brand manager's basic job became "make the figures and get promoted." Top management's view didn't seem to be that much different because everyone assumed a naturally expanding marketplace in the future.

With this short-term managerial view, sales promotion naturally became a favored technique in the marketing mix. Because the definition of sales promotion is a "short-term incentive to purchase," it filled all the fast-track manager's needs. It was easy to implement; it got immediate response, particularly with the trade, and most of all, it was measurable and visible when compared with traditional ad campaigns.

Where often advertising took time to build and the results weren't always clear, the product manager could quickly see the results of sales promotion and those results could be measured in cases, dollars, return on investment and the like. Sales promotion seems to have been ready-made for the manager with a short-range view. It was and still is being used in exactly that same way.

• **More parity products.** In the 1970s, fewer and fewer really new products came to market. Most established brands were at parity with competition. Product managers found it harder and harder to differentiate their brands in the marketplace. With no visible or inherent difference in the product to advertise, even the advertising began to look the same. The easy way for brand managers to differentiate their products was through sales promotion. The marketing credo became: "If you can't improve or differentiate the product, differentiate it with sales promotion."

For example, the promotional message to the consumer, as well as the trade, became "now our brand has a premium" or "look for our coupon" or "enter our sweepstakes." Sales promotion offered the volume-hungry product manager a quick and easy fix in the marketplace for a product that was just about the same as everyone else's. And many product managers took advantage of the techniques available, commonly shifting money from advertising to sales promotion. From there, the practice simply grew.

Where often advertising took time to build and the results weren't always clear, the results of sales promotions could be measured in cases, dollars, return on investment and the like.

• **Sales force pressure.** One of the outgrowths of management's short-term view was to put increased pressure on the sales force to move these parity products in greater volume, particularly to the trade. The sales force's natural response was to request greater and greater trade incentives, commonly in the form of price concessions. Because of almost constantly escalating product costs as a result of inflation, marketing management's answer was to manipulate the product price through sales promotion techniques, rather than through actual price list changes. These sales promotion programs took many forms: Off-invoice allowances; bill-backs; volume, stocking and display allowances; trade coupons, and rebates all became common tactics in the brand manager's promotional program.

• **Consumers and the economy.** One of the most obvious factors influencing the increased use of sales promotion, although not necessarily the most dominant, was the economic situation from the mid-1970s through today. As consumers became hard-pressed financially because of inflation, a stagnant economy and unemployment, they naturally sought out and used the various price-reducing sales promotion programs that were being offered by product manufacturers. These helped them cope economically. As marketers saw sales promotion give them big sales boosts, compared with the results they received from advertising, they naturally increased the use of sales promotion. Thus, the consumer sales promotion spiral grew.

Similar to the situation with the trade, the easiest way to get more sales promotion money was to take funds already allocated for advertising and simply shift them to sales promotion. The result? More money in consumer promotion and less money in consumer media advertising.

The future

Some of the four factors listed above will likely diminish in importance as decision points in the future. Already, inflation, particularly in the U.S., seems to be under control. There is also some evidence that marketing management, at least at the upper levels, may well have learned its lesson on "sales at any price." The era of parity products and particularly pressure from the sales force, however, is far from over. In addition, there are four other factors that will continue to encourage marketing management to invest a larger share of the over-all promotional budget in sales promotion in the next decade or so.

• **Increasing trade concentration.** The increasing concentration of the retail trade into a few dominant chains and buying groups will likely force manufacturers to increase their investment in sales promotion. There is little question that marketplace control has shifted from the manufacturer to the retailer. This is clearly evident in the consumer's shift in allegiance from national brands to private labels and generics over the past few years. It's becoming more obvious that the consumer puts most of his or her faith in Kroger or Safeway or Walgreens or Osco rather than in General Foods or General Mills or Pillsbury or other manufacturers of national brands. And local retailer control of the marketplace is only going to increase in the future.

The result of this marketplace power shift is already well known to many product manufacturers. In many local markets today, the retail trade now dictates to the manufacturer what he must provide in the way of price and promotion simply to get the product stocked in the retail store.

As the retailer's power increases, there will be additional pressure on the manufacturer to provide more trade deals, trade coupons, co-op advertising allowances and the like. While the retail trade recognizes the need for the manufacturer to presell and gain acceptance with the consumer through advertising, the retailer's primary concern is quite different. He's really interested in what he can do to differentiate himself from his local competition. That generally is accomplished through vari-

Don E. Schultz is associate professor of advertising at Northwestern University's Medill School of Journalism, Evanston, Ill.

Promotion

(Continued from Page M-52)

ious forms of pricing and selection differentiation along with local promotional activities. It is not accomplished simply through stocking nationally advertised brands.

Thus, the increased concentration and the increasing power of the retail trade in the marketplace will likely dictate that manufacturers continue to shift funds in their promotional budgets from advertising to sales promotion simply to make sure their brands are available at retail.

- **Increasing media diffusion.** Over the past 100 years or so, media have been used to aggregate markets. In the past five to seven years, however, the trend has been to use the media to segment markets.

The result has been a diffusion of the media's capabilities, and this is quite likely to continue. We're already seeing increased segmentation of audiences through specialized magazine and radio formats. Narrowcasting in tv and cable is just beginning.

As the audience continues to be split up, it will become more difficult for a major advertiser to make use of the mass media. In addition, as the media continue to segment the audience, it becomes more and more costly for manufacturers to reach all the various segments who might be prospects.

Therefore, it seems only natural that advertisers will start to develop more specialized and localized promotions that would provide a more cost-effective method of reaching their customers and prospects than through traditional media advertising. As media further segment audiences, the likelihood of increased emphasis on sales promotion will continue to grow.

- **More localized promotional planning.** As a direct result of trade concentration and media diffusion, more national advertisers are developing local or regional marketing plans. They are seeking to get closer and closer to their customers.

Additionally, marketers are confirming more and more that there are no truly national brands. Even those products and brands with the strongest consumer franchises have weak consumer segments and weak geographic markets.

As the demand for more localized marketing by the traditionally large national advertisers develops, the incentive to use sales promotion will increase.

Smaller, segmented target groups generally respond well to sales promotion activities, and developing an initial sales promotion program is certainly less expensive than developing an advertising program. The increasing power of the trade will also fuel this need for more localized marketing efforts, which also greatly favor sales promotion techniques over advertising.

With the retailer's inclination to favor sales promotion over manufacturer-initiated advertising, the information passed along to the manufacturer will most likely be biased toward sales promotion.

- **Measurement capabilities.** Because of the forms and techniques of sales promotion, the increasing use of Universal Product Codes and scanners to gather sales data at the retail level greatly favors measurement of sales promotion rather than advertising. Traditionally, management has favored those approaches that can be measured over those that cannot.

The factors that initiated the shift by national marketers from advertising to sales promotion are still there. Other factors almost mandate that the budget share devoted to sales promotion will increase.

Therefore, one of the major advantages sales promotion has and will have over media advertising in the future is simply that sales promotion can be measured easily and advertising can't or is much more difficult to do.

Another factor to help fuel sales promotion growth is that most scanner results will be in the hands of the retailer, not the manufacturer. Even today, many manufacturers find that retailers, because they have the data, know much more about the success of their various promotional efforts than they do, even though the manufacturer may have initiated the event. With the retailer's natural inclination to favor sales promotion over manufacturer-initiated media advertising, the information passed along to the manufacturer will most likely be biased toward sales promotion. And, as the retailer's influence on the manufacturer's promotional efforts increases, the pressure for sales promotion funds will likely increase too.

There are hazards, too

Based on the factors outlined above, the shift in manufacturer-originated marketing funds from media advertising to sales promotion will most likely continue in the future. This shift, however, raises some basic questions and hazards for marketing management, particularly as it relates to advertising investments.

- **Potential decline in brand franchise.** Advertising is generally considered to be the basic method of implanting ideas and attitudes about products in the minds of consumers. With a major shift in emphasis by a manufacturer to sales promotion, there is great danger that the consumer brand franchise may be lost. If the brand franchise declines, the growth of private label and generics seems inevitable.
- **You can overdo sales promotion.** If carried too far, sales promotion can actually hurt not only the brand, but the entire category as well. A prime example is the bar soap category. Several years ago, it appears, manufacturers of bar soap decided rather than competing in advertising, they would compete in sales promotion.

The prime tactic was the bonus pack, *i.e.*, banded packs of individual bars that offered either a free bar or a reduced price on multiple bar purchases. Eventually, almost all manufacturers entered the fray, each one trying to outdo the others. As a result, the price of almost all bar soaps was footballed with sales promotion over the years to the point that most consumers really didn't know the actual value of any brand.

When manufacturers attempted to return to what they considered to be regular pricing, sales dropped. Consumers had no basis for evaluation, plus they were confident that another promotion would come along soon. Now, one of the costs of doing business in the bar soap category is the sales promotion bonus pack. That's a marketing cost over which the manufacturer now has little control, and it's one that really doesn't provide him with additional sales, either.

- **Increased price competition.** The very nature of sales promotion (a short-term incentive to purchase offered by the manufacturer or seller) is always some sort of price incentive, *i.e.*, the price is reduced in cash or the product or the price is compromised through the offer of a premium, prize or the like. Therefore, when a manufacturer shifts emphasis from advertising to sales promotion, he is identifying his competitive arena as price and price alone. And we all know what can happen when there is unrestricted price competition in a category.

Thus, by its very nature, an increase in sales promotion activity by the manufacturer really determines the competitive arena for the brand. If that is the marketer's conscious decision, fine. Unfortunately, too many marketers seem to lose sight of exactly what a shift to increased sales promotion and away from advertising can mean to the future of the brand. Sales promotion means price competition, and long-term straight price competition generally means problems.

There is little question sales promotion will continue to grow as a larger and larger portion of the marketer's promotional investment. The factors that initiated the shift by national marketers from advertising to sales promotion are still there. Additionally, there are other factors that almost mandate that the share of the marketing budget devoted to sales promotion activities increase in the future. But that shift comes with an inherent risk for marketing management. Whatever your position in the marketing management hierarchy, you must have a clear picture of what is driving and will continue to drive sales promotion expenditures in the future. And you should be aware of the risks of the conversion of media advertising funds to sales promotion. The risks are too great to proceed without some guidance. ■

Potboiler

(Continued from Page M-5)

bidding. Avon prevailed. Ms. Singer and Evans split the money. And Mr. Katz was able to finance his campaign.

Mr. Katz had already worked out a strategy with Mr. Atkatz of Franklin Spier. "Yearning," Mr. Katz says, "is the common denominator. All of these books are about yearning. It bypasses literature completely. The impulse of where it works best is to tell another woman a story that moves her completely."

Roughly three-quarters of Evans' money would go toward print advertising. The balance would be spent on 60-second radio commercials to be aired in New York, Los Angeles and Chicago.

To herald the book, Mr. Atkatz prepared a two-page spread for *Publishers Weekly*. It appeared in October, four months before publication. It told of "the poor little rich girls whose tempestuous, often tortured lives are recycled into media fantasies of wealth, glamor and decadence."

In November, the 20 representatives gathered in New York. Mr. Katz decided to take the chance and show them copies of the book. Ads appeared in 13 newspapers and their book review supplements. The radio campaign began. Listeners were placed at the Plaza Hotel on the night of a debutante ball. They heard the limousines arrive and the names of the more celebrated young women whispered. And then they heard about the relationship of one woman whose "heart belongs to daddy." "The innuendo," says Mr. Katz, "was unmistakable." By February, 35,000 advance copies had been sold, and the book also had received some usable praise. In a review, *Cosmopolitan* wrote that the book "has a goodly share of lurid drama but basically this is a hot tub of fantasy and none the worse for it."

Mr. Katz acknowledges that Ms. Singer remains a "paperback" author. There is a difference, after all, in the author whose books can attract readers willing to pay $13.95 a copy and those whose books sell for $3.95. But that is something he is working to change.

In July, Avon released its paperback version of "The Debutantes," replete with a spicier cover—the faces of the four characters were replaced by a portrait of a willowy brunet whose face was used as the background for the bookstore stand. Avon spent more than $100,000 on its campaign. The bulk of that money went toward full-page ads in such magazines as *Cosmopolitan*, *Harper's Bazaar*, *New Woman*, *Interview* and *Vogue*, as well as *True Confessions*, *True Romance*, *True Experience* and *Modern Romance*.

But Mr. Katz was already looking beyond "The Debutantes." Although he thought it necessary to first produce a hardbound copy of the book to give it the sort of respectability not accorded to paperbacks, his sales did not go beyond the initial 35,000 copies. The money for this first book, he says, was going to be made in the reprinting sales.

Now, however, with the publication of Ms. Singer's second novel, the focus of the selling has changed to the author herself. In August, in the *Times* book review, Evans took a full-page ad to announce the arrival of "Star Dreams," by "a new superstar [who] rivals the dazzle of Danielle Steel and Judith Krantz."

Mr. Katz says that he wanted Mr. Atkatz to prepare an ad that read like a profile in *People* magazine. The result tells not only how Ms. Singer "burst onto the scene," but that reviewers had found in her work "minimum sentiment and maximum spice."

All of this did not sit well with Ms. Singer. "I was a little upset," she says. "I like to think of myself in the business end, but I don't know if this was right. But he insisted that my name was important to the book."

Still, Ms. Singer and her family have moved from their apartment to a 14-room home in the Bel Air section of Los Angeles. She is completing her third novel. The writing, she says, has come more quickly. And though now there are radio, tv and bookstore appearances that take her away from her work, she acknowledges they're all necessary.

Perhaps Mr. Katz will indeed produce in Ms. Singer the sort of writer whose name on the jacket can mean a best seller. And for her part, Ms. Singer is content to stay within her chosen genre. "I have no desire to write 'better' books," she says, casting her lot with one of the book business' closest approximations of a sure thing. ■

'S-T' sale

(Continued from Page 1)

outrageous, *New York Post*.

The generous use of promotions and advertising here would mirror Mr. Murdoch's moves in New York and Boston. In those cities he quickly pumped up circulation of the ailing newspapers he had purchased by using a host of such marketing methods.

Since Mr. Murdoch bought the *Boston Herald*, in early 1983, circulation has jumped from 228,228 to 317,612. The *Post's* numbers hover at 962,000 and both tabloids are running highly promoted "Wingo" numbers contests.

Some newspaper executives contend the introduction of such "Wingo" game tactics is a given for the *Sun-Times*, but they and major local advertisers are waiting to see if Mr. Murdoch will attempt to lure readers by using the sensationalist tabloid methods appearing in New York and San Antonio.

The *Post* and *San Antonio Express* and *News*, two other News America holdings, rely on bold headlines, human-interest stories and bathing beauties to attract readers.

"We don't know what he's going to do," commented a *Tribune* executive. "But he didn't spend $90 million to keep the status quo."

"Murdoch's got deep pockets," says one *Sun-Times* executive. "There was some concern that if Hoge got the paper he wouldn't have the money to back it up."

In a letter of intent to Field Enterprises owners Marshall and Frederick Field, Mr. Murdoch stated that News America did not "intend any substantial changes in the newspaper and we would strive to maintain the newspaper's high standards and reputation in the community."

Local advertisers have adopted a "wait and see" attitude. Dennis Bookshester, president-ceo of Carson Pirie Scott & Co.'s department store division, said his company hopes the *Sun-Times* will continue to go after the upscale audience.

"It should stay on the track that it has been on," said Mr. Bookshester. "That is the audience we want to talk to in the marketplace." At Marshall Field's, Marilyn Levey, vp-advertising, also said the retailer wanted Chicago to have two newspapers competing for the same higher income audience. Messrs. Murdoch and Hoge visited Philip Miller, chairman of Marshall Field's, the day the sale was announced.

The visit was "to assure us that no significant changes will be made," said Mr. Miller.

Claude Hinton, director of advertising for Walgreen's Drug Stores, Deerfield, Ill., said his company would look favorably on the *Sun-Times* if it separated itself more from the *Tribune's* readership and lessened reader duplication. Most of Walgreen's stores are located within the city limits.

Newspaper executives who have competed with Mr. Murdoch contend he will do just that by fostering a tabloid similar to his other properties.

"Its too much of a temptation for him to go to Chicago and not run the type of tabloid he is used to putting out," says Arthur Wible, exec vp-director of sales for the *New York Daily News*.

Others point to Texas. Up until this year the *San Antonio Express* had been developed into a newspaper targeted to the upscale audience. But Mr. Murdoch abandoned that market, which had not grown significantly in the recession, and came back with a racier tabloid that features shorter stories, splashier graphics and front-page headlines like "Woman Shot, Head Cut Off."

What may discourage that tack is that the *Sun-Times* is the first profitable domestic newspaper Mr. Murdoch has purchased. Management estimates the *Sun-Times* had net income of $4 million on $185 million in revenues for fiscal 1983 (ending Sept. 30).

John Reidy, an industry analyst with Drexel Burnham Lambert, said that he expects the *Sun-Times* would be infused with some of the "peppy" journalistic measures that were characteristic of other Murdoch papers, but he acknowledged that the *Sun-Times* might provide a unique opportunity for Mr. Murdoch in this country.

"Although his papers in New York and Boston have increased their circulations, they really haven't gotten the broad retail support yet that they need," said Mr. Reidy. "The *Sun-Times* already has a considerable base in that area, and if he can build on that, he might have a really good investment for himself."

Mr. Reidy predicted that, while Chicago readers might not get the wholesale *New York Post*-style treatment in the Murdoch-owned *Sun-Times*, some familiar characteristics are sure to show up.

"Murdoch has his own colorful way of presenting the news, and I expect some of that will pop up in the *Sun-Times*," Mr. Reidy said.

When Field Enterprises announced in April that it was liquidating and selling off its assets, co-owner Marshall Field said that Mr. Murdoch would not be a candidate to purchase the newspaper

In a somber mood during the press conference where Rupert Murdoch announced the purchase of the *Chicago Sun-Times* were owner Marshall Field V (left) and publisher James Hoge.

Mr. Hoge, the unsuccessful bidder, said last week he will remain as the newspaper's publisher for the time being.

Marshall and Frederick Field, half brothers, each of whom owns 50% of the company's voting stock, had decided to pursue their separate interests.

It is the combination of Mr. Murdoch's hefty bid and Frederick Field's desire to get the highest market price that gave Mr. Murdoch another U.S. property.

"It took control out of my hands," Marshall Field told reporters and then added, "I think he's going to give the *Tribune* hell."#

Dallas, Detroit papers show gains

By ROBERT REED

Many of the nation's largest daily newspapers suffered circulation declines over the past year, but in Dallas and Detroit, two of the country's sizzling competitive newspaper markets, readership gains were scored.

Also, Gannett Co.'s *USA Today* continues to cast a shadow over some areas as that national newspaper indeed emerges as a "second buy." It has dampened the statewide sales for newspapers in Chicago and Detroit, say newspaper executives.

Preliminary circulation figures filed by publishers with the Audit Bureau of Circulations indicate that most of the big-city dailies have been hurt. These numbers, as yet unaudited by the ABC, are for the six months that ended in September and are compared to those for the same period in 1982.

The Chicago-based Tribune Co.'s *New York Daily News* suffered the biggest loss. The newspaper saw weekday figures drop 148,597 from last year's 1,544,101. The rival all-day *New York Post* had a gain of 1,958 to 962,078.

The *News'* Sunday numbers also dropped, going from 1982's 1,986,151 to 1,860,989. The *Post* does not have a Sunday edition.

Arthur Wible, exec vp-director of sales for the *Daily News*, said the decline occurred because the company is in the midst of shifting its printing facilities from midtown Manhattan to three outlying areas. He said this limited printing capabilities.

In addition, deadlines have been moved up so the *News* is not always able to supply late sports scores and other breaking news. That is hurting newsstand sales, he said.

"We told advertisers that 1983 was going to be a difficult transition year and there is still a difficult period left to go through," said Mr. Wible. "But we are certain that our readership base has not been shaken."

In an attempt to soften the impact of the reported numbers drop, the *News* has taken out ads in trade journals, claiming that ad linage figures are up 2,185,000 lines for the first nine months of this year.

The *New York Times* continues to grow, as that newpaper saw total daily circulation increase 4,863 to 910,538. The *Times* reported that 684,333 of its total comes from in and around New York City.

The *Times* recently applied with the ABC to become a national newspaper (AA, July 4); Sunday circulation leaped to 1,523,113 from 1,498,873 mainly on the strength of its national distribution. Circulation for the *Wall Street Journal*, also a national newspaper, increased from 1,925,722 to 2,020,132.

Knight-Ridder's *Detroit Free Press* went up from 631,989 to 635,114 and on Sunday climbed from 771,083 to 788,203. The *Free Press* states the nearly 4,000 gain comes from within the suburban "retail trading zone"—a designation given to certain areas by retailers and publishers using ABC numbers. But the *Free Press'* statewide sales were hindered by *USA Today* because of its emergence as a supplemental buy to the various hometown papers, according to the company.

Meanwhile, the *Detroit News* also saw its numbers jump, going from 642,531 to 650,683. Sunday circulation was boosted from 1982's level of 843,580 to 858,870. The all-day *News* recently began morning home delivery and attributes its gains to that program.

The release of the circulation numbers touched off another slugfest in Dallas where, for the first time, the *Dallas Morning News* overtook the Times Mirror-owned *Dallas Times Herald* in the daily city zone.

In total circulation, the *News* outstripped its competitor with weekday gains of 18,391, moving to 335,670. On Sunday, it had gains of 27,619, putting it at 417,474. In contrast, the *Times Herald* reported a daily gain of 185, boosting it to 269,594.

In the Dallas county zone edition, the *Times Herald* maintained a lead on Sunday. But the *News* gained 5,445 daily in the city zone compared to the *Times Herald's* loss of 3,930 daily. On Sunday, the *News* gained 11,454 compared to the *Times Herald* gain of 435.

The *Times Herald* is taking the position that the best defense is offense, so the newspaper launched an attack on the *News'* ad theme, "Nobody beats the *Dallas Morning News* in the morning." In a multimedia campaign featuring actor Mason Adams (of "Lou Grant" fame) the *Times Herald* says, "The next time the other paper says they can't be beat in the morning, don't buy it."

Times Herald staffers were issued promotional t-shirts bearing the slogan: "My newspaper beats them in the morning and clobbers them in the afternoon."

Not so, says the *News*, which placed ads last week claiming boldly: "We own Dallas County." A *News* spokesman said they plan to step up the "Nobody beats" theme.

In Washington, the Washington Post saw its daily circulation drop 7,167 to 718,842. The Sunday *Post* jumped from 1982's 971,957 to 996,621.

The *Philadelphia Inquirer* lost 27,842 weekdays, declining to 533,176. The Sunday *Inquirer* also saw some slippage, from 1,031,321 to 994,966.

The *Chicago Sun-Times*, which was sold last week to press baron Rupert Murdoch, saw a decline of 12,445, to 639,134.

Most of the decline comes from the newspaper's primary market area within the city of Chicago, according to ABC figures. Sunday numbers dropped from 677,681 to 669,426.

Meanwhile, the weekday *Chicago Tribune* had a decline of 7,231 to 751,024. The Sunday *Tribune* jumped from 1,101,615 to 1,116,403.

Howard Hay, vp-circulation for the Tribune, attributed nearly 4,900 of the weekday circulation decline to the newspaper's drop in statewide sales. The combination of *USA Today* and the higher unemployment that has hit the smaller cities and towns surrounding the Chicago area have cut into sales.

"In many of those smaller cities we are the second buy, and *USA Today* has affected us in those county areas," said Mr. Hay.

In Denver, where the *Denver Post* and the *Rocky Mountain News* are thrashing it out, the numbers for both have declined. The *Post* reported a drop of 8,009 to 243,428. On Sundays the *Post* lost 9,644 as it dropped to 343,943.

Competing *Rocky Mountain News*, which saw price jumps from 15¢ to 25¢ during this reporting period, dropped 4,690 to 315,524. On Sundays the newspaper climbed from 345,770 to 355,992. *USA Today's* emergence in the Denver area also had an adverse effect, said William Fletcher, general manager of the *Rocky Mountain News*.#

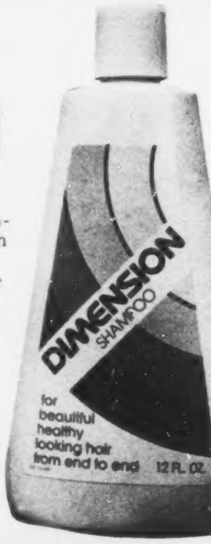
Lever Bros. on a roll

Dimension shampoo now heading national



By PAT SLOAN

New York—Lever Bros. is moving its Dimension shampoo into national distribution. When that process is complete sometime next year, the brand will be supported by an advertising and promotional budget that is expected to reach $60 million.

That would top the $50 million that Revlon has allotted for its new Hair's Daily Requirement haircare line (AA, Nov. 7).

Dimension's budget will include nearly $18 million in tv, sources say. Lever also is planning at least three freestanding inserts of 25¢-off and 30¢-off coupons in eastern newspapers in February, April and May.

Additionally, a direct-mail sampling program is expected to reach nearly 70% of all households.

Lever expects to capture 6% of the shampoo market by the end of 1984, no easy task in the already highly competitive and fragmented $1.3 billion category.

Although Lever will not confirm the rollout of Dimension, sales representatives for the company have announced the plans at several trade shows in the Northeast, where the shampoo now is being sold after earlier testing in the Midwest. Trade sources expect it

Sunlight next?

Outcleans the leading brand.

By NANCY GIGES

New York—Lever Bros. is taking a run at Procter & Gamble in another category—dishwashing products.

Lever appears to have a successful encore to Sunlight dishwashing liquid with Sunlight automatic dishwasher detergent. The new product rolled into 25% of the country this fall, primarily the West and Southwest, and is following the same upward sales path it took in test markets.

A few months after the dishwasher detergent appeared

More brews seen on tap at Anheuser

By ROBERT REED

Anheuser-Busch soon will begin selling another superpremium beer, next year will debut a new malt liquor and is looking at expanding its brand lineup further.

These moves are part of a revamped marketing strategy that will use new products as a means of protecting the No. 1 brewer's total market share within a flat beer-selling environment.

A-B will introduce the malt liquor, as yet unnamed, early next year in major cities throughout the country. It shortly will begin marketing Michelob Classic Dark at retail in parts of California.

That brew has been confined to on-premise accounts.

In addition, the St. Louis brewer is considering the marketing of an "ultra" superpremium brew and an economy-price "low-end" beer, industry sources said.

Also in the lower end, the company is stepping up assaults on the popular-price segment by expanding distribution of Busch and increasing the grass-roots selling efforts of Busch and Natural Light, a lower-price light beer (AA, Nov. 7).

These moves come at a time when the entire beer industry is anticipating flat or declining sales for the coming years. A-B has seen less sales growth for the flagship Budweiser (which sold a lofty 39 million bbls. last year), slippage of superpremium Michelob and a spotty performance from its latest—Budweiser Light.

A spokesman for A-B refused to confirm or deny the existence of the new brews, and would not comment on any other aspect of the marketing.

"Out of all the brewers, Anheuser is in the best position to come up with new products because it already has a viable premium main brand and can afford to branch out," says one brewing industry executive.

The emergence of a malt liquor marks the second go-round for A-B within that estimated 6 million bbl. subsegment. In 1971, the company entered the market with Budweiser Malt Liquor, but after a tepid two-year performance it was discontinued.

At that time, A-B said it was stopping production of Budweiser Malt because it had decided to con-

Both sides on syndication issue watch Congress

Net talks stall on revenue

By RICHARD L. GORDON

Washington—Hollywood offered to toss overboard its demand for a share of net tv advertising profits as private summit talks with the networks intensified last week. A third closed-door session is scheduled for Nov. 18 in New York.

But the producers continued to insist on some kind of revenue-sharing commitment from the nets before they agree to allow them to resume bargaining for program ownership rights.

They and their independent tv station allies also balked again at discussing anything more than a minor syndication role—limited to educational programs—for the networks.

If an agreement can be reached, it would be the basis for rewriting the 13-year-old Federal Communications Commission rules that bar the nets from acquiring ownership or syndication rights to programs they lease from independent producers.

Though the talks continue, both sides have been waiting to see if Congress will complete action on Hollywood-backed legislation that bars FCC changing the rules for six months.

The bill cleared the House last week, but the Senate may let it dangle until after the Christmas holidays.

The Assn. of National Advertisers and the American Assn. of Advertising Agencies are on record opposing any change in the FCC rules at this time because it could jeopardize the availability of top-quality off-net shows to independent tv stations.

Motion Picture Assn. of America president Jack Valenti, a key Hollywood bargainer in the current talks,

Chicle gets direct vs. competitors

By GAY JERVEY

Warner-Lambert's American Chicle division is blasting out on several fronts, including tough competitive advertising and new products entering the turf of a major rival.

Trident mints are getting their first new national campaign since the brand was reformulated last year.

Tv spots, which have been testing in limited markets, take direct, competitive aim at both Ragold Inc.'s Velamints and Life Savers' Breath Savers mints.

The feisty push for the Trident item comes at a time when American Chicle seems to be awakening from a lull in noteworthy new-product and marketing activity.

The company is test-marketing a line of stick gums that reportedly look more than a little like those of archrival Wm. Wrigley Jr. Co., the Chicago-based gum market leader; another line of gum sold in packages of nine thin sticks, and a Hall's nasal spray extension of its Hall's cough drops in early-market stages.

All of this should catch the attention not only of consumers but also of Wall Street, which has kept only one eye on Chicle, and a half-shut one at that.

Preferring the high-tech, high-profit world of W-L's pharmaceuticals, most analysts following the company view Chicle with only a little more interest than they did Entenmann's, which W-L sold to General Foods last year.

The sale was partly in response

Atari agency shifts reflect new chief

By BOB MARICH

Financially ailing Atari has moved to a sharper definition of its advertising agency assignments, which total an estimated $100 million in billings.

The big loser in the revamp is Needham, Harper & Steers/USA, New York, dropped completely by the Warner Communications unit after it had parlayed spot assignments to an apparent fast-track position this summer.

The winners are agencies with longtime links to Philip Morris Inc. New Atari chairman James Morgan is the former marketing chief for that company's domestic tobacco products.

NH&S created the "Nobody's hotter than Atari this summer" campaign that ran on cable (MTV: Music Television) and some spot tv as well as on radio. That corporate project amounted to about $1 million in billings for Needham.

NH&S recently was given the new AtariSoft line—videogame and computer software designed to run on systems of Atari competitors. That plum now goes to Wells, Rich, Greene, New York, which

AHP sued on Riopan ad claims

By NANCY GIGES

New York—American Home Products is once again the target of charges of misleading claims in comparative ads, this time for Riopan antacid.

William H. Rorer Inc., marketer of Maalox, the leading liquid antacid, has alleged in federal court here that AHP has increased its market share for Riopan by making false and misleading claims in advertising.

Rorer has hired the same law firm—Patterson, Belknap, Webb & Tyler—that Johnson & Johnson used in the 1970s to force AHP to stop making certain comparative claims against Tylenol in Anacin ads.

Rorer alleges that the ads convey the message that Riopan Plus is a more effective antacid than Maalox when, in fact, AHP, and its Ayerst subsidiary, which markets the brand, has only lab tests to support its claims and no tests involving humans.

While the commercials do specify that some of the claims are based on lab tests, the Rorer complaint states that consumers take away the message that the advertiser has proof that Riopan performed better in the stomachs of humans.

AHP has offered to modify its advertising to resolve the controversy and, in fact, made some changes since first Rorer objected about a year ago. But Rorer did not find those changes or those offered acceptable, according to documents supplied to the court.

Barbara Rose, Rorer director of marketing information, stated in an affidavit that AHP is gaining millions of dollars through false and deceptive advertising at the "direct expense of its competition and to the detriment of millions of Americans who use liquid antacid products." She said the market for liquid antacids is about $200 million and Maalox holds about 40% of the market, and that Riopan has grown to about 12%.

"Historically, these liquid antacids were considered by the medical profession to be 'serious medicine.' Advertising and promotion thus focused solely on health-care professionals," she said. "Having failed to make significant headway in promoting Riopan to the medical profession, Ayerst in late 1981 initiated a national campaign of tv ads."

She said Ayerst and the networks received protests

Sweeps: ABC wins first week

By DIANE MERMIGAS

ABC blasted its way into the November sweeps period by winning the first full week on the strength of its Wednesday, Saturday and Sunday series while closing the gap on CBS' season-to-date lead.

But the network competition was expected to get much tougher heading into the season's seventh week after more widespread stunting (preempting of regularly scheduled shows).

For the first eight days of the November ratings sweeps, ABC led the prime time ratings, although CBS was not far behind.

The week ended Nov. 6 marked ABC's second weekly win of the season since its World Series telecasts dominated prime time the week ended Oct. 16. CBS has won the remaining four weeks.

ABC claims it is the only network to show over-all prime time ratings improvement over the first six weeks of last season. ABC is up 1.3 points to a 17.6 ratings average this season. CBS has only a 0.1 point drop, and NBC's average rating for the season has dropped 1.3 points to an average 15.1.

What put ABC over the top in the sixth week was the strong Nov.

(Continued on Page 108)

Women checking out ‘Hotel’

By JAMES P. FORKAN

NEW YORK—Of the two new-for-fall ratings hits, CBS' "AfterMASH" has the broadest appeal, while ABC's "Hotel" owes its strength to women viewers.

ABC's "Hardcastle & McCormick" shapes up as the second-most-promising newcomer series, following "AfterMASH," in terms of male appeal. CBS' "Scarecrow & Mrs. King" emerges thus far as the only other contender among the new shows with female viewers.

Beyond those four shows, agency and advertiser executives perusing the latest fall demographic top 10 charts from A.C. Nielsen Co. covering Sept. 26 to Oct. 23 are finding slim pickings when it comes to new series.

"AfterMASH," clearly drawing from the popularity of "M*A*S*H," ranked among the top five in male and female viewers aged 18 to 34, 18 to 49, 25 to 54 and 12 to 17. Women 18 to 34 ranked that spinoff as No. 1.

"Hotel" benefited from having "Dynasty" as its lead-in. Both series ranked as big favorites among women 18 to 34, 18 to 49 and 50 and older. Income breakouts were not available yet.

"Hardcastle" was the only other fledgling series to make the top 10 in the three male breakouts from ages 18 through 54.

Women 18 to 34 put "Scarecrow & Mrs. King" into their top 10, as did women 25 to 54. In the youth market, "AfterMASH" was the sole freshman series in the top 10 for ages 12 to 17. Children two to 11 went not only for "Scarecrow" but also CBS' "Whiz Kids" and NBC's "Mr. Smith."

As for established programs, ABC's "Monday Night Football," despite some slippage in total homes (it was No. 26 in Nielsen homes data), is back near the top among males, right up there with "Hill Street Blues" among men 54 and younger and "60 Minutes" among men older than 50.

ABC's and NBC's Sunday movies were major lures for men 54 and younger, while NBC's Monday movies have become an attractive alternative to football among young women. NBC's Monday movie packet was No. 8 in the four-week homes data, compared with 18th for the NBC Sunday package and 21st for ABC's Sunday movies.

NBC's Sunday movie package contained "Women of San Quentin," "High School U.S.A." and the repeat theatrical "Bustin' Loose." Its Monday titles included "Policewoman Centerfold," "Adam" and "Sessions," all seen as female-appeal alternatives to ABC's Monday NFL telecasts.

ABC's Sunday movies included the made-for-tv "Making of a Male Model" and two new-to-network theatricals, "Heaven Can Wait" and "Nighthawks."

Nielsen's data through Dec. 19 showed NBC's "Hill Street Blues" had snared the top spot among men 18 to 49 and 25 to 54, with "Dynasty" on the top in those female demographics.

ABC's "Happy Days," tops among children a year earlier but pushed from this fall's top 10 by "The A Team," remains a hit at No. 9 with women 18 to 34.

"Magnum, P.I.," now more popular with males than females, has been surpassed in homes and demographic ratings by "Simon & Simon."

Looking at the top 10 in households for those same four weeks this fall, "AfterMASH," "Dynasty," "Dallas," "Simon & Simon" and "The A Team" led the way, with "Hotel," "Magnum," NBC's Monday movies, "60 Minutes" and "Scarecrow" rounding out the top 10.

CBS, traditionally seen as more appealing to older viewers than its rivals, has been the major proponent in recent years of the 25-to-54 demographic. That age group has stronger purchasing activity than the 18-to-49 bracket, David Poltrack, vp-tv research, CBS/Broadcast Group, has said.

He now is citing the Census Bureau's newly released 1980-81 consumer expenditure survey as the latest piece of evidence to support sponsor pursuit of the 25-to-54 bracket. The survey indicated that major spending power now is concentrated within the 35-to-54 segment, he said.#

From Apple to Wang, computers mean business

By Udayan Gupta

The universe of computers continues to be in a state of perpetual frenzy—one that repeats itself continuously. Each day brings a new player, a new product or a changing of the old order. Just four days in October can attest to that:

- **Tuesday, Oct. 4.** Wang Laboratories, Lowell, Mass., announces the launch of its Professional Image Computer, a personal computer that scans images and stores them in a computer memory. Wang also introduces software and other products aimed at making it easier for its computers to communicate with International Business Machines Corp. products.
- **Wednesday, Oct. 5.** Fortune Systems Corp., Belmont, Cal., announces that its board has forced Gary B. Friedman, its founder and president, to resign. Fortune, a marketer of computer systems for word processing and computer modeling of financial data, has been experiencing increased customer complaints about technical problems with its machines.
- **Thursday, Oct. 6.** Acorn Computers, a British manufacturer of microcomputers, introduces its BBC computer to the U.S. in Cambridge, Mass. Acorn's computer has had extraordinary success in the educational segment of the British market and will go head to head against the Apple and IBM Personal Computer.
- **Friday, Oct. 7.** Lotus Development Corp., San Francisco, marketers of the 1-2-3, one of the fastest selling software packages in the market today, announces that its initial public offering of stock had been immensely successful. It raised $46 million—$37 million for the company and $9 million for selling to shareholders. The 1-2-3 has the unique capability of combining spreadsheet, database and graphics in one program and can be used with the IBM PC as well as other 16-bit machines.

A new computer, a new player, an initial public offering and the ousting of an industry head—all regular occurrences these days in the computer era.

Indeed, the advent of the personal computer was expected to be the much needed boost that the computer industry required. And it was. Cashing in were companies such as Cupertino, Cal.-based Apple Computers and Tandy Corp. in Fort Worth, Tex., but with varying styles. Tandy, with its myriad Radio Shack outlets, flooded the country with its TRS-80 model, while Apple established a spanking new distribution network and dealer outlets.

Both were successful, so much so that they invited a host of new players, all eager to grab their share of the pie.

The mushrooming of companies in the industry was a phenomenon in itself. Earlier, such companies as International Business Machines Corp. and Digital Equipment Corp. had dominated the industry, commanding the capital as well as the manpower. However, with the spectacular success of entrepreneurs such as Apple's Steven P. Jobs and Atari's Nolan Bushnell, the control loosened. Many of the stars from the giants left to launch their own ventures, attracted by the potential of greater accomplishment and quicker riches.

"The entrepreneurs had nothing to lose," notes one industry observer, "If their companies succeeded, they would be at the top. If they failed, they could always return to the fold."

"It seems hardly a week goes by when one does not read in *Electronic News* that some top engineer from Hewlett-Packard, Digital Equipment, Intel, Tektronix or another top company has left to join a startup company," notes Michael Weisberg in Prudential-Bache's "High Tech Notes." "It is impossible to document, but we believe that the people drain is shifting the balance of power in product development. The advantage is moving away from big companies and toward small ones."

The other factor that shifted the balance toward the new company was the relative ease of raising capital. The growth of the venture capital environment and its unmasked sympathy toward high technology helped. Companies have been known to raise very large sums of money in the private market—often $15 million to $20 million—and even larger sums publicly.

Yet amidst all this growth, there remained a sense of confusion and bewilderment. Even though Apple reigned supreme, users and potential users had questions about the prolifera-

(Continued on Page M-10)

Programing in the human factors

By B.G. Yovovich

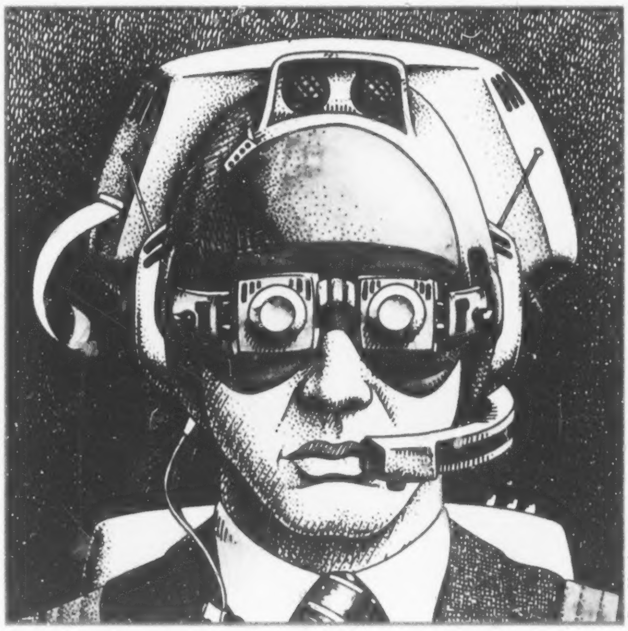
Technology is no longer enough. More and more, the success of a business computer system depends not so much on whether it has state-of-the-art technology as on how well it deals with the "human factors."

At their most mundane level, human considerations have led to such improvements as convenient detachable keyboards and video display terminals that minimize eyestrain and fatigue. The greater challenge, however, has been to tailor business systems to users' social and psychological needs, not just their physical ones.

"It's been said that there is a pretty good, though not perfect, match between the way a person's fingers work and the way that typewriters are designed," says John Gould, a researcher with International Business Machines Corp. "But there is not a very good match at all between the way people's heads work and what we show on the displays, and we think that is because we don't know enough about how people's heads work."

Several developments have prompted business computer manufacturers to become more interested in learning more about "how people's heads work," one of the most important being a change in the kinds of people using computers.

"The original users of computers were scientists and engineers who were intimately familiar with the internal workings of the machines," says Paul Green, a University of Michigan professor and chairman of the Human Factors Society's computer systems technical group.



Tom Herzberg

(The Human Factors Society is a Santa Monica, Cal.-based group that studies the impact of technology on the work environment.)

These scientists, says Mr. Green, "were very tolerant of messages that were obscure or of structures that didn't seem to make sense. Now that computers have been introduced into the office and other environments, they are being used by people who are not computer experts, who don't have the time, inclination or the expertise to delve into understanding the machines. They just want to get the job done, and the computer is a tool to do it."

And there is an economic shift as well.

"A couple of decades ago, an hour of computer time was very expensive compared to an hour of a person's time, and it was very inappropriate to worry about saving the person's time," says Mr. Gould. Since then, however, "computing has gotten cheaper and cheaper, especially when compared with the cost of people's time, and this has increased the incentives for making machines that enable individuals to perform more efficiently."

In some cases, business systems have substituted a "menu interface" for the traditional "command" approach to user-machine communication in which users needed to know specific command terms before they could use the computer.

The menu interface "gives users a number of choices, and when they make a choice, it takes them to the next step of the process," says Nancy Anderson, a University of Maryland professor and member of a National Academy of Sciences committee on human factors research. "The menu helps an inexperienced person."

The menu approach, however, has a drawback: "Sophisticated users often find menus very annoying," says Susan Dray, human factors specialist at Honeywell. Ms. Dray points out that the same individual is likely to change in sophistication and need for menus as he or she becomes more accustomed to working with the system.

As a result, a great deal of current research is directed at development of "adaptive interfaces" that can determine "what level of user it is dealing with and can adapt to the user's skills," says Ms. Anderson. She says most of the work so far has been on text-editing equipment and has sought to make it possible for experienced users to eliminate time-consuming features that they no longer need but might be useful to less experienced individuals.

One of the current hot areas of human factors research, for example, is the study of work patterns of middle managers and corporate executives.

"A major concern of ours for the last few years has been to figure out how to make tools that would be useful to this population of individuals that typically do not use computers in their work," says Mr. Gould of IBM. "These individuals have a lot of discretion in how they go about their work and what they use in their work and we knew that we would have to [develop products] that are easy to learn, easy to use and very useful. We knew that the only way to do that was to understand the user."

With this in mind, "we spent a great deal of time studying and trying to understand what these people do in the office," says Mr. Gould. He found a number of

Business

(Continued from Page M-9)

tion of systems and languages—none of which could address each other. There are those, such as Robert Rudkin of Dallas-based Diamond Shamrock, who believe that the absence of a dominant standard slowed down user acceptance and purchases.

It took the IBM Personal Computer to resolve the market's confusion. In one fell swoop it conquered the market for personal computers, vaulting to the leadership role occupied by Apple. "There is no doubt that IBM has come to dominate the microcomputer industry, and its dominance is growing," says Michele Preston, microcomputer analyst at New York's L.F. Rothschild, Unterberg, Towbin. "Hardware manufacturers must offer IBM compatibility." She points to Apple's Lisa, which recently adopted the software system used by IBM.

Similarly, a software company must also develop products that can be used on the IBM PC. Says Ms. Preston, "Knowing that a shakeout is under way, end users feel comfortable in committing to buy IBM personal computers long-term rather than products from a startup manufacturer of questionable staying power."

However, while the IBM PC rules supreme in the personal computer market, it still has a long way to go in capturing the business segment, says Carter Dunlap, technology analyst with San Francisco's Robertson, Colman & Stephens, investment banker. The needs of the business market will not be met by the 16-bit computer, but by the 32-bit and that is still at somewhat of a distance. "We're not into the real world of business computers as yet," says Mr. Dunlap. "But we're getting there."

Getting there may be at least another year away. Anindya Basu, a senior research associate with Link Resources, a New York-based consulting company, believes that the 32-bit supermicrocomputers should make their appearance by 1985.

This movement toward the business segment of the market should not be difficult to comprehend. A survey by *Dun's Business Month*, a publication of Dun & Bradstreet, found that 63% of companies with 500 or more employes now use microcomputers, most of which were purchased during the last year. By contrast, only 14.5% of the smaller companies—one to 19 employes—had taken the plunge. Still, the urge to get in on the craze is there. Of that smaller company group, 44% indicated that they planned to purchase a computer in the near future.

Link's Anindya Basu is quick to point out that the computer's potential market among small businesses is truly immense. Of the nation's 4.5 million small businesses, only 15% to 20% have computers in place, notes Mr. Basu. The remaining 80% to 85% forms a very alluring market.

The focus on business is going to accelerate even further, not merely because the market offers the greatest potential, but also because the rest of the computer industry is relatively stagnant.

The most devastated market is undoubtedly that of the home computer. The industry lost more than $500 million in the second quarter of this year, a performance that brought about mass personnel changes at Mattel Inc., Atari and a number of other companies. Texas Instruments, one of the biggest losers, held off on its TI 99/8, only to decide that it would not introduce it in 1983.

Coleco Industries, which had predicted that it would sell as many as 500,000 units of its Adam computer by Christmas, is still smoothing out the wrinkles.

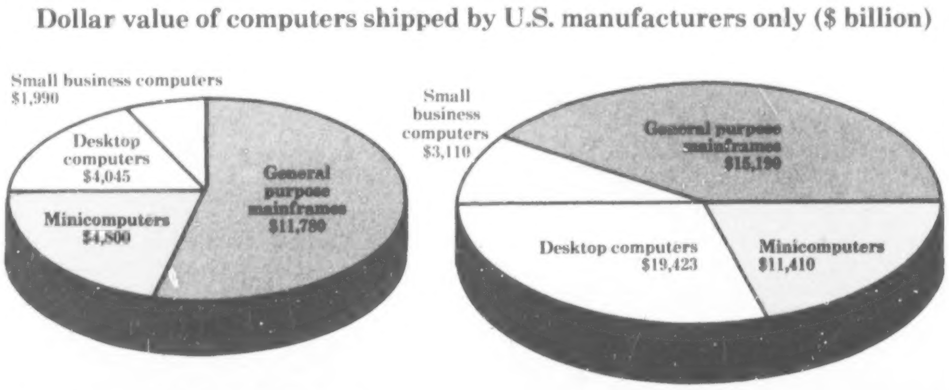
Indeed, the most excitement was around another IBM product, the Peanut, expected by the first week of November.

The higher end of the microcomputer market has not been without its problems either. Osborne, which stormed into the portable personal computer market, is in Chapter XI while Computer Devices, one of the portable computer pioneers, is also hemorrhaging.

There are others in trouble as well, Fortune Systems, which waltzed into the public view on the strength of a splashy $500 million public offering, now finds itself burdened with unsold inventory and a machine

Computer industry profile

Dollar value of computers shipped by U.S. manufacturers only ($ billion)



Source: International Data Corp., Framingham, Mass.

behavioral considerations that would have an impact on products and services aimed at this market. In particular, the research indicated that the managers were in their offices only half the time; spent less than one-third of their time reading or writing, and spent two-thirds of their time communicating with other people face-to-face or over the telephone.

In light of these findings, it became clear that, if a system were to be truly useful to managers, "it would have to have terminals that were available almost everywhere because they want to be able to communicate regardless of where they are," says Mr. Gould, "so we ended up using touch-tone phones as terminals rather than, for example, a cathode ray tube board.

"Because we learned that people most often want to communicate by voice and not by reading or writing, we developed a voice communication system, as opposed to a video terminal/electronic mail system."

According to Mr. Green at the University of Michigan, development processes of this sort are examples of the increasing use by computer companies of an "outside in" approach to product development.

"The outside-in approach starts by thinking about who the user will be and what the user will see," says Mr. Green. "This is very different from the inside-out approach in which someone figures out a way to have the computer run as fast as it can and execute things as quickly as possible—then, as an afterthought, tacks on some operator considerations.

Let's get down to BASICs

By Ed Zotti

Small computers have been multiplying like frenzied gerbils in recent years, and so have computer languages, the stuff from which all computer programs are built. Lest you sound ignorant next time the cocktail-hour conversation turns to the latest in software, here's a brief rundown on some of the most popular languages.

ALGOL. ALGOrithmic Language. Granddaddy of 'em all, ALGOL has been around for years and is said to be particularly well suited to number-type applications. Numerous "improvements" on this program have been written over the years, some of them of dubious utility. However, one computer jock referred to ALGOL 60 (written in 1960, in case you wonder) as "a great improvement on all its successors."

APL. A Programming Language. APL was designed for mathematical applications. It uses a lot of symbols that permit complex instructions to be economically expressed. Statements that might take dozens of lines in other languages can be squeezed into one in APL. Widely available on mainframe computers, it is seldom used on microcomputers.

BASIC. Beginners' All-purpose Symbolic Instructional Code. BASIC, originally developed at Dartmouth College for instructional purposes, has become the language most widely used on microcomputers.

COBOL. COmmon Business Oriented Language. Originally developed by the Department of Defense, COBOL is used around the world for business applications such as accounting, bookkeeping and inventory control.

In itself an admirably no-nonsense language, COBOL unfortunately inspired would-be computer comedians to come up with numerous lame puns as names for their own languages, such as CUBOL (Computer Usage Business Oriented Language) and the unbelievably tortured SNOBOL (StriNg Oriented symBOlic Language). These in turn gave rise to such gems as LISP (LISt Processing), PRONTO (PROgram for Numerical Tool Operation) and MUMPS (Multi-User Multi-Processing System).

FORTRAN. FORmula TRANslator. One of the earliest computer languages, FORTRAN was originally developed to make it easier to program complex scientific and engineering equations, although it's been used at one time or another for just about everything. Considered a bit old-fashioned by the avant-garde of the computer world, FORTRAN nonetheless has the advantage of being the closest thing the data processing biz has to a universal language.

Pascal. Named for Blaise Pascal, the famous French mathematician and philosopher. The comer among computer languages, Pascal may soon become more popular than BASIC. Powerful and versatile, it is said to be extremely easy to learn, although you'd never know it from looking at a program.

In a quote from a book on Pascal, it read: "FORTRAN has the rugged simplicity of a Model T Ford, and BASIC displays a childlike naivete, but Pascal exhibits the elegant simplicity that derives from economy and rightness of concept." Uh-huh.

PL/1. Programming Language 1 is a name universally regarded as an example of typical IBM arrogance, inasmuch as hundreds of languages preceded it. It must be admitted, however, that something called Programming Language 143 lacks something in the way of snappiness. PL/1 is IBM's attempt to combine the business capabilities of COBOL with the mathematical finesse of FORTRAN.

Ed Zotti is a Chicago-based free lance writer and a frequent contributor to Magazine.

---

plagued by technological problems. Victor Technologies and Vector Graphic, two of the early high fliers, are also weighted down by losses and market weakness.

In the minicomputer market, some of the spectacular early players—Prime Computer, Data General Corp. and Datapoint Corp.—are also severely tarnished. For them the market has shifted from new to replacement. The same is true of mainframes. Although there is some new activity, growth is relatively flat.

Clearly, amidst the dark skies and economic weakness, there is a shakeout going on. "The characteristics of survivors?" asks Mr. Dunlap of Robertson, Colman & Stephens. "They'll be the ones who have established a strong niche and who are defending it by a strong marketing effort."

"The future will belong to those companies that already have a foot in the door," says Eddie Brown of Brown Capital Management, an investment management company in Towson, Md. "Those computers that already have a large installed base will be the ones who sell the most."

Mr. Brown sees IBM, Digital Equipment, Hewlett-Packard, Wang Laboratories and Tandy among the survivors, though he is also enthusiastic about Solana Beach, Cal.-based Kaypro Corp. and Compaq Computer Corp. in Houston, two companies that manufacture IBM-compatible machines.

Mr. Dunlap emphasizes that there are too many companies in the computer environment. "It will boil down to five major companies and a few companies with a niche," he says. Among his candidates: IBM, American Telephone & Telegraph Co., Hewlett-Packard, Digital Equipment and—as niche players—Altos Computers and Convergent Technologies.

Link's Anindya Basu has a more elaborate list of survivors and champions. IBM, Hewlett-Packard and Digital Equipment are his logical choices, though he sees Tandy and Apple as probable major players.

New York-based Value Line, the investment advisory company, basically agrees with the analysts. IBM gets the highest rating for timeliness and safety. "Look for a 19% to 20% advance next year," advises Value Line about IBM. Other companies that Value Line is recommending include Apple and Wang. Value analyst Jerry Melin sees Digital Equipment, Convergent Technologies, Hewlett-Packard and Compaq doing well in the new environment.

IBM is on practically everyone's list. Indeed, there are those who argue that the company will set the tone for what will happen in the business computer environment. Carol Muratore of Prudential-Bache believes that one ripple effect of a "new IBM" will be to force its competitors to spend more on research, marketing and support in order to be able to compete effectively. Hewlett-Packard has already announced that it will permanently allocate a higher percentage of sales to marketing. Digital Equipment has made a similar announcement.

Not everyone believes, however, that IBM has the territory to itself. Tim Yankauer of New York-based Shearson/American Express says there is a lot for the others as well. "No reason to believe that IBM will have all the market.

There are others out there, others who are strong in their own right," says Mr. Yankauer, who believes that Burroughs Corp., Sperry Corp. and Digital Equipment will all be major players in this environment for some time to come.

Right now, there are no limits on the industry, says Mr. Yankauer. "There's still going to be a tremendous proliferation of new products."

And as for the companies in trouble—the analysts mentioned Fortune Systems, Victor Technologies and Computer Devices—if they can't resolve their assortment of technological and compatibility problems, they will be forced to go belly up. "The market will penalize those who make promises but cannot deliver," predicts Tim Yankauer.

Whichever way you cut it, the computer industry is entering a new business environment. The success of the various manufacturers will depend on how well each manages to meet user needs.

Software programs pick up power

But for newcomers, the crowded field's a tough nut to crack

By Betsy Gilbert

A couple of years ago it was noted that in the rapidly growing business computer market, software—not hardware—seemed to be driving the industry. That observation is now regarded as the gospel.

Manufacturers can do only so much with machinery, but the strides that can be made with the programs that drive the machinery are infinite. Word processing, database management, financial spread sheets, graphics—they're in big demand; they're providing solutions to long-standing business problems and they're increasingly the reason people are buying computers. Or, as a button sported by the editorial staff of *LIST* magazine says, "Putting hardware ahead of software is nowhere."

> **"Business software is an incredibly lucrative market, but it is so crowded that only a small percentage of these new companies will make it."**

That says it all, short and sweet, expressing the belief of thousands of software authors and publishers who are racing to enter the competition for business software dollars. It was recently estimated by Interactive TeleMarketing, a Lafayette, Cal., company specializing in software research and distribution, that more than 800 new programs are introduced to the marketplace each month. What the people behind those products are after is a portion of a $1 billion dollar worldwide software market, one that is expected to reach $7 billion within five years.

"Business software is an incredibly lucrative market, one that seems easy to get into, which is why we see so many products being introduced," said Bill Coggsmall, founder of the microcomputer software research company, Software Access International, which recently published a major study on the software market. "However, the market has become so crowded that only a small percentage of these new companies will make it, and an even smaller percentage will make it big."

The Software Access study is intended to define, explain and provide some structure to the highly fragmented microcomputer software industry. It describes the industry as being broad and shallow, one in which only a very few of the more than 5,000 software developers across the U.S. are capable of dominating.

"The names that keep cropping up in the industry, the leading contenders in the market, are the ones with plenty of money to spend promoting their products," said Mr. Coggsmall. "Those are the ones with the big sales. They might not be producing the most innovative packages and, in fact, many of them are actually republishers [companies that buy software, then repackage it and sell it under their names], but they have the name recognition."

Mr. Coggsmall is right on target. According to *ICP Software Business Review's* recent listing of the top 200 U.S. software product and service companies, the leaders (in sales) of this relatively new industry are the old guard of the computer arena. The top five are International Business Machines Corp., Control Data Corp. Digital Equipment Corp., Burroughs Corp. and NCR Corp. Not a small, hopeful startup company in the bunch.

However, the companies people in the computer industry are talking about aren't on this list. Companies like Lotus Development Corp., Context Management Systems, Software Publishing Corp. and Peachtree Software are the real innovators—the ones making people sit up and take notice.

"Think about this," suggested Stewart Alsop, editor of *Infoworld*, a microcomputer newsweekly that provides its readers with detailed software reviews in every issue. "The largest pure microcomputer software company in the world today—Microsoft—is only doing about $70 million in sales. The leaders are judged by sales figures. So it's going to be a long time before what many of us consider to be the innovators are included in the top 200 listings."

It's a tough nut to crack, this software business. With so many products competing for sales dollars, shelf space is becoming a scarce and valuable commodity. This is forcing publishers to seek alternatives to the more traditional marketing avenues—dealers and distributors—and look instead for more innovative methods of getting their products in the hands of computer users.

"The successful companies today realize that they need a big dose of marketing pizazz—they need to make a lot of noise," Bill Coggsmall explains, "and that's just what they're doing."

One of the ways they're accomplishing that feat is by hiring public relations and advertising experts to work inhouse to build an impressive company image. A second strategy involves plunking down lots of money in major advertising campaigns.

"Big promotional budgets are becoming more and more commonplace," says Brian Boyle, a marketing analyst specializing in software for Gnostic Concepts of Menlo Park, Cal. "The introduction of Lotus 1-2-3 is a prime example. Ads were everywhere, and the press blitz was just incredible."

That kind of activity takes a lot of money, invested on a continual basis. Bill Bastl, marketing director of Software Connections in Santa Clara, Cal., has been quoted as estimating that today's software company needs to add $100,000 every month to the promotional budget in order to maintain a steady level of recognition.

Where, one wonders, does all that money come from?

"Venture capital financing," maintains Mr. Alsop. "Software is *the* thing to invest in these days, and the venture capitalists are lining up to put money into software companies."

Mr. Alsop, who also edits a biweekly newsletter—"Softletter," which deals with trends and strategies in software publishing—observes a few companies still trying to "bootstrap" their efforts without outside financing, but he notes that it's getting increasingly difficult to do so.

"Today, you really need the money in order to get the name recognition that's so crucial to sales," he says. "It's a fact that the big companies with big budgets are getting a lion's share of attention, and that is simply the nature of the industry. This business is marketing driven, and in order to compete in it, you've got to have the promotional budget."

Some software houses are taking another approach. Rather than seeking out venture capital financing, they are allowing themselves to be acquired by larger companies. Recent examples making the news have been the acquisition of Minneapolis-based Open Systems by University Computing Corp. of Dallas, and that of Information Unlimited Software of Sausalito, Cal., by Computer Associates of Gerico, New York.

The acquisition of smaller, lesser-known companies by more established companies is apparently the coming thing, and why not? It's a simple, painless way of gaining recognition for the smaller company, recognition that might otherwise never come.

"I don't know that I'd call software acquisition a trend yet, but it is happening with greater regularity," said Louis Harm, editor of *ICP Software Business Review*. "A lot of vendors in order to offer their customer everything they need from one source are acquiring small software houses."

The problem Mr. Harm sees with acquisitions is in the maintenance of quality. While a company offering complete software lines might boast a large product portfolio, the collection is often a hodgepodge of packages that have no relation to one another.

"Software integration—that is, programs which were designed to work together—is lacking when any company begins building up a big software offering, based on acquisitions," Mr. Harm says. "Users today are becoming more sophisticated, and as a result, they demand more for their money. One of the things they want is integration, and vendors who can't offer that aren't going to make the sales."

The fact remains, however, that many of the companies on ICP's annual list of the top software companies are large corporations, which have gotten into the business by acquiring smaller organizations.

"That's the way of this industry," Mr. Harm says. "Pioneers create a market, then other companies—those with a lot of money—come in and take over the market.

"Many of the really innovative names in the software business aren't on our list because the revenues just aren't there," he says.

Gnostic Concepts' Mr. Boyle puts it pragmatically: "You can't patent an idea, and what's hot in business software today—the word processing, spread sheets and databases—are ideas that are ripe for imitation. The things that make a personal computer personal, that make an individual really need the system, are the programs that offer solutions to certain problems. Those are ideas and they're going to take a lot of different forms."

Mr. Boyle points out that those ideas are taking shape all over the U.S., not just in California's Silicon Valley, where much of microcomputer software got its start.

"Massachusetts is making a name as a major software area," he said. "The Bellevue, Wash., area is also getting attention, as are Dallas and parts of Minnesota. Basically, wherever you find a good university, you'll find software being produced in the same vicinity, because that's where the thinkers are."

If the university-based thinkers are producing today's innovative software, what are they working on for tomorrow?

"Programs that do more for the user in the simplest way possible," Mr. Boyle says, "programs that offer solutions to problems without requiring too much from the user."

Specifically, he points to T.K.! Solver from Software Arts in Wellesley, Mass., the company that produced, then sold, the now legendary VisiCalc spread sheet program. T.K.! Solver, the name of the software program, is a big evolutionary step up from VisiCalc, says Mr. Boyle.

"This program is so simple," he said. "The user keys in the facts and figures and T.K.! Solver literally does everything else: The computations, the problem solving, everything. If you think of the spread sheet as automating arithmetic, then think of this program as doing the same for algebra."

If T.K.! Solver follows the lead of some of the other popular programs today, odds are we'll be seeing a lot of it in the pages of the magazines we read and slipping in between segments of our favorite tv shows. It all comes back to marketing.

"Business professionals are the ones buying computers today," said Ted Leonsis, editor of *LIST*, a monthly software resource magazine published by Redgate Publishing Co. "They don't know much about technology, but they do know that their business problems have solutions in the world of the computer and specifically in the world of software. The software vendors have to reach these people and in order to do that, they've got to stand out in what has become a huge crowd. If they can't be innovative in their marketing approaches, forget it."

Hearst plans new Hispanic paper

By JENNIFER PENDLETON

Los Angeles—Hearst Corp. is developing a Spanish-language newspaper as a possible solution to its declining fortunes here.

The publisher of the troubled Los Angeles *Herald-Examiner* is calling the new vehicle *El Heraldo*, and is at present talking to major advertisers about the viability of the project.

While a final decision about whether it will start in May, as planned, hasn't been made, sources close to the project say they are optimistic Hearst will give it the go-ahead.

Hearst officials are meeting in Los Angeles today to discuss the issue.

If all goes according to plan, *El Heraldo* will be a broadsheet newspaper distributed free of charge in high-density Hispanic areas in eastern and central Los Angeles.

It will start with twice-a-month frequency, but within six months Hearst hopes to make it a weekly. Eventually, the company hopes to

Alberto split 30s suit may add ABC, NBC

By CRAIG REISS and NANCY MILLMAN

CBS was the only tv network named in Alberto-Culver Co.'s counter lawsuit last week over the use of split 30-second commercials, but ABC and NBC "technically could be named as defendants" if they don't reach an agreement with Alberto by Nov. 22, a company official said.

CBS and Alberto-Culver sued each other in complaints in which each claimed to be the champion of the "little guy" advertiser.

In a suit filed in federal court in New York on Nov. 15, CBS Inc. alleged that Alberto-Culver has used coercion to force the Big 3 tv networks to accept that company's 30-second commercials containing two nonintegrated product messages.

Also named as defendants in the CBS suit were ABC and NBC, since any judgment in the case would be meaningless unless it were binding on the other two tv networks.

On the following day, Alberto-Culver answered back with a class-action suit of its own against CBS, the National Assn. of Broadcasters (NAB) and 10 tv station groups that have refused to accept the Alberto split 30s.

The station groups involved are: Cox Communications; Hearst Corp.; King Broadcasting Co.; Knight-Ridder Broadcasting; Meredith Corp.; Metromedia Inc.; Post-Newsweek Stations; Scripps-Howard Broadcasting Co.; Storer Communications, and Westinghouse Broadcasting & Cable Co.

Taft Broadcasting and Capital Cities Communications were not cited in the suit since they recently agreed to accept the Alberto split 30s.

The issues in both cases center around the efforts this year by Al-

Almaden wine moves $10 million to BBDO

By RUTH STROUD

In a move that appears to have caught the wine industry by surprise, Almaden Vineyards has fired Dancer Fitzgerald Sample, its agency of 12 years, and named BBDO/West, San Francisco, to handle its $10 million-plus account.

The move, effective Jan. 1, came without a formal review, but close on the heels of a top-level shakeup at Almaden and amidst recent declines in shipments and market share at the winery.

In October, John McClelland, president and general manager of Almaden, resigned to join Geyser Peak Wineries, Geyserville, Cal., as chairman. Mr. McClelland, a 25-year veteran of the winery, held the top post for three years and, according to some sources, was pressured into resigning.

He was succeeded as general manager by Ron Siletto, who has been Almaden's vp-marketing since May. At that time he moved from a similar post at National Distillers & Chemical Corp., New York, Almaden's parent company.

In the marketing spot, Mr. Siletto replaced Greg Sivaslian, who left to enter the financial-services field.

In his new position, Mr. Siletto recruited Robert Mutschler, former marketing manager on National Distillers' Windsor Canadian, as his new director of marketing. The president title at Almaden will not be filled.

When he arrived in May, Mr. Siletto brought with him from National Distillers a more "firebrand" style of competitive marketing, which he began implementing almost immediately, hoping to halt Almaden's sliding sales.

■ Wine shipments had slipped from 30.4 million gals. to 28.8 million gals., or 5.3%, between 1981 and 1982, according to *Impact*, a wine and spirits newsletter. The winery had forfeited its status as the third-largest U.S. winery to Wine Spectrum, which grew 15.3%

last minute news

Chrysler may consolidate network tv buying

Detroit—Chrysler Corp. may consolidate network tv media buying with one of its two agencies. Now, Kenyon & Eckhardt buys for Chrysler-Plymouth and corporate, and BBDO, for Dodge. Agency revenues would be unaffected if Chrysler picks a single network agency of record. The idea is to improve Chrysler's influence with bigger buys.

Armour joins rush to low-cal frozen dinners

Phoenix—Armour Food Co. will introduce Classic Lite, a nine-item line of frozen dinners with less than 300 calories, in 12 to 15 selected markets in six to eight weeks, with ad spending at a $10 million rate. Tv and print ads will stress health and fitness, via Bozell & Jacobs, Dallas.

Avco Financial to B&B for $4 million account

Los Angeles—Avco Financial Services named Benton & Bowles to handle its $4 million account, replacing incumbent Cunningham, Root & Craig. Finalists included Eisaman, Johns & Laws and DDB, which withdrew after getting Coast Federal Savings' $4 million account, formerly at Ayer. DDB also withdrew from competing for American Savings' $8 million-to-$10 million account; Eisaman and WRG/West are in the running. WRG is said to be the frontrunner for American, formerly in-house.

Controversy lingers a 'day after'; Falwell vows ad boycott

By DIANE MERMIGAS

A boycott against sponsors of ABC's controversial drama "The Day After" is being planned, said Rev. Jerry Falwell.

Rev. Falwell, head of the Moral Majority, told Advertising Age it is likely his organization this week will launch a consumer boycott against all advertisers who bought time

Sponsors ask relief on ad time from nets

By GAY JERVEY
and CRAIG REISS

NEW YORK—Advertisers over the last month have asked the Big 3 tv networks to take back for resale fourth-quarter commercial time in all dayparts—time worth tens of millions of dollars.

While not all, or even most, of the requests for "relief"—as the practice is called—have been granted by the networks, the large amount of requests for resale are indicative of the abnormal state of the tv advertising marketplace through the rest of the year.

Experts have noted that the attempts by advertisers to pull back on their fourth-quarter tv commitments have less to do with the state of the national economy than with financial adjustments for yearend performance reports and marketing shifts among brands.

Advertisers are prohibited by Federal Trade Commission regulations from reselling commercial tv time. To gain relief, the advertiser must ask the tv network to serve as broker on the resale.

The networks do not have to resell the time, although generally the Big 3 will attempt to accommodate the advertiser if the resale will not adversely affect the tv marketplace.

Gillette Co. frequently has been mentioned as one advertiser that cut back drastically on its fourth-quarter network commitments.

However, Thomas Ryan, vp-advertising services, Gillette North America, said the requests for relief were business as usual for Gillette, that this quarter does not show more juggling activity than usual.

"Yes, we are making some adjustments, but I don't want it to get blown out of proportion," Mr. Ryan said. "All year, there is a constant flow of such adjustments."

He conceded that Gillette is "lightening up a little on sports.

"Everyday we're changing, adding, subtracting," Mr. Ryan said. "The fourth quarter tends to be a time when they have to make adjustments to profit goals."

As the requests build for network relief, the impact is being felt in the scatter and syndication mar-

Headline News: CNN hikes price

By MAURINE CHRISTOPHER

The cost of headline-style cable news is going up for some operators, now that there is only one product in the market.

The price for Turner Broadcasting System's CNN Headline News, when bought alone, has been raised from a monthly 5¢ to 20¢ per home for new clients as of today.

However, systems that carry all three Turner services, Cable News Network, WTBS and CNN Headline News, as a part of basic cable will continue to get CNN Headline News free as a bonus to CNN.

CNN, Turner's original in-depth news service, continues to be priced at 15¢ in a new card just mailed to multiple systems operators.

WTBS is marketed to cablecasters by a carrier, Satellite Syndicated Systems, for discounted fees ranging up to 10¢ a month per subscriber. TBS is not allowed to share in that revenue since the Federal Communications Commission does not permit an on-air tv station to satellite itself to cable.

Under the revised card, which will go into effect after the usual six-months notice, the maximum cost cap has been removed.

Traditionally, major cable operators pay basic cable program sup-

Dr Pepper gets ad muscle

By TOM BAYER

DALLAS—Dr Pepper Co. is expected to pump more of its resources into advertising and promotion when its takeover by Forstmann Little & Co. is completed in several months, just in time to impact what the company believes is a radically different 1984 campaign.

With spending next year already slated at $35 million-plus—up 25%—to go into a three-for-one bottler co-op ad plan (AA, Oct. 10), Dr Pepper will greatly increase its competitive marketing muscle.

Indications are the soft-drink marketer will hold onto but expand use of its charted 1984 course featuring the new ad theme, "Hold out for the out of the ordinary."

The takeover by Forstmann Little & Co. is precisely the arrangement Dr Pepper Co. had sought when it hired Lazard Freres & Co. last July. Termed a "friendly takeover," the arrangement calls for Forstmann Little & Co. to relieve Dr Pepper Co. of its debt —about $110 million—and to leave the company's management intact.

Altogether, the acquisition totals about $627 million, including $512.5 million for 23.5 million shares of Dr Pepper Co. stock at $22 a share, plus the debt refinancing.

Funds for the leveraged buyout will come from Forstmann Little's own pooled funds and from bank loans. According to *Pension & Investment Age*, Forst-

Sweeps: CBS wins on 'Chiefs'

By JAMES P. FORKAN

NEW YORK—Although ABC led for the first eight days of the November sweeps, CBS pulled ahead in both the 15-day Arbitron Ratings Co. and 14-day A.C. Nielsen Co. sweeps race, thanks to "Chiefs" and its regular hits.

In the Arbitron sweeps period (Nov. 2 to 16), CBS' 19.0 led ABC's 17.4 and NBC's 15.2. The Nielsen span (Nov. 3 to 16) showed CBS even further ahead, 19.5 to ABC's 17.2 and NBC's 15.1.

Besides the three-part "Chiefs," whose major sponsors included Volkswagen and Miller Brewing's Meister Brau, "60 Minutes" (with a season high 27.8 rating/41 share), "Dallas," "Simon & Simon," "Magnum, P.I." and newcomer "AfterMASH" contributed to CBS' fifth weekly victory.

In addition, "Knots Landing," which has nudged past NBC's "Hill Street Blues" to become the Thursday 10 p.m. (ET) leader this fall, contributed to the 19.6 rating average for the week ended Nov. 13, a victory that CBS executives dubbed "overwhelming" since the margin (3.3 points) was the widest thus far this fall.

NBC-TV, still the also-ran in the

Public shops hold their own in quarter

By CHRISTY MARSHALL

NEW YORK—The third quarter for publicly held advertising agencies was "pretty decent, with a few blips here and there," according to Fred Anschel, analyst with Dean Witter Reynolds. Looking ahead, he sees a good fourth as well.

Alan Gottesman, analyst with L.F. Rothschild Unterberg Towbin, agreed, adding, "On balance, the industry seems to be doing alright."

At the same time, BBDO announced it had filed with the Securities & Exchange Commission for a public offering of 650,000 shares of common stock—a little more than ten years after BBDO made its first public offering in October, 1973. Then the price was $9 a share; today, BBDO sells near $40.

The company predicts those newly issued shares will be available during the week of Nov. 21. The underwriter, Dean Witter Reynolds, has been granted a 97,500 share overallotment option. The proposed maximum aggregate offering price is $31.8 million. The money made from the offering is earmarked for possible acquisitions. According to the prospectus, "the company is in an advanced stage of negotiations with regard to the acquisition of one advertising agency and is holding discussions regarding the possible acquisition in 1984 of an advertising-related firm."

Source: Advertising Age

The agency in question turned out to be Waring & LaRosa.

In the third quarter, all publicly held agencies did fairly well in terms of net income. Foote, Cone & Belding led the way with net income soaring 90% to $3.65 million. The past three months have been extremely active for FCB. The agency acquired both NCK Organization and then North Castle Partners, mergers orchestrated around FCB's new client Colgate-Palmolive. Those mergers were not reflected in the third-quarter statement.

JWT Group was the second-greatest gainer in the quarter, with net income up 32% to $3.9 million. According to JWT chairman Don Johnston, the strong showing is attributable to three of the company's subsidiaries—J. Walter Thompson USA, Hill & Knowlton and Lord, Geller, Federico, Einstein—that "achieved record profits, while the financial position of the company over-all improved in a dramatic fashion."

Interpublic Group of Cos. came in third with a net income of $2.5 million, 22% more than in the same quarter of 1982. Also, in the third quarter, Interpublic completed the purchase of Dailey International, based in Los Angeles, whose figures were included in the third quarter. Interpublic's figures included the sale of Talent Center Payment Operation, a small U.S. subsidiary.

Grey Advertising's net was up 19%, to $1.6 million; BBDO was up 18% to $3 million, and Ogilvy & Mather's net increased 17.3%, to $2.8 million. Doyle Dane Bernbach, in its traditionally weakest quarter, watched its net loss narrow; "We narrowed the downness, so to speak," said Robert Pfundstein, DDB's chief financial officer

Mickelberry, an advertising agency holding company and parent of Cunningham & Walsh, Nadler & Larimer and Laurence, Charles & Free, posted a gain of 2%, with net income rising to $468,000.

BBDO enjoyed the strongest showing in terms of revenue gains in the third quarter of '83, with an increase of 25%, to $63.1 million. Grey was close behind with its revenues climbing 24%, to $40.9 million. Interpublic came in with the slightest revenue gain at 1.4%, to $136.9 million.

For the year to date, JWT Group was the biggest winner in net income and Doyle Dane Bernbach the clearest loser. After a tumultuous 1982, JWT has had a strong recovery in 1983, with its net income up 125% to $11 million.

Those earnings include "pretax provisions of $12.1 million as a result of the now-defunct tv program

Ramada to sell small units

PHOENIX—Ramada Inns announced plans to sell at least 30 smaller hotel properties over the next three years and use the proceeds to acquire larger existing hotels in major markets.

Ramada currently owns 70 hotels; an additional 524 are franchised.

Bank group passes out print ad awards

CHICAGO—The Bank Marketing Assn. recently recognized 39 ads as the "Best of Print" in its annual competition for financial advertising.

The winners, by media category, were:

- Newspaper (less than full page, b&w): First National Bank of Chicago; Dauphin Deposit Bank & Trust, Harrisburg, Pa.; Central Bank of the South, Birmingham, Ala.; Shawmut Bank, Boston; Seattle First National Bank; Maine Savings Bank, Portland, Me.; Empire of America, Buffalo, N.Y.
- Newspaper (less than full page, color): Central Bank of the South; Springfield Marine Bank, Springfield, Ill.
- Newspaper (full page, b&w): First National Bank of Chicago; Rainier National Bank, Seattle; Manufacturers Hanover Trust Co., New York; Mount Greenwood Bank, Mount Greenwood, Ill.
- Newspaper (full page, color): Marine Corp., Milwaukee; First National Bank, Stuart, Fla.
- Newspaper campaign (b&w): Bank of Delaware, Wilmington, Del.; First Interstate Bank, Reno; First Bank System, Minneapolis; Old National Bank, Seattle; Bank of New York; Empire of America; Mid-State Bank, Altoona, Pa.
- Newspaper campaign (color): First American Bank Corp., Kalamazoo, Mich.; First National Bank of Chicago.
- Consumer magazine (less than full page, b&w): Liberty State Bank, Troy, Mich.
- Consumer magazine (full page, b&w): Bank of Boston; First Security National Bank, Lexington, Ky.
- Consumer magazine (full page, color): First of America Bank Corp., Kalamazoo, Mich.; Crocker Bank, San Francisco.
- Consumer magazine (campaign, b&w): Old Kent Bank & Trust Co., Grand Rapids, Mich.; Harris Trust & Savings Bank, Chicago.
- Consumer magazine (campaign, color): MasterCard International, New York; Bank of America, San Francisco.
- Business or trade publication (less than full page, b&w): Equibank, Pittsburgh.
- Business or trade publication (full page, b&w): Chemical Bank, New York.
- Business or trade publication (full page, color): New Jersey Bank, West Patterson, N.J.
- Business or trade publication (campaign, b&w): First Interstate Bank, Los Angeles
- Business or trade publication (campaign, color): Bank of America; Sun Banks Inc., Orlando.
- Direct mail (order solicitation, single mailing): Lincoln First Bank, Rochester, N.Y.
- Direct mail (order solicitation, campaign): Fidelity Bank, Cherry Hill, N.J.
- Direct mail (lead inquiry, campaign): First Bank System, Minneapolis.
- Direct mail (traffic building): Colonial Bank, Montgomery, Ala.
- Transit (campaign): Pacific Western Bank, Milwaukie, Ore.
- Outdoor advertising (painted board): Omaha National Bank.
- Outdoor advertising (campaign): Bank of America, Champaign National Bank, Champaign, Ill.
- Printed material (single brochure): State Street Bank & Trust Co., Boston; Barnett Bank, Jacksonville, Fla.; Rainier National Bank.
- Printed material (campaign): South Carolina National Bank, Columbia, S.C.; Western Bank, Houston; Alaska National Bank of the North, Anchorage.
- Specialty advertising (less than $2.50): Bank of Lexington, Lexington, Ky.
- Specialty advertising ($2.50 to $10): Bank of A. Levy, Ventura, Cal.
- Specialty advertising (more than $10): Western Bank, Houston.
- Sales promotion (point of purchase): Lincoln First Bank.
- Sales promotion (internal): Liberty State Bank.#

When it comes to food sales, we're a Super Market.

booth
newspapers
booth

There are a lot of hearty appetites in Boothland. More than you might think.

In fact, we're the 11th largest food market in America, consuming over 3 billion dollars' worth of groceries every year. That means we gobble up places like Denver, Baltimore, Pittsburgh, Indianapolis and Anaheim.

And here's more food for thought. In population, our 44 contiguous counties make up America's 7th largest metro market. In passenger car registrations we're number 7. We rank 12th in apparel sales. And 8th in pharmaceuticals. Plus we have excellent figures in other markets, too.

So if you and your clients are hungry for greater sales, simply phone the Booth Super Market today at (313) 540-5600. Represented nationally by Newhouse Newspapers.

Booth. America's most overlooked market.

WHAT COLOR EYES DO YOU WANT?
INTRODUCING CUSTOM EYES. THE FIRST FASHION-TINTED SOFT CONTACT LENSES.
CustomEyes

Eyes have it

Custom Tint Laboratories, Raleigh, N.C., has received Food & Drug Administration approval to manufacture and market Custom Eyes polymacon soft contact lenses tinted in cosmetic colors. Shaller, Rubin & Winer, New York, is handling the advertising, which includes trade and consumer ads that ask, "What color eyes do you want?" Concept is that consumers can change eye color as easily as eye shadow. Meanwhile, Bausch & Lomb has begun marketing tinted lenses regionally through a manufacturing agreement with CTL.

Shop results

(Continued from Page 30)

syndication operation as well as losses in foreign exchange translation and recruitment activities," according to the company. While JWT suffered losses of $3.6 million from currency exchanges, it has gained $1.6 million in foreign exchange gains this year.

"Mr. Johnston noted that interest expense has declined substantially as the company reduced its borrowings in the quarter by $17 million, which included $5 million of long-term debt," stockholders were told.

DDB's net has dropped in the three quarters of 1983, to $3.7 million from $4.2 million in 1982. Mr. Pfundstein attributed that downturn to three factors: A shift of client spending to the fourth quarter; startup costs with its new office in Detroit, and international losses as a result of the strong dollar. However, for the year, Mr. Pfundstein expects the agency to be up.

In terms of revenues for the nine months, all of the publicly held shops posted gains with the greatest increase marked by Mickelberry, up 30% to $64.3 million. BBDO came in second with a 23% gain to $185.4 million.#

and seafood.

Following closely on the heels of doubling beef prices in 1979 is the drought of 1983, which almost certainly will translate into higher beef prices next year. This is bad news indeed for the beefeaters and especially for the beef sellers. Collins Foods' Sizzler Family steakhouses has added crab to its menu, and by doing so upgraded its prices and service from the budget floor to more of a family restaurant. The appearance of the appetizing crustacean generated favorable sales volume. Budget steakhouses like Sizzler—till now the domain of the hard-working, steak-eating, but recession-vulnerable blue collar audience—had to extend their base to attract a slightly more affluent clientele.

Strangely enough, the rise in beef prices adversely affected the higher-price steakhouses. According to Mr. Culp, the consumer draws a line on what he's willing to shell out for steak in a chain restaurant. The buck seems to psychologically stop at $8, while upper-end chain steakhouses were forced to enter the $10 plus range in order to stay in business.

There are, however, always exceptions. In this category it's Chart House, whose upper end steakhouses, all of which are architecturally and geographically unique, are said to be doing a nice bit of business, thank you.

The logical alternatives to beef are chicken and seafood. Both those segments posted gains this year, especially chicken. But here again, chains have had to adjust to consumer preference. Chicken not only continues to be offered by the likes of Kentucky Fried Chicken, Church's and Popeyes (*see story on Page M-23*), but it also crops up on the menus of hamburger chains and steakhouses as a nutritious alternative.

The major activity on the chicken scene has been in the moderately upscale arena. Wendy's Sisters Chicken & Biscuits is one of the recent contenders, while Mrs. Winner's Chicken & Biscuits is already a strong presence in the category with its Southeast-based operation.

These upscale chicken places offer a cozier, pleasant setting in which to consume one's slightly higher-price chicken. Menus are broader, and a down-home-on-the-farm fresh chicken image exudes. Some of the more moderately priced chains like Church's are said to be experiencing some difficulty only because they are located in inner city areas of high unemployment. In response, Church's reportedly increased its advertising budget and recently purchased another chicken chain, Ron's Krispy.

The seafood segment continues to fare well, but for the price-sensitive budget portion, it's been an upstream battle. Budget seafood places, whose mainstay has been deep batter-fried fish, now face a disapproving public concerned with its cholesterol count. The move toward baking and broiling, the

(Continued on Page M-14)

Where Americans run to eat

By John C. Maxwell Jr.

More and more Americans are joining those on the fast track, with many juggling school, careers and family (or various combinations). Consequently, quick, easy, convenient and nutritious meals are essential to their schedules. This trend, in conjunction with a growing number of women in the work force and a higher level of disposable income, should benefit the purchase meal industry considerably over the next several years.

A recent Gallup Poll indicates a significant rise in the number of meals eaten out during the first half of 1983; April set an alltime high with 42% of all meals eaten away from home during that month. Those families most likely to eat in fast-food restaurants are those with children (no matter the age of the children).

Industry sales of $33.6 billion in 1982, an 11.8% gain over 1981, exceeded our expectations. Much of the gain can be attributed to the turnaround of the economy, with volume making a better showing for the second half of 1982. This improvement has continued through the first half of 1983.

Families with nonworking mothers tend to eat at fast-food restaurants less frequently than families with working mothers—89% vs. 96%. With the exception of last year (a recessionary period), the percentage of the population eating away from home has risen year to year, as has the percentage of women in the labor force. Unit gain is now the key to revenue growth.

Heretofore, it was easy for companies to increase prices 10% to 12%, thereby keeping sales artifically high in some instances. Now that we have entered a period of disinflation, the key companies to keep an eye on are those that aim for unit growth while increasing or maintaining their customers.

The top 10 fast-food companies remained unchanged in rank in 1982 *vis-a-vis* 1981. Altogether, the 10 accounted for $17.5 billion in 1982, the equivalent of 52.2% of total industry sales of $33.6 billion. McDonald's, Burger King and Kentucky Fried Chicken each lost minor market share, while Wendy's recorded a slight gain. However, McDonald's remains No. 1, with almost a 19% industry share.

With 47.6% of total sales in 1982, the hamburger-oriented restaurant category of the fast-food industry continued as the No. 1 segment; steak and full-menu restaurants took second place with 21% of total industry sales; pizza and chicken-style restaurants commanded third and fourth places, respectively, with 10.7% and 9.8% of total industry sales. The Mexican food restaurant group registered the largest year-to-year percentage gain in terms of sales—up 22%, a growth trend we believe is continuing in 1983.

Advertising for the fast-food industry in 1982 increased 17.4% to $578.1 million, up from 1981's revised $492.3 million. McDonald's, the leading industry advertiser in 1982, spent $161.1 million, an 18% increase over 1981 expenditures. Burger King and Kentucky Fried Chicken's outlays for advertising totaled $65.1 and $42.6 million, respectively, and represented increases of 39.4% and 17.7%.

Menu expansion, a major characteristic of the industry in 1982, tended to run the gamut, ranging from the inclusion of breakfast items to the addition of salad bars in many major restaurants. Mexican food, always popular in the West and Southwest, continues to gain in popularity in other regions, especially in the Northeast. Several restaurants that previously specialized in other foods have added Mexican fare (such as tacos and enchiladas) to their menus, providing further evidence of an increased acceptance of Mexican food. This trend should persist for the near future.

As a whole, the purchase meal industry looks bright. Commodity prices in 1983 should remain stable. Coupled with a slower rate of inflation, this should enable fast-food industry sales to advance and simultaneously keep menu price increases to about 5% rather than an estimated 6% rise as forecast in December, 1982.

Many more consumers are realizing an increase in disposable personal income, and thus a more flexible life style, which we expect would benefit the full-menu restaurants particularly.

Down the road, fast-food sales are expected to increase 14.3% year to year in 1983. Some of this gain may be attributed to consumers returning to the fast-food market after having defected from it during the recession.

John C. Maxwell Jr. is senior vp at Lehman Bros. Kuhn Loeb Research in New York.

'Day' aftermath

Sponsors pull coup

By DIANE MERMIGAS

Ratings: Page 2

Advertisers who bought time in ABC-TV's controversial "The Day After"—some of it at cut rates—have not only emerged unscathed by what turned out to be an empty threat from the Moral Majority, but came away with record tv-movie exposure and some positive consumer reaction to boot.

Several of the advertisers on the show said that they had altered media plans or launched holiday campaigns early to take advantage of the exposure opportunity. And they weren't especially worried about consumer reaction or interest-group retaliation.

Results from two viewer polls would seem to indicate they gambled wisely. Surveys by Warner Amex's two-way Qube cable tv system and J. Walter Thompson USA both turned up similar findings: One-quarter of viewers in both polls said they felt more favorable toward advertisers who had participated in "The Day After." Slightly more than two-thirds said their opinions of the advertisers involved had not changed.

Jerry Falwell, leader of the conservative organization, last week backed off his earlier threat (AA, Nov. 21) to boycott the 16 companies who purchased the 25 30-second national spots on the Nov. 20 drama,

(Continued on Page 104)

ABC the big victor

By CRAIG REISS

Analysis

New York—The prime time broadcast of "The Day After" broke all the rules of network tv economics.

In the middle of a critical ratings sweeps period, ABC voluntarily—and strategically—eliminated advertising availabilities for itself and its affiliates for most of the evening.

It ran a program whose content environment shrank the available pool of advertisers, even though most advertisers that did not advertise in the show conceded "Day After" could be the best prime time ad buy ever on a cost-efficiency basis.

ABC drove down the price of ad time during a fourth quarter that already has many advertisers seeking relief from their upfront commitments, and scatter advertisers playing an effective cat-and-mouse game that has been driving prices even lower through January.

ABC sold final spots in "Day After" as low as $60,000 per 30 seconds, far below the going rate for a regular weekend movie and an incredible 60¢ cost-per-thousand rate in total audience.

But for every penny ABC lost in ad revenues, it was able to inflict a

GM breaks 'sale' drive

By RALPH GRAY

Detroit—General Motors drop-kicked the first model-1984 special sale deal through the automotive goalposts over the Thanksgiving holidays, catching the competition on the sidelines.

Ads broke over the long holiday weekend for a "buy now, pay later" financing plan on selected GM models.

Ford Motor Co., Chrysler Corp. and American Motors had no immediate rejoinder.

Chevrolet carried the ball with 45% of its tv buys, mainly in sports programing, on the "Big USA-1 yearend sales drive."

The Campbell-Ewald advertising for Chevrolet used gridiron settings as the background for such lines as "Take retail delivery now on selected models and make no monthly payments until March 1." Other offers include special option packages.

Chevrolet is trying to deliver 250,000 vehicles in the 40-day period. The financing plans via General Motors Acceptance

Vicks eyes bigger share in shampoos

By PAT SLOAN

Apparently striving to become the largest volume shampoo marketer, Richardson-Vicks has started testing another new entry, Crystal Spring.

Cable tv spots for the shampoos and companion conditioner began appearing in Eau Claire, Wis., this month, created by Jordan, Case & McGrath.

The launch comes amidst stepped-up new-product development activity in several divisions of the Wilton, Conn.-based company, and helps fulfill a long and often-stated goal of Richardson-Vicks to come out with more internally developed products.

Crystal Spring, billed as having a "special natural protein, the same kind hair is made of," is one of only a few shampoos, such as International Playtex's Jhirmack, to be packaged in a carton.

Some observers believe Richardson-Vicks has identified a "hole" in the $1.3 billion shampoo market where there are few nationally advertised brands positioned as "natural" being sold in traditional drug and food stores.

One such product, introduced earlier this year, is Nature's

Huhtamaki goes sweet on U.S. candy market

By JANET NEIMAN

CHICAGO—Huhtamaki Group, Finland's diversified consumer and industrial products marketer, has developed a sweet tooth for the U.S. confectionery industry.

In rapid succession, the Helsinki-based company purchased Leaf Confectionery, Beatrice Foods' confectionery operation and General Mills' Donruss bubble gum division, thrusting the company into the top 10 of U.S. confectionery companies.

Huhtamaki's new company, Leaf Inc., will combine all three operations along with its existing U.S. subsidiary, Finnfoods, based in Englewood Cliffs, N.J.

The acquisitions are expected to encourage advertising and marketing efforts for the newly acquired brands. Finnfoods said last week no decisions have been made regarding agency assignments for the brands, but several sources said no changes will be made.

Leslie Shankman, former president of Leaf Confectionery and now president of Leaf Inc., said last week he expects his division's ad spending to at least double —to about $2.5 million—in '84 as a result of the acquisition.

Huhtamaki is "very advertising and promotional-type-advertising-minded," he said. Referring to "fairly heavy advertising" that Huhtamaki Group has done on its products in Europe, he said he expects all the products under the new Leaf banner to receive stronger advertising in the future.

The existing U.S. division of Huhtamaki—Finnfoods—is handled by Lempert Co., Belleville, N.J. Agency president Phil Lempert agreed with Mr. Shankman, saying, "I think you'll find the new management is much more consumer-aggressive than Beatrice has been with the confections unit or than Leaf Confectionery was. They're very aggressive. . .they've done a superb job in Europe."

The three new units are expected to add about $290 million in annual sales to Huhtamaki Group's 1982 worldwide net sales of $367 million. The Helsinki company also markets canned and frozen foods, beverages, pharmaceuticals, foodservice disposables and industrial products.

The new Leaf will be divided into six separate operating divisions. Leaf confectionery division, Chicago, will market the Leaf line of candy and gum spe-

Hershey is going to adults with its new Take Five candy bar.

New Hershey bar takes aim at Mars

By GAY JERVEY

In a major confectionery introduction, Hershey Foods is launching Take Five, a light chocolate and peanut creme wafer designed for an older crowd.

The company, in a neck-and-neck race with candy competitor M&M/Mars, claims the eventual rollout will be "one of the biggest" in its history.

Hershey is moving Take Five into the Cleveland, Dallas, Denver and Houston markets. Advertising by Doyle Dane Bernbach is scheduled to break soon after the bar has settled onto retail shelves, probably within the next several weeks.

At the same time, the company is extending Reese's Pieces to an offshoot called Reese's Pieces Peanuts, a peanut center covered with

Braniff to unfurl its new colors

By TOM BAYER

DALLAS—Braniff International will reveal its new colors Nov. 29 in a christening ceremony where it is expected to introduce a plane with a white top, a blue belly and a red logo on the side.

The airline would not release the specific design.

Braniff confirmed that it is working tentatively with a list of 20 cities to be served by Braniff's 30 Boeing 727-200s with 85 departures daily from Dallas-Fort Worth Airport.

The markets are: Austin, Chicago, Denver, Houston, Kansas City, Las Vegas, Los Angeles, Miami, Midland/Odessa, Newark, New Orleans, New York, Oklahoma City, Orlando, St. Louis, San Antonio, San Francisco, Tulsa, Tampa and Washington.

In preparation for the March 1 startup, Braniff expects to begin its advertising via N W Ayer in early February.#

O&M wins Polaroid videocassettes

DDB on a losing streak

By CHRISTY MARSHALL

NEW YORK—November may well be remembered as one of Doyle Dane Bernbach's cruelest months.

In the past weeks, the agency lost International Business Machines (corporate tv), spending between $13 million and $19 million annually; Bulova Watch, worth $4 million, and, most recently, media buying for CBS Entertainment, about $1 million.

On top of that, longtime client Polaroid Corp. last week named Ogilvy & Mather to handle advertising for its domestic videocassette entry. Its campaign is slated to begin in the first quarter of 1984 with a multimillion-dollar budget.

DDB remains Polaroid's primary agency in the U.S. and overseas.

But despite the losses, "This is not a troubled time," contended Robert Pfundstein, chief financial officer of DDB. The agency's earnings will be up for the year, he said.

He noted that the agency continues to handle IBM Information Systems products, and increased budgets of that IBM unit will more than offset the loss of the corporate account, which moved to Lord, Geller, Federico, Einstein (AA, Nov. 14).

A DDB press release last week said the agency and Bulova had "mutually" terminated their relationship because of Bulova's "heavy concentration of trade advertising."

DDB said in the release that the account would be better serviced by a smaller agency.

However, Marvin Schneider, chairman of Bulova's new agency, Sherwood & Schneider, a subsidiary of Della Femina, Travisano & Partners, said his shop primarily was working on a consumer campaign with a

Sweeps:

'Day' blasts ABC to top

By DIANE MERMIGAS

Intense prebroadcast publicity and heightened debate over nuclear arms contributed to ABC's "The Day After" becoming the highest-rated made-for-tv movie ever, industry observers contend.

The controversial nuclear-attack drama, which averaged a 46 rating and 62 share of the national tv audience, also was the top-ranked movie ever in household delivery to air on network tv.

The movie was seen in 38.5 million households. An estimated [illegible] million people saw some portio[illegible] the film.

In over-all ratings of all types of movies (theatrical and made-for-tv), "Day After" was second only to the original network tv broadcast of "Gone With the Wind." That theatrical averaged a 47.6/65 over two nights on NBC in November, 1976.

ABC also reported that "The Day After" ranked as the 12th-highest rated of all tv program[illegible] ever aired on network tv, plac[illegible] behind such telecasts as [illegible] "M*A*S*H" finale earlier [illegible] year, the 1980 "Who shot [illegible] episode of "Dallas," the 1977 [illegible] of "Roots," "Gone With the Win[illegible]

Purina embraces low-price strategy

Alley Cat test entry follows Mainstay move

By JANET NEIMAN

Ralston Purina Co.'s new Alley Cat dry cat food, now testing in Phoenix and Tucson (AA, Oct. 17), will put the company's products into every price segment of the dry cat food category.

The product, which will represent Purina in the moderate-price segment of the branded, dry cat food market, is a response to what George Cook, director of marketing services for the St. Louis-based company, called the "rather dramatic" recent growth among generic and private label cat foods.

While Alley Cat is intended to combat that strength, it is being positioned as a "moderate price brand" (retailing at somewhere between premium-quality and private label dry cat food) rather than a "price brand competing directly against private label and generics," a Purina spokesman said.

"Purina already has a fairly major chunk of the cat food business now," said an executive at competitor Carnation Co., who sees Alley Cat as "another [Ralston] test of positioning to reach another segment of the market."

Selling Areas-Marketing Inc. figures, however, show sales of private label and generic cat foods peaked at 13.7% of the market in February, and have been declining since.

Drexel Burnham Lambert estimates Ralston's share of the $292 million dry cat food category as 62.1%, giving it the leading position in the market.

"Apparently they feel the need to have a price brand out there," one West Coast retailer said.

Purina already has eight other cat foods in national distribution: Cat Chow, Kitten Chow, Tender Vittles, Happy Cat, Special Dinners, Purina 100, Meow Mix and Thrive.

Ralston has acknowledged the similarity between the Alley Cat entry and the company's apparently successful repositioning of Mainstay dog food over the past two years.

Mainstay, introduced in 1979 with a pledge of $25 million in advertising and promotion support, was relaunched in early 1981 as an unadvertised, lower-end product.

The repositioning, a company spokeswoman explained last week, was intended to give retailers an alternative to private label and generics on which they can make a profit while offering consumers a product in whose name they have confidence.

Similarly, Ralston is saying that Alley Cat "provides another purchase opportunity for consumers," offering "Purina quality at a moderate price."

One retail source, who sees such a strategy at work in the Alley Cat entry, noted that Mainstay has moved up to "the middle of the category" in his marketing area, the West Coast. A Midwest buyer confirmed that Mainstay has "picked up" since the price drop.

SAMI reported a 22% increase in tonnage for Mainstay over the past year ended mid-September and a 9.4% increase in its dollar share, to about $19.7 million.

While Ralston has put no advertising behind Mainstay since its restaging, the brand has been heavily dealt in the trade, and has been promoted with couponed freestanding inserts and in-pack premiums, such as selected Rubbermaid dinnerware pieces and stationery.

Mr. Cook acknowledged that Mainstay has benefited from the repositioning.

Unlike Mainstay, however, Alley Cat has no name recognition and will be advertised via Gardner

We still rustle up longhorns in Houston.

Houston hopes to hook 'em via its longhorn tag. . .

Houston drilling for a renewed economic spirit

By TOM BAYER

Houston—A group of Houston citizens today will launch a campaign to encourage Houstonians to feel good about living in Houston, to focus on what's right about the city.

Following on the heels of a separate campaign begun to give Houston a slick, cosmopolitan image among the nation's convention planners and tourists, the "spirit" campaign begins a multimedia pep rally for a populace that needs cheering up in the face of economic adversity.

Houston is a boomtown gone bust, and the belief among many in the community is that although things will improve eventually, Houston never will be the same.

The trauma of the energy bust and peso devaluations has left its mark on all aspects of the economy, including advertising.

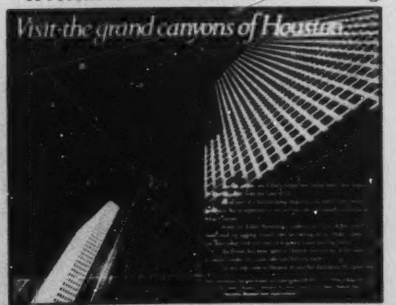
Clients have slashed or wiped out ad budgets, leaving agencies with little to do, little money to make. Larger agencies have tightened their belts and weathered the storm. Smaller agencies have been less fortunate.

A recent announcement from Cummings & Hester said the agency had ceased operations, a casualty of client cutbacks and heavy financial losses from a number of oil and gas industry-related clients.

But a new Houston may be emerging from the rubble of the depressed energy industry, for which it had become the capital and was riding tall in the saddle.

Just two years ago,

(Continued on Page 74)



Visit the grand canyons of Houston.

. . .**Another** ad pitches its grand canyons.

O'Brasky takes over at 'Vanity'

By STUART EMMRICH

New York—Conde Nast ousted Joseph Corr Jr. as publisher of *Vanity Fair* last week and named *New York* associate publisher David O'Brasky—a veteran of the rough-and-tumble world of magazine ad sales—to take his place.

The move was cited by several people in the advertising community as a sign that Conde Nast has realized it can't sell *Vanity Fair* on its tony image alone.

"That magazine—like all magazines—needs a huckster behind it," said one media buyer at a New York ad agency. "And O'Brasky is a huckster."

Few people expressed surprise that Conde Nast finally had decided to replace Mr. Corr as publisher of the magazine. Several

The 'battle of the burgers' one year later

Source: SRI Research Center Inc., Lincoln, Neb.

Burgers burn in memory

By SCOTT HUME

adWatch

Fast-food's Battle of the Burgers is a year old and showing no sign of abating.

Since Burger King Corp. in September, 1982, fired the first salvo by proclaiming its Whopper sandwich the winner over McDonald's Big Mac and Wendy's Single in taste tests, the fast-food giants have engaged in a nonstop tug-of-war for consumers' attention.

With fast-food chains' heavy reliance on impulse purchases, top-of-mind advertising awareness is particularly vital.

As measured by Advertising Age's exclusive adWatch survey, increases in awareness have alternated between Burger King and McDonald's with the swiftness of a good tennis volley. Awareness of Burger King's advertising rises one month, then falls as McDonald's picks up.

The ball is now back in McDonald's court.

Last month, 26.3% of respondents named Burger King when asked for the first fast-food advertising that came to mind.

That was an increase of 8.6 percentage points over September and Burger King's third-largest, one-month gain since the battle began.

McDonald's has maintained its first-place status since adWatch was inaugurated in April, 1982, although last month it slipped 2.4 points to a 42.6% share

(Continued on Page 80)

Cigaret sales in downspin

By JOHN C. MAXWELL JR.

It appears to us that cigaret industry totals for 1983 will come in a bit lower than anticipated. We currently are looking for 590 billion to 597 billion units at yearend, against 624 billion in 1982.

The higher number in our 1983 range presumes yearend loading. Basically, we are predicting a 5% to 6% drop in units.

The snapback in consumption does not seem to be as buoyant as we had hoped. At this time, consumption appears to be down at least 4% at an annual rate. This leads us to believe that next year's snapback will not be all that large, with totals reaching 600 billion to 605 billion units at best, which might even turn out to be high.

The primary adverse effect has been the doubling of the federal excise tax. We believe the industry also has been hurt by aggressive tax increases in more than 12 states this year, and that number may be equaled in calendar 1984.

We also believe that health concerns increasingly are affecting smoking habits; this could be compounded, depending on what sort of labeling bill comes out of Congress.

The bottom line to all of this is that we may have seen the all time high in cigaret consumption, and after 1984's rebound we may find 1985 and beyond with lower numbers. Therefore, we consider the industry even more of a market-share game than in the past.

As noted in the attached tables, Philip Morris USA has bypassed R.J. Reynolds Tobacco Co. by a considerable margin in market shares. Also, Lorillard passed American Tobacco and moved into fourth position.

However, neither Reynolds nor Brown & Williamson put in final price increases in January, 1983, which meant substantial inventory liquidation in the field on the part of both companies in the first quarter. This indicates that these two companies' market shares have been understated in 1983.

As far as 1983 goes, three companies had absolute unit volume gains. Philip Morris was up 0.3%, Lorillard up 1.5% and Liggett & Myers Tobacco Co. up 51%. In the latter case, generics were the entire reason, and it appears generics now are running at an annual rate of 3% to 3.5% market share.

It should be pointed out that generic brands sell for at least $2 a carton less than the major advertised brands. We believe this may help to put a cap on further price increases by the industry, at least in the near future.

We point out again that the government freeze of tobacco leaf prices, the winding down of the allotment situation (which terminates in 1987) and new cigaret-making machinery that will double manufacturing capacity over the next couple of years should help to reduce industry costs.

The companies have been realistic about their outlook for the industry, and production schedules at the major companies (such as Reynolds, Philip Morris and American Tobacco) reflect layoffs of considerable numbers of workers. Unless the industry shows some rebound, we expect further cutting.

The name of the game will be to continue to make sure that costs stay under control. In a deflationary economy, it is very difficult to raise prices. We may see a return to pricing only once every 12 to 18 months, as was prevalent before the recent inflationary period.

Marlboro cigarets continue to do well. One out of five cigarets smoked in the U.S. is a Marlboro.

Philip Morris' new Players appears to have approached a 1% share, which is excellent for a fresh entry. While Reynolds' Century shows only a 0.3% market share for this year, note that it is distributed in only two-thirds of the country and is running at a rate of 0.7% to 0.8% share wherever it is sold. It is too early to make estimates on Brown & Williamson's Richland 25.

The fastest-growing cigaret in the industry is Lorillard's Newport, up 9.7%, bringing it into 11th position. It missed the top 10 this year only because of the reintegration of the Golden Lights category into the Kent family of brands, which gave Kent a higher share.

As we pointed out in this report a year ago, low tar appears to have topped out. In our tables, you can see a drop from a 58.8% share in 1982 to an estimated 53.2% in 1983.

It also appears that the companies gradually are moving their tar content back up by several milligrams. This is exactly what happened in Germany. Obviously a cigaret with some tar in it tastes better than those with none.#

agency people

Kemp to UniWorld exec vp

NEW YORK—Herb Kemp has been named exec vp-director of account services of UniWorld Group, a black-owned ad agency here. Mr. Kemp formerly was vp-management supervisor at J. Walter Thompson USA. He succeeds Melvin Fallis, who left late last month to start his own business in Atlanta.

Other people moving:

Robert Michaels to exec vp, Cadwell Davis Partners, New York, from senior vp-management supervisor, Laurence, Charles & Free.

Joyce Kayhart, management supervisor, AC&R Advertising, New York, to senior vp.

Tom Rosenwald to senior vp-pharmaceuticals, M.E.D. Communications, Hopelawn, N.J., from vp-account supervisor. Also, **Norbert Lempert** to vp-account supervisor, a new post, from a similar post, Robert A. Becker Inc., and **Norman Goldberg** to vp-marketing, a new post, from director-market research.

William Curreri to senior vp-group director, client services, Medicus Intercon, New York, from senior vp-group supervisor. Also, **Nicholas Maiale** to representative director in Japan from group director of client services, New York, succeeding **Ralph Muolo**, who becomes deputy manager, Italy, and **Margaret Borchers** to account supervisor from account exec.

Joseph Viverito to senior vp-creative director, Kane, Bortree & Associates, New York, from vp-associate creative director, D'Arcy-MacManus & Masius, New York.

Barbara Carnegie to vp-creative director, Collaborative Group, Portland, Ore., a new post, from vp-associate creative director, Campbell-Mithun, Chicago.

George Parker to vp-creative director, Coakley Heagerty, Santa Clara, Cal., a new post, from managing director, Ehrenstrale & Co., London, a division of BBDO International.

Michael Jans to associate creative director, McCann-Erickson, San Francisco, from a similar post, J. Walter Thompson USA, San Francisco. Also, **Michael Goodwin** to art director from a similar post, D'Arcy-MacManus & Masius, San Francisco. He succeeds **Judy Larkin**, who moved to a similar post, Foote, Cone & Belding, San Francisco. At the Troy, Mich., office, **Garry Nielsen** to vp-senior copywriter from vp-associate creative director, BBDO, Southfield, Mich.

Cynthia Anderson to media director, CHA/Claire Harrison Associates, San Francisco, from the same post, Criswell Division, San Francisco. She replaces **Linda Borchill**, who left.

Patrice Carroll and **Elizabeth O'Brien** to network supervisors, SSC&B, New York, from network negotiators.

Darlene Koplien to media planner, Needham, Harper & Steers/USA, Los Angeles, a new post, from media supervisor, Wells, Rich, Greene/West, Los Angeles.

Marcy Donley to account supervisor, Carlson, Liebowitz & Olshever, Los Angeles, from a similar post, Wayne E. Smith & Associates, Los Angeles. Also, **Steve Kepher** to account supervisor, from account exec.

James Witham to vp-senior art director, Quinn & Johnson/BBDO, Boston, from senior art director, Humphrey Browning MacDougall, Boston.

Dorothy Murphy to vp-media, Fearon O'Leary Kaprielian, New York, from media planning supervisor, Ted Bates Advertising. Also, **Santo Cambareri** to exec art director from art director, Ketchum Advertising.

Linda Roberts to director-media services, John Malmo Advertising, Memphis, from the same post, Jan Gardner & Associates, Atlanta.

Judith Beskin to associate media director, Cascino & Purcell, Atlanta, from a similar post, Lawler Ballard, Norfolk, Va.

Nick Howse to media director, Burrell Advertising, Chicago, from associate media director, Bozell & Jacobs.

Martha Hendrix-Baledge to associate media director, Mangan Rains Ginnaven Holcomb, Little Rock, Ark., from media buyer.

Joan Scheeter to media director, Don Costello & Co., Chicago, from regional field sales media supervisor, Seven-Up Co., St. Louis.

Pamela Ott to media director, Ebey, Utley, van Bronkhorst, Mountain View, Cal., from sales rep, KNTV, San Jose.

Mary Salmich to associate media director, Bozell & Jacobs, Chicago, from media supervisor, Foote, Cone & Belding.

Samuel Chisholm to senior vp-director of client services, Mingo-Jones Advertising, New York, from vp-management supervisor.

Lyle Brumfield Jr. to senior vp-client services, Stockton, West, Burkhart, Cincinnati, from vp-director of marketing services, G.M. Feldman & Co., Chicago.

Barbara Iannucci to account supervisor, Barkley & Evergreen, Kansas City, from account exec.

Marion Wood to account supervisor, Kobs & Brady, New York, from account exec.

Peter D. Mineo to account supervisor, Dugan/Farley Communications, Montvale, N.J., from previous post as an account exec.

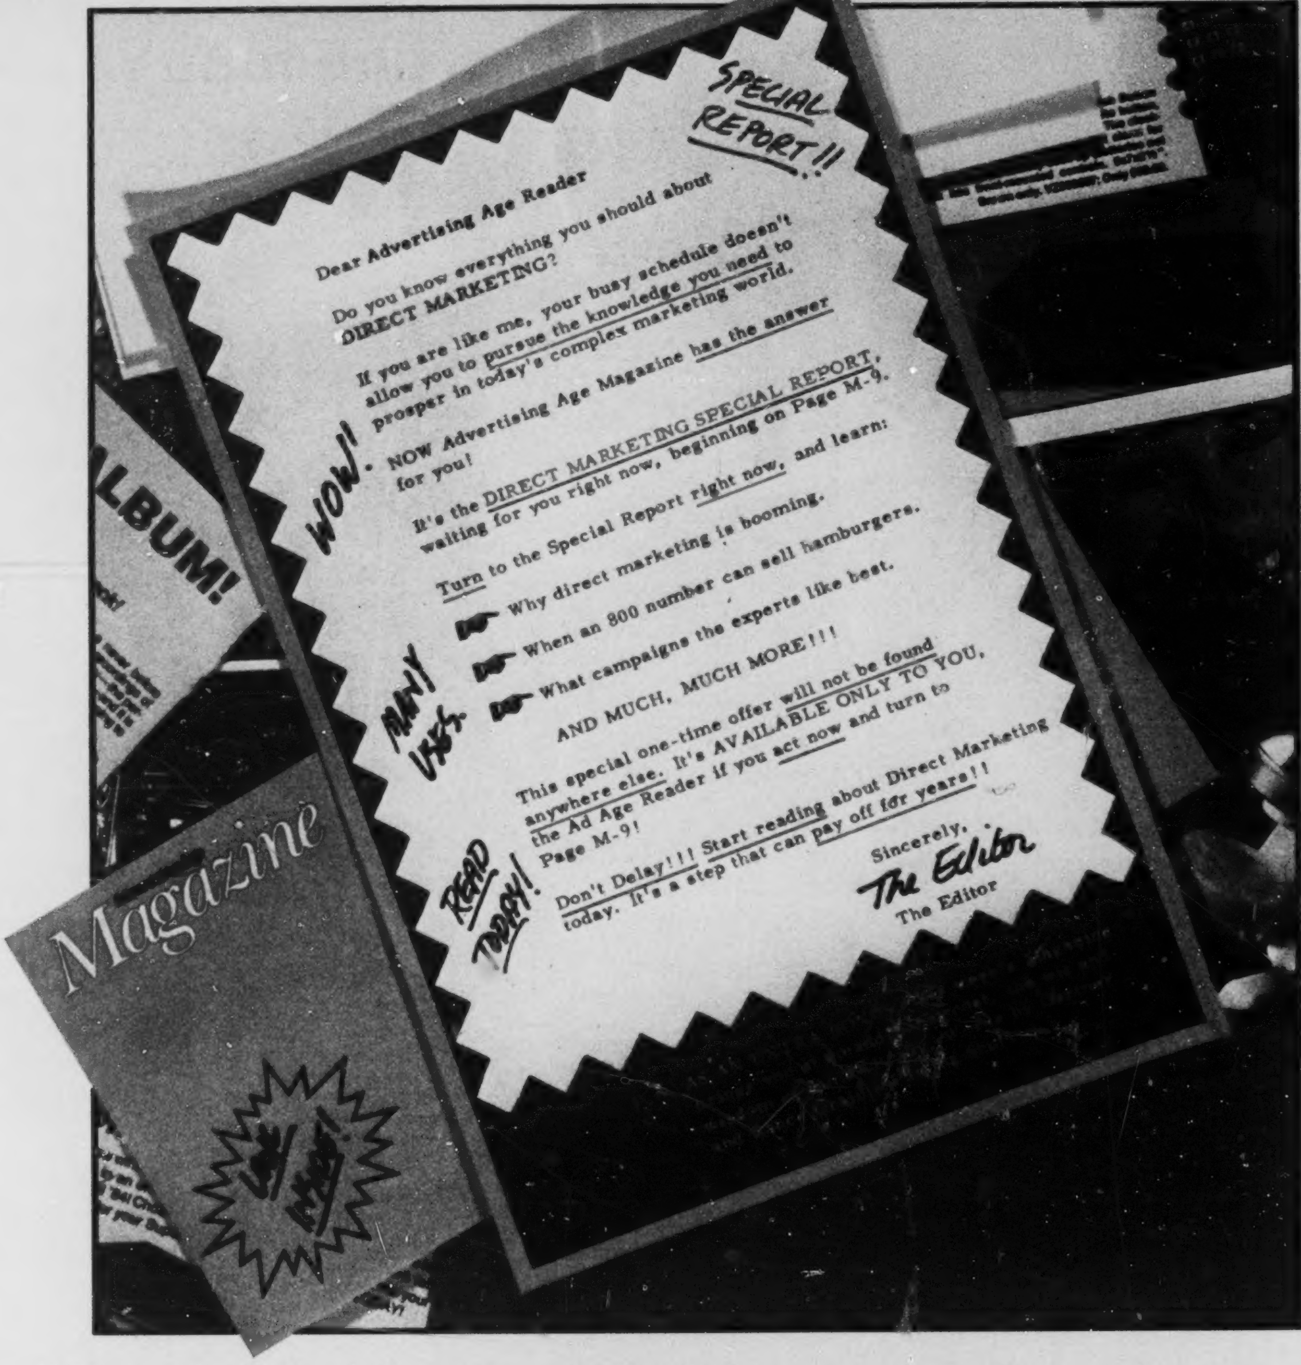
Miles Jackson to vp-account supervisor, The Pitluk Group, San Antonio, from account management supervisor, Goodwin, Dannenbaum, Littman & Wingfield, Houston.

B.W. McDonald to account supervisor on the Midland International Corp. account, Sandven Advertising, Kansas City, Mo., from the same post, Barkley & Evergreen, Kansas City, Mo.

Beverley J. Samuelson to account supervisor on several residential real estate accounts, King Advertising, Newport Beach, Cal., from marketing director, Danielian Associates, a Newport Beach architectural company.

ELECTED VPs:

Jennifer B. Greenblatt, Medicus Intercon, New York. . .**Charles J. Skuba**, Dancer Fitzgerald Sample, New York. . .**Dennis Whitpen**, Foote, Cone & Belding, New York. . .**Jacqueline Grace, James Eaton** and **Thomas Lentz**, Kenyon & Eckhardt, New York. . .**Douglas Fidoten**, AC&R Advertising, New York . . .**John Havrilla, Matt McNerney, Alisa Gabriel, Vicki Logan** and **David Sumner**, Jordan, Case & McGrath, New York. . .**Lewis C. Randall**, Deutsch, Shea & Evans, New York. . .**William Anderson** and **Richard Melenchuck**, Knoth & Meads Co., San Diego. . .**Tom Kirk** and **Jack Valente**, Needham, Harper & Steers, Los Angeles.#



SPECIAL REPORT!!

Dear Advertising Age Reader

Do you know everything you should about DIRECT MARKETING?

If you are like me, your busy schedule doesn't allow you to pursue the knowledge you need to prosper in today's complex marketing world.

WOW! • NOW Advertising Age Magazine has the answer for you!

It's the DIRECT MARKETING SPECIAL REPORT, waiting for you right now, beginning on Page M-9.

Turn to the Special Report right now, and learn:

MANY USES.

- ☞ Why direct marketing is booming.
- ☞ When an 800 number can sell hamburgers.
- ☞ What campaigns the experts like best.

AND MUCH, MUCH MORE!!!

This special one-time offer will not be found anywhere else. It's AVAILABLE ONLY TO YOU, the Ad Age Reader if you act now and turn to Page M-9!

READ TODAY!

Don't Delay!!! Start reading about Direct Marketing today. It's a step that can pay off for years!!

Sincerely,

The Editor

Marketing's stepchild comes into its own

By Lori Kesler

The woman in blue jeans steps out her front door, a smile of expectation playing on her lips. "What's in the mailbox today?"

The smile fades. "Junk mail," she mutters as she pulls out two credit card bills, a magazine, a catalog, a free sample of shampoo, an envelope bulging with coupons and a large four-color folder soliciting season tickets to the symphony.

She's not thrilled with what she found in her mailbox. She'd rather have a letter from home, and direct marketers know that only too well.

"With an impersonal medium like the mail, it's quite a challenge to get someone you don't know interested in something she doesn't think she wants," says John De Pasquale, chairman of the Direct Marketing Group, New York.

Lori Kesler is an ADVERTISING AGE *correspondent in St. Louis.*

But there's more to this scene than meets the eye. Indeed, nothing in that mailbox arrived there by accident.

"Segmentation is the name of the game," says John C. Holt, executive vp at Dun & Bradstreet Corp. "Reaching the best audience for a product, efficiently—that's direct marketing."

The woman on the front porch looks through her mail. Once inside, she puts the sample shampoo in her shower. She glances through the package of coupons and stuffs several in her purse. The symphony folder and catalog end up on her desk. She'll study them later.

So direct marketers scored pretty well after all. But they're not done yet. This woman also will find direct marketing ads in her magazine and statement stuffers in her bills.

And often—perhaps more often than she realizes— she'll respond.

Of course, these days the mailbox isn't direct marketing's only media tool, or even its most powerful. The telephone, newspapers and magazines, tv and radio figure into the picture, too, as do experiments with shopping via interactive cable tv, videotex and teletext and home computers.

In fact, the telephone has moved into the No. 1 spot as the biggest direct marketing and direct response medium—or at least the one on which the most dollars are spent.

Last year, an estimated $12.9 billion was spent on telemarketing, more than the $11.4 billion that was dropped for direct mail.

To be sure, the numbers can be confusing. Telephone direct marketing expenditures are tallied up to include 800 toll-free systems (in-WATS) and outgoing telephone marketing (out-WATS), along with local telephone marketing operations.

Robert DeLay, president of the Direct Marketing Assn., says some of the 800 number activity might well be categorized as customer service.

But he believes many companies—including some major package goods manufacturers—also are using the 800 customer service systems as a testing ground for more ambitious direct-selling programs.

Direct mail, for its part, is expected to increase spending by 13% in 1983, according to Robert Coen, senior vp-director of forecasting at McCann-Erickson, New York.

That would put direct mail's growth rate well ahead of network tv's 11% and national newspaper advertising's 8% projected growth for 1983.

Mr. Coen believes direct marketing is likely to become increasingly popular, especially among young families in which both spouses work.

"Time's a problem for these people, and they're often relatively affluent," he says. "In this group, there's a greater willingness to employ direct response techniques."

It's no wonder, then, that the world of direct marketing is growing at a healthy clip. Its sales volume totaled about $138 billion in 1982, up from $125 billion in 1981, $112 billion in 1980 and $82 billion in 1977, according to DMA figures.

Consumer mail order sales accounted for about $40 billion of that total last year, with the remainder coming from such other sources as telephone or tv and from such categories as magazine subscriptions, political and fund-raising contributions and business-to-business sales.

The DMA predicts that by the year 2000, one in every four consumer dollars will be spent on mail-order sales.

A decade ago, the direct marketing field belonged mostly to catalogers, magazine publishers (for circulation promotion),

book and record clubs and fundraisers.

Now, says Mr. De Pasquale, "there's hardly an industry anywhere that doesn't use direct marketing or mail in some form."

But if you're looking for the real excitement in direct marketing today, watch the action in business-to-business sales, financial services and retailing.

Maxwell Sroge, publisher of the "Non-Store Marketing Report" and "Catalog Marketer," calls office and computer supplies the most explosive product growth area.

"This trend to direct marketing business-to-business products has been building momentum for the past 10 years, but now," he says, "it's a fever pitch. You can buy a computer or a typewriter by phone or from a catalog. IBM, Xerox and Digital Equipment all have mail order subsidiaries."

It's not hard to understand why. The sales representatives for office equipment manufacturers like to concentrate on the big items. Says Mr. Sroge, "No salesman wants to bother with selling ink for the computer."

Yet, he notes, parent companies make terrific profits on small equipment and office supplies, "and they find that catalogs and 800 numbers carry that business very well."

Then, too, the cost of fielding a national sales force has led some business-to-business marketers to seek more imaginative sales techniques.

"When the cost of a personal sales call exceeds $150, that leaves quite a margin of latitude for direct marketing," says Mr. De Pasquale.

Indeed, an IBM marketing executive last year told a seminar group that his company sells thousands of typewriters costing $1,000 or more through direct mail and print ads carrying toll-free 800 numbers. "The typewriter has reached a commodity stage and no longer needs a rep to sell it," he said.

Business-to-business mar-

Stepchild

(Continued from Page M-10)

keters also have moved heavily into telemarketing, and they're exploring the emerging technologies often associated with home shopping. In fact, Mr. DeLay predicts much of the new electronic technology will find its way into America's offices long before it reaches most homes.

"Business already has some pretty sophisticated electronic information systems," he says, because it has the money to spend and it's willing to invest in the hardware.

Electronic home shopping, on the other hand, will grow, but it won't really explode until most people can order on two-way systems—and that's several years away, Mr. DeLay says.

If business-to-business use of direct marketing has blossomed, financial institutions have jumped into the area with such vigor it surprised oldtimers.

"Banks are coming out of their cocoons," says one insider. "They finally discovered they've got to know how to sell their products and services."

Perhaps that's because a few years ago, some aggressive money market funds got the attention of bankers by using direct marketing to take business away from them.

Dreyfus, under the leadership of Time-Life Books veteran Jerome Hardy, led the march into direct marketing, and "then it just kind of exploded," says one professional. "All the financial services got into it. Now every direct marketing agency in town's working on financial projects."

Retail stores also have begun to explore direct marketing, but experts agree that most of them have a long way to go.

Although department stores tend to use catalogs to draw traffic rather than to generate direct sales, observers say a handful—such as Neiman-Marcus, May Co., Dayton-Hudson, Bloomingdale's, Lord & Taylor and Saks—have made serious direct marketing thrusts.

Some, in fact, are taking segmentation to surprising lengths. One store, for example, takes a garment such as an expensive silk blouse and finds dozens of ways to come up with accessories for it. Then it creates an accessories catalog and sends it to everyone who bought that silk blouse. "They get fantastic returns. It's a premier example of what stores will be doing in the future," Mr. DeLay says.

Mr. De Pasquale predicts another direct marketing innovation—the "magalog," which weaves editorial information into the catalog format—also will catch on with retailers.

He says a few department stores are testing the concept, which originated with catalog publishers. Yet, perhaps inevitably, many retailers feel threatened by the whole idea of direct marketing because they see it siphoning business from their stores. Often they respond by ignoring it. An insider tells of reading one major merchandiser's long-term marketing plan and finding not one word about direct marketing.

Nevertheless, direct marketing professionals have urged retailers to join the movement rather than fight it. "Maybe," notes one executive, "those retailers ought to start building more warehouses instead of more stores. Maybe they should stop kidding themselves. Home shopping is going to become a way of life."

Few would argue with that assessment of the future. A quick backward glance reminds us that seemingly small changes in technology and life styles have quickly and dramatically affected buying habits.

Although catalog companies

New group sorts out mailing list users

Remember Dustin Hoffman in "The Graduate"? A business executive took the college graduate aside and whispered in his ear the magic word for success: "Plastics."

Obviously the guy wasn't a direct marketing man or he'd have whispered, "Segmentation."

At the moment, the industry's favorite buzzword also describes a move taking place within its own ranks.

Now that the Direct Mail/-Marketing Assn. has dropped the word "Mail" from its name to reflect the broadening interests of the industry, another organization has cropped up to represent just one special segment.

The new group, called Mailing List Users & Suppliers Assn. (ML/USA), says it'll devote its efforts exclusively to people who use, supply and rely on mailing lists to do business.

"Nowhere are [our] interests being represented with any degree of vigor," says Ralph Stevens, chairman of the ML/USA steering committee and president of Woodruff-Stevens & Associates, New York, a list management company. "Though large in numbers, we seem to have the least say, the least influence over what goes on in the direct marketing community. We mean to change that."

ML/USA, with 55 member companies as of early November, has hired an executive manager and is taking legal and administrative steps to set itself up as a nonprofit organization.

Mr. Stevens says the direct marketing industry has grown so big that one national organization simply can't represent all facets.

But he insists the new group isn't meant to be a rival to the Direct Marketing Assn. In fact, his company belongs to both.

Still, industry insiders say lots of mailing people were piqued when the DMA changed its name last year.

The organization that began 65 years ago as the Direct Mail Advertising Assn. became the Direct Mail/Marketing Assn. in 1973. Then at its 1982 conference, it dropped "Mail" and became simply DMA.

A DMA official said at the time that the new name "makes it clear our method of doing business can be used in any medium—print, broadcast, telephone, mail and other direct media."

Robert DeLay, the organization's president, says DMA devotes lots of attention to the needs of list brokers and buyers, but he admits it may not be enough to suit everyone.

"It's part of the growth pains we're all having in this field," he says. —*L.K.*

Good Luck, Computerworld.

During the past thirteen years, we helped **CW** grow to become the Number One Trade Publication in the United States.

We provided them with award-winning creative packages, shrewd printing/mailing purchasing and supervision, expert list counsel and an overall commitment to quality, budget and timing, second to none.

And we did the same for **InfoWorld** and **Computer Business News [ISO World]**, as well as for the Computer Caravan, The OEM and OA Forums, Computerweek and all the other fine "products" of CW Communications.

Now they've decided to go in-house. And we wish them all the luck in the world.

So now [you guessed it!], we're looking for another **Computerworld** —a company [perhaps high-tech, perhaps a publisher] that wants to make a major impact on the marketplace, build its customer base, expand into other areas and, in general, be very, very successful.

What about you? Let's talk. Call Mel Berger, our Director of Client Services, at 617-739-2400. He'll tell you how we can make your company our latest success story.

Telemarketers start group

By Eddy Christman

Telemarketing, said to be the largest single marketing medium in dollar volume, has its own trade association.

Called the American Telemarketing Assn. (ATA), the group seeks to become the industry spokesman, standard bearer and code of ethics promulgator.

The new association came into being this fall, and its president, Eugene Kordahl of National Telemarketing, Randolph, N.J., is pleased by initial response.

Mr. Kordahl says ATA has had 200 inquiries from all over the U.S. He expects the current membership of 25 to double by early December.

The association now has a mailing address at 200 Park Ave. and a fulltime executive director, George Lenz.

Mr. Lenz is a professional trade association manager who has been with such groups as the National Assn. of Insurance Brokers, Insurance Information Institute and American Institute of Marine Underwriters.

Dues for ATA have been set at $500 per year for founders, charter members and regular members. This includes voting privileges—one vote per company. Nonvoting associate memberships and individual memberships are available at $250 and $100, respectively.

According to Mr. Lenz, a big year-long membership drive would be started Nov. 15.

One of Mr. Lenz' priorities is to get a seminar program "up and running." He now anticipates holding an annual meeting with an accompanying trade show "in about a year."

A prime reason for setting up the organization for telemarketers, Mr. Lenz says, is to better serve a booming industry that now "has so many different facets. It was felt that a single organization" was needed to address all the concerns of those diverse groups.

He listed those who use telemarketing techniques to sell products and services, equipment makers, and the vast array of service providers who work with telemarketers as among those "facets."

He pointed out that ATA even has an architect member—a designer of telephone centers. He said some thought has been given to establishing "interest areas" within ATA to serve specific groups.

The Direct Marketing Assn. (DMA), New York, has a telemarketing council within its organization that represents the industry. But now, some telemarketers believe that is no longer enough.

In fact, DMA's own figures suggest that telemarketing merits its own trade group. According to figures it released for 1982, telemarketing expenditures hit an estimated $12.9 billion, while the figure for traditional expenditure leader direct mail was $11.4 billion.

And telemarketers aren't alone among direct marketing people seeking trade association independence. Recently, direct mail list brokers also set up their own association. *(See related story on Page M-64)*

DMA doesn't regard either new association as a hostile group, according to public relations director Roberta Wexler. "Direct marketing is an enormous field and we welcome anything that will result in its betterment," she says.

Among the founding members of ATA are: Lee Van Vechten of Telephone Marketing Group, Howell, N.J.; Glenn Snyder of Army Times Telemarketing Co., Washington, D.C.; Norman Pensky of ADDS Telecommunications, Walnut Creek, Cal.; Richard Holck of Burroughs Corp., Rochester, N.Y., and Seldon O. Young of Nice Corp., Ogden, Utah.

Mr. Kordahl says the group is still working on its code of ethics and wants to establish clear guides that "will give direction to anyone who wants to join.

"The good will of the public and the business community is a very fragile and fleeting thing. It should not be abused by the telemarketing industry," the ATA president says. "High standards of ethics will prevail to maintain the viability of this emerging, almost-limitless marketing medium."

Leader of the direct marketing pack
Estimated telephone expenditures for telemarketing applications

	1982 (in $ millions)	Per cent increases over 1981
Residential originated local calls	656.4	2.1
Residential originated toll calls	821.3	6.0
Business originated local calls	5,546.8	16.6
Business originated toll, Wats, 800* calls	5,911.1	11.7
Total	12,935.6	12.8

Note: *800 service is a toll-free service paid by businesses. Therefore, residential (consumer) placed 800 calls are included in this value.

This story was adapted from an article that appeared in the October issue of Business Marketing. *Eddy Christman is a free lance writer and frequent contributor to* Business Marketing.

"Joan, why does it make sense to print my catalog at Service Web in Chicago?"

In a recent telephone discussion, a color printing buyer asked that question of Joan Vanderbeck, Director of Communications at Service Web Offset Corporation, the Chicago web printers. The buyer added:

"I've always heard of Service Web as the developer of MiraColor. Isn't that just for 8½ x 11" brochures and the like?"

"No," Joan answered, "the unique combination printing program we call MiraColor is ideal for many kinds of brochures, inserts and statement stuffers. But it's also well suited to catalogs in quantities of 50,000 and 100,000. Whether you need a test run or you're marketing to smaller mailing lists, MiraColor produces eight- and sixteen-page catalogs in a number of sizes—at a significant savings."

"Joan, that sounds promising. But what if my catalog is as successful as I hope it will be? Can you handle the longer runs?"

"Absolutely. MiraColor is just part of the work we do. Color catalog printing is one of our specialties. We produce catalogs in quantities as high as 500,000, one million or even more.

"Don't ask us to print four million, however. We'd love the business, but that long a catalog run doesn't really fit our equipment."

"My sales depend on how good my catalog looks to my customers. That's a big responsibility."

"Yes, when we print your catalog, it's like being in business together. Our success depends on your success. So we try to make each catalog the best we can produce.

"Keep in mind that Service Web has 50 years experience in quality color printing."

"How does that make a difference?"

"It means that when you print your catalog with Service Web, you'll be working with a staff of dedicated printing experts. Everyone from your salesperson to the production staff is a graphic arts professional. They devote a lot of time and energy to giving you the best possible printed result.

"For example, because our presses operate around the clock, it's not unusual for a salesperson to come in at 3:00 a.m. for a press approval. Just last week, one of our customers (a knowledgeable buyer from a major Chicago direct mail company) expressed his relief that he could trust his salesperson to approve the color. He knew from his past experience with Service that he didn't have to come in himself for the press o.k. And that was for a print run of over a million catalogs."

"But every printer says they do a good job. What makes Service Web different?"

"Quality isn't just a slogan, it's an active concern at each step of the production process. When your final platemaking film arrives in the plant it's carefully checked over to see that it's correct in every detail (size, percentages, etc.). Our sales and production staff function like back-stops. Because of their training and experience they often catch things that the customer has missed.

"If a problem is discovered, your salesperson will call you immediately to discuss the recommended solution It may be something as simple, yet important, as missing center marks, but it can make a big difference to the success of your job.

"At each stage of production, several of our trained production people keep careful watch over your catalog. Your salesperson works closely with the production staff and follows your job through the plant—not just when your catalog is on press, but also when it's in our bindery.

"The result of all that meticulous attention is what you and your customer see on the page. You'll see that the color work in your catalog is in accurate register, that the color has a fine, high gloss. And your customer will be impressed by the rich tones, the vibrant colors, the sharp details that bring the page to life."

"It sounds like Service Web salespeople aren't just order-takers. Can they actually help me in the planning stages of my catalog?"

"Not only can they help simplify your planning, they can often save you money as well. When you discuss your marketing goals early, they may be able to suggest a more economical way to produce the catalog (perhaps just a slight change in dimension) or they may suggest an innovative format. Of course Service Web can print standard 5½ x 8½" or 8½ x 11" formats very efficiently. But our high-speed web presses can produce many other formats economically. You might want to test an elegant square format or an economical mini-catalog complete with reply vehicle for use as a package or billing insert."

"Joan, I got into a real jam with my last printer because my film was a couple of days late and I couldn't get on press."

"We're very flexible. Our production planner can usually find a way to stretch a little and still meet your deadline—even if you're late. Customers frequently run behind schedule and want us to make up for lost time—so they won't miss their mail date. Your salesperson won't make any promises we can't keep, but we've "saved the day" for many a company.

"At Service, you don't need to worry about getting lost in a giant organization. We're big enough to get the job done right, but small enough to remain flexible and give you personal attention."

"What happens to my catalog once it's printed? Do I have to arrange for mailing?"

"Many experts agree that Chicago is the preferred central distribution point. When you print at Service, you'll be at the heart of the U.S. direct mail network. Service Web works closely with several top local mail houses to make sure your catalogs are mailed correctly and on time. Or we can handle drop shipments as you require to distributors or other multiple locations."

"All that sounds convincing, but I'm a little nervous about working with a printer so far away in Chicago."

"Actually we're as close as your telephone. Our customers are all over the United States. Several of them have told us it's often easier to get in touch with their Service Web salesperson in Chicago than someone at a local printer. If your salesperson is temporarily unavailable, and you need a fast answer, there's always someone knowledgeable who can help you or get the information you need. Your salesperson calls you regularly when your catalog is in production to keep you informed of how things are progressing. You'll find you're as well informed as if your office were just down the street."

You probably still have questions that were not answered in the discussion you just read. Getting the answers is as easy as picking up the phone.

Call 800/621-1567 right now. Ask for Joan Vanderbeck. If she's busy, one of Service Web's other qualified printing consultants will be happy to answer your questions or discuss your printing needs. Be sure to ask for actual samples of Service Web's catalog work to see for yourself how good your own catalog can look.

introduced direct selling to mainstream America in the early years of the century, experts say direct marketing as we know it dates back only 15 years or so.

Computers and credit cards generally are credited with revolutionizing the whole process.

Credit cards, says Mr. De Pasquale, provided a convenient payment mechanism that eliminated the need for payment orders and drafts. And computers, which became a regular part of the business scene in the 1960s, allowed systematic access to names and addresses and spawned database marketing.

Now, says Mr. De Pasquale, sophisticated database systems enable a company to develop files with very specific information about each customer.

"They can have a profile that says, 'Sally Jones is married and has two children. She graduated from the University of Chicago and she bought a red dress from the September catalog,' " he explains.

But direct marketing's growth has been fueled by some powerful sociological forces as well. "The whole fabric of American society has changed in recent years," says Dun & Bradstreet's Mr. Holt. He notes that only 7% of all families fit the old stereotype in which dad works downtown and mom stays home to take care of two kids. Now that the majority of women work outside the home, says Mr. Holt, everyone's looking for a quick, efficient way to shop.

Then, too, direct response marketing as an industry has matured and its reputation has improved, so people more often risk buying a product sight unseen. Notes Mr. De Pasquale, "In the old days, people wouldn't purchase something if they couldn't try it on first."

But today, he says, people have overcome that threshold, perhaps partly due to time pressures, uninformed sales staffs, gas and parking costs—"now people think, 'If it doesn't fit, we can always send it back.' "

Mr. Coen of McCann-Erickson believes mass media image advertisers and direct response advertisers are learning they have more in common than they once thought. "They used to be in two very separate camps—the group that concerned itself primarily with image advertising and the group that sold directly via telephone, mail or direct response tv," he explains.

But now, he says, direct mailers are finding mass media advertising support improves their response rates, and direct response tv users seem to be getting more image into messages.

By the same token, companies that advertise to create image and awareness have discovered they can increase effectiveness with such direct response devices as 800 numbers.

"The two camps are becoming more aware of each other—and blending techniques," Mr. Coen says.

AdWatch

(Continued from Page 3)

of first mentions. Wendy's 5.5% share was still good enough for third place, still not good enough to pose a serious challenge.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a national random sample of consumers to name the advertising in a variety of product categories that first comes to mind from all seen, heard or read in the preceding 30 days.

Last month, 1,250 people were questioned by phone from Oct. 1 through Oct. 20. Under adWatch methodology, an increase or decrease of 2.8 percentage points from the previous month is considered a statistically significant change attributable to more than sample variations.

BK adds a few twists

Burger King's awareness in October, 1982, rose an incredible 15.7 percentage points from 8.4% to 24.1% on the strength of that first phase of comparative advertising. Since then, several new twists have been applied to its taunting of McDonald's that have given the No. 2 burger chain some short-term boosts in awareness.

But Burger King hasn't managed to sustain those increases, while McDonald's has held its supremacy.

Following the initial jump to a 24.1% share in October, 1982, Burger King slid to 10.8% (almost back to its starting point) in February of this year. Over that same period, McDonald's, which had dropped from 45.5% to 35.8% in the first month of the challenge, steadily rebuilt its awareness.

In February, 1983, Big Mac's share was 43.6%. It has not dropped below 40% since.

Burger King's phase-two "Broiling vs. frying" campaign in March was another shot in the arm, boosting its share of first mentions nearly 11 points to 21.4%. By August, having put the comparative messages on hold while it advertised "Return of the Jedi" glasses and salad bars, Burger King again had lost much of its gain and held 14.4% of mentions.

MacDonald family has effect

True to form, the third phase of the campaign (launched in September) has again halted a slide and has boosted awareness for Burger King. The real-life MacDonald family in their false noses and glasses and "National Switch Week's" two-for-one Whopper deal captured consumer attention, allowing Burger King to close the gap with its larger rival for another month.

In other categories last month:

- Burger King's comparative strategy is an adaptation of No. 2 **soft-drink** marketer Pepsi-Cola's taste challenge to leader Coke. That battle also intensified last month.

Coca-Cola's share of first mentions dropped 3.9 points in October to 28.2% while awareness of Pepsi rose 1 point to a 27.4% share. That put the longtime rivals less than a single percentage point apart in top-of-mind ad awareness as Coke begins phasing in new campaigns for its brands, including a new comparative message for its caffeine-free product (AA, Oct. 17). 7UP, continuing its no-additives positioning, held a 7.2% share in third place.

- Posting a dramatic increase in the **airlines** category last month was Eastern Air Lines. Its 6.4 point rise was the largest jump registered to date in that segment. Its 22.4% of mentions was the largest share of consumer awareness an airline has been able to grab.

Eastern's tv advertising last month featured chairman Frank Borman explaining that, despite the name, the carrier serves a long list of domestic and international markets. Other spots focused on Eastern's new planes. But Eastern's advertising may have been especially memorable last month because Eastern's financial and labor problems were the topics of frequent news reports.

United Airlines, with 14.9%, held on to the No. 2 spot behind the continuing use of celebrity and businessperson endorsements. Stetson Hat Co. president Gary Rosenthal is among the most recent. American Airlines was No. 3 with 9.8%.

- Tylenol continued to strengthen its lead in the **medicine & drugs** category. In October, advertising for Tylenol came to mind first for 37% of the sample, a 4 point advance from September. No. 2 Anacin, meanwhile, fell back to a 7.3% share last month after a 4.4 point rise to 11.8% in September. No. 3 Bayer dropped 2 points in October to 4.2%.

Awareness of Tylenol's advertising also may have been bolstered by the news media as many reports noted the anniversary of last year's poisonings.

- Worth noting is the steady rise of U.S. Tobacco Co.'s Skoal smokeless tobacco. Unlike others' in the **tobacco products** category, Skoal's advertising still is accepted for tv, and its $2 million campaign for Skoal Bandits tobacco-in-a-pouch (AA, June 27) has increased its awareness from 3.1% in July to 7% in October. That put it closer to category leader Marlboro (9.4%) than any No. 2 previously has come. Winston remained No. 3 with 5%.

- When the 1,250 respondents last month were asked to name the first advertising that came to mind regardless of category, these were the **top 10**: (1) Coke; (2) McDonald's; (3) Burger King; (4) Miller/Lite; (5) Pepsi-Cola; (6) Chrysler; (7) Budweiser/Budweiser Light; (8) (tie) Chevrolet, Ford, Tide.#

The advertising of Beneficial finance company may be viewed as a metaphor for Christmas selling. Jacking up its media spending 80% from last year, the company is slating much of a $900,000 expenditure for the coming month. Its tv spot shows expensive jewelry, personal computers and a Chinese Shar-Pei puppy, which can fetch a price of $2,500. Beneficial is not alone in believing that Christmas will turn out to be very merry for marketing and retailing, with surprising sales strength among more expensive items.

High-ticket items head for nation's Christmas trees

An Advertising Age roundup

The Christmas selling season is off to a brisk start, and retailers around the country are reporting sales increases over last year well into the double digits. High-ticket items and luxury versions of basic goods are stoking the fire.

Stereo equipment, videocassette recorders, furs, jewelry and computers are hot sellers. Shoppers are snapping up not just sweaters, but glitter-rhinestone and sequin sweaters; not just sheets and blankets, but Ralph Lauren home furnishings; not just perfume, but Muskone Ph 5, a fragrance in a gold bottle from England, said to enhance natural sex appeal, that sells for $200 and up.

Since this year is being promoted as the 80th anniversary of the teddy bear, they're being offered and embraced in varieties from under $10 to mink. Especially popular are the Bialosky bear and the Berenstain bear. And young consumers, of course, are panting after Coleco Industries' Cabbage Patch kids *(see accompanying story).*

The fourth-quarter's total retail sales are expected to reach $326

(Continued on Page 112)

. . .along with toys

By JAMES P. FORKAN

The crazed rush to buy Coleco Industries' cuddly "adoptable" Cabbage Patch Kids has received much media attention since Thanksgiving, but as early as October Coleco executives were saying the dolls were already virtually sold out at major retailers (AA, Oct. 24).

But the run on Cabbage Patch store shelves, while considerable even before Thanksgiving, reached fanatical proportions after the media fell on the story.

That media attention sparked some speculation that Coleco nursed the success and the hype around Cabbage Patch to bolster its own stock, which had suffered this year, particularly since its problems in delivering its new Adam home computer to stores. That, however,

Political ad spending to top $1 billion record

By STUART EMMRICH

Within the next few weeks, candidates running for President of the United States will shift into a high gear of campaign spending that is certain to make the 1984 race the most expensive in the nation's history.

Political analysts and operatives contacted by ADVERTISING AGE estimate the Democratic field will spend more than $60 million between now and the convention in July, each vying for the chance to face Ronald Reagan in the November general election.

That general election will also almost certainly set a record for political spending—courtesy of the federal government. Each of the two major party candidates will receive $40 million in federal funds, a hefty inflation-factored boost from the $29 million that Mr. Reagan and Jimmy Carter each received from the government in 1980.

With congressional, state and local races being held in addition to the presidential race, the total amount of money spent by various candidates on political advertising in 1984 will easily exceed the $1 billion mark, first reached in 1980.

'84
Marketing the Candidates

This analysis of ad spending is the first in a series of articles in which AA will examine the advertising and marketing aspects of the 1984 political campaigns.

Walter Mondale and John Glenn, the acknowledged front-runners in the Democratic race for President, already are counting on bankrolls of up to $15 million each to finance their operations through the early—and crucial—part of the upcoming primary season.

The two candidates' coffers are expected to receive an infusion of cash after two ambitious fund-raising ventures on Dec. 10.

Walter Mondale has purchased five minutes of prime time tv on CBS for a fund-raising commercial that night; John Glenn is holding a huge fund-raising event in Austin, Tex., that same day. Both candidates are hoping to raise $1 million with those efforts.

The other six Democratic candidates, ranging from South Carolina Sen. Ernest Hollings to former Florida Gov. Reubin Askew, are scrambling to put together financing of up to about $2 million each to keep them in the race at least through the first two or three primaries.

Although it is difficult to pinpoint just how much of the money being raised by candidates will go directly to advertising, political operatives say that, as the primary season nears, a huge proportion—usually between 50% and 60%—of each candidate's budget will be spent on advertising.

Aides to John Glenn, for instance, have estimated that in the first two months of 1984 their can-

NH&S joins lengthy list of former agencies

Gallo fills up O&M's cup

By RUTH STROUD

E.&J. Gallo Winery, well known for its sometimes tenuous, short-lived relationships with advertising agencies, has moved its remaining $7 million in billings from Needham, Harper & Steers/USA, Los Angeles, to Ogilvy & Mather, San Francisco.

The brands involved include Andre sparkling wines, E&J brandy, Carlo Rossi, its newly introduced Polo Brindisi and new products.

O&M currently handles about $25 million in Gallo business—its varietal and premium wines as well as corporate advertising.

A terse statement issued jointly by Gallo and Needham late last week stated the two "have mutually agreed to terminate their relationship, effective March 1."

Beyond the official reasons given, Needham/Los Angeles president Gerry Rubin declined to elaborate on what led to the split other than to say it was not over creative or financial differences. "We found them, not unlike published reports, to be demanding clients," he said, "but there are lots of demanding clients and that's one of the prices of working for the nation's No. 1 winery."

An O&M executive said the agency had not gone after Needham's business, but wasn't surprised at being given the assignments. "Nothing Gallo does surprises me," he remarked.

Over the past 30 years, the winery has employed 15 advertising agencies, several of which have worked for Gallo twice.

NH&S has watched its store of Gallo business slowly dwindle during the past two years. The agency's Chicago office was first named to handle Gallo's premium table wines in April, 1982, after a

last minute news

ABC balks on ad time plan, cites soft market

NEW YORK—ABC will not go ahead with the third phase of its national ad time expansion because of the current market softness. However, ABC will make available as many as three additional weekly 30-second spots in prime time to its affiliates beginning in January. The additional spots will come out of airtime normally devoted to network promotions and program openings and closings. The expansion, being discussed at this week's ABC affiliate board of governors meeting in Hawaii, will put ABC stations on a par with CBS and NBC affiliates, which each get about 70 weekly 30-second spots from their respective networks.

To our readers

This issue marks the return, after a three-year interval, of Advertising Age's 100 Leading Markets issue.

What we've done—Advertising Age staff and quite a few free lance writers from around the country—is talk about what's happening in these marketplaces, beyond population swings and building starts. The profiles were written by those who *know* the markets, and at least 50 times while reading these profiles as they came in I was tempted to relocate.

As always, the best information is the kind that falls into our lap accidentally. That, perhaps, shouldn't surprise us, but this kind of information is frequently unexpected. In Fresno, Cal., for instance, local marketers are burned because Dancer Fitzgerald Sample recently eliminated the area from the agency's recommended list of ideal test market areas.

Or consider Buffalo. Everyone would probably suspect it's fairly typical of industrial northeastern cities, a victim of wrenching economic hard luck. And it is. But only in reading the litany of woes that beset the market, as detailed in our profile, can you get a hint of some of the difficulties that residents there must confront.

Then there's Houston, once the golden boy of major metropolitan markets. Some of the raw numbers indicate that it is, still, the kind of place a marketer should consider. But the slump in the oil business, among other things, has put a kind of economic straitjacket on the city. A lot of that Texas sheen has worn off.

The unexpectedly favorable news is, of course, more pleasant to read. Cleveland, the city that replaced Philadelphia as the butt of every joke, seems to be recovering nicely, says our profile. Maybe you haven't heard much about the city lately, now that it isn't quivering at the edge of a financial tidal wave. A low-key effort to pump economic life into the city has replaced headlines, and that probably suits the people there just fine.

It's also interesting to read of a market that is learning to go beyond its halcyon days. As our profile notes, it used be that in Las Vegas all you needed were some slot machines and a crap table, and the revenue would come spinning in. No more. The gaming people there have learned they can't expect to sit back and wait around for the sweet sound of money. They are beginning to market and merchandise their attractions. Certainly, the pressure from Atlantic City has shaken the somnolence out of those once sharp operators.

(Atlantic City, by the way, is not large enough to have made our list of markets. But it surely bears watching. It is growing rapidly, and it is making an impact in reviving the economy of the area.)

While these items may be of interest and importance, however, the lasting impact of these markets should come from those broad trends that a reading of all 100 profiles would suggest. The increasing suburbanization of America, for instance, is likely to continue as more markets of the Middlesex-Somerset-Hunterdon, N.J., or Lake County, Ill., category are added to the list. Also, everyone, but everyone, is talking about attracting "high-tech" businesses. And there is little doubt that a sense of economic recovery is, indeed, evident.

It is this kind of trend-reading that gives this report value, placing the markets of this country into a time and a place that lend perspective.

Hardy markets guide path to recovery—aka growth

And it's not only the Sunbelt powerhouses

By Alfred Hong

The metropolitan markets that sustained our economy during the recent recession are setting a fast pace as they lead the nation toward a period of unprecedented growth and prosperity.

As keen marketers would suspect, current information from the latest "Marketing Economics Guide 1983-84" document that the erstwhile shining markets of the Sunbelt still dominate the list of the fastest-growing markets. For almost two years, they were able to withstand the difficult rolling adjustments that the entire economy endured in order to wring out the vestiges of rampant inflation. These markets of destiny, including Houston, Beaumont-Port Arthur, Corpus Christi in Texas and Fort Lauderdale-Hollywood-Pompano Beach, West Palm Beach-Boca Raton-Delray Beach and Orlando in Florida, showed their resiliency by continuing to build retail sales volume and attracting new businesses during their ordeal. Most significantly, these markets broke their shackles and generated the spark that started construction in private housing on its road to recovery.

An analysis of the data (*see tables on Page M-16*) shows that not all of the action has been confined to the above metropolitan areas located in Texas and Florida, however. Atlantic City, N.J., Portsmouth-Dover-Rochester, N.H., and Tucson, Ariz. for example, have been contributing substantially. The first two markets, located along the North Atlantic seaboard, were the focus of considerable excitement during the readjustment and are strong attractions in an otherwise quiescent region. As a result, they have played an important role in adding impetus to the rising economic activity in their region.

People in pursuit of their various economic roles make up markets. Marketers look to population, income and economic activity in each market to a basic yardstick. What follows is a detailed look at each of these measures:

Population

Population is a solid gauge of a market's strength and momentum. Among the 10 fastest-growing markets in retail sales from 1977 (U.S. Census) to 1982, five of them also placed among the top 10 in population growth from 1980 (U.S. Census) to 1983. Four of the remaining five markets also had very respectable increases.

On the other hand, the population growth for Atlantic City, N.J., has been only 1.6% lower than the 2.7% average for the U.S. as a whole. The special character of the market has provided it with considerable stimuli to foster dynamic growth.

It is apparent, however, that the city fathers need to reinforce the attractiveness of the market with resort or recreational area appeal before it can draw in people who will have more than a transient stake in its development.

In contrast, the spectacular population growth of 10.3% from 1980 to

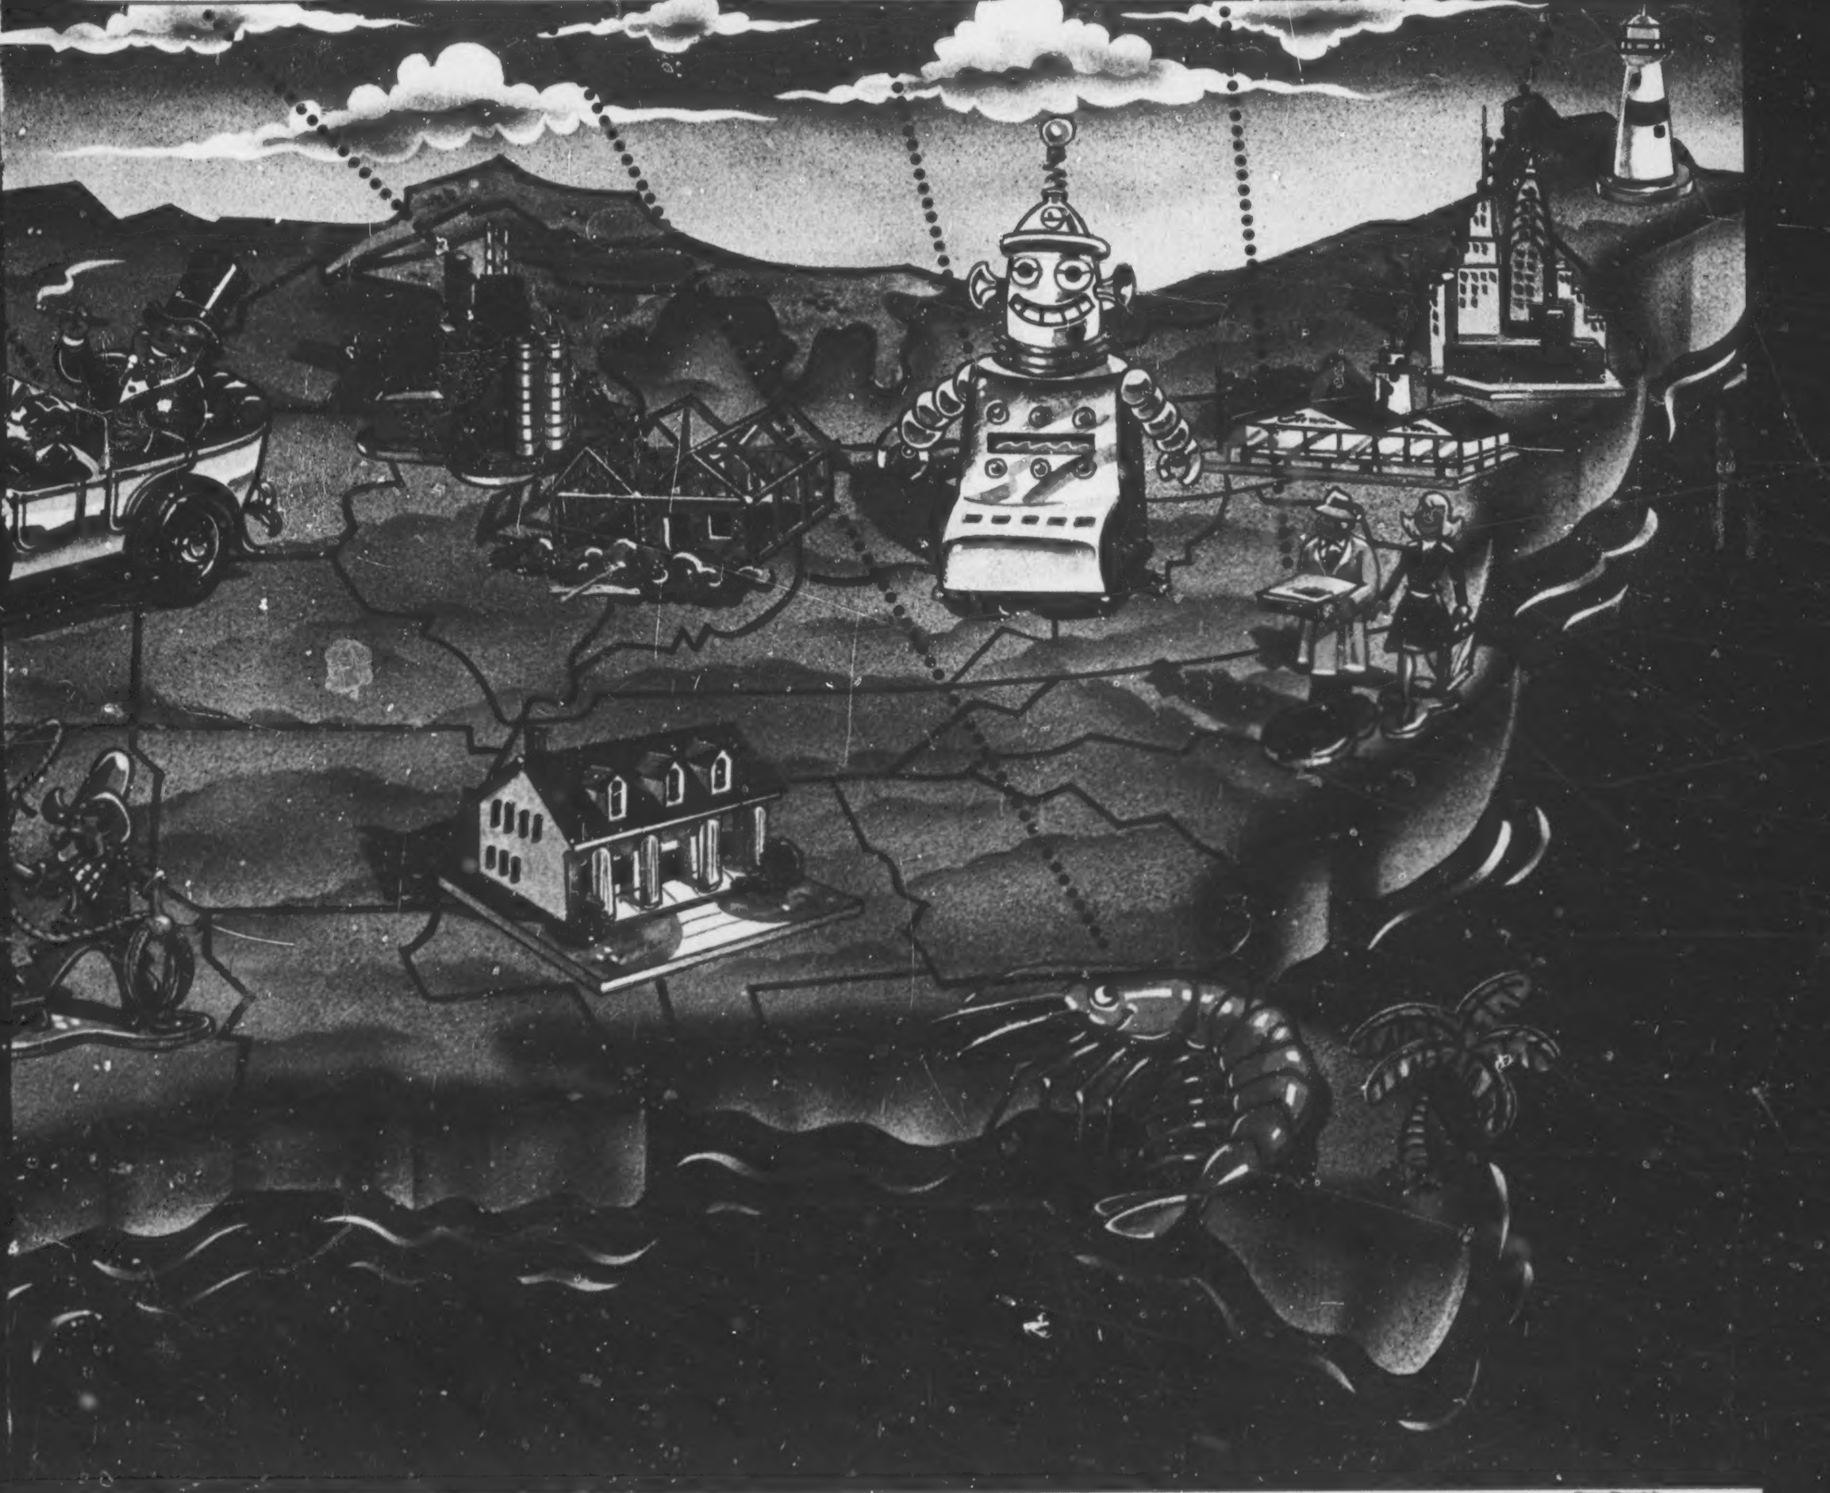
Retailers' paradise
Sales in Philadelphia's new Gallery shopping complex are about 50% higher per sq. ft. than the national average.
(See Page M-22)



Steve Boswick

1983 for the Las Vegas market placed it No. 2 in growth in the country.

This rapid pace is the more remarkable because it extends to three decades the length of its record growth. Moreover, its population growth has been accompanied by a very significant increase of 67.5% in retail sales volume from 1977 to 1982.

The new criteria the government has established for defining metropolitan statistical areas (*see story on Page M-8*) have given some fast-growing markets a rightful place in the sun.

Marketers have always known Dallas-Fort Worth as one of the nation's growth markets. For many years, however, Fort Worth has been living in the shadow of its big sister, even though it has enjoyed faster growth both in population and in retail sales. Now that the government has accorded it recognition as the Fort Worth-Arlington Metropolitan Statistical Area, it stands out with a performance record of 9.2% growth in population since 1980 and a 98.3% growth in retail sales since 1977.

Income

The wide fluctuations in the fortunes of individual metropolitan markets during the recession underscored the ephemeral nature of income, but even more, its importance as a basic yardstick of market strength. An examination of well-to-do markets reveals that most of them adjoin the megalopolises of New York, Chicago, Los Angeles and San Francisco. As such, under new criteria, the government has grouped them together as Consolidated Metropolitan Statistical Areas.

Marketers can focus on such mass markets with large concentrations of prospective consumers. While recent changes in the social and economic status of consumers have splintered or are splitting apart the market, the sheer magnitude of these very large markets allows professionals to draw fine market segments and distinctive product differentiations.

Retail sales

The rapid development of the Sunbelt markets has focused attention on their retail drawing power. Retailers located in these fast-growing markets have reaped windfall gains from being at the right place at the right time.

While some of the metropolitan areas that enjoy the highest index of retail sales to disposable income attract expenditures from nonresidents of those areas, from either shoppers in adjoining areas or tourists, in other markets consumers allocate more of their expenditures to goods rather than to services or to savings.

(This index is computed by dividing the market's percentage of U.S. retail sales by its percentage of U.S. income. Based on the simple assumption that all the consumers in a market will spend a certain proportion of their income for retail goods, this index indicates the extent to which the market deviates from the U.S. Index of 100.)

This is particularly true of these very high index markets. To a considerable extent, the exceptionally large retail dollar volume in these particular markets is an indication of how well marketers have succeeded in influencing their customers to spend.

The creative marketing strategies and tactics marketers have devised and implemented in these highly competitive markets bear watching. For as the economy starts on the road to prosperity, it is the successful marketers who will be spreading the benefits of mass production, mass distribution and mass consumption.

100 Leading Markets

Reports on the economic activities of the nation's largest metropolitan areas

New England

Boston, Mass.

Population '80	2,805,911
Rank	7
Est. income '82	$39,265,246,000

While much of the country has been struggling out of recession, Boston has been thriving. "Just look at all the cranes rising above the city," says James Sullivan, president of the Greater Boston Chamber of Commerce, pointing to the effects of more than $1 billion in new construction a year for the past several years and more in the pipeline.

Unemployment is down in the market, averaging 5.2% in August, down from 6.6% six months earlier.

Hotels are springing up on every corner. Five thousand new hotel rooms have either just opened or are scheduled to open shortly. Joining a new Westin Hotel at Copley Place, the Marriott Long Wharf, the Bostonian, the Meridien and the Back Bay Hilton will be another Marriott for giant Copley Place, a Four Seasons Hotel at Park Square (across the street from the new State Transportation Office Building, still under construction) and a new Intercontinental Hotel leading the construction of Lafayette Place.

Who will fill these new hotels, plus the expanded existing hotels like the Ritz Carlton and the refurbished Sheraton Boston is something of a short-term puzzle. While the area actually lost 81,280 residents from 1970 to 1980, tourism has grown in the past two years. According to the Greater Boston Convention and Tourism Board, the city's hotels are relying on increased convention business.

Unfortunately, the Hynes Auditorium, Boston's major convention facility, is planning to shut down completely for two years for a major refurbishing and expansion. Although the long-term outlook for convention business is excellent now that the expansion of the Hynes is to proceed, the new hotels are going to have to weather a two-year shutdown. When the Hynes is finished, possibly before, the newly created state authority financing that project will turn its attention to a new Boston Garden arena.

One alternative convention site is the new Bayside Exposition Center, converted from an abandoned shopping center. The facility, along Dorchester Bay, is the new home for a variety of trade and consumer shows and is located in a section of the city that is slated for some major redevelopment.

Another alternative facility will be the BOSCOM facility under construction at the site of the former Commonwealth Pier. BOSCOM is being developed by the Fidelity organization (money market funds) as a permanent high-tech and electronics marketing center. In addition to the permanent attractions, the facility is expected to accommodate other activities as well.

A major marina-condominium-hotel-retail complex is being developed alongside BOSCOM by restaurateur Anthony Athaneus and Hyatt Hotels, and another high-tech development is taking place on Logan Airport's Bird Island Flats. The $130 million project will house about 50 high-tech companies in a designated foreign trade zone.

One high-tech area, the much heralded genetic engineering industry, often cited as the next wave of high-tech development, has been relatively slow to develop. But finance and insurance industries, longtime backbones of the Boston economy, are strong, says Mr. Sullivan, despite massive layoffs at Prudential, part of a nationwide consolidation by that company. New England Mutual, a home-based insurance company has major construction and expansion already planned for the Back Bay, and laws allowing out-of-state New England mergers have Boston banks competing aggressively here.

Other regulatory changes have dra-

What's behind the numbers

By Stanley E. Cohen

After a three-year hiatus, ADVERTISING AGE with this special issue once again looks at major developments in the 100 largest U.S. markets.

Our purpose is to highlight change. So the profiles are narrative, relying less on statistics than specific examples.

We asked our reporters to try to find the pulse of the communities. What is changing, and why? What does it mean in terms of future developments and marketing prospects?

The 100 markets are the 100 most populous, based on 1980 U.S. Census data, retabulated by the Bureau of the Census to conform to the new Metropolitan Statistical Area (MSA) concept adopted by the federal government on June 30, 1983.

At this time, no census material other than 1970 and 1980 population has been officially retabulated on the new basis. Once again, we have turned to Marketing Economics Institute Ltd. for help. Its population, personal income and retail sales estimates *(see Pages M-10 and M-12)* are all based on the new concept.

Under the new system, some markets are designated MSAs and others Primary Metropolitan Statistical Areas (PMSAs). Conceptually they are identical. The 78 PMSAs were distinctively titled by the government statisticians because they are also components of 23 "megalopolis" Consolidated Metropolitan Statistical Areas.

Although most of the new MSAs and PMSAs are identical to or closely resemble the Standard Metropolitan Statistical Areas (SMSA) they replaced, there are numerous instances of new titles, reflecting the addition or deletion of counties and communities.

In some instances, SMSAs were split in to two PMSAs. For example, Dallas-Fort Worth SMSA has become the Dallas PMSA and Fort Worth-Arlington PMSA. Other SMSAs have been substantially expanded. The former Norfolk-Virginia Beach-Portsmouth SMSA, for example, is now the Norfolk-Virginia Beach-Newport News MSA, with the addition of three counties and the cities of Chesapeake, Hampton, Newport News and Williamsburg.

Each MSA or PMSA is a geographic area consisting of a large population nucleus together with adjacent communities that have close economic and social ties. (MSAs and PMSAs consist of entire counties, except in six New England states, where they are made up of townships.) An area qualifies in one of two ways: It has (1) a city of at least 50,000 population, or (2) an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In addition to the county containing the main city, an MSA or PMSA may also include additional counties that have close economic and social ties to the central county.

Standard metropolitan definitions were first developed 35 years ago so that basic federal statistics in population, housing, industry and trade are all published on comparable geographical terms. They are normally reviewed after every decennial population census. The latest revision resulted in several additions to the old SMSA list, for a total of 257 MSAs and 78 PMSAs.

The new formula also increases the number of recognized "megalopolis" units from 16 under the old definition to 23 CMSAs, which are composed of the 78 PMSAs.

Stanley E. Cohen is Washington editor of ADVERTISING AGE.

matically affected the retail market as well. In particular, the repeal of the Sunday blue laws has put a stop to the flow of retail business over state lines. "We were surrounded by states competing on Sundays," notes Mr. Sullivan.

More changes can be expected with the November election of Mayor Raymond Flynn. While downtown development will continue, every major mayoral candidate supported linking development of downtown with that of the neighborhoods by having developers somehow subsidize or support neighborhood projects.

Meanwhile, although the many visitors flocking here this past summer saw a prospering city, the city's neighborhoods have not enjoyed a full share of that success.

Pending state and local condominium conversion bills and linkage proposals are just two ways the city is attempting to balance downtown development with traditional neighborhood interests.

Boston's greatest bottleneck, its transportation system, may finally see some improvement. In fact, Gov. Michael Dukakis just endorsed the Third Harbor/Tunnel Central Artery Depression project that is a hope to the alleviation of the area's worst traffic jams.

Essentially, the $2.2 billion project will, over 10 years, add a third tunnel directly to the airport while expanding and placing underground the mile long elevated highway, cutting north-south across downtown Boston. The project should open another 25 acres of prime downtown land for low-and medium-rise development.

At the same time, expansion of the public transit system is continuing as subways push beyond Harvard Square and plans are put forward to revive train travel to Cape Cod.

Despite the immediate traffic problems expected because of the projects, there will be plenty of encouragement for visitors to come to the city, especially with the launching of the "Boston, Bright From The Start" marketing campaign, a slogan the city hopes will rival "I Love New York" in appeal.

The city continues to be a lively media town. Since Rupert Murdoch took over the failing *Boston Herald* (then the *Herald-American*) from the Hearst Corp., the paper has aggressively been building readership and promoting itself. Wingo—the newspaper bingo game—came to Boston as part of an uphill struggle with the *Boston Globe*.

Heating up the newspaper scene even more was the entry of *USA Today* into the market.

WQTV, Channel 68, becomes the city's newest tv station, joining the three network affiliates, three independents and two public tv stations, while Cablevision wires the city for a state-of-the-art system that promises to deliver dozens of channels for a minimal basic fee.

Bridgeport-Milford, Conn.

Population '80	438,557
Rank	94
Est. income '82	$11,067,409,000

The nine-town Bridgeport PMSA comprises Bridgeport, Fairfield, Stratford, Trumbull, Easton, Monroe and Shelton in Fairfield County and Derby and Milford in New Haven County.

It is a major corporate, banking and manufacturing center and is home to many corporations, including General Electric Co., United Technologies/Sikorsky Aircraft, Avco Lycoming, Mobil Chemical, Bunker Ramo, Chesebrough-Pond's Research, Richardson-Vicks, TIE Communications, Warnaco, Remington-Du Pont, Tetley Tea and American Chain and Cable (ACCO).

Bridgeport has been experiencing a substantial amount of economic growth and prosperity. Last year, it was one of six cities awarded enterprise zone designation by the state of Connecticut, the zone covering 300 acres in the industrial area west of the Pequonnock River and the commercial district at the south end of E. Main St. It already has 25 projects in the works, including a planned industrial conversion of the 500,000-sq.-ft. former Bridgeport Brass complex.

Another area receiving considerable support for revitalization is Harborpointe. Under a project designed to develop the area, the state plans to turn over considerable acreage to a group of developers headed by the Sterling Group.

In return, the developers, over a period of 20 years, will construct thousands of housing units, thousands of square feet of offices and other units. One of the more immediate projects for the developers will be a group of 500 moderately priced townhouses.

The enterprise zone status is expected to be a major weapon in Bridgeport's efforts to attract more business within its area.

The incentives under the designation include: A 50% state corporation business tax reduction for 10 years for new manufacturing projects; an 80% abatement of local property taxes for five years for new manufacturing projects with the state reimbursing the municipality 75%; a $1,000 grant for each new job created in conjunction with a manufacturing project; local tax assessment freezes for up to seven years on new commercial and residential projects, and low interest venture capital and small business loans of up to $100,000.

Bridgeport's East End is going through a facelift, through the efforts of the Metropolitan Business Assn., which with an annual budget of $423,000 aims to help companies in this blighted area become viable. One way to achieve this is through making the area secure.

The association plans to establish foot patrols, not just to ensure the safety of the merchants, but also to assure potential shoppers in the area of their own safety.

Quite apart from the development that is proceeding, the area is attractive because of its location. It sits on Long Island Sound and is also close in proximity to New York City. In addition, Bridgeport itself is located in one of the busier manufacturing areas in the nation.

In contrast to Bridgeport, Milford is a smaller community that houses much of the working population of Bridgeport and nearby New Haven.

The Milford area is not entirely a "bedroom community," said Dave Reiscetta of the *Milford Citizen*, a 7,500 circulation newspaper that serves the community. "It has begun to attract new businesses as well." Among some of the newcomers are small manufacturing units such as U.S. Motors, a manufacturer of automobile parts.

Both Bridgeport and Milford are experiencing considerable growth in housing, residential as well as commercial. Shelly Rasmussen of the Greater Bridgeport Planning Council said Bridgeport is the leader in the state in terms of growth in residential housing units.

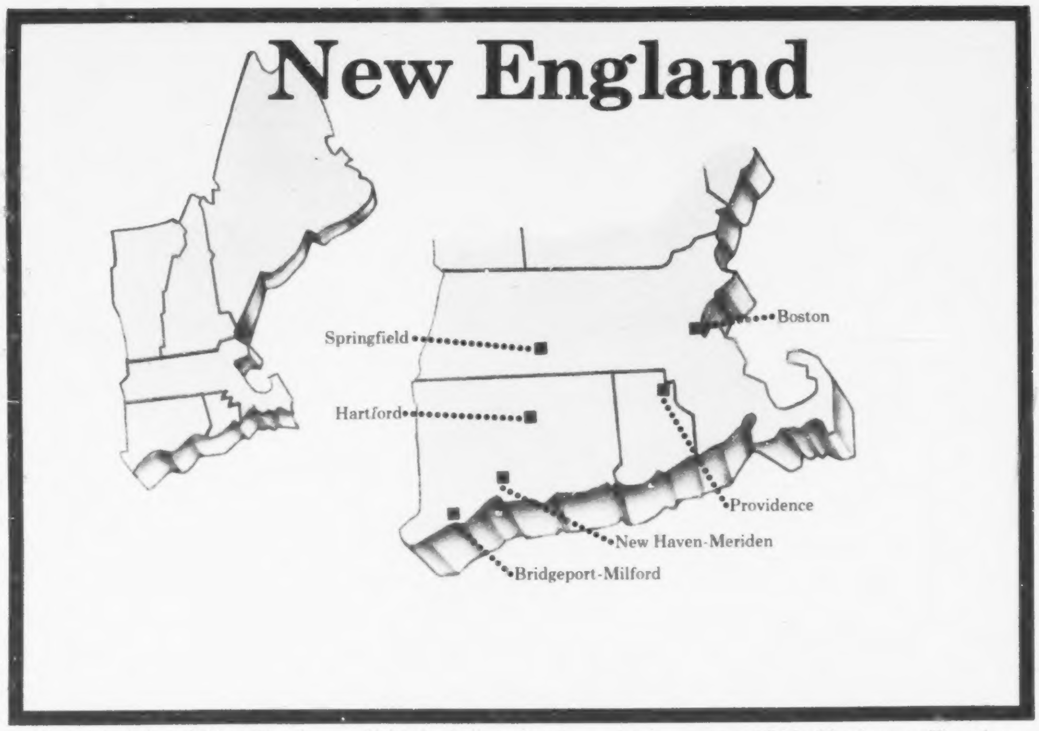
New England



Of course, Bridgeport sits amidst one of the most affluent suburban pockets in the nation—Fairfield County—and this has, in part, helped direct a great deal of retail activity to the area. Both Bridgeport and Milford have the advantage of being strategically placed in terms of transportation.

Bridgeport has good access by highway,'as well as water, and posesses an airport that is consistently increasing the volume it handles. The Long Island Ferry has installed a second boat to service the area. Similarly, Milford sits adjacent to Interstate Hwy. 95 and the Boston Post Road, making it an ideal location for shopping malls.

The Bridgeport market is served by two daily newspapers and 12 radio stations, including four am stations. There is one tv station originating in the market, in addition to broadcast spillover from other areas.

Hartford, Conn.

Population '80	715,923
Rank	60
Est. income	$12,220,547,000

Deregulatory actions that allow insurance companies to become involved with businesses other than insurance have helped spark a commercial and office building boom in Hartford.

While renovation of existing structures in downtown Hartford has picked up over the past four years, there has been almost no new building in the city for about 15 years.

This year, however, at least four major office structures have been completed, representing more than 1.8 million sq. ft. of new office space and at least 100,000 sq. ft. of new downtown retail space.

In addition, Hartford and its surrounding communities are considering proposals for at least 20 new office complexes. The recent completions and proposed new buildings have been spurred by the insurance companies' entry into the real estate and construction business, as well as the continuing relocation of corporate headquarters to Connecticut.

Among the recently completed office buildings are One City Place, an office complex being completed in two stages. The first stage would provide 786,000 sq. ft. of office space, while the second would produce an additional 230,000 sq. ft. Urban Investment & Development, a Chicago-based subsidiary of Aetna Life & Casualty, and Bronson Hutensky are the developers.

Another recent building is One Commercial Plaza, developed by Chase Family Ltd. and Olympia York of Hartford. The project includes 674,000 sq. ft. of office space and 21,000 sq. ft. of commercial space.

Another Chase/Olympia York project is One Corporate Center, opened in 1981, which has 384,000 sq. ft. of office and 23,000 sq. ft. of retail space.

According to the Hartford Chamber of Commerce, projects representing an additional 2.2 million sq. ft. of new office space and about 600,000 sq. ft. of office renovation are being considered.

Further, proposals for about 600,000 sq. ft. of new retail space have also been submitted to city authorities. In addition, plans for 523 new housing units are being considered, as well as hotel construction representing 1,250 new rooms.

Hartford has also appointed a committee to study the feasibility of building a new convention center in downtown Hartford. The existing Civic Center Coliseum, which closed down for almost two years after its roof caved in during the snow storms of January, 1978, remains the only major convention site in the area.

According to the Connecticut State Department of Revenue Services, retail sales in 1982 in Hartford reached $869.7 million from 10,251 retail establishments. In New Britain, retail sales reached about $200 million from 4,024 retail outlets, while Bristol had retail sales of about $180 million from 3,635 stores.

The area is served by one daily newspaper—the morning *Hartford Courant*. The market has four tv stations, four am and nine fm radio stations and two cable services.

New Haven-Meriden, Conn.

Population '80	500,474
Rank	85
Est. income '82	$8,028,324,000

As recently as 1980, New Haven—even in rosy days associated with Yale's ivy halls, rather than a thriving economy—remained hopeful, but far from assured, that it could find the magic formula for business revitalization and large-scale urban renewal.

Given its industrial and manufacturing backbone, New Haven—indeed, the entire state of Connecticut—felt the brunt of the 1970s recession and entered the 1980s in need of new rivers of employment, as well as resources for rebuilding.

Today, according to Doug Marsh, president of the Greater New Haven Chamber of Commerce, things are looking up. First, the downtown area has undergone a series of facelifts; and less cosmetically, the deeper seeds for economic restructuring are being sowed.

"Things are much, much improved," Mr. Marsh says. "There is a buoyancy in the business community, particularly among business leaders, concerning both our future and the recent past."

Among other things, New Haven is receiving positive RSVPs for corporate relocation into the area: Bristol-Myers Co. plans to install extensive research and development facilities over the next seven years, and Saab-Scania of America, located in nearby Orange, has committed to building a truck facility.

In addition, Mr. Marsh says, downtown New Haven is stepping out anew. The Rouse Corp., which most recently replenished South Street Seaport in Manhattan, has contracted to rebuild a downtown shopping mall. Key retailers, such as Macy's, have restated their New Haven commitment.

New Haven's theater district—a critical training ground for not only Broadway plays but off-Broadway talent—has also been overhauled. A refurbished Schubert Theatre is scheduled to open in December, with a new Palace Theatre (formerly the Roger Sherman Theatre) not far behind. Union Railroad Station has been renovated to the tune of $28 million; another $30 million has been plowed into the rebuilding of Yale-New Haven Hospital. Next on the agenda is a similar rehabilitation of the Temple Medical Center.

The list, Mr. Marsh maintains, goes on. Downtown shopping areas adjacent to Yale are receiving new sidewalks; condominiums are sprouting. Not surprisingly, he says, the renewed downtown spirit and renovated space has attracted lawyers, accountants and other professionals.

Just who is behind all this activity? According to Mr. Marsh, Yale University and the Knights of Columbus, whose headquarters are in New Haven, have been particularly helpful. But, he stresses, so have quite a few private investors, whose spirit and commitment to New Haven "is like nothing I've ever seen.

"The town commands a lot of loyalty and caring," Mr. Marsh says. Yale itself boasts an aura of pride and tradition; so much so, Mr. Marsh says, that people who have been associated with Yale, in whatever fashion, will return with families and careers in tow. Yale also contributes a heterogeneous and international flavor to the area, given its far-flung pool of professorial and student talent.

As for neighboring Waterbury—once known as the "Brass Capital of the World"—it too feels happier, but only after some brutal years. Blitzed by the recession, Waterbury has made inroads in broadening its economic base from manufacturing and heavy metals, and has begun sustained downtown redevelopment.

Equally important, the unemployment rate has dropped from its mid-1970s high of 14% to 16%, and now hovers at 5.7%. The drop reflects the city's gradual recovery from the collapse of the heavy metals industry—Waterbury's mainstay.

Hard times were epitomized by Anaconda Corp.'s relocating several of its divisions to suburban Chicago and by other such corporate desertions. Waterbury fought back, however, principally through the formation of the Naughatuck Valley Development Corp., which in one of its more notable coups bought the vacated premises of the Chase division of Century Brass for $1, and renovated it with the help of an Economic Development Agency grant and a grant from the Connecticut Economic Development Agency.

Today, the restored premises are 65% occupied and have created some 700 new jobs.

As for Meriden, it has overcome problems festered by the Meriden Mall's being abandoned by such key tenants as Barker's Discount Store and Stop & Shop supermarket. The good news is in construction, namely a photographic joint venture between Fotomat Corp. and Konishiroku Photo Industry of Japan on Interstate Hwy. 91.

Serving the New Haven market area daily is the morning *Journal-Courier* and the evening and Sunday *New Haven Register*.

The area is also served by three fm and three am radio stations, and a variety of cable programing.

Providence, R.I.

Population '80	618,514
Rank	67
Est. income '82	$7,994,318,000

If Providence has appeared to be left out of the action that nearby Boston has enjoyed over the past several years, then appearances are truly deceiving, said Ken Orenstein, executive director of the Providence Foundation, a development coordinating committee. It's not that nothing had been happening in Providence before,

---

Rural area growth tops cities

By David Snyder

A new analysis of the 1980 U.S. Census shows a quiet shift going on in the U.S. population. Rural regions, it seems, are growing faster than metropolitan areas. Many say this flight from urban life has been so unexpected that it has caught a lot of people off guard, including some population experts.

It has hardly surprised Calvin Beale. Mr. Beale, director of population studies at the U.S. Department of Agriculture, spotted the trend in 1970 and is recognized as the first to look into it.

"Almost any adult in the U.S., in any professional capacity, whether it be advertising or marketing . . . lived in a set of decades in which if there was one axiom that seemed to be true, it was that population flowed from rural to urban," says Mr. Beale. "People weren't looking for changes, but any specialized study over the years made it clear that things were going to turn around."

Many of the former city dwellers, the statistics suggest, are young people in search of independence and less structured living. One result is a renaissance in independent entrepreneurial activity in such fields as bed and breakfast hotels and specialty stores. "People are not maximizing income; they are maximizing satisfaction," Mr. Beale says.

The study that reinforces Mr. Beale's theories was released this year by the Rand Corp., which used Mr. Beale's self-styled technique to analyze the 1980 U.S. Census, further spotlighting the nation's new romance with country living. For example, the Rand study showed the rural areas of New Hampshire and a large portion of the Ozark and Rocky Mountain areas were growing at twice the national average, while many metropolitan areas in the same regions were growing at below the national rate.

That Mr. Beale was able to sense a trend so early on only attests to the unique insight he brings to the analysis of population data. In his 30 years of tracking population patterns for the USDA, Mr. Beale has developed unorthodox techniques for pinpointing shifts in rural and metropolitan living that has attracted the attention of business executives seeking more precise methods of market analysis. His methods impress marketers because he looks at the data in terms of integrated social and economic units rather than traditional political boundaries.

His approach disregards accepted geographic boundaries such as state lines when dividing the U.S. into measurable demographic regions. Instead he carves the 50 states into about 500 subregions, each with its own homogenous economic, geographic, cultural and historical characteristics. For broader analysis, he combines the subregions into 26 larger regions. To get a sense of how the 500 subregions should be drawn, Mr. Beale not only relies on census data, but also on studies done by local colleges and universities.

But Mr. Beale's statistical analysis is accompanied by what the Rand Corp.'s population expert, Peter Morrison, calls a "type of observation and insight," which Mr. Beale acquires by traveling to hundreds of the nation's small towns and villages in search of common demographic characteristics and changing population trends.

Over the past three decades Mr. Beale has traveled to more than 1,700 of the nation's 3,100 county seats, talking to local USDA officials, area real estate agents, members of local chambers of commerce and even, on occasion, individual shopkeepers. It's all in his quest for new data for his analysis.

To keep pace with population changes, he travels to about 50 new counties a year. "I still have 1,400 to go," Mr. Beale says.

The technique he devised for use by the USDA to administer government programs is also catching on in the private sector. Following the release of the Rand Corp. study, Mr. Beale's office received dozens of inquiries from corporate marketing departments requesting information about his analysis.

Barry O'Brian, manager of merchandising and planning with Phillip Morris Inc., is looking towards Mr. Beale's technique as a means of breaking down market segments into smaller, more precise units.

"In 1950 it may have been entirely acceptable to look at large blocks of population and group them together, but today that's entirely unacceptable," Mr. O'Brian says.

Most marketing analysts break the entire country into 90 regions, but he adds that the regions are "usually too large to make a statement about the area."

As more people find rural living attractive, Mr. Beale says that he expects a sustained movement into smaller towns and villages.

As for himself, a life-long Washingtonian, Mr. Beale says he has no desire to abandon his urban life style. "The country is a nice place to visit," he says, "but I wouldn't want to live there." AA

David Snyder is a researcher/reporter in ADVERTISING AGE'S *Washington bureau.*

but "now things are visible. There's been a lot of groundwork completed," he explained, which makes the sudden burst of construction and development possible.

The largest of these is the Capital Center Project. The project, said Charlene Hall, executive director of the Capital Center Commission, is an effort to remove the "Chinese Wall" that has cut across downtown Providence since the railroad first ran tracks past the base of the state capitol. It is a $120 million project to relocate the railroad tracks and open 60 acres of prime downtown land for development.

Construction has begun and the track work is expected to be completed in 1984, Ms. Hall said. After that, the Capital Center Commission will supervise the development of the newly opened land. Guidelines for that development have just come into place, she said.

A second major project that promises to open even more area to future development is the newly announced harbor revitalization project, combining city, state and private resources. The harbor project involves 4.5 linear miles of Providence waterfront and, depending upon how far inland you calculate, 100 acres or more of prime waterfront property would be opened for development.

Funding is already in place for highway changes designed to help facilitate access to portions of the waterfront project and eliminate obstacles to waterfront development, noted Mr. Orenstein. One private development, Richmond Square Technology Park, is a $6 million project currently under construction.

The over-all project, expected to take seven to eight years to complete, may generate about $125 million in private development in addition to state, federal and city funds that would be put into the road and harbor work. Parts of the project are to be essentially residential. Other sections, particularly around the downtown area, are targeted for mixed residential and commercial use, while other portions of the project would involve recreational facilities.

While the harbor project and Capital Center are the biggest projects going, there is other development, too. Davol Square is an old rubber factory that has been turned by private developer Rob Freeman into a marketplace similar to Boston's highly successful Quincy Market. The restoration project includes offices and a retail arcade.

LaSalle Square is the last remaining urban renewal project in downtown Providence, noted Stanley Bernstein, director of the city's department of planning and urban development. The city's contribution to the project is an auto-restricted zone and the centralizing of public transportation.

Three private parties have expressed interest in further developing the parcel, which adjoins the Civic Center. Although a similar proposal fell through several years ago, this time Mr. Bernstein expects some sort of hotel-office-parking complex will be completed.

The Civic Center itself is suddenly facing stiff competition from the new civic center in nearby Worcester, Mass., the Centrum. The Providence Civic Center reports a significant drop in rock concerts, in particular, since the opening of the competing facility.

If the Civic Center is finding the going rough, Rhode Island's major banks appear to be prospering. Both the Oldstone Bank and Fleet Financial are building new office towers, and preliminary reports say that leasing is going along quite well, noted Mr. Orenstein.

Over-all, the service sector of the economy is going so well that there is something of an office boom in downtown Providence, added Ms. Hall. Rhode Island's service economy is doing very well with banks, insurance companies and advertising agencies showing significant growth.

The weakness, conceded the latest official report, is with the industrial sector. For instance, the anticipated boom along the Rhode Island coast to service offshore oil drilling in Georges Bank has failed to materialize as test wells have come up dry.

Tourism was up this past summer as beautiful weather and the America's Cup races brought visitors to the Rhode Island coast, but tourism won't replace the kind of economy that an oil industry would have generated, report local businessmen. And now even the America's Cup race won't be returning to Rhode Island, since the cup has been lost to Australia.

Providence has two daily newspapers, two network tv affiliates (plus one affiliate in New Bedford, Mass.), one independent station and one public broadcasting station. In radio, Providence has seven am and six fm stations, plus others in nearby towns. Additionally, it has two cable tv services, plus many others serving nearby towns and counties.

Springfield, Mass.

Population '80	515,259
Rank	83
Est. income '82	$5,085,049,000

Five years of construction and urban renewal in downtown Springfield, Mass., are finally paying off. "We're seeing the results of over one-quarter of a billion dollars in investment," said Gerald Hayes, vp, economic development with the Springfield Chamber of Commerce.

Those developments include One Financial Plaza, for Bank of Boston; Center Square, for the Springfield Institution of Savings; a new federal building and court house; a new downtown parking facility and a home for the area's resident theater company; State West; Morgan Square apartments; the rehabilitation of five buildings along Main St., and renovated Symphony Hall.

It's about time, said a lifelong Springfield businessman who watched the city's downtown deteriorate for years as business fled to suburban shopping malls. The revival began several years ago with Baystate West, a retail and office center including a Marriott Hotel. That project stood alone, however, as the downtown continued to deteriorate. One of the two remaining major retailers, Forbes & Wallace, finally went completely out of business, its building standing empty.

Now a $50 million project is slated for the Forbes & Wallace property adjoining Baystate West, situated in the center of all the new development. Included in the development are plans for a 300-room Sheraton Hotel.

Following Baystate West was the new Springfield Civic Center, but the facility continues to struggle. "It appears to be living on rock concerts and wrestling," noted an advertising executive at Springfield-based Milton Bradley Co. Unfortunately, as far as rock concerts go, the opening of The Centrum, Worcester's new civic center about 40 miles away, has attracted quite a bit of that business as well. The Springfield Indians use the facility for semipro hockey, but the National Hockey League Hartford Whalers play only 30 miles south, directly along Interstate Hwy. 91.

The Civic Center "is doing reasonably well," said Mr. Hayes, "although it is not in a profit mode." Basketball, however, may help the Civic Center. The Tip-Off Classic opens the college season and is held at the Civic Center, as are the finals of the National Collegiate Athletic Assn. Division II basketball tournament each spring. Another event, the Hall of Fame basketball game, brings two National Basketball Assn. professional teams to town for an exhibition game that caps a week of events and festivities.

In fact, the Basketball Hall of Fame will be moving to its new site in downtown Springfield, along the Connecticut River. Previously, the national attraction had lived in relative obscurity on the campus of Springfield College, where the game was invented. The new location of the Hall of Fame is expected to generate increased tourism in the city's center.

Combined with the environmental restoration of the Connecticut River and the creation of Riverfront Park alongside Interstate 91 in downtown Springfield, visitors will have more recreational activities to choose from. Heritage Park, part of a statewide system of urban parks, is also planned for the same area.

Industry is making a comeback inthe area. A major Digital Equipment Corp. facility on the old Springfield Armory grounds employs approximately 1,000 people. Relocating from Atlanta to Springfield is Sewell Plastics, added Mr. Hayes.

To accommodate anticipated industrial activity, three new industrial parks are being developed.

Meanwhile, to boost further interest in the city, a two-year promotional effort has been launched. The theme of the multimedia campaign is "Downtown Springfield. We've got it all together." The campaign is being funded primarily by Massachusetts Mutual Life Insurance, Albert Steiger Co. (the remaining major downtown retailer), the Springfield Institution For Savings and the Fontaine Construction Co.

The city will have a new mayor, Ritchie Neal, and the chamber of commerce is optimistic that under his new administration the momentum of development will continue.

Springfield is served by three tv stations, 12 radio stations (five of them am), two weekly papers, two daily newspapers—the *Springfield News* in the evening and the *Republican* in the morning—and Continental Cablevision of Springfield.

The markets that stand above the crowd

Middle Atlantic

Albany-Schenectady-Troy, N.Y.

Population '80	835,880
Rank	55
Est. income '82	$7,551,154,000

The Albany, Schenectady and Troy area is a market where the old is giving way to the new in the midst of slow, steady growth.

The market, dominated by Albany, New York's state capital, and the industrialized cities of Schenectady and Troy, is at the confluence of the Mohawk and Hudson rivers. Immediately to the north are the Adirondacks; looming to the south are the Catskills.

The area, which grew only 3% in population in the past decade, has undergone major political and media changes recently, including a new mayor in Albany, a power position in that city's political structure and wholesale changes in media ownership.

Albany's longtime Mayor Erastus Corning died last summer after serving for more than 40 years. He was succeeded by Thomas M. Whalen III, president of the city council.

Mayor Whalen's policies essentially have followed those of his predecessor, whose Democratic political machine was characterized in most quarters as benevolent.

Ownership in the broadcast industry in the Albany market could be likened to a game of musical chairs. WRGB of Schenectady, once NBC's oldest affiliates, switched to CBS in September, 1981, after being courted for some time by CBS.

General Electric sold WRGB this August to Unicom Inc., which includes former CBS president John D. Backe among its investors. GE also sold its two local radio properties, WGY (am) and WGFM (fm), to Sky Communications in September.

When WRGB switched to CBS, the CBS affiliate at the time was WAST-TV, owned by Viacom International. WAST became the NBC affiliate and changed its call letters to WNYT.

Employment in the area is heavily tied to state government, which accounts for half of the 97,900 local, state and federal government employes monitored by the state's Department of Labor in the five-county Albany market. The unemployment rate was 6.7% in September, compared with 6.8% a year ago.

The slight improvement is attributable to a healthy nonmanufacturing sector, including finance, insurance, real estate and transportation.

The state government, on the other hand, could take little credit. In May, it laid off 3,600 workers in the Albany area and 9,900 statewide.

One company that has been hiring is Coleco Industries, which has a home computer manufacturing plant in Montgomery County near Amsterdam. Ford Motor Co. is rehiring for its assembly plant in Green Island in Albany County.

General Electric Co., however, has dropped 1,500 this year from its payroll in its giant Schenectady operation, effecting a rise in unemployment from 6.4% in midyear 1982 to 8.2% a year later in that city.

Most construction in the area is taking place in and around Albany. Crossgates Mall, located on the border between Guilderland and Albany, is scheduled to open in March, with anchor stores: J.C. Penney, Caldor, Filene's and Jordan Marsh.

Tentative plans at Colonie Center, now the area's largest shopping center, located several miles northeast of Crossgates, call for the expansion of Macy's and the addition of an unnamed major department store and a mall section for small shops. Expansion plans would bring total square footage to 1.2 million.

Also in the Colonie area, located near Albany County Airport midway between Albany and Schenectady, construction is under way on a 300-room Marriott hotel.

Albany County officials also have proposed a convention center in the Colonie corridor. Construction is to be completed June, 1984, on City Center, a convention center with a 2,500-seat auditorium in Saratoga Springs, about 35 miles north of Albany.

In Schenectady, 16 miles northwest of Albany on the Mohawk, work continues on the Plaza 400 downtown revitalization project. Supported by public funds, the program primarily involves facade improvement in a three- to four-block sector.

Proctor's Theatre, just off Canal Square street mall in downtown Schenectady, continues to get a new facelift.

Built by vaudeville king F.F. Proctor for $1.5 million in 1926, Proctor's just completed a $1 million fundraising drive that is helping to finance construction that includes two new marquees—both patterned after original signage—and an orchestra pit with an hydraulic lift for a new Wurlitzer organ.

One of the big industries in Troy, located on the opposite side of the Hudson River from northern Albany, is Rensselaer Polytechnic Institute (RPI), which has begun to attract industry to the area as part of its new three-part program to bring together academia and corporate America.

National Semiconductor recently just moved to Rensselaer Technology Park, where 130 out of a planned 400 acres are developed. The total acreage at the industrial park south of the campus on the bank of the Hudson is 1,200, most of which will remain recreational. RPI faculty serve as consultants for a number of companies in the park.

An old-fashioned newspaper war is looming in southern Saratoga County among Hearst Corp.'s combined morning *Albany Times-Union* and evening *Knickerbocker News*, the evening *Troy Times-Record*, the morning *Schenectady Gazette* and Gannett Co.'s much smaller evening *Saratogian*.

The aggressors in the war are the Albany papers, which just set up a news bureau in Ballston Spa south of Saratoga Springs.

Besides the tv stations and newspapers, the area is also served by three cable companies and eight am and eight fm radio stations.

Allentown-Bethlehem, Pa.-N.J.

Population '80	635,481
Rank	66
Est. income '82	$6,374,559,000

Billy Joel's hit song "Allentown" put the Allentown-Bethlehem-Easton area on the map as a symbol of smokestack America being left behind in a rapidly changing world economy. But the city fathers in the Lehigh Valley are not passively waiting for an economic miracle.

Drawing on the already strong apparel-manufacturing base in the area, Bethlehem is hoping to transform idled Bethlehem Steel manufacturing facilities on the south side of town into a manufacturers' outlet shopping district similar to the thriving outlet center in Reading, Pa.

Last summer, the city brought in consultant Iris Ellis, who specializes in such projects and who gave the concept favorable prospects for success. Now the city is searching for a developer and is ready to help with financing and site improvements.

Allentown, whose fate historically has been tied to Bethlehem Steel and Mack trucks, has made steady progress in diversifying its economic base. Particularly promising is Bell Labs' plan to build a $100 million high-tech facility in Lehigh County.

Bell Labs is now in the process of buying land from the county, and the project should take four to five years to complete, initially employing several hundred and eventually providing jobs for more than 1,000.

Easton is focusing its efforts on at-

tracting small businesses, such as Chocolate Cornucopia, a marketer of candy molds for the consumer market, which opened a manufacturing facility in Easton in July. To boost its efforts to nurture small business, Easton is counting on the Ben Franklin Partnership—a state-sponsored program centered at Lehigh University.

The program, one of four Ben Franklin projects in Pennsylvania, aims to attract new business through state funding matched by private contributions and donation of services. In Easton, $5 million in public and private funds will be used to develop a small business incubator, giving new enterprises low-cost space and other assistance during the startup phase.

The efforts to build new economic strength in the Lehigh Valley come in response to a recession that hit the area hard, with unemployment in the first half of 1983 going as high as 16% before stabilizing between 10% and 11% this fall. Bethlehem Steel, which has its headquarters in Bethlehem and several manufacturing facilities in the area, suffered a $1.4 billion loss in 1982, but a substantial portion of that reflected writeoffs for closing its Lackawanna, N.Y., facility. No further major plant shutdowns are expected at Bethlehem.

Meanwhile, the city of Bethlehem is trying to market, through Philadelphia-based Jackson Cross Realtors, a two-acre vacant site across from the recently completed 50,000-sq.-ft. Butz office building downtown.

Plans are for the site to be a mix of office, retail and first-class residential space. And at Bethlehem Business Park, a 100,000-sq.-ft. building is under construction for Guardian Life Insurance, which relocated its headquarters to Bethlehem from the New York area.

Bethlehem's downtown center doesn't have a strong retail trade, being eclipsed both by suburban malls and by Allentown, which 10 years ago converted a four-block section of its downtown core into a mall with canopy-covered sidewalks and two anchor stores: Leh's, a local department store, and a five-story Hess', the first department store in that chain. But Allentown, too, is feeling the pinch of competition from the malls, the biggest of which is the Lehigh Valley mall to the north of the city.

In fact, one of the major construction projects in downtown Allentown is the conversion of the former Zollinger-Harnett department store into office space. Most of the construction in the area, however, is taking place in Lehigh Valley Industrial Park, where local developer August Zumas is constructing a 102,500-sq.-ft. office building, and Burron Medical (a manufacturer of surgical and medical equipment and a major local employer) is slated to begin construction of a 140,000-sq.-ft. plant in April, 1984.

Since 1980, Allentown has also seen the addition of two hotels: An 80,000-sq.-ft. Sheraton in Hanover Township and a $13 million Hilton hotel and conference center downtown. And in 1981, both Keebler and Pet Foods opened manufacturing plants in the area.

Easton, in addition to trying to nurture new small businesses, is working to make the area more attractive for existing businesses. City officials are trying to attain port-of-entry designation for Easton to help local companies that serve international markets—such as Binney & Smith, the Crayola crayon manufacturer headquartered in Easton, and Ingersoll-Rand, a producer of mining equipment. The port-of-entry designation would allow companies to purchase goods abroad, assemble them in the Lehigh Valley and ship them out again at advantageous rates from the Allentown-Bethlehem-Easton airport.

The newspapers in the market are the *Allentown Morning Call* and the *Morning Call Weekender*, along with the *Bethlehem Globe-Times* and the *Easton-Wilson Express*, serving daily. The area is serviced by two network tv affiliates, an independent and a noncommercial public educational station, eight fm and six am stations, and receives cable through Service Electric Cable TV and Sammons Communications.

Bergen-Passaic, N.J.

Population '80	1,292,970
Rank	31
Est. income	$15,487,863,000

Bergen County has remained a reliable alternative for businesses that want to be in the metropolitan area, but not in New York City.

Neighboring Passaic County has successfully survived the economic tide that swept industry southward in the 1950s and 1960s.

Located almost halfway between Boston and Washington and only miles from New York City, these counties share a strategic position that is enhanced by excellent transportation networks and a ready labor force.

Bergen County is the home of more than 3,000 corporate headquarters, most of which were lured to the former farmland by advantageous tax policies and pleasant suburban living.

Passaic County has recently been rediscovered by the business community. It is emerging as a viable commercial center. Taken together, two developments in Little Falls provide 65,000 sq. ft. of retail and office space.

Passaic developers, now building with an eye to energy conservation and environmental consideration, have impressed commercial interests with reasonable rental rates.

Both counties show a rise in taxable property for 1982. According to the state treasurer's office, Bergen property is valued at $31.4 billion, an increase of $2 billion from the previous year. Passaic's increase is listed at $461 million, for a total valuation of $9.6 billion. Bergen defied recessionary trends of the construction industry in 1981, when it issued 1,821 building permits, 511 more than it did in 1980.

The 1980 census revealed a population drop of 64,960 for the area since 1970. The median age is 34.8. Retail sales for the area topped $7 billion last year, $5.25 billion of this figure coming primarily from the shopping centers of Bergen County.

Pilot projects to preserve Passaic County's inner cities have begun to take effect. Older factories are being used for light industry and compact industrial parks. The quality of life in Paterson and Passaic, both former silk and mill centers, has taken on an international flavor with the accent on Hispanic culture. The cities' shopping areas are beginning to lose their shabby appearance, but they do not compete with the high fashion shopping centers beyond the city limits.

Development in the Meadowlands sports complex at the southern tip of Bergen County has already assumed explosive proportions. Called the most valuable piece of real estate in the world, it envelops 20,000 acres. The $360 million complex is home base for professional football, soccer, ice hockey and basketball teams. Harness and thoroughbred racing share a track.

The Hackensack Meadowlands Development Commission regulates planning and construction for the area once known as "swampland." Six residential developments, shopping, cultural and health facilities are to occupy 3,000 acres here, while 1[illegible]00 acres have been reserved for industrial, commercial and transportation use. Corporate and industrial growth has already begun as high-rise building competes with New York's skyline.

The Meadowlands is expected to be a resource for the 19 million people who live in a ring around it. Along with other parcels of land in the Bergen-Passaic region, it combines land and land reuse with imagination and design to provide the optimum benefit to the residents.

The area's growth stems from an apparent cosmopolitan approach among planners and people who live here as much as to a renewed pride in the state itself. Because growth has enabled a variety of economic and cultural facilities to find a home in Bergen and Passaic counties, residents agree that New York is still a nice place to visit, but only occasionally.

The Bergen-Passaic market is served by the evening *Herald-News* in Passaic and the evening *Record* in Bergen County. A variety of cable services are available, and the market has several radio stations, in addition to the radio and tv signals from the nearby New York market.

Buffalo, N.Y.

Population '80	1,015,472
Rank	40
Est. income '82	$8,916,002,000

The 1982 recession year hastened the decline of Buffalo's steel and auto industries. At the same time it accelerated the growth of its financial services, high technology and education sectors.

Two major employers, Bethlehem Steel Corp. and General Motors Corp., announced plant closings that affected thousands of workers. Other smaller industries went bankrupt or curtailed production and employment.

Yet other sectors prospered. Two regional savings banks became large, multistate thrifts. The University of Buffalo emerged as a major research center, and the computer boom brought prosperity to new companies.

At Bethlehem's Lackawanna plant, the end of basic steelmaking in 1983 meant permanent layoffs for 7,300 employes. The plant, once the world's third largest steel facility, will shrink to two finishing operations employing 1,300; at one time it had 22,000 employes.

State officials estimate the shutdown could affect as many as 8,000 jobs in related industries.

Republic Steel Corp. mothballed its Buffalo plant in 1981. Analysts predict the 2,500-worker plant will be permanently closed or sold when Cleveland-based Republic Steel combines with LTV Corp.'s Jones & Laughlin Steel subsidiary.

General Motors Corp. announced in June that it will close its foundry in Tonawanda, a decision that will affect 2,200 workers and could cause problems for the nearby Chevrolet Motor plant, which employs 3,000. GM now employs 16,000 in the area, with 3,100 remaining on layoff.

Ford Motor Co.'s stamping plant, which will make parts for Ford's new Tempo/Topaz models, has shaken off the recession's effects and now employs 2,700, with another 900 on layoff.

Several chemical and energy businesses also have suffered. Mobil Corp. closed its 250-employe refinery in 1981, and Ashland Oil Co. closed its 300-employe Tonawanda refinery in 1982. The Carborundum Co. restructured its Niagara Falls operations, closing one abrasives plant and selling another. Carborundum, with 2,000 employes in the area, has lost 1,250 jobs since 1982. With plans to concentrate on high technology materials and processes, Carborundum opened a $700,000 microcircuit plant in 1983 and announced it will spend $7.7 million on advanced ceramics development.

While heavy industries faltered, two Buffalo savings banks progressed. Acquiring more than a dozen banks in four states, they emerged as industry-leading thrifts prepared for the coming of national banking.

Buffalo Savings Bank changed its name to Goldome Bank for Savings. Its $10.2 billion in assets, New York and Florida banking network and national subsidiaries made it the country's second-largest savings bank. It recently opened a $55 million headquarters on Main St., and announced plans to go public in 1984.

Erie Savings Bank, now Empire of America FSA, increased its assets to $6.7 billion through mergers with banks in Florida, New York, Texas and Michigan. Empire, whose Metroteller electronic banking subsidiary is the nation's largest, in October opened the first four of 80 financial service centers that will sell real estate, insurance and securities. Empire is also planning to go public.

Main St.'s revitalization has been aided by Goldome's new headquarters, the new $16 million Norstar building across the street and the adjacent 400-room Hyatt Hotel, a $38 million project that is nearing completion.

The area surrounded by the three buildings has been designated Fountain Plaza, but that plaza will be just one part of a 1¼-mile, $42 million pedestrian mall that will be served by a 6.4-mile rapid transit line now nearing completion.

The mall has won federal and state funding approval and is being designed.

The University of Buffalo is becoming a major research center, which UB officials say will boost the area's high technology sector. UB is preparing a state-funded medical instruments research center, which has received $1.7 million in private research contracts.

The Calspan Advanced Technology Center has agreed to run another research laboratory with UB in Calspan's Cheektowaga plant. Calspan

Paramus claims mall leadership

By Madelyn McCoy

There is one secret that Macy's couldn't keep from Gimbels. And it's apparent to everybody in northern New Jersey. Paramus, once an open-field community in Bergen County, has made inroads at stealing New York City's thunder by becoming a mecca for shoppers. It is the shopping mall capital of the world, or at least that's what its boosters like to call it.

Five major shopping centers dominate Paramus, and all lie within a five-mile radius of the center of Bergen County. Each of these malls feature one or more of the most prestigious names in retailing. These are stores that followed their customers when they moved across the Hudson River from New York City, Brooklyn and the Bronx during the post-World War II exodus.

The malls each sport a distinctive personality, but all exude an air of the affluence. Riverside Square boasts Bloomingdale's and Saks Fifth Avenue. B. Altman and Lord & Taylor anchor the Fashion Center, while Abraham & Straus and Sears attract middle-income shoppers to Paramus Park.

Older malls compete successfully for customers. Sterns Bros., which long ago closed its New York City doors to concentrate on the suburban market, is the major retailer at Bergen Mall. Across the highway, but connected by a walkway, is Caldors, retailing's new kid on the block.

The first mall to come to Paramus is located at the cloverleaf intersection of Routes 4 and 17, two highly trafficked highways close to the Garden State Parkway. Here, at Garden State Plaza, Gimbels competes with Bambergers, a member of the Macy family and New Jersey's largest department store chain.

Three of the malls have close to 100 stores; one has 110 stores. Many are branches of specialty stores that once graced main streets in the more affluent towns in Bergen County.

Retail sales figures for Bergen County, certainly helped by these malls, are staggering. Sales in 1982 reached more than $5.25 billion. Per household retail sales in the county top $12,000 a year.

Shopping in Bergen is not limited to the residents, however. Customers flock to Paramus from Westchester and Rockland counties in New York, from New York City and from Hudson, Essex and Passaic counties in New Jersey. The lure for New Yorkers is free parking. But more important is that New Jersey does not place a sales tax on clothing, as does New York.

Within this setting, mall promotions abound, and a number of malls maintain permanent attractions for the customers. One has a resident theater, another an international food bazaar. By the time the mall closes at 9:30 p.m., the air has become permeated with a multinational aroma.

Major department stores vie for the shoppers' palates with myriad mall restaurants. Many specialize in one form of cuisine or another. Crepe restaurants are popular.

Mall retailers are not the only people who experience the pleasant ring of the cash register in Paramus. The highways that lead to the malls are edged with a large number of specialty stores that attract buyers with advertised specials or unique merchandise. Many are discounters; they feature identical brands at lower prices. Others carry a larger assortment of a single item, carpeting, for example.

Shoppers need cars to get to Paramus, and car shoppers can probably find their dream car there. Auto sales in Bergen County total $700 million yearly, and many of the dealers are located on Routes 4 and 17, in Paramus. Bergen County dealers outsell car dealers in 15 states.

Still, it is not surprising that shopping malls have been good to the taxpayers of Paramus. The municipality enjoys a low tax rate, even though it has also experienced enormous residential growth, which requires necessary but expensive services and schools.

And Paramus continues to draw shoppers to its boundaries. Even the $100 million shopping center planned in the Meadowlands, located at the southern end of Bergen County, does not dampen the enthusiasm of retailers in Paramus.

Madelyn McCoy is executive editor of Worrall Publications, Maplewood, N.J.

will contribute $3 million to the 30-man laboratory.

UB in October announced a $1.1 million gift to build a research center near its Amherst campus. The university also is constructing three academic buildings worth $20 million on that campus. The Main St. campus is being transformed into a health sciences center, with three construction projects worth $68 million.

Buffalo lost a newspaper in 1982, when the morning *Courier-Express* ceased publication. Its competitor, the *Buffalo News*, added a morning street edition. The *Niagara Gazette* in Niagara Falls switched from evening to morning publication.

The market is also served by five tv stations, five cable tv services, 11 am and 11 fm radio stations.

Harrisburg-Lebanon-Carlisle, Pa.

Population '80	555,158
Rank	76
Est. income '82	$5,776,548,000

As a former railroad town that survived the demise of that industry, as well as the closing in the mid-1960s of a large Air Force base that had been considered vital to the local economy, Harrisburg is a city with a good track record for making the best of a bad situation. Its current challenge is to transform the downtown section into an attractive cosmopolitan hub for regional development in central Pennsylvania.

The city's efforts toward that end are aided by the employment stability Harrisburg enjoys as the state capital. The Commonwealth of Pennsylvania has 37,000 employes, and trade associations, lobbying groups and a large government-associated professional community have helped keep the city relatively insulated from the recession, which devastated much of the state.

Harrisburg's unemployment rate at the end of 1982 was 6.2%; by the fall of 1983 it had edged up to 6.7%, but historically there has been little fluctuation in the rate. It has usually been below the national average.

Other major, equally dependable employers in the area are the U.S. Naval Supply Depot, which employs 6,000; the New Cumberland Army Depot, with 3,000 employes, and the U.S. Army War College, the army's premier strategy school.

The problem now is that much of the residential, retail and—recently—office development, has taken place in the suburban areas, particularly the West Shore, leaving downtown Harrisburg deserted after 5 p.m., when government offices close.

That poses a problem for regional development groups, which are striving to further diversify the economic base by attracting new businesses to the three-county area; Dauphin County, home to Harrisburg; Cumberland County, which contains the growth-oriented West Shore, and Perry County, which doesn't have a traffic light within its borders.

One Harrisburg businessman said many prospective clients are interested in locating within the region until they see the downtown area, which desperately needs more retail development, cultural facilities and other amenities to "bring people to the center city and keep them there."

Some progress has been made, particularly in Harristown, a large sector of the downtown area south of the capitol complex targeted for a $500 million development program. The idea is that construction of two or three big anchor buildings would spark other private development in the area. Thus far, two important components have been completed. One is 333 Market Street, which houses the state's education department, other offices and specialty retailers on the ground floor. The other is Strawberry Square, which contains two floors of retail space topped by offices.

Pomeroy's, a local department store with a main branch downtown and a tie-in to Strawberry Square, is the only major retailer in town. But the Strawberry Square shopping center has touched off early stages of a retail revival of smaller shops along adjacent side streets, which had been lined with boarded-up storefronts.

Nevertheless, the major retail activity is still concentrated in the Harrisburg East Mall and the West Shore's Capital City Mall, where Hess's, a Pennsylvania-based department store chain, serves as the anchor store for both.

Other segments of Harristown that have yet to get off the ground are a convention center-hotel complex (which has been caught in political infighting over selection of a developer) and a third state office building, the construction of which is tied to a go-ahead on the convention center-hotel. Currently, the only major convention facility in the area is the Hershey Lodge and Convention Center, in nearby Hershey, headquarters of Hershey Foods Corp. and Hershey Entertainment and Resort Co.

Elsewhere, another important step toward improving Harrisburg's image is being taken. Site work has been done for a new airport terminal, which is now in the design phase. Major ongoing or planned construction and renovation in the Harrisburg area include:

- Construction of a 200,000-sq.-ft. headquarters building on the West Shore for Pennsylvania Hospital Insurance Co. The project began this fall and is scheduled to be completed in 1985.
- Expansion and renovation of Harrisburg Hospital at a cost of $20 million. It joins Hershey Medical Center (a research and teaching hospital affiliated with Penn State University) as one of the area's top employers.
- Construction of a new 155,000-sq.-ft. engineering and design complex for AMP Inc., a manufacturer of electronic components, which employs 5,500 people and has 26 facilities already in the Harrisburg area.

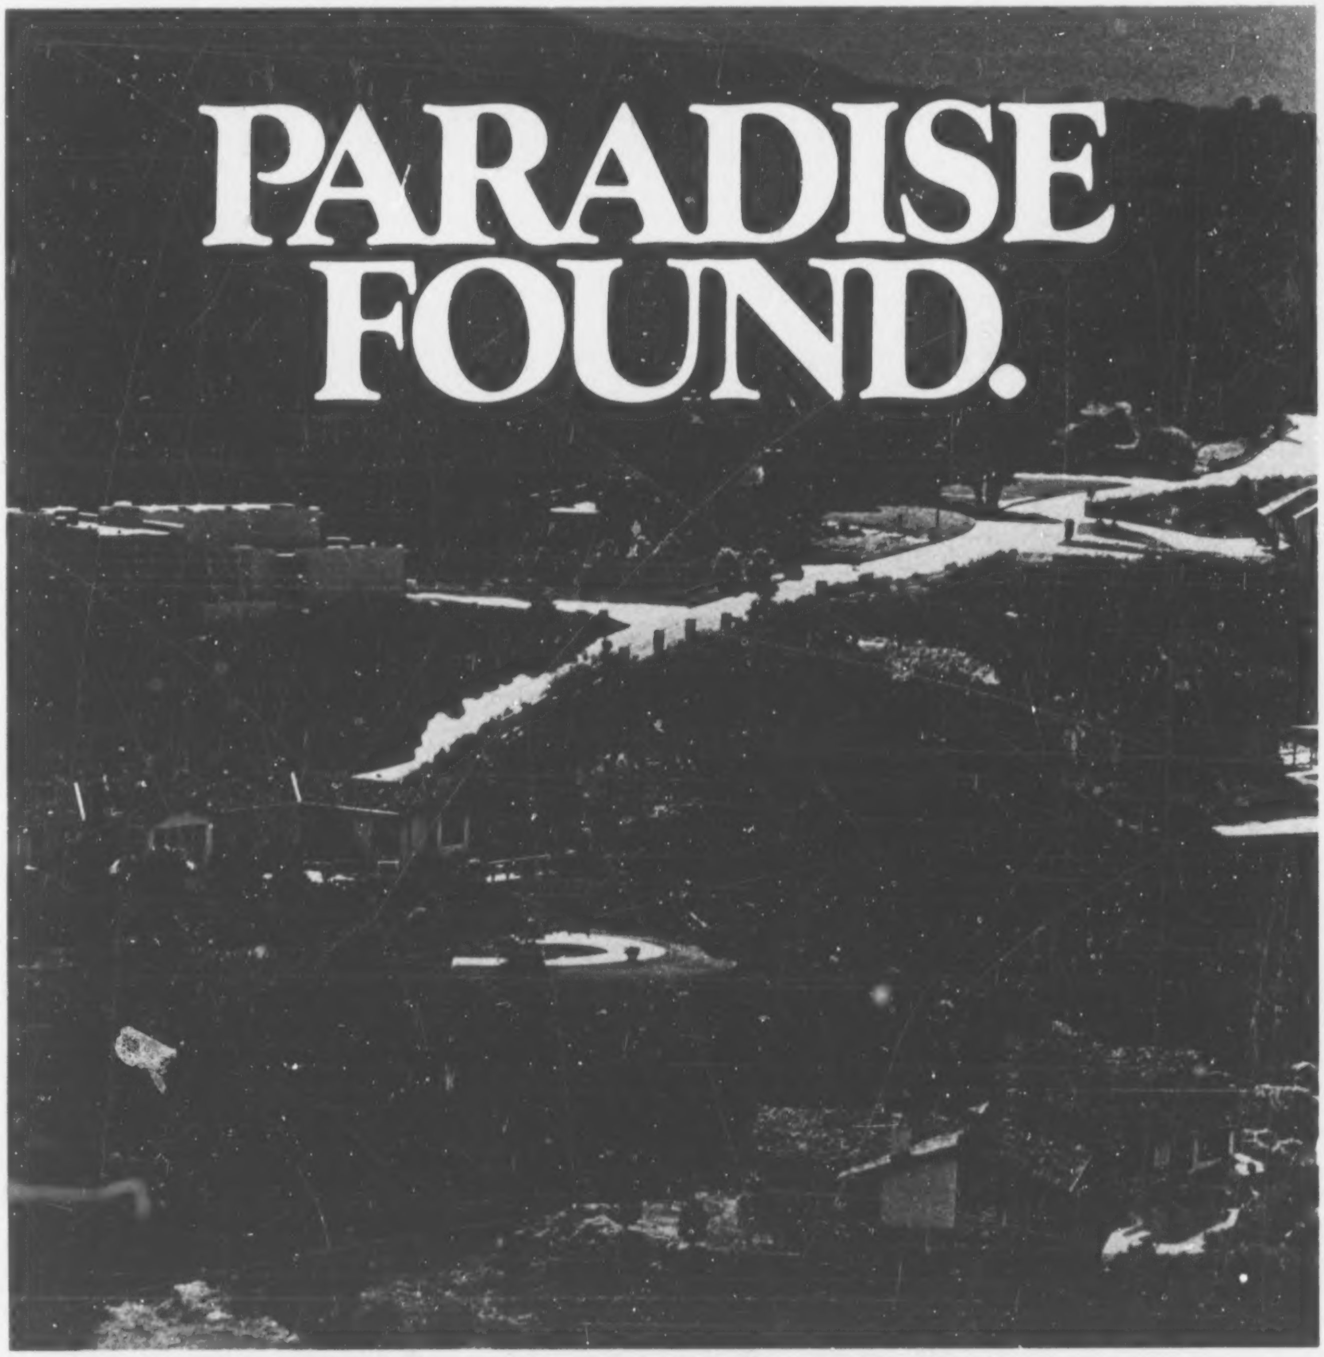
In the last three years, the city has succeeded in bringing in some new businesses. Tru-Temper Hardware relocated its national headquarters from Cleveland to Harrisburg, and American Waterworks Service Co., which owns several water systems in the state, located its headquarters in the area. Also, Owens Corning is taking over an old Libbey canning plant on the West Shore to produce Fiberglas building products.

Harrisburg has two daily newspapers and one weekly. The area is served by seven am and seven fm radio stations, five tv stations and eight cable tv services.

Jersey City, N.J.

Population '80	556,972
Rank	75
Est. income '82	$5,847,491,000

A seven-minute train ride from downtown Manhattan, Jersey City stands next in line to benefit from New



Santa Clara County holds the richest 1.4 million consumers in Northern California.

Fifty miles south of San Francisco lies a marketer's dream, the San Jose MSA (Santa Clara County). Its 1.4 million residents live in the center of what may be the largest concentration of New Money in America, money from high technology.

The average Santa Clara household earns the richest EBI of any metro area in Northern California. That's $33,051 of spendable income per household[2]

Last year, Santa Clara County residents spent over $8 billion among their local retailers with remarkable amounts concentrated in the medium and high priced lines[3]

The only way to reach this seller's paradise effectively is with the Mercury News. The Mercury News reaches metro San Jose's New Money—52% daily, 5-issue reach 67%. The San Francisco Chronicle/Examiner barely reaches 11% on a good day[4]

So if you're looking for sales, look for the people with money to spend. California's New Money is in the San Jose MSA (Santa Clara County). That's why the Mercury News produces such heavenly results.

THE SAN JOSE MERCURY NEWS

Reaching Northern California's richest million people!

[1]Based on average household EBI, California Metro Markets. [2&3]Sales and Marketing Management Survey of Buying Power, 1983. [4]San Jose "Continuing Market Study," 1981/82, Belden. Represented by KNIGHT-RIDDER NEWSPAPER SALES.

100

York City's economic growth, as neighboring Hoboken already has. Like many cities in the Northeast, the state's second largest municipality's manufacturing base has dwindled, and its unemployment rate stands at 11%.

But today its abandoned buildings and undeveloped property—particularly its waterfront vacated by the railroad years ago—are considered prime real estate.

As a result, Jersey City is deluged with massive, billion-dollar commercial, industrial and residential development projects.

Developers call it a boomtown; New Jersey's Sen. Bill Bradley has claimed, "Jersey City has the greatest potential of any city in the East."

Mayor Gerald McCann, a conservative, pro-business Democrat and a Reagan supporter, can also be credited in part for wooing Manhattan businesses hunting for less-expensive office space, as well as private developers seeking to cash in on the New York area's unrelenting condominium craze, in which increasing numbers of young professionals are switching from renting to buying.

This year the city was awarded a $40 million Urban Development Action Grant—the largest ever awarded—for the first phase of Harbor City, a $2 billion development project along the city's northern waterfront.

The grant is to be used to help build roads and sewers on the 200-acre tract of land, demolish old buildings and build a new parking garage.

The project, sponsored by the city and three private development companies, comprises a 750,000-sq.-ft. shopping mall, 1,000 residential housing units and 500,000 sq. ft. of office facilities.

Another major waterfront development is Harborside Terminal, an abandoned refrigeration warehouse that is being converted into 2.3 million sq. ft. of office space.

Harborside is one of the world's largest privately owned waterfront properties.

Harborside's first tenant, Bankers Trust of New York City, is moving its entire data processing center. It is expected to have 150 to 250 employes.

To prepare the city's unemployed with skills demanded by the inflow of such high-tech service businesses from New York, Jersey City's Private Industry Council, with $2 million of federal funds, has planned several employment and training programs, which include teaching computer skills, according to director Anthony Corsi. Jersey City intends to become a home for the "back office" operations of New York's financial houses.

Citibank is moving into Journal Square, the first office construction in 50 years in Jersey City's central business district. The 15-story office tower is being renovated to offer 100,000 sq. ft. of new office space, with a panoramic view of Manhattan.

Plans are under way to link Journal Square into a fiber optics network, under the development of the Port Authority and Merrill Lynch & Co.

The cable would link earth station satellite dishes located in Staten Island to Manhattan's World Trade Center, passing through Journal Square.

Developers hope that the opportunity to link up with the Teleport Satellite Communication Center at Journal Square will attract growing, data-intensive businesses to the area.

Hamilton Park Condominiums, one of the first certified historic restorations in Jersey City, comprises 86 residential units produced from 13 three and four-story buildings.

Using federal funds, the Jersey City Redevelopment Agency condemned the 13 buildings facing Hamilton Park and sold them to a developer for $470,000. The studios, about 520 sq. ft. in size, start at $35,000; one-bedroom apartments cost $62,000.

Two blocks east of Hamilton Park is a group of historic, 80-year-old buildings known as Betz Brewery. The brewery is eight contiguous abandoned brick warehouses ranging from three to five stories high, containing approximately 300,000 sq. ft. of floor space and 20,000 sq. ft. of vacant land. The brewery sold for $720,000 and is being converted into 195 rental units, a project that is costing $12 million.

Nearing completion is the Montgomery Gateway Project, a redevelopment of 100 acres of downtown Jersey City through rehabilitation of 220 residential units, new construction of 420 residential units and construction of nearby commercial and recreational space.

Still on the drawing boards are the Droyers Point, Caven Point and—perhaps most ambitious of all—the Exchange Place extension projects. Droyers Point, which offers 90 acres for residential development overlooking Newark Bay, is only minutes away from the New Jersey Turnpike. The site now holds Roosevelt Stadium and a marina.

Caven Point encompasses 132 acres of undeveloped public land, suitable for commercial and residential waterfront development. Proposals include development of 1 million sq ft. of midrise office space, 700 units of housing and a 500-room hotel.

The Exchange Place extension project envisions the development of 16 acres—14 of them underwater—for commercial development. The underwater property, which would extend the downtown commercial district at Exchange Place right into the Hudson River, nearly became the new home of the American Stock Exchange in 1977. Market and geotechnical analyses are being prepared to determine the extent of the site's development potential.

Media orginating from Jersey City include an afternoon daily (not published Sunday) and one weekly newspaper; a cable tv franchise is being litigated.

Middlesex-Somerset-Hunterdon, N.J.

Population '80	886,383
Rank	49
Est. income '82	$10,933,311,000

Middlesex County, says a spokesman for the county's planning board, is in the midst of transition. A moribund manufacturing economy has been replaced by a thriving service base.

One major recent development, for instance, was Merrill Lynch's move to set up offices in the county. In addition, Johnson & Johnson, which already has a major office complex, is reportedly considering the construction and development of another.

In the middle of this activity is New Brunswick, the seat of Middlesex County standing on the south bank of the Raritan River. It is the home of Rutgers University, one of the nation's oldest universities, and houses several of its campuses, including Douglass College, Cook College and the Livingston and Bush units.

The university is taking a new look at its own financial health. The Rutgers University Board of Governors has established a Committee on the Future Financing of New Jersey's State University to seek new sources of funds.

The group, according to university spokesmen, will seek to increase state and federal aid and private giving. It will also consider obtaining income from land owned by Rutgers.

Meanwhile, the county continues to be plagued by controversy surrounding waste removal and landfills. Recently East Brunswick citizens group challenged local and county officials to change their plans for the construction of a major resource recovery plant in the township. A county planning board spokesperson points out that the county is fast running out of landfills, and there have been few suggestions for constructing new ones or coming up with "state-of-the art" plans.

Of note is a recent decision by legislators from Middlesex, Essex and Hudson counties to team up with area scientists, community groups and others to form an alternative to the state's Hazardous Waste Facilities Siting Commission. One of their missions will be to monitor the progress of new plant sites.

Somerset is undergoing an economic revival of its own, reports a spokesman for the county planning board. During the last few years, the county has been experiencing a dizzying pace of office construction.

The Beneficial Management building, completed last year, has more than 500,000 sq. ft. of space, while the Chubb Group of Cos.' new building adds another 500,000 sq. ft. of commercial space to the area. Also significant is the 1.4 million-sq.-ft. Atrium, which has yet to be completed.

One construction project that has been receiving extensive exposure is the Worlds Fair Corporate Center in Somerset. Companies that have already located to the Worlds Fair Center include divisions of Atari Inc., Telecom Plus of New Jersey, New Jersey National Bank, Metropolitan Life Insurance Co. and Royal Business Machines.

The heightened influx of businesses into both Middlesex and Somerset has come about because of improved transportation links. The development of the Interstate Hwy. 287 corridor links both the counties to Newark and Newark airport.

In addition, access to Interstate 287 means greater commuter convenience.

One factor boosting transit in this area is the $1.6 million Somerset County Transit Garage. Also, the Federal Highway Administration has approved the transfer of nearly $470 million in federal funds from projects that have been shelved to benefit transportation projects within the area.

In contrast to Middlesex and Somerset counties, Hunterdon County is primarily a residential area. However, it has been experiencing its own problems with waste removal and landfills. The High Point landfill was ordered closed because it was alleged to be an "immediate" threat to public health.

The three counties are served by a number of cable franchises, several uhf tv stations and about a half dozen am and fm radio stations. While the area is served by the *Newark Star Ledger*, there are a number of local newspapers as well.

Monmouth-Ocean, N.J.

Population '80	849,211
Rank	54
Est. income	$9,260,902,000

Explosive growth best describes the Monmouth-Ocean, N.J., region during the last decade. Affluent families, retired people and planned industrial growth have created a combination of resources that has turned this area, along the Atlantic Ocean in the central portion of New Jersey, into the fastest-growing one in the state.

The northeast may be experiencing a decline in population and jobs, but the Monmouth-Ocean region shows a staggering statistical growth. The 1983 *Sales & Marketing Management* Survey of Buying Power study reports that from 1977 to 1982 the area's population increased 11%. In addition, 75% of the households are "homeowner owned" and 33% have an effective buying income of $35,000. The median effective buying income for households is $26,183, a 99% increase above the 1977 level.

The area can attribute its success to its location, reliable transportation, climate and the quality of life in the region. The Garden State Pkwy., a toll road, opened up the former resort counties to "year-round living." Although some of the residents commute to the metropolitan area, others have found jobs in the publicly owned industrial parks and in businesses that have flocked to the counties.

This has resulted in an upgrading of many roads, creation of others and a planned improvement of the rail lines. Housing starts also reflect the growth. Monmouth and Ocean Counties ranked second and third in housing starts in the state last year.

Nonresidential construction also continues at a fast pace. In Monmouth County, New Jersey Bell is building a $20 million corporate data center in Freehold Township. The total workforce is expected to number 400 white collar workers. American Bell is supposed to employ 2,000 workers when its major installation is completed in Middletown Township in 1985.

Ocean County's economic forte has become the industrial park. The county has taken full advantage of its vast open acreage and has developed tracts to attract light industry, trucking companies and packaging and storage industries.

The parks are owned by the municipalities in which they are located but were developed with the aid of the county and a large infusion of federal money. Lakewood, in 1978, was the recipient of $2.2 million, the largest grant ever awarded by the U.S. Economic Development Administration.

Since 1976, the parks have been responsible for the creation of an estimated 7,000 jobs. At least 20 new companies are expected to locate in Ocean County in 1983.

High-tech companies have been major employers in the region since 1972. As the counties have attracted a diversity of industries, however, the dominance of these companies has lessened. Fort Monmouth, a U.S. Army installation, has remained the area's prime employer, with more than 8,000 people on its payroll.

The urban pockets of the area were never large enough entities to become unmanageable. Although they have experienced some economic decline, they have not become the remnants of society as have the larger cities in the state.

Plans are under way to revitalize Red Bank with an office condominium complex and to add to the six industrial parks already in the urban areas of Ocean County. Asbury Park's boardwalk is being renovated by a consortium headed by the entertainer Johnny Cash.

The service industry also adds to the economic base of the region. Both counties boast year-round entertainment and restaurant facilities. This is in marked contrast to the seasonal leisure time offerings that used to dot the coastline not long ago.

The residential portions of the Monmouth-Ocean area range from horse farms, where breeding is becoming a definable industry, to tract housing and condominiums. The extended autumns and mild winters continue to lure older couples to retirement villages.

The oil crisis of 1973 forced many families to rediscover recreation closer to home, and these areas benefited as the New Jersey shore became more popular than ever.

Monmouth and Ocean counties were settled by the Lenape Indians, who fished and bathed in the friendly Atlantic Ocean. Later, pirates and whalers came to its shores, also attracted by the bounties of the sea.

Today, Monmouth and Ocean counties can attribute their successful growth to almost the same conditions that drew its earliest inhabitants. In one respect the early traditions continue; the area has enjoyed phenomenal growth because it has pirated both people and industry from the New York metropolitan area.

The area is served by a variety of cable services and publications, including the evening *Asbury Park Press*. There are also several radio stations in the area, in addition to those broadcast from the nearby New York and Philadelphia markets.

Nassau-Suffolk, N.Y.

Population '80	2,605,813
Rank	9
Est. income	$32,572,045,000

The Nassau/Suffolk market, made up of two suburban counties on Long Island, is one of the few areas in the Northeast that continues to show a rise in employment.

No longer considered solely a land of bedroom communities for New York City, the two counties are the home of more than 1,000 companies, many specializing in high technology, more than 20 colleges and a number of resorts and vacation spots.

Yet while the island continues to make economic progress, the national recession finally hit the area during the fiscal year that ended in September. The unemployment rate for the year averaged 6.8%, although it was back down to a more normal 6% by the end of the fiscal year. But even during that difficult year, the work force increased to 949,000 from 940,000 the previous year, a gain considered exceptional in the Northeast.

Much of the island's growth comes from companies in the high technology field. With more than 2,000 employes, Grumman Corp., producer of buses and military aircraft, is the island's largest private employer. Other major employers are New York Telephone, Long Island Railroad and Long Island Lighting Co.

Grumman, ranked 177th in the *Fortune* 500, has been based on the island since its founding in a garage in 1929. Other high-tech companies include Sperry Corp., Hazeltine Corp., General Instrument Corp., Fairchild Camera & Instrument and Ehrenreich Photo-Optical. Increasingly, foreign companies are locating on Long Island; they cite the advantages of being close to New York City without paying the high costs of rent demanded in the city itself. The cost of new office space ranges from $22 to $28 per sq. ft., much lower than the $35 to $60 per sq. ft. range in midtown Manhattan.

In Jericho and Melville, the trend of converting farmland into new office space continues. At Mitchel Field, construction of a $137 million European American Bank Plaza, with 12-story twin towers and more than 1 million sq. ft. of office space, is almost complete.

One of the oldest shopping centers on the island, Green Acres in Valley Stream has been completely renovated and includes a prototype of the Sears, Roebuck & Co. "store of the future."

Nassau and Suffolk also have some 125 industrial parks, 45 convention centers and nine regional indoor shopping malls. Tourism provides the area with close to $2 billion annually. There are about 300 hotels/motels and several more either in the construction or proposal stage.

Recently completed are a $27 million 391-room Marriott Hotel at Mitchel Field, near Nassau Coliseum, and Garden City Hotel, a $30 million project that attempts to restore old world elegance in creating a building reminiscent of its 75-year-old predecessor, demolished in 1971.

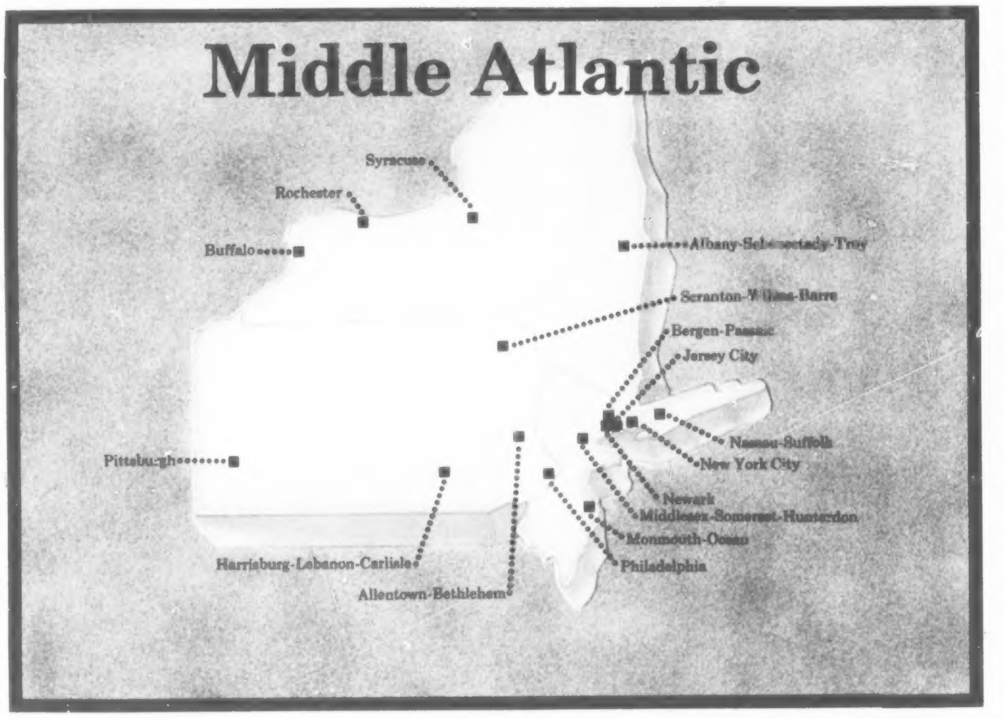
In keeping with a trend across the country, buildings are being upgraded to the highest economic permitted use, according to William E. Greiner, president, Greiner-Maltz Co., a research company that specializes in Long Island commercial real estate. He cited a number of buildings that have just been converted or are being converted from manufacturing to office and retail usage.

Recent housing starts are down considerably compared with 10 years ago, but are expected to increase slightly this year. In 1982, 4,800 permits were issued and 5,000 are projected for this year. But this compares with the more than 18,000 issued 10 years ago. The decline is most dramatic in Suffolk County, which is east of Nassau, where the number of permits issued 10 years ago accounted for 14,000 of the total and was down to 3,000 last year.

Analysts blame the drastic drop in the unavailability of money both to builders and prospective buyers. Money dried up when the state delayed in revising its usury laws several years ago and, once new laws passed, prospective buyers postponed purchases in the hope that interest rates would drop below a 10% rate.

The Brookhaven National Laboratory, Upton, which provides facilities

Middle Atlantic



for conducting research in the peaceful aspects of nuclear science, had some bad news in October when the government decided to stop work on what was to be the world's largest colliding beam accelerator, a $325 million project. Formerly called Project Isabelle, the project was about one-third completed. Brookhaven has proposed that the nearly completed tunnel that was to house the machine be used for a less expensive heavy ion collider.

Another project, the National Synchrotron Light Source, has been so successful since it was put in operation a year ago that it will be expanded over the next few years. It is a source of X-ray and ultraviolet radiation for use by corporations and academic labs.

Controversy over the opening of Long Island Lighting Co.'s nuclear power plant at Shoreham continues to rage on several fronts. There are those who still are opposed to putting the plant into operation at all costs because of dangers to residents in case of accident, while others are enraged that the costs of the project have ballooned to $3.5 billion and may be passed on to ratepayers.

A recent staff report to the governor's commission on Shoreham has indicated that it will cost only 6% more to abandon the almost completed reactor than to operate it for 30 years. That finding agrees with estimates suggested by consultants to Suffolk County, while LILCO has maintained that rates would have to be increased an additional 18% if the Shoreham plant is not put into operation.

The area is served by one daily newspaper, one business weekly, 113 community weeklies, 11 biweeklies and monthlies, 26 magazines, two tv stations, 28 radio stations and 10 cable tv companies.

New York, N.Y.

Population '80	8,274,961
Rank	1
Est. income '82	$90,431,904,000

It had to happen. The "I love New York" campaign, which has turned much of this market into a Rotary-style community of boosters, is beginning to inspire some sort of a backlash. Among its manifestations: The publication last year of a book, "I Loathe New York: A Humorous Look at the Rotten Apple."

Yet despite those who contend the Big Apple is rotten to the core, New York has managed to continue its remarkable comeback from the brink of fiscal collapse in the mid-1970s.

Sure, corporations keep moving their headquarters out of the city. Sure, the number of manufacturing jobs is falling.

Sure, orchestra tickets to a Broadway hit—a hit these days being any show that manages not to close on opening night—can cost 45 bucks apiece. Sure, the subways are dirtier and more crowded than ever.

But the crowds have little to do with an increasing population. In fact, from 1970 to 1980, the New York area lost more than 800,000 residents.

But no one can argue the city does not remain the vibrant, pulsating center of national, and perhaps even international, fashion, communications, retailing, banking, finance, arts, culture and publishing.

Recent developments in the market, east side, west side, all around the town, have tended to emphasize these strengths.

Downtown, the South Street Seaport, opened last summer, has already become a magnet for natives and tourists alike.

On the weekends, crowds at the Rouse development sometime resemble the subway at rush hour, though you certainly can't buy a drink, a baked potato or an "I Love Lucy" postcard on the IRT.

Between the giant Gimbels and Macy's department stores, Herald Center, in what used to be an E.J. Korvettes (and, before that, Saks 34th St.), is under construction, promising to bring the theme-mall ambiance of South Street Seaport to midtown Manhattan. The project, which calls for 200 shops and restaurants on 11 levels, is scheduled to open its doors next September.

New York Land Co. is developing the $50 million Herald Center, where rents are expected to range from $70 to $75 per sq. ft.

Also in midtown, the almost dizzying pace of new building is unabated, with "Coming soon" and "Now renting" signs seemingly on every corner. Among the showcases: American Telephone & Telegraph and International Business Machines Corp. buildings on Madison Ave.

A recent survey of commercial rents by Coldwell Banker Real Estate Consultation Services shows New York still has the country's most expensive office space, with rents ranging from $35 to $60 per sq. ft. in midtown Manhattan.

In the heart of Times Square, hard by some of the sleaziest pornographic movie houses and peep shows, the giant core of Marriott's Marquis Hotel is rising to the sky. Nearby, on 46th St., Restaurant Row has welcomed several new eateries.

Farther north, the formerly run-down Upper West Side, particularly along Columbus Ave., continues its hyper-gentrification into a chic and trendy neighborhood of boutiques, restaurants and shops.

The "smart" Upper East Side keeps spreading to more and more upper streets; the unofficial boundary line of E. 86th St. is being pushed northward to E. 96th St., as the blocks in between are occupied by everything from warehouses remodeled into condominiums to auto dealerships.

Manhattan isn't the only borouga to benefit from the "I love New York" boom. In Queens, for instance, Silvercup Studios and Astoria Film Center are burgeoning movie-tv-video production complexes; the latter is the base for the filming of Francis Ford Coppola's new feature, "Cotton Club."

But most of the hoopla and hullabaloo is, as usual, concentrated in Manhattan. Perhaps this can be attributed to the borough serving as *the* major media center, home to three daily newspapers, six tv stations and 31 am and 35 fm radio stations (though some media, such as the Staten Island *Advance*, WOR-TV and numerous radio stations, are based outside Manhattan).

Manhattan is the locus for the nation's media, from American Broadcasting Cos., CBS Inc. and NBC to Conde Nast Publications, Hearst Corp. and Time Inc.

Newark, N.J.

Population '80	1,878,959
Rank	17
Est. income '82	$20,545,099,000

Even though Newark seems to be recovering from a severe economic slump, a full recovery is still years away. The city continues to be plagued by high unemployment, low levels of economic development and continuing declines in federal aid.

"We are faced with a declining population and an eroding tax base," said a spokesman of the Mayor's office for planning and grantsmanship. "That, in turn, has put a lot of pressure on the city."

Not that the community has not been seeing any new construction. Among the corporations that continue to build in the area are Public Service Gas & Electric, Prudential Life Insurance and New Jersey Bell. There are also plans to revitalize the Passaic River area through the development of commercial malls and residential condominiums. The city has been constructing more than 10,000 units each year, partly to replace older units and in part to meet new demand. The net housing gain, according to one observer, is closer to 5,000 units annually.

"For all the problems that we are facing, we are going through a quiet renaissance," said Calvin Reed, vp-marketing with Connection Communications Corp., the cable franchise for the city of Newark. He pointed to a growing improvement in city services, including healthcare and education.

Newark has slowly evolved into a center for higher education. Among the many institutions that now have facilities in the city are Rutgers Law School, New Jersey Institute of Technology, Seton Hall Law School, New Jersey School of Medicine & Dentistry and the Essex County College.

There has also been a marked improvement in the city's schools with an over-all increase in the average scores recorded by the city's students. The improvement coincides with the appointment of a new school superintendent.

Nonetheless, the city is faced with substantial cuts in the funds for police and firefighting services. Mayor Kenneth Gibson says the $5 million in general revenue sharing money awarded annually to Newark has remained at the same level since 1977. "The purchasing power of GRS has been effectively cut in half due to the changes in our American economy," Mayor Gibson wrote to President Reagan asking that he not veto the funds allocated to GRS, pointing out that any loss of funds would affect the quality of life and the slow road to recovery.

While funds for police and firefighters may be in peril, educational funds are not. Based on recent assessments of real estate in Passaic County, where Newark sits, there could be an increase of nearly 7% in the amount spent on the city's schools.

Newark has also been facing a mini-transportation boom. One Port Authority of New York & New Jersey spokesman said Newark airport experienced an increase of 39.6% in passenger traffic over the first eight months of 1983, compared with the same period in 1982. The total number of passengers who passed through the airport in 1982 was 11.7 million, an increase of 15% from the previous year.

One reason for the sharp rise can be attributed to the increased activity of PEOPLExpress, which now operates to a number of major metropolitan areas. Deregulation combined with the congestion in New York airports may cause a further rise in the passenger flow through the airport.

In terms of the media, Newark has long been without any tv station or cable franchise of its own. Recently, however, that has changed. Not only has the city seen its first vhf tv station, but it also has a fully functioning cable franchise.

The city received its first tv station when WOR-TV, moved its offices from New York to New Jersey. The move was initiated more by an attempt to forestall a hearing by the Federal Communications Commission on the station's broadcast license than by any urgent need to establish the state's first vhf station. The impact, however, has been all positive. There has been a marked increase and improvement in the coverage of the city, not only by WOR, but also by other New York-based stations.

The city turned on its cable system last year and the response has been "excellent," said Mr. Reed of Connection Communications, the cable franchise. Currently, it has a total of 18,500 subscribers to its basic service. In addition to its pay channels, the company also offers programing directed especially at the various ethnic groups within the community, inclusive of a Portuguese channel.

The area is also served by the daily *Newark Star-Ledger* and six radio stations, including two am stations.

Philadelphia, Pa.-N.J.

Population '80	4,716,818
Rank	4
Est. income '82	$47,925,300,000

Philadelphia is a town on the move. And much of the momentum is coming from Market Street East, a catch phrase that represents the giant renewal of the city's central downtown street, roughly between City Hall and Independence Hall. It is akin to the massive redevelopment that transformed Market Street West—on the other side of City Hall—into a corporate and retail hub during the 1960s and 1970s.

One key to Market Street East is the brand new Gallery II, a $120 million shopping mall that opened in October and adds some 105 speciality shops, restaurants and a J.C. Penney Co. store to the indoor shopping complex spawned six years ago, when the 125-store Gallery opened.

The expanded Gallery complex, developed by the Rouse Co., now spans the north side of Market St. between 8th and 11th Sts. and is also anchored by Gimbels and Strawbridge & Clothier department stores. Its 1.7 million sq. ft. makes it the nation's largest urban mall.

So far, the Gallery complex has been a roaring success. Last year, sales averaged $235 per sq. ft., about 50% higher than the national average. Spurred by that track record, 90% of Gallery II was leased prior to its opening. Rouse estimates suggest that Gallery II will pump some $5.3 million in tax revenue into the local economy (compared with $4.7 million from the original complex) and provide about 2,600 jobs.

Contiguous to the Galleries, work continues on the $75 million Market East Commuter Station. The new station is part of the $325 million Center City Commuter Tunnel system, which has been under construction for the last four years and is expected to begin limited passenger service in January, full service by summer or fall.

By closing a six-block gap between Suburban Station and Reading Terminal, the tunnel would connect the former Penn Central commuter rail lines and the former Reading Co. lines, both now operated by the Southeastern Pennsylvania Transportation Authority, doubling commuters' travel range between the north, west and southwest suburbs and Center City by interconnecting 200 stations in five counties. The tunnel would also encompass the Philadelphia International Airport-Center City high speed line also under construction.

Tourism continues to be a major source of city revenue. One major proposed project is a $401 million convention center, with space to the north and west that would permit another 450,000 sq. ft. in expansion. The Reading Co., which proposed the plan, has also secured an agreement with Hyatt Corp. to manage a 1,200-room hotel to be developed just west of the center at a projected cost of some $150 million.

The Reading Co. estimates that the center could generate some $1.2 billion to the city and state over the next 30 years and create some 8,200 permanent jobs. All of this hinges on the purchase of several acres of real estate (Reading's existing railroad station would be phased out by the new Market East station and incorporated as part of the convention center site), the relocation of some 150 businesses and 40 residences and the orchestration of hundreds of millions of dollars in financing.

Observers point out that the recent election of Democrat W. Wilson Goode will have more than a little bearing on the center's future.

Meanwhile, construction work continues on One Reading Center, a $76 million, 32-story office bulding at 11th and Market Sts., between Gallery II and the proposed convention center site.

Buoying the enthusiasm about Market Street East's gradual revitalization from sleazy, down-at-the-heels blight to shiny chic was outgoing Mayor Bill Green's announcement in September of a $14.1 million plan (including some $13 million in government grants and close to $1 million in pledges by a dozen Market Street corporations) to rebuild and beautify Market Street's sidewalks and roadbed between City Hall and Independence Hall, scheduled to begin next summer and to be completed before the 1985 Christmas shopping season.

Elsewhere, several new office towers and hotels—six new hotels in the last three years—are helping to ease the sting of business closings, such as the *Philadelphia Bulletin* and the Frankford Arsenal in recent years, and move Philadelphia closer to what local leaders see as its future as a services-medical/pharmaceutical-high tech center.

City officials also are promoting the country's fourth largest metropolitan area as an ideal tv or movie location—successfully, in the case of "Rocky," "Blow Out" and, most recently, "Trading Places."

Which is not to say that the Philadelphia Industrial Development Corp. has slackened its efforts to lure new industry with attractive financial packages and tax incentives.

Port development also continues to be an area of major concern. On the plus side, six-month figures released in October showed a 13% gain in general cargo for the first half of 1983, compared with the same period in 1982. Over-all, the recent figures showed only New York ahead of Philadelphia for total general cargo passed over North Atlantic piers. Another plus: Last year's new calls by QE2 were tremendous public relations for the port's cruise business. On the down side, hopes for Philadelphia to become a major coal exporting port have been stymied significantly by a slump in international markets.

There are other problems. High on the list of many critics is the need for business tax reform. Critics also are fed up with the political and legal hassling that continues to make cable tv off limits for most of the city.

Philadelphia has two general circulation daily newspapers, several neighborhood papers, five commercial tv stations, one subscription tv station, limited cable service and 24 am and 28 fm radio stations.

Pittsburgh, Pa.

Population '80	2,218,870
Rank	10
Est. income '82	$21,829,588,000

The bunching together of new office-and-shopping towers in downtown Pittsburgh resembles the huddle of the Steelers football team in one of its championship seasons.

Recently completed giants include the $150 million, 54-story One Mellon Bank Center, which serves as new headquarters for the expansion-minded bank holding company. Another is One Oxford Centre, a $70 million office complex, which also houses high-price specialty retailers and two of Pittsburgh's hottest new night spots: Hillary's restaurant and Harper's, a restaurant and jazz club.

Behemoths soon ready for action are PPG Place, a 40-story tower and five attendant buildings situated on 5½ acres in the heart of the Golden Triangle downtown. The $197 million project was designed by architects Philip Johnson and John Burgee, and its fantasy-like Gothic spires draw on the city's rich heritage of Gothic architecture.

Twenty-five retailers, primarily local, already have opened in the main tower, and retail space also is planned in three of the five other buildings nearing completion.

Also to be completed soon is North Shore Center, which includes three new office and retail buildings on the shore of the Allegheny River and development of a $2.2 million outdoor sculpture park. This private development is expected to trigger residential housing in that area, as the city's Renaissance II activity spreads from the Golden Triangle to riverfront sections adjacent to downtown and up Fifth Ave. toward Oakland, the heart of Pittsburgh's medical and university research facilities.

And there are further changes to come in the skyline of the Golden Triangle. A twin for One Oxford Centre is in the planning stages, and groundbreaking is scheduled this spring for Allegheny International's new $100 million headquarters in the city's theater district, an area also slated for renovation.

Suburban development is keeping pace with downtown growth, too. U.S. Steel's realty development division is in early stages of transforming 70 acres adjacent to its research center in Monroeville, an eastern suburb, into Wyngate Plaza, a combination of office and retail space and 30 acres of townhouses and garden apartments.

The corridor connecting the city to Greater Pittsburgh International Airport continues as a growth area, and is particularly popular for many of the 32 foreign companies that have established offices in Pittsburgh since 1980. Construction of a new $289 million airport terminal complex at Greater Pitt—now in advanced design stages—is likely to spark further growth in that area.

While the building boom is reshaping the face of the city, Pittsburgh's economic base is in the midst of a deeper transformation that is proceeding slowly but surely.

Through the first half of 1983, the unemployment rate in the Pittsburgh area stayed at about 16%, dipping below that to 13.5% only in July. The recession took its toll on white-collar workers in this city, which is the third-largest corporate headquarters in the U.S., serving as home for giants such as H.J. Heinz Co., Gulf Air, Alcoa and Rockwell International.

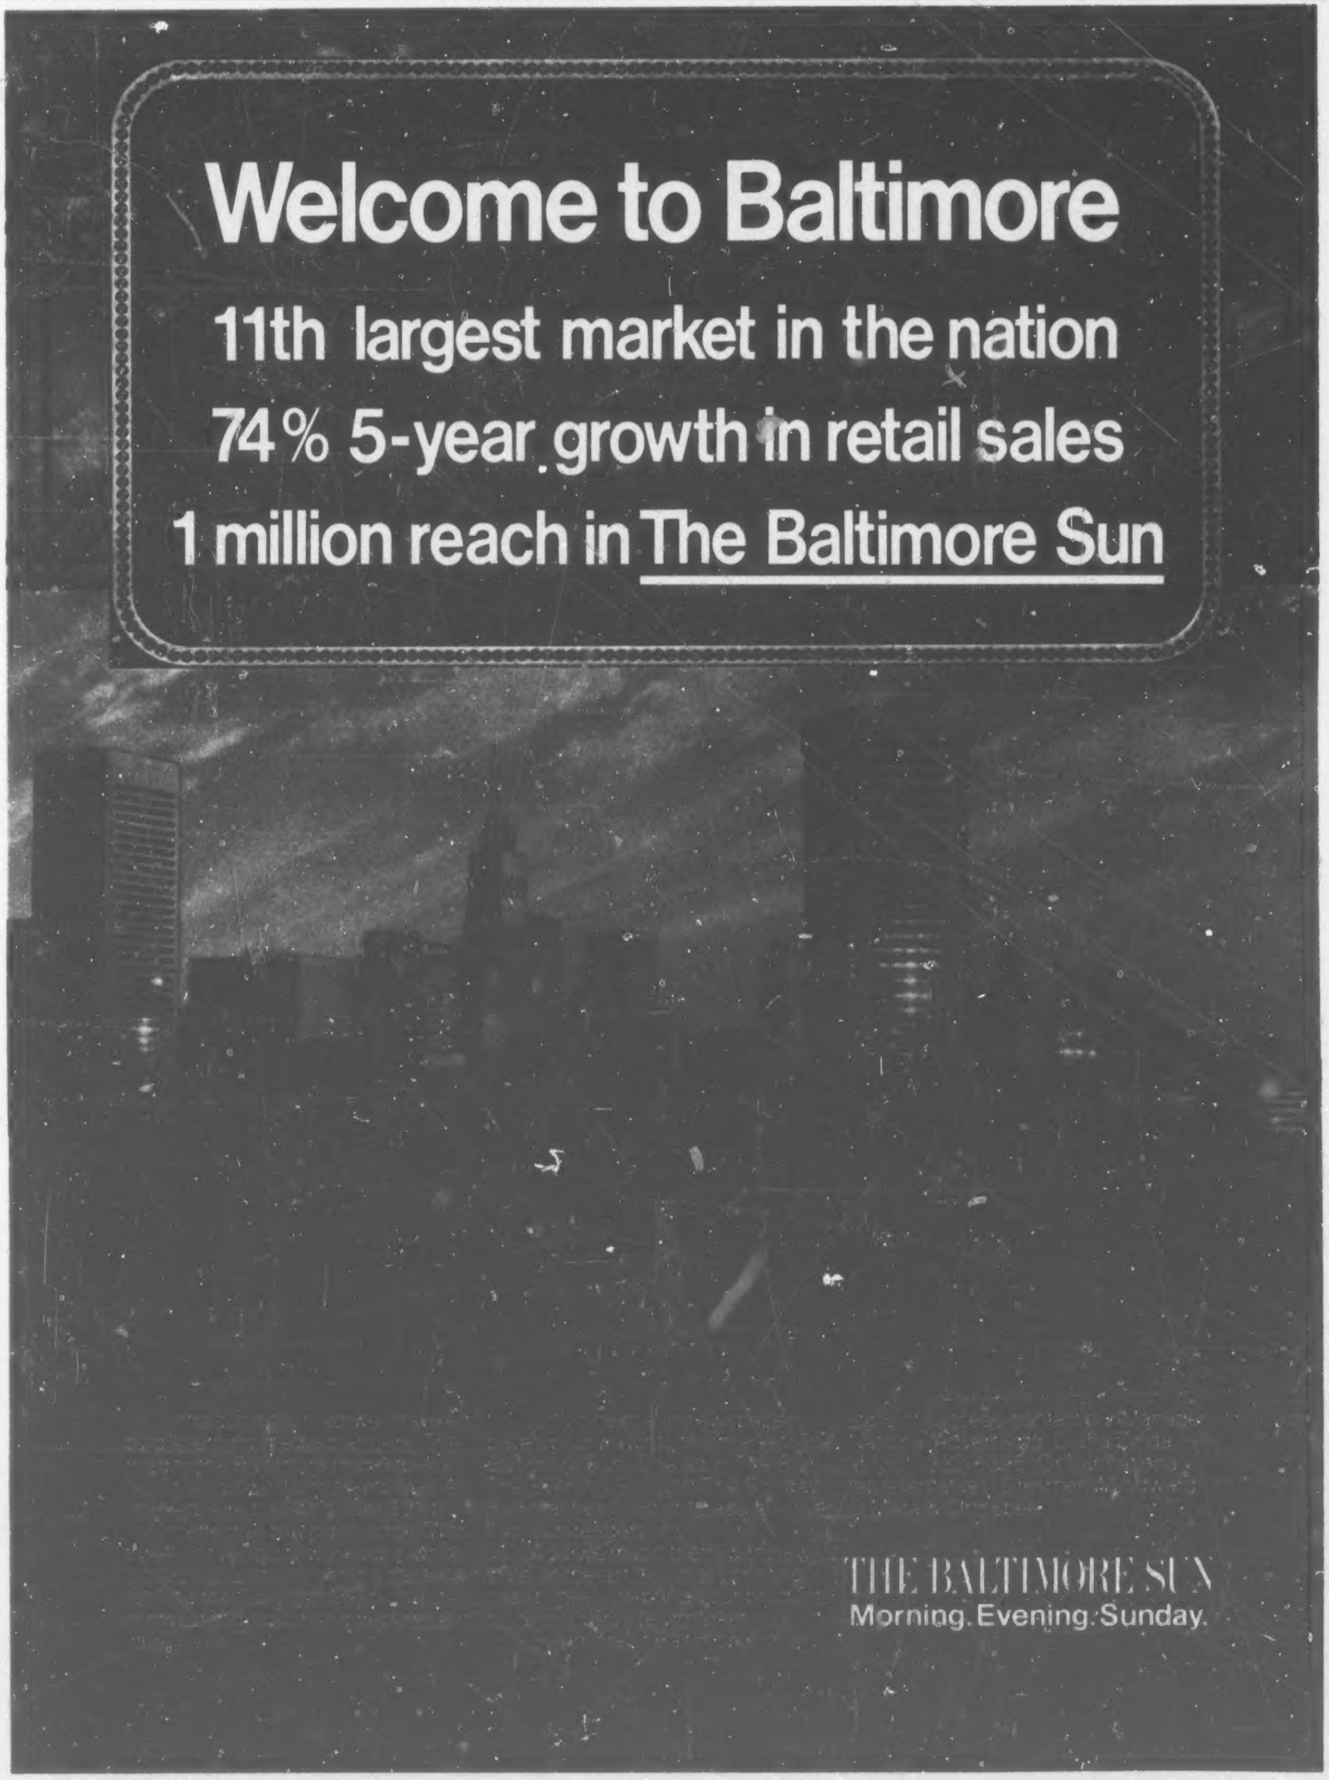
Both salaried and hourly workers continue to be trimmed from the workforce in steel—once the heart of Pittsburgh's economy—as that industry shrinks permanently. U.S. Steel is likely to close two major plants in Pittsburgh by year-end and cutbacks are expected at Jones & Laughlin Steel's two mills here as a result of a merger between its parent company, LTV Corp., and Republic Steel Corp.

Nevertheless, Pittsburgh is blessed with a number of essential characteristics needed to wean it from its dependence on heavy industry.

Those attributes include university research resources, which act as a magnet for private sector investment. Pittsburgh has long been known as a leading medical center—both for research, primarily at the University of Pittsburgh, and for its operating-room expertise in new fields, such as organ transplants.

From that environment, new high-tech medical companies have sprung up. And Carnegie-Mellon University is a leader in artificial intelligence and robotics research, a major portion of which is sponsored by Westinghouse Electric Corp.

Another major reason behind Pittsburgh's favorable prospects for economic growth is a strong local political structure, which still emulates the spirit of government and private enterprise cooperation forged in the 1950s, when Mayor David L. Lawrence and financier R.K. Mellon banded together to substantially wipe out factory smoke and soot that could



Welcome to Baltimore

1 million reach in The Baltimore Sun
THE BALTIMORE SUN
Morning. Evening. Sunday.

turn the downtown dark at noon on a sunny day.

A lot of the Renaissance II private sector construction was predicated on the city's construction of a $480 million light rail transit system, including a subway system linking the southern suburbs to four stations downtown. That system is scheduled to be completed in November, 1984.

In addition, the city this fall began a $14.6 million reconstruction of Grant St., which is the city's corporate headquarters row, aiming to turn it into tree-lined boulevard with a hint of the atmosphere of New York's Fifth Ave. That money is part of a total $75 million the city has allocated for street improvements in the Golden Triangle over the next six years.

Looking ahead, one of Pittsburgh's greatest civic challenges is to significantly expand its convention business. The city has the David L. Lawrence Convention Center, but not nearly enough hotel space. Progress is being made, however.

This fall, financing was cleared after many delays for construction of a $134 million, 619-room hotel and an office complex adjacent to the convention center. Construction begins July, 1984, with completion set for two years later. The bulk of the financing is coming from Metropolitan Life Insurance Co., and the hotel will be operated by Vista International. Also on the hotel front, a new 200-room hotel tower is planned to expand the Sheraton Station Square, and the Pittsburgh Hilton is undergoing a $4 million renovation.

Pittsburgh also is expanding as a sports center. Edward J. DeBartolo Sr., owner of the Pittsburgh Penguins hockey and Spirit soccer teams, has purchased the local U.S. Football League franchise, with the team to be known as the Pittsburgh Maulers.

Mr. DeBartolo also has his eye on the Cleveland Indians baseball team and has signed a contract with Warner-Amex (which now owns a substantial minority interest in the Pittsburgh Pirates) for cable broadcast of sports events at his Civic Arena.

Pittsburgh has two daily newspapers, two weekly business newspapers, five tv stations and one cable service (Warner Cable). There are 30 am radio stations and 12 fm radio stations serving the greater Pittsburgh area.

Rochester, N.Y.

Population '80	971,230
Rank	43
Est. income '82	$9,958,153,000

The economic downturn refuted the local myth that Rochester is "recession-proof," though it did seem to hold true as late as early 1982.

As the rest of the nation spun into recession, Rochester's largest employer, Eastman Kodak Co., added the disc camera and 6,000 jobs, more than offsetting job losses elsewhere in the local economy.

But continued recession through 1982, combined with the effects of foreign competition for Kodak and the area's second largest employer, Xerox Corp., finally caught up with Rochester. Kodak has laid off about 2,700 workers this year and cut several thousand other jobs through a voluntary incentive plan. Kodak employment now stands at some 55,000. Xerox cut about 2,000 jobs from a prerecession level of 15,000.

Still, only at its record peak of 10.4% unemployment in June of this year has the Rochester market failed to do better than national and state unemployment figures. In August, Rochester unemployment stood at 7.3%, compared with a state rate of 8.2% and a national rate of 9.5%.

As Rochester joins the nation in recovery, these pluses are obvious: Nonmanufacturing employment is growing rapidly; Rochester has a mix of high-tech and information companies, such as Computer Consoles Inc. and Gannett Co. Rochester also has respected educational institutions with good technical credentials—the Rochester Institute of Technology and University of Rochester.

Most exciting to city officials is downtown Rochester's full-fledged boom.

The centerpiece is a $40 million state-financed convention center now under construction on the banks of the Genesee River, scheduled to open by early 1985. City officials expect it to pump tens of millions of dollars into the local economy.

It already has prompted Stouffer Corp. to take over a nearby hotel and help finance $20 million in renovations. Holiday Inn is spending $4.2 million to remodel its downtown hotel. And an entrepreneur from Buffalo, who built a Hyatt in that city, has announced plans to build a $38.5 million hotel adjacent to the center. All three are to be connected to the center by second-level walkways—city officials think this may be a unique attraction for conventioneers.

At the other end of downtown, the city and county are spending $18 million for a "cultural center" around the Eastman Theater, home of the Rochester Philharmonic Orchestra. A $5 million parking garage and $7 million YMCA have recently opened, but plans for a performing arts center are not yet complete.

Throughout the rest of downtown, another $50 million-plus is being invested in new and rehabilitated office buildings, restaurants and housing.

Elsewhere, the Federal Aviation Administration proposes to make Rochester the air-control hub of western New York because of the new $7.5 million control tower completed last fall at the Rochester-Monroe County Airport. In addition, airlines have spent some $4 million for terminal renovations in the past few years, and the county has budgeted $15.7 million to extend two jet runways and build two new small-craft runways. Construction is scheduled to start in 1986.

Rochester is served by two daily newspapers, 10 am and 11 fm radio stations, five tv stations and major cable tv services.

Scranton-Wilkes-Barre, Pa.

Population '80	728,796
Rank	58
Est. income '82	$5,848,673,000

Contrary to what you may have heard, Scranton and Wilkes-Barre have not died and gone to coal miner's heaven. In fact, local civic leaders in both areas have recently begun formal marketing efforts to let outsiders know that they're alive and well and, possibly, the ideal place for your next vacation or plant expansion.

The Scranton Plan was put together by volunteers from Scranton, Lackawanna County and the industrial development arm of the Greater Scranton Chamber of Commerce. Industrial expansion is a key goal, but it is hoped that the area's future fortunes will also be linked to its evolution as a tourist center, located as it is a half-hour's drive from the heart of the Pocono Mountains.

Meanwhile, 15 miles or so south in Luzerne County, Wilkes-Barre's movers and shakers hope to improve the area's image and attract new industry through the newly formed Committee for Economic Growth, a volunteer organization of some 350 members sponsored by the Greater Wilkes-Barre Chamber of Commerce and representing nearly every local business, civic, social and cultural institution.

In Scranton, a number of factors should help contribute to the economic scenario local leaders hope to see unfold in the coming years. For one thing, there's Montage, 1,100 acres in Moosic Borough, five miles from downtown Scranton, that are being developed as a major resort with skiing, an 18-hole golf course, a baseball park, a civic arena, some 405,000 sq. ft. earmarked for commercial and light industrial use, some 211 single-family homes and approximately 40 townhouses.

Phase 1 of the project, development of its $13 million ski facility, is in progress and targeted for completion in time for a December, 1984, opening, with a quarter-million skiers expected annually.

Another major project, scheduled for completion early next year, will transform Scranton's Fire Lackawanna train station, vacated 10 years ago, into the centerpiece for a $13 million, six-story Hilton Hotel with 165 rooms, three restaurants, a convention center and health spa.

The Scranton area already has two Holiday Inns and a Sheraton, as well as a number of other smaller hotels. The arrival of Steamtown USA, the country's largest collection of steam-operated railroad equipment, is also expected to dramatically recolor the complexion of downtown Scranton. Relocation of the museum from Vermont began last summer and is expected to be complete by next summer. It is expected to draw some 400,000 tourists annually.

Visitors to both Steamtown and Scranton's new Hilton at Lackawanna Station will also find a new look to nearby Lackawanna Avenue, which just went through substantial street and sidewalk improvements as part of a campaign to revitalize downtown's commercial-retail hub.

Over-all, downtown Scranton's 25-

square-block commercial district is northeastern Pennsylvania's largest shopping center. In fact, *Editor & Publisher Market Guide* estimates that 1982 retail sales in the city of Scranton alone contributed $469.7 million to the total $956.9 in sales estimated for all of Lackawanna County.

On the industrial side, the last 50 acres of the 300-acre Keystone Park in suburban Scranton are now being cleared and developed.

Plans call for 50-acre lots specifically geared toward office and light manufacturing uses. In the already-developed section of the park, Emery Air Freight has begun preliminary design work on a 40,000-sq.-ft. expansion expected to add 200 jobs to its current 270-person operation.

The Wilkes-Barre industrial base generally depends on small manufacturing businesses—machine tool shops are a good example—with fewer than 100 employes. There has been some expansion among companies that produce health industry products.

Area observers are predicting some growth in service-related companies—such as the locally based Diversified Records, a records storage facility—and in back-office functions, all of which will be addressed more specifically when the Committee for Economic Growth begins to report on its findings. According to one committee spokesman, the group hopes to start by publishing a detailed study of Wilkes-Barre's assets and liabilities next spring.

Current Wilkes-Barre area development is not nearly so dramatic as the mammoth efforts mounted after Hurricane Agnes and a raging Susquehanna River created $539 million worth of damage in 1972. But local leaders describe their economy as holding its own, with only one notable plant closing (General Cigar last June, with some 100 jobs) and several expansions in the last year and a half.

Included among the latter is the new $1 million facility being built downtown by Luzerne Optical Laboratories, Ltd.

The Scranton/Wilkes-Barre market is served by four daily newspapers (two in Scranton, two in Wilkes-Barre), three commercial tv stations, one subscription tv station, two cable services and some 25 radio stations.

Syracuse, N.Y.

Population '80	642,971
Rank	64
Est. income '82	$5,779,319,000

The impact of the sagging national economy got to Syracuse later than most places. Even the area's auto-related industries didn't feel the crunch until much later than most.

But when it arrived, the area suffered along with the rest of the country, and its recovery started later.

Unemployment hit its peak in November, 1982, when 10.3% of the three-county MSA's workforce was unemployed. Chrysler's new process gear plant and General Motors' Fisher Body plant both had huge chunks of their workers on indefinite layoff. Today, the area's unemployment rate is 6.6%.

In addition, the effect of corporate takeovers of the city's two biggest companies—Carrier Corp. by United Technologies and Crouse-Hinds Co. by Cooper Industries—was starting to be felt. Cooper, for example, announced that it planned to shut down one of Crouse-Hinds' operations in Syracuse and move it to Mississippi, where costs were lower.

But Syracuse grew through the recession. In 1982, Carrier announced a $24 million expansion of its Carlyle Compressor plant and, near year's end, began rehiring workers. It also built a new headquarters and moved that operation out of the downtown area.

And at the peak of the recession, the Greater Syracuse Chamber of Commerce began a four-year drive to build Syracuse's national income and try to lure new business to the area while encouraging existing business to stay and expand.

As one chamber official said, "Syracuse doesn't suffer from a bad image. It suffers from a non-image."

The drive, called the Greater Syracuse Program, began with pledges of more than $3 million from area companies.

The first phase was a national advertising blitz in which the chamber bought space in national business and trade publications. The ads described the area's abundant water, good transportation, favorable cost of living and skilled workers.

The program was aimed at attracting high-tech companies to Syracuse, which already had a substantial number of such concerns.

Meanwhile, the state named Syracuse University as the site for one of several high-tech centers that were part of a state plan linking government, private and university resources in an ambitious effort to create a high-tech base in the state. SU's center would be for computer software development.

The Greater Syracuse Program, now two years old, has yet to produce dramatic tangible results, although some claim that new business did move into the area because of it.

But the chamber remains optimistic, indicating such a program, in competition with similar programs in 33 states, will take four to five years to produce.

In the meantime, another group, the Metropolitan Development Assn., began a push to lure insurance companies to Syracuse. According to Kevin Kersev, director of economic research at the chamber, Syracuse has become the second largest insurance center in the state behind New York City.

Developers saw some of this activity coming and began building or planning Class A office space as if there would never be enough of it. They were only partially right.

Pioneer Group built the $20 million One Park Place office tower just off the downtown area and landed International Business Machines Corp. as one major tenant before the building was finished. American General Life, a partner in the project, was the second major tenant, and about 90% of the building is now rented.

Pivko Group, a Canadian development company, was not as lucky. It bought the former Syracuse Mall building downtown, gutted it, made some additions and converted it into 140,000 sq. ft. of prime office space. It was finished early this year and still is nowhere near full occupancy, despite a rent reduction.

The glut of space also has slowed another major project proposed, again, by Canadian developers. The $50 million Galleries of Syracuse mixed-use mall was proposed in 1980. IBM was to have been a key tenant, but it went to Park Place.

The Galleries finally landed the Onondaga County main library as its key tenant, but no work has begun on the demolition of existing building yet, and if work does not begin before the end of the year, the library stands to lose a $700,000 federal grant.

Elsewhere, besides offices, Anheuser-Busch, which bought a former Schlitz brewery in 1980, opened its brewery early in 1983. Busch bought the plant for $100 million and instituted another $100 million in renovations over three years.

The area's retail operations also grew. A new off-price mall opened early in 1983, joining 15 other malls or shopping centers in the Syracuse suburbs. The area's major retail outlets include T.J. Maxx, Service Merchandise, Hills, J.C. Penney Co. and Sears, Roebuck & Co.

With all the new construction, the area did not neglect its transportation system.

The terminal at Syracuse Hancock International Airport was renovated and expanded, and the city, which operates the airport, built an $11 million, 1,600-space parking garage there. Most of the major airlines and many smaller lines serve the facility.

Greater Syracuse is served by two daily newspapers—the *Post-Standard* in the morning; the *Herald-Journal*, afternoon, and *Herald-American/Post-Standard* on Sunday; 10 weekly newspapers; three shoppers; two monthly business newspapers, the *Central New York Business Review* and *Syracuse Business*, and one magazine, *Syracuse Magazine*. There are three network-affiliated tv stations; a public tv station; three cable tv companies, and 16 radio stations.

East North Central

Akron, O.

Population '80	660,328
Rank	62
Est. income '82	$5,966,172,000

Akron has long been synonymous with rubber, but it is now turning into a diversified center of service, research and small businesses.

Just 10 years ago, 40% of the area's jobs were in manufacturing and 60% in nonmanufacturing. Today the ratio is 30% to 70%. And the major employer of production workers is no longer tire plants but small metalworking companies.

While Akron's picture has been painted as bleak during the recession, total employment is higher than it was 10 years ago, said Jim Kroeger, direc-

BUYING THE TOP 25 MARKETS? BUY THE ODDBALL.

Scarborough ranks the Des Moines Sunday Register audience 21st.

The oddball situation of the Des Moines Sunday Register in Iowa has just been confirmed by the newest Scarborough study*.

Although the Des Moines metro market doesn't make the top 100, the study ranks our Sunday statewide newspaper audience 21st among all newspaper markets in the U.S. Plus, our daily audience ranks 28th.

To help put these facts in perspective, our Sunday statewide newspaper audience is greater than the ADI readership of the Phoenix Sunday Republic. And our daily audience is larger than the ADI readership of the Kansas City Star/Times!

So if you're buying the top 50 ADI markets, don't overlook the Des Moines Register. The oddball newspaper market. It's got market coverage that's far above par. Scarborough confirms it.

The Des Moines Register
BLANKETS IOWA

*Source: Scarborough's National Newspaper Audience Ratings Study, 1983.
Represented nationally by CWO&O

tor of economic development at the Akron Regional Development Board (ARDB), the area's chamber of commerce.

"What we have lost in manufacturing we have added back in the nonmanufacturing sector," he says.

The last tire plant left Akron in 1982, but the city's four tire companies have vowed to keep their headquarters in the area—and to expand them.

Firestone Tire & Rubber Co., for example, has spent $14 million since 1981 to renovate its world headquarters building on Firestone Parkway in south Akron. An additional $16 million is in line to be spent to complete the renovation by 1987.

Goodyear Tire & Rubber Co. is completing a $125 million technical center to replace two vacant tire plants. The facility would employ some 1,200 for research and development activities.

All in all, more than $124 million in private capital was invested in new plants and plant expansions in Summit, Medina and Portage counties during 1982, creating 929 jobs. Mr. Kroeger expects investment to be slightly higher in 1983.

One of the big projects outside the tire industry is a $12 million data center under construction by Ohio Bell in Akron's Opportunity Park. The facility is expected to be finished by mid-1985 and employ 150 initially.

In the retail arena, Cedarwood Construction Co. is renovating the old Akron Square Plaza, a vacant mall, into a factory outlet center. The $10 million project is scheduled to start before the end of the year.

Downtown Akron is also undergoing renovation. More than $26 million has been invested in the downtown area during 1982 and 1983, says Greg Balbierz, a city economic development analyst. Among the big projects is CitiCenter, now emerging from a former YWCA building. This $7 million project is scheduled to open in late 1984 and will house an athletic club, offices and retail outlets. A skywalk will connect CitiCenter with other key downtown buildings.

The M. O'Neil Co. department store downtown is also undergoing $2.5 million worth of rehabilitation, and the Civic Theatre is getting a $1 million facelift.

The area's unemployment rate is hovering around 12%, down from 15% in January. The Akron Home Bureau Assn. expects single and multi-family housing starts to hit 2,575 in 1983, up from 2,280 in 1982.

Although things are looking brighter in the area, development experts are searching for ways to keep the economy growing. Their most recent innovation was an "industrial incubator," or a facility to foster the growth of fledgling companies.

The incubator is jointly sponsored by the City of Akron, Summit County, the Private Industry Council and the University of Akron. They acquired the former O'Connor Steel Co. plant last year, and it now houses five companies ranging from an industrial robot manufacturer to a sporting goods distributor.

City fathers hope to have at least 12 companies in the facility by the end of the year and are already planning a second incubator and a venture capital fund. Summit, Medina and Portage counties are served by five daily papers, four am and five fm radio stations, four tv stations and three cable companies.

Chicago, Ill.

Population '80	6,060,387
Rank	3
Est. income '82	$58,042,372,000

Sometimes Chicago just doesn't live up to its reputation.

The Windy City actually ranks far down on the list of the nation's windiest. And the City that Works faces high unemployment and politicians whose bickering over what is left of a crumbling machine's patronage system often brings local government grinding to a halt.

Hit hard during the recession in its economic center, manufacturing, Chicago faces the recovery plagued by a flurry of economic and social problems, not the least of which is racial tension, usually latent, but brought to the forefront by last spring's election campaign in which Harold Washington became the city's first black mayor. Though fiscal crises seem to land upon the city more often than in the past, many say Chicago is just passing through a troublesome phase as its economy shifts from a manufacturing to a service base.

Employment statistics show the move away from manufacturing and toward service industries began some time ago, even before the recession knocked the stuffing out of manufacturing employment. In the last few years, the switch gained momentum.

The total number of employes in the mining, construction, manufacturing and public utility fields dropped 17.6% since 1980 to about 935,000 by mid-1983. The other nonagricultural fields—service, financial, retail and government—managed to show a slight gain in number of employes in the face of the recession, inching up 1.6% to 2.1 million during the same period.

Among retailers, there is considerable optimism, particularly along Chicago's premier shopping area, the Magnificent Mile. While the wait for a Bloomingdale's—estimated time of arrival is 1987 in yet another new shopping complex—continues, Neiman-Marcus opened a posh store in time for the holidays even though the building that houses it, the Olympia Center, has months of contruction to go.

Ralph Lauren's Polo store moved to larger quarters in the recently completed and ostentatiously named One Magnificent Mile building. A host of other high-price retailers have opened for business there as well.

Some worry that the opening of so many retail centers in the Near North Side area will glut the market, but the shopping center that helped start it all, Water Tower Place, is doing a booming business.

While other purveyors of specialty foods and confections are also expanding operations, more traditional food retailers struggle to keep hold of a protean market. Consumers on the affluent North Side are buying more varied and expensive foods in order to follow the gourmet cooking fad. But major supermarket chains are closing stores in troubled areas of the South Side, where unemployment reaches 30%.

Even in relatively affluent areas and particularly in outlying suburbs, traditional supermarkets are beginning to see serious competition from warehouse stores that sell package goods out of shipping cartons and bulk foods packed by the consumer.

Further back along the industrial food chain, some food processing companies are running into tough times. Meat processing companies still operate several plants around town, though Chicago no longer sees itself as the world's hog butcher. But tough price competition from nonunion plants scattered through less urban parts of the Midwest has led to several plant closings and an ongoing struggle between management and unions.

Many manufacturers see Chicago as a tough place to do business because of high county and state taxes and the predominance of unions. On the other hand, some businesses find it advantageous to locate near Chicago.

Area businessmen and local government officials are pushing the idea of a high-tech corridor or arc that cuts through suburbs to the west and northwest of Chicago. They see an entrepreneurial business district anchored by the large electronics companies already located in the area.

The combination of a relatively central location in the nation, busy international O'Hare International Airport and a cosmopolitan city, where young up-and-coming engineers and executives can find an apartment for under $500 a month, is attracting diverse companies to the area.

While government types chase glamorous high-tech companies, a growth company in the fast-food industry, Chart House shifted headquarters from Lafayette, La., to suburban Chicago. The reason? "I lived in Chicago before and I liked the city," said Donald N. Smith, the company's new chief executive officer. He added that the location makes it easier to hire top-flight executive talent and provides him with easy access to restaurants and franchises scattered around the nation.

As the number of young professionals increases, so too does the number of apartment buildings in the city. An area a few blocks west of the Magnificent Mile is favored by developers betting on a revitalization of the downtown Loop business district and a continuation of apartment construction there.

Meanwhile, gentrification of older parts of the city to the north and south continues. The South Side has the University of Chicago, the Chicago White Sox and Hyde Park. But it also has the area's largest waste dump and the shells of deserted factories. The North Side has Old Town and New Town, a large number of small theaters and good affordable restaurants. But it also has shells of deserted factories a little to the west and the Chicago Cubs.

In general, Chicago is in good shape for the future. The federal Bureau of Labor Statistics predicts the number of employes in Illinois will grow about 3% through the decade. The same rate applies to the Chicago area, which accounts for three-fifths of the state's employment.

And racial tensions have eased since the election. Chicago still is a city of economically and racially defined neighborhoods. A walk of a few blocks can take a person from the wealthy Gold Coast to the poverty-stricken projects of Cabrini Green. But blacks and other minorities have gained a large amount of political and business clout in recent years. And, clout is what it's all about in Chicago.

That's officially noted by the *Chicago Tribune*, the city's largest newspaper, in a comic strip called Clout Street put together by editorial cartoonists and others. Another famous annotator of clout, Mike Royko, resides at the *Sun-Times*, (recently acquired by Rupert Murdoch's News America Publishing Co., to the trepidation of many Chicago journalists). The *Sun-Times* runs a fairly close second to the *Tribune* in daily circulation.

The city also houses three major network owned-and-operated tv stations, two major independents (including superstation WGN) and a Public Broadcasting System affiliate that earns a chunk of its budget by taking commercials. A total of 15 tv stations serve the market.

A substantial number of small neighborhood weeklies and dailies fill the niches on the print side. Backing up tv in broadcast are 49 radio stations. Although cable franchises have been awarded, the city is not wired. The suburbs have a variety of services.

Test your metro knowledge

By Ed Zotti

For years Americans have argued over the relative merits of their home towns—which city is the liveliest, the most expensive, the coldest, the rainiest, whatever. Until recently, however, most such arguments were strictly of the hot-air variety—there was no good way of checking out the truth. Until two years ago, that is.

That's when Rand McNally published the "Places Rated Almanac" by Richard Boyer and David Savageau. PRA ranked 277 U.S. metropolitan areas according to quality of climate, housing, healthcare, crime and so on. In the process, the authors unearthed a vast treasury of oddball facts about the nation's cities. See if you can recognize these 12 cities from the facts provided below:

1. It has the most taverns per capita of any city in the U.S. (curiously, among the nine runners-up in this category, six are in the same state as the leader). It's also among the top 10 in movie theaters per capita. One of the safest cities in the U.S. (second lowest in violent crime), it's also among the coldest, a phenomenon noted in such other Northern Plains cities as Fargo, N.D., and St. Cloud, Minn.

2. It's the largest city in the country without a zoo.

3. PRA considers it the best all-around metropolitan area in the country, with the nation's best transportation system, although it also has the second most congested freeways. It's among the top 10 in most available seats at spectator sports per capita. On the negative side, it's among the top 10 in murder and robbery rates. The state it's located in has the widest gap between richest and poorest school districts, and also leads the U.S. in quantity of moonshine confiscated annually.

4. It's among the top 10 in all-around climate, although a farmer was killed there once by a hailstorm. It has among the fewest bowling alleys per capita of any city in the nation. It's in the top 10 for murder and rape, and ranks among the 10 lowest in "educational effort," a measure of the resources invested by each city in its local school system.

5. It has the worst auto theft rate in the country, but it also has one of the lowest unemployment rates. It can boast of the country's best universities for law, business, medicine, engineering and music. One of those universities is also the nation's most expensive. It is among the 12 windiest cities, and among the top 6 in real estate taxes. It is one of a handful of cities whose public transit system includes ferryboats, trolleybuses, streetcars and subways. It offers the most racing days of any city in the country for thoroughbred, harness and greyhound racing.

6. It's the sunniest and driest city in the U.S., and is among the top 10 in hours per year over 80 degrees. Partly as a consequence (air-conditioning, you know), it's among the highest in electricity use per household. It's in the top 10 for murder and robbery, but it also has the second highest per capita spending on parks and public recreation.

7. It has the most even climate on the continent, and is among the top 10 cities in freedom from ragweed pollen. Its housing is some of the most expensive in the nation, and its property taxes on houses are among the highest. It's in PRA's top 10 for "supply of cultural facilities." The state in which it is located has the nation's highest incidence of leprosy, malaria and typhoid fever.

8. It's the only major American city with no heated homes, and has the lowest number of heating-degree days, a measure of evenness of climate. It's among the 12 windiest American cities. It has the most expensive housing (more than $170,000 per unit average), but among the lowest real estate taxes. In its population class, it has the highest rate of "culture per capita," as calculated by PRA. It's also in the top 10 for amount spent on parks and recreation. Unfortunately, it also has one of the highest student-teacher ratios.

9. It has the nation's most popular aquarium even though it isn't near an ocean. It has the most popular zoo, the second highest museum attendance, and the second most popular harness racing track, all of which help put it in PRA's top five for recreational opportunities and top four for "supply of cultural facilities." It is not one of the windiest cities in the country. It has among the nation's most severe air pollution, and typically has only 70 sunny days a year.

10. It was the fastest-growing metropolitan area from 1970 to 1980 (95.1%). It's projected to have the second highest job growth rate through 1990. It offers the second best access to public golf courses, is among the top 10 best cities in freedom from ragweed pollen and is among the top 10 for projected income growth through 1990. On the other hand, it's the third hottest U.S. city, with 103 days in the 90s per year. It's also in the top 10 for aggravated assault.

11. The fifth coldest city in the U.S., it also has the lowest percentage of houses over 40 years old of any American city. It has the highest average household income, the highest teacher salaries, and ragweed pollen index of zero. The state in which it's located has the lowest death rate for heart disease, cancer and stroke, but the highest death rate for accidents, giving it one of the lowest life expectancies in the nation.

12. This godforsaken pesthole has the third worst economic prospects of the 277 metro areas studied. It saw the steepest population decline from 1970 to 1980 (8.5%) and had either the worst or second worst crime rate, depending on how you calculate these things. It has the lowest household use of electricity, but the highest bills per household. On the other hand, it has the most museums, theaters, public and fine arts broadcasting outlets, opera companies, dance troupes, symphony orchestras, employed artists and major universities. Perhaps equally important, the state in which it is located has the most golf facilities in the nation.

Ed Zotti, a writer in Chicago, is a frequent contributor to Magazine.

Cincinnati, O.-Ky.-Ind.

Population '80	1,401,491
Rank	28
Est. income '82	$13,952,491,000

If one used construction as the sole indicator of economic health, Cincinnati would seem vigorous indeed.

An unprecedented downtown building boom is expected to add 2.4 million sq. ft. of office space to the more than 1 million sq. ft. built recently in surburban office parks and large-scale renovation projects at various downtown sites. Much of the new investment has come from out-of-town interests betting on companies desiring Cincinnati offices because of the city's lower rental rates. While city planners do not anticipate significant population growth, they do hope the city will become a good location for serving the Northeast and Sunbelt.

Whether or not there will be enough tenants depends on whom you ask. A few have raised the possibility of a glut, while city development director Nell Surber pointed to the current 2% vacancy rate among Class-A office space. He said Cincinnati needs the room, especially for attracting new businesses.

Attracting new businesses is a primary goal of Cincinnati's "Blue Chip City" campaign. Meant to publicize the city's virtues as a place to start or relocate a business, the campign involves the chamber of commerce and chief executive officers of several major local corporations. Its fulltime director is William Price, formerly general manager of Taft Broadcasting's Kings Island amusement park. The chamber of commerce also hopes to develop a venture capital fund; the city received a $150,000 venture capital grant from Gannett Co. in January, 1983.

The Blue Chip campaign emphasizes Cincinnati's economic stability. The city suffered many problems common among northern industrial cities during the recession, though to a lesser extent. Particularly hard-hit was the machine tool industry, long a staple of the local economy. Steel and automotive industries also faltered.

But the city shows signs of recovery. Employment in August was still down 0.9% from the year before, and metropolitan area unemployment was 10.7% in June. But Ford Motor Co. recalled all laid-off workers to its Sharonville transmission plant, as well as 600 at its Batavia facility; the General Motors Camaro/Firebird plant in Norwood remained strong, operating two full shifts per day. Armco Inc., the diversified steelmaker based in nearby Middletown, O., continued to lose money but recalled 860 local workers in July.

General Electric Co., Procter & Gamble and Kroger Co. remained strong, but on the downside, Revlon Realistic, a manufacturer of haircare products, announced in October it would close its Cincinnati plant, laying off 250 workers. No one yet knows the impact of Baldwin-United's bankruptcy.

Retailers have experienced recent modest gains (except for the Union Terminal development, which faltered and appears doomed), but the major expression of confidence in Cincinnati came from outside as two major companies embarked on local ventures.

Construction continued on a new Saks Fifth Avenue store adjacent to the Hyatt Regency downtown, which is also under construction. And Hyper Shoppes, a European company, announced plans to build its first U.S. supermarket on the city's east side.

The housing market improved, with real estate companies holding steady or making modest gains, although the condo market lagged. Rehabilitation efforts continued in several older neighborhoods and downtown, where Two Garfield Place and One Lytle Place, new buildings, and Fourth Plum, a renovated structure, vied for upscale tenants moving back to the inner city.

Although few see it as a panacea, the city has begun promoting local growth in high-tech industries. A planned Institute for Advanced Manufacturing Sciences has a board of directors and some funding; proponents hope to begin construction in 1984 and seek additional financial support and a management organization; the institute would provide space for high-tech research.

Efforts at attracting corporate relocations have had some success. AT&T Long Lines plans to lease 435,000 sq. ft. of new office space for its national engineering and design layout facilities. Merrell-Dow intends to move part of its pharmaceutical division from Indianapolis to Cincinnati, and USI Industries, part of National Distillers, plans to relocate its New York headquarters in Cincinnati by the summer of 1984.

Predictions of wholesale business flight from the state have not proved accurate, but some companies have chosen to occupy land in Northern Kentucky rather than pay Ohio taxes. Still, a referendum proposal to repeal taxes implemented during Gov. Richard Celeste's administration and before was voted down after concerted efforts to convince Ohio voters that the added revenue was necessary to help solve the state's fiscal problems.

Cincinnati's advertising community has recovered from its major recent blow, the loss of Kenner Toys' business to New York. Sive Associates, the agency that lost Kenner, recovered last year by snatching Ideal Toy Co. from a Manhattan agency. The larger Cincinnati agencies have continued making modest inroads in neighboring markets, landing accounts in Tennessee, Indiana and Texas. No major new defections occurred in the last year.

Suburban newspapers (at latest count numbering 28) grew as they began filling gaps in the surburban coverage of the two major dailies, the *Cincinnati Enquirer* and *Cincinnati Post*. Other media servicing the area include five commercial tv stations, one public tv station, seven cable services, nine am and 17 fm stations.

Cleveland, O.

Population '80	1,898,825
Rank	16
Est. income '82	$19,735,433,000

Dennis Kucinich returned to Cleveland City Hall this autumn—and the city survived (he won election as a city councilman). And it is fast becoming the opinion of most business people around town that the city has emerged from Mr. Kucinich's stormy years as mayor of a town that can take its knocks, survive and even thrive, whatever the economy and the comedians toss Cleveland's way.

When LTV Corp. announced it was buying locally based Republic Steel Corp. to team with LTV's Jones & Laugnlin Steel subsidiary, Republic's executives fought and won the battle to keep the merged company in Cleveland. That meant hundreds of jobs would stay in the city, another sign that the ball was beginning to take a Cleveland bounce.

While many manufacturing operations have closed plants and otherwise trimmed operations, the area's steel, auto and auto-related industries have started to call workers back to their jobs.

In addition, there are a number of

KNIGHT-RIDDER NEWSPAPERS
THE BIG NEWS TODAY ISN'T JUST IN THE PAPER

It's about the paper

New Simmons' and Scarborough findings have increased your media planning opportunities.

Great news for advertisers.

Now there are two syndicated newspaper audience studies on the books (and in the computer) and they have changed the way you'll look at newspapers forever.

Simmons' study of the top 40 ADIs and Scarborough's study of the top 50 have proved that today's newspapers deliver an average of more than *2.7* readers per copy.

Monitored by ARF, these studies now provide local audience data—detailed reach and frequency, along with audience demographics—for more than 150 dailies and 113 Sunday newspapers; no other medium provides such complete information for so many local markets.

And more importantly, now you can evaluate newspapers against broadcast and magazines using *the same criteria*—great news for media decision-makers.

Unquestionably, newspaper planning has just entered an exciting new era. So, the next time you start to consider the most effective way to reach an advertising audience, we hope you will consider this: the printed word is powerful. And it now allows you to make a more precise media buy than ever before.

Call your Knight-Ridder sales representative to learn how newspapers can work best for you.

Knight-Ridder Newspaper Sales, Inc.

NEW YORK · ATLANTA · CHICAGO · DETROIT · LOS ANGELES · MIAMI · MINNEAPOLIS · SAN FRANCISCO

growing regional and national retailers headquartered in Cleveland that are adding optimism to the outlook for the area's economy.

Cole National Corp. (which operates Children's Palace toy stores, the optical departments in Sears and a number of other speciality retailers); Fabri-Centers, a major fabric seller, and Revco D.S., one of the largest drugstore chains in the country, all call the Cleveland area home.

Under Mayor George Voinovich, the central city itself is also organizing as never before. The mayor's administration is putting its efforts behind programs that assist businesses looking to expand and is pursuing federal tax dollars for both business and community development.

Mr. Voinovich recently credited his own planning and development department for spearheading a drive to obtain a federal grant for major street and water main repair in an industrial area on the city's southeast side, as well as for a $3 million federal grant for an industrial park in the depressed Hough area.

Construction downtown and elsewhere is continuing, as the area's economy changes to a more diverse service orientation and office buildings replace smokestacks on the city's skyline. Four skyscrapers under construction or just completed will provide expansion for many of the largest businesses headquartered in the area, including the Eaton Corp., Ohio Bell Telephone Co. and Standard Oil Co. (Ohio).

Other downtown development includes a renovation of the area surrounding the Terminal Tower, the city's tallest building. The Tower City project is expected to include a total of 18 interconnected buildings including a hotel, a medical merchandise mart and office and condominium space.

Though the suburbs are still closely tied to the central city, development in outlying areas continues with Scott Fetzer Co. and the Nordson Corp. putting up new headquarters and a handful of developers planning speculative office buildings in growing suburban commercial areas. An estimated 2,000 apartment units are also under construction in the area.

One of the most promising areas for economic growth is expected to come from companies that produce sophisticated medical equipment. Already the home of Technicare Corp. and Picker International—two major competitors in the medical imaging business—the area has a group of smaller companies cropping up in related areas.

In addition, one of the area's largest employers is the Cleveland Clinic. Though it already draws patients from around the world, a massive building program already is under way. If it comes to pass, the Tower City medical mart will provide an important boost to the area's travel and convention business, which has been lagging.

The city is also home to two major trade publication groups. Penton/IPC publishes 27 titles and HBJ Publications, a subsidiary of Harcourt Brace Jovanovich, recently set up shop in a Cleveland suburb for its stable of 131 titles.

Though the city last year lost its afternoon daily newspaper, the *Cleveland Press*, the city is served by the morning *Plain Dealer*, a half dozen suburban afternoon papers and the chain of 17 weekly *Sun* newspapers.

Two dozen radio stations fight hard for ratings points and advertising dollars with no one station able to hold a secure spot for very long.

The demise of a subscription tv service last summer gave the city five fulltime tv stations (three vhf and two uhf) with plans for a new station to be on the air early next year.

Columbus, O.

Population '80	1,243,833
Rank	33
Est. income '82	$11,748,226,000

Compared with many cities in the Midwest, Columbus led a charmed existence throughout the last recession.

Although the recession left its mark downtown, Ohio's capital weathered the difficulties largely because of its balanced economy. Much of the local economy's growth has occurred in the service sector.

Public employes represent about 20% of the labor force, and heavy industry provides fewer than 25% of the city's jobs, said Ernest J. Hartong Jr. of the Columbus Area Chamber of Commerce. "We have had some decline in manufacturing," said the economic development officer. "It has not impacted us like it did some other cities."

The city's unemployment rate stayed well behind the state's during the recession. Ohio unemployment peaked at almost 15% in January, while the Columbus rate was just above 10%. Nationally, the jobless level was almost 11.5%.

The Dayton Malleable foundry closed in 1981, and major layoffs occurred at a number of manufacturers, including Timken, Columbus Auto Parts and Fisher Body.

There was employment growth, however, at plants owned by companies such as Liebert, AccuRay and Worthington Industries.

Rockwell International's work force has grown to about 4,500 since the company won contracts for B-1 bomber components, and employment is expected to peak at 6,500 by mid-1986. In nearby Marysville, Honda employs about 1,500 workers in its new auto plant. The state government is the largest employer in Columbus, with 19,800 employes.

Next come Ohio State University (18,400); the federal government (11,070—not including military personnel); Columbus public schools (7,000); F&R Lazarus (6,480); the city government (6,060); Nationwide Insurance (6,060); Ohio Bell (4,820); Western Electric (4,750), and the county government (4,400).

Downtown Columbus is experiencing extensive construction. The largest effort is Capitol South, a redevelopment project encompassing three blocks immediately south of the capitol building. Combined public and private funding is being used, with the city government retaining title to the land. The value of the entire project will total an estimated $250 million to $400 million.

Most progress so far has occurred in the north half of the development. The Pickett Cos. and Aetna Life Insurance built One Capitol South, a 12-story, mirrored-glass office building. Foundation grants and federal funds paid for the Centrum, a small park which includes an outdoor skating rink. Plans call for later construction of a parking structure and mall.

Largely completed is Capitol Square, a $100-million, twin-tower complex being built by John W. Galbreath and Co. It is designed to provide office space and house a 400-room Hyatt, the downtown district's second.

Adjoining Capitol Square is the Ohio Theatre, a restored historical landmark undergoing a $9 million expansion. A glass-covered esplanade would connect the theater and the Galbreath complex.

Another downtown construction project is the Huntington Center. The $100 million complex would house the parent company of Huntington National Bank, plus other tenants. The building would be topped by a 193-suite, $15 million luxury hotel planned by the Pickett Cos.

Columbus has experienced healthy growth in its convention business. Major conventions drew about 565,000 people in 1982, and 1983 attendance is projected to reach 600,000, reports the visitors bureau. Last year, convention visitors spent an estimated $85 million in Columbus.

Several corporations recently established headquarters in the area. American Electric Power, formerly headquartered in New York, moved into an $80 million, 32-story downtown office tower. Anaconda Advanced Technology moved from Los Angeles and expanded its Columbus production facilities. The company makes computer-based control systems for the industry.

Combiblock, a manufacturer of aseptic packaging, opened a headquarters and production plant here. Also moving into new quarters were Ohio State Life Insurance and Farmers Insurance of Columbus.

At Port Columbus International Airport, more than 2.6 million airline passengers used the facility in 1982, up almost 8% from the previous year. A new, $72 million terminal was completed in 1981, providing 500,000 sq. ft., more than triple the previous year.

Fifteen airlines provide service in Columbus, several more than there were before deregulation. Midway canceled its Columbus operations this year, and other carriers have reduced service. Columbus, however, has not lost air connections to any major city.

The closed Rickenbacker Air National Guard Base, with a pair of 12,000-ft. runways, is expected to become a major air freight center. The airport authority expects to receive title to the property from the federal government late this year. The authority plans to develop an industrial park in an effort to attract aircraft and aircraft component manufacturers to the site.

The ad industry continues to prosper in Columbus. Lenere Shrieves, new business coordinator for Hameroff/Milenthal, said the city has almost 150 advertising agencies. She said her agency has doubled its volume to about $14 million in the past year. Much of the growth has come in the marketing of computers and health care.

Columbus has two daily newspapers, 18 weeklies and three monthly magazines. There are four cable tv companies. In broadcasting, there are four tv stations, plus seven am and 11 fm radio stations.

Dayton-Springfield, O.

Population '80	942,083
Rank	45
Est. income '82	$8,456,131,000

Thanks in part to a turnaround in the auto industry, Dayton's wounded economy has stabilized, if not improved.

The Dayton area had been battered by plant closings and layoffs in 1980 and 1981, but no plant closings have been reported in the last two years. John Cordray, chief economist at the Dayton Chamber of Commerce, said unemployment in Montgomery County is 9.4%, the lowest since April of 1982. There are 368,000 employed workers in the county.

11. Anchorage, Alaska.
12. New York.

Second City proves it's second to none

By Jack Hafferkamp

Ten years ago—before "Saturday Night Live," "SCTV," "The Blues Brothers," "Animal House," "Cheers" or even "Hill Street Blues"—New York drama critic Clive Barnes made a striking comment.

"The entire recent tradition of American theatrical satire," he had written, "can be summed up in three words, The Second City."

Today, when Chicago chauvinists are justifiably proud of the second city's thriving theater scene, The Second City has emerged as America's deepest comedy talent well. It has launched the careers of more famous actors and actresses than there is room here to list. But from Joan Rivers to Tim Kazurinsky and Alan Arkin to Shelly ("Cheers") Long and Betty ("Hill Street Blues") Thomas, the roster is a virtual who's who of America's funny people. And the humor doesn't even stop at national borders. Since 1973, there has even been a Canadian Second City, which resides in Toronto.

This week, the Chicago home base celebrates its 24th birthday. Born Dec. 16—Beethoven's birthday—1959 in a converted Chinese laundry in Chicago's Old Town, it is currently offering its 65th revue, "Orwell That Ends Well." The show is a hit, mixing—as always—topical humor with doses of pure silliness and strong audience identification.

How do they do it, show after show, year after year? This amazing history continues because producer Bernard Sahlins and associate producer Joyce Sloane have established a repeatable process for generating and packaging comic creativity.

"The form is flexible," explains Ms. Sloane. "The actors can perform their craft every night, and because we do improvisations four nights per week, they have the opportunity to fail. That's really what helps our people to grow so fast.

"Second, we are a company, but our cast is continually changing. We have auditions for each show. This guarantees that we change with the times and that the people on stage have the same points of reference as the people in the audience. When the actors mention a hit song, the audience knows it. Other satirical theaters have come and gone as the people who created them went on to other things. We're still here because we're always looking for new people to give us that new blood."

Who said 1984 couldn't be funny? The Second City has turned it into its latest revue, "Orwell That Ends Well."

One reason sometimes advanced for The Second City's original ability to take root is that Chicago was safe from the corrupting temptations and pressures of the Los Angeles-New York bigtime entertainment mainstream. Unmolested in their relative obscurity, Mr. Sahlins, Ms. Sloane, directors Paul Sills and Del Close and pianist Fred Kaz were able to perfect The Second City style.

Today, however, there is no obscurity. The Second City has become so well known as a talent pool that the network tv executives and movie people drop in regularly. The Second City's fame also means that there is never a shortage of hopeful young actors and actresses ringing the doorbell.

Those who pass the test are admitted to a backstage atmosphere that is a heady mix of nervous energy and bursts of inspiration. The environment is competitive yet supportive, exhausting yet energizing, liberating yet humbling. Even hard-boiled journalists often have found its lure hard to resist.

Eliot Wald went from feature writing at the *Chicago Sun-Times* through The Second City to comedy writing for "Saturday Night Live."

Denise DeClue went through a Second City workshop as research for a story and wound up joining the Second City Touring Company. She also worked with Mr. Sahlins and cast members brainstorming tv and film development projects.

That led to film script projects including "My Bodyguard," a yet-to-be filmed adaptation of David Mamet's play "Sexual Perversity in Chicago" and a Bette Midler film known variously as "Big Success" or "Woman On Top"—all written in conjunction with "Saturday Night Live" cast member Mr. Kazurinsky.

"In a way, Second City is like high school," says Ms. DeClue. "The people who play on the main stage are the upperclassmen. They're cocky and cool. The freshmen are the new kids in the touring company. They have to prove themselves to the older kids. Bernie is the principal."

Mr. Sahlins has expressed The Second City's philosophy of humor in this way: "We always feel that the worth of our material depends on how true it is. You can always get a laugh by dropping your pants, but we think that's a cheap shot. The best material is based on identification—when the audience says to itself, 'Yes, that's right!' "

Of course, when everything is working onstage, that identification is so fast that few in the audience see the show's seams. Thus outsiders often have a hard time comprehending exactly how demandingly intense the Second City experience is for the young talents onstage. But there is a glimmer of the kind of ego commitment and dedication to excellence one finds inside The Second City in this story from Joyce Sloan:

"The day after Brandon Tartikoff [NBC-TV's vp-entertainment] was here, our sandwich maker and dishwasher, Clark Bachman, said to me that it had been a wonderful experience seeing his old prep school mate Brandon. 'You know,' Clark said to me, 'when I was editor of the school paper, I would never accept his work.' "

Jack Hafferkamp is a free lance writer in Chicago.

General Motors Corp., the major employer in Dayton, recalled about 3,000 workers in 1983 to work in its new small truck and diesel engine plant.

In addition, Wright Patterson Air Force Base, near Dayton, will be a key consultant in the development of the B-1 bomber. Rockwell International Corp. has the contract to manufacture the aircraft in other parts of Ohio, but it will engage several local companies to supply parts. Wright Patterson itself employs 22,000 people.

But while manufacturing remains the area's bread-and-butter category, Dayton is slowly moving toward a more service-oriented and high-tech economic base. NCR Corp.'s headquarters here recently expanded by opening a microchip plant in nearby Miamisburg. The plant is to have from 150 to 300 employes.

Retailing companies, said Mr. Cordray, are experiencing "some growing pains." New owners are being sought for Arcade Square, a downtown mall that has had trouble filling space. On a more promising note, a renovated warehouse on the edge of downtown has reopened as a discount center called Factory Mart Outlet.

Because Dayton is home to several corporate headquarters, hotel owners report occupancy rates are high and business is good. There has also been an explosion of fast-food restaurants in the last 18 months.

Mr. Cordray said 1983 has been a "good but not a super year" for Dayton businesses. "The capital goods industry has still not gotten back to full swing," he said.

In nearby Springfield, part of the Dayton market area, unemployment stands at 10.1% in a workforce of 70,723. Still heavily based in manufacturing, the city is the site of large International Harvester, Kelsey-Hayes Speako division and Cooper Energy Systems plants.

Chamber of commerce officials say economic recovery has reached Springfield. International Harvester transferred its trucking assembly operations to the city in 1983 and recalled some 2,000 workers. Kelsey-Hayes, an aircraft parts company, is experiencing big increases in government contracts.

The pickup in manufacturing has been beneficial for Springfield's service industries. O'Neills' restaurant, which had been closed for a year, is scheduled to reopen; other small restaurants and a bakery plan to expand or reopen.

City officials, the chamber of commerce and the Clark County Development Corp. are aggressively trying to keep businesses in Springfield through financial incentives such as revolving loan funds, industrial revenue bonds and extensive use of Urban Development Action Grants.

As a result of joint private industry government efforts, three industrial parks are now being developed, a downtown office building has been renovated and a factory outlet mall, with 70% of its space already leased, will open within a few months.

"We're out to help business and industry in the city," said Mark Yates, economic development director for the chamber, "and it seems to be working."

Springfield's major newspaper is the *Springfield News* and *Sun*. Its radio stations are: WDLY (am), WAZV (fm), WIZE (am) and WEEC (fm). The market is served by one cable company and a weekly advertising paper. Columbus and Dayton tv stations also are received in Springfield.

In Dayton, the major media are: Two daily newspapers, the morning *Journal Herald* and *Dayton Daily News* in the evening; three tv network affiliates; 10 radio stations (am and fm); two cable tv companies and a public tv station.

Detroit, Mich.

Population '80	4,488,072
Rank	5
Est. income '82	$43,676,370,000

In 1981, some Detroit area blue collar workers jumped in their pickup trucks or campers, headed for Houston, found the pastures less than green and came back home.

Today, despite a bare-bones budget, layoffs and unacceptable unemployment rates, Mayor Coleman A. Young can say, "There is nothing wrong with this city . . . that a national economic recovery won't cure."

Working toward that end, the U.S auto makers introduced 1984 models that have neat fits and finishes. And the industry is revving up for spectacular earnings records for 1983.

Chrysler Corp. had earnings of $100.2 million for the third quarter, $582.6 million for the first nine months, or better than Chrysler's best full year.

General Motors Corp. recorded $736.9 million in nine-month earnings, a record.

Ford Motor Co. had $333 million in nine-month earnings—it, too, a record.

And Detroit can certainly use its share of the trickle-down.

Meanwhile, city planning and building continue in many sectors of the community. Here are some highlights:

Groundbreaking for a downtown People Mover took place in October. The elevated system would link key activity centers along a 2.9-mile loop of the central business district. Among the system's 13 stops: Cobo Hall, Joe Louis Arena, the financial district, Bricktown, Greektown and the Renaissance Center—ending the perceived isolation of Ren Cen from downtown Detroit. Opening in 1986, the system is expected to carry about 57,500 people daily by 1990.

"It will create hundreds of construction jobs and encourage investments in office, retail, hotel and residential land uses within the downtown area," said Gary Krause, general manager of the Southeastern Michigan Transportation Authority.

The People Mover would also connect with the $77 million Riverfront, a 10-acre, self-contained community built around twin 29-story luxury apartment towers. Each of the 604 apartments is designed to provide an impressive view of the Detroit River.

Riverfront is designed to offer all the expected conveniences, plus a parking garage, private 77-boat marina, health club, racquetball and tennis courts, jogging track and 6-acre park. Occupancy at Riverfront begins in the spring of 1984.

In the retail area, Diane Edgecomb, president of the Central Business District Assn., discussed the trauma created by the closing of Detroit's queen of downtown department stores, the J.L. Hudson Co., in 1982.

"There's no question that the loss of Hudson's created a vacuum in services," she said.

Yet other stores have absorbed those services after a thorough survey of the local needs.

To facilitate business in the area, Ms. Edgecomb's organization has divided downtown Detroit into "clusters" of commercial neighborhoods: Bricktown, Woodward Ave., Washington Blvd., the financial district and others.

The neglect of former years is being corrected by organization "Resource Teams" working with business owners to determine area needs. Parking? Transportation? Security? Lighting? Years ago, the plan worked for Greektown—a big success, day and night.

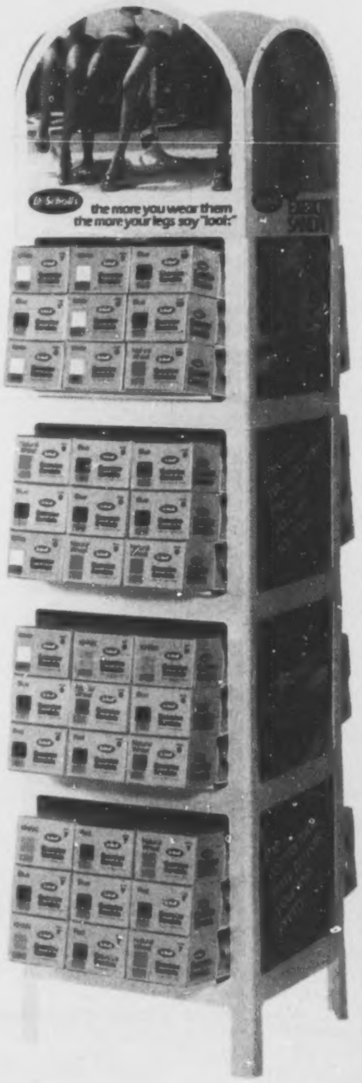
An open house for prospective retailers will be held in the spring. Ms. Edgecomb said, "We're not going to . . . bring them in unless I think they can make money."

Detroit's Metropolitan Center for High Technology is an effort to bring university minds and business intitiative together for the purpose of developing new high-tech industries in Detroit and surrounding areas.

The 272,000-sq.-ft. center opened in October at the former Detroit Institute of Technology facility near Wayne State University. Federal, state, city and private funding totaling $9.7 million has been invested.

Tenant development companies would be provided with libraries, computers and technical laboratories as well as access to WSU consultants. When in place and producing for the

Our stock displays helped Dr. Scholls put their best foot forward.



At Henschel-Steinau, we offer a wide selection of practical and versatile stock displays that can be a foot in the door to greater retail sales. By adapting these units to fill the needs of major companies like Dr. Scholls, our highly skilled designers and engineers have created prize winning displays that have been hugely successful at the retail level. In addition they offer these advantages:

- Eliminating the high costs and lengthy tooling time means fast delivery and better economy.
- Because of the wide variety of our stock units you can have the flexibility of custom design without the cost.
- Although ruggedly constructed for permanent use they are UPS shippable and can be set up and knocked down without tools.
- They can be ordered in limited quantities for test market situations.
- A large selection of stock trays and supports molded in any color can be custom decorated by silk screening, hot stamping or labeling.

Why not join Dr. Scholls, and other major companies, and see how Henschel-Steinau stock displays can fit your needs. You'll find them a highly economical step toward greater sales at the retail level. Call us today for a no obligation discussion of your immediate requirements.

**For more information,
call Henschel-Steinau today,
and put our stock displays to work for you.**

market, the new companies would increase job opportunities and strengthen the tax base.

A major liftoff for the economy and the spirit of Detroit will be the opening of the $800 million GM Assembly Plant. It is providing from 3,000 to 6,000 jobs and bringing in a projected $5.4 million in taxes. The plant is scheduled to come to life in 1984, in time for the 1985 models.

Detroit is viewed as a tough city—streetwise and experienced in survival. It's also a city of ethnic festivals, the Montreux-Detroit Jazz Festival, a Formula I Grand Prix, fm rock, live seminal blues, the International Marathon and sports, sports, sports.

The Detroit area is served by two daily newspapers, 12 am and 22 fm stations (plus six am and three fm stations in Windsor, Ont.), seven tv stations (plus two stations in Windsor) and 12 pay/cable tv services in the suburbs. Detroit is not yet wired for cable.

Flint, Mich.

Population '80	**450,449**
Rank	**91**
Est. income '82	**$4,032,306,000**

Flint is trying to position itself on an economic plateau, above the peaks and valleys of the auto industry, by attracting tourists, service and high-tech industries.

In March, 1982, unemployment in the market, which comprises Genessee and Shiawassee counties, reached a recession record of 23.7%, highest of any area in the nation. By this past August the rate was down to 15.5%, which translated into 35,500 workers.

Yet Flint is moving ahead with ambitious plans to metamorphose from a depressed industrial city with boarded-up stores into a tourist attraction with a thriving downtown.

The biggest transformation is the 22 downtown acres that are becoming AutoWorld, a $70 million urban theme park. A 70-foot dome at the park covers an area the size of a football field.

The entertainment and educational center expects to attract 900,000 visitors within a year after its scheduled opening next July 1, creating 1,800 jobs.

AutoWorld is financed by donations from the C.S. Mott Foundation, established for community betterment by an early industrialist who exchanged his axle works for stock in a brand new General Motors Corp. Other financing came from the General Motors Foundation, citizens of Flint and the Department of Housing and Urban Development.

Flint can also show tourists a new $22 million "town square" downtown park. In 1981, a $63 million Riverfront Center with a 400-room Hyatt Regency Hotel and convention center, and a $13 million Citizens Bank Building opened. An $8 million state office building opened downtown in summer, 1983. Windmill Place, a downtown complex of restaurants and small shops under one roof, has been drawing crowds since its 1982 opening.

The University of Michigan-Flint has a full enrollment of 5,000 at a new campus across the Flint River from AutoWorld. Projections of the campus's eventual cost reach $80 million.

Elsewhere, planners are working on Carriage Town, a restoration at the wagon works that became the first Buick plant.

In October, the Flint City Council moved to apply for an Urban Development Action Grant for the "Flint Festival Marketplace," or Center City Plaza. It would occupy a downtown block that contains a now-defunct department store.

As with most Flint redevelopment projects, the Mott Foundation is financing the planning and helping to attract federal funding. The purpose behind all the new plans is to provide service jobs, said former mayor James Rutherford. "Service jobs will be dominant in the future—motels, office buildings, restaurants—those kinds of things," he said.

"It's because the other isn't going to be there. We have to start preparing for that," he added.

There isn't any question, the mayor added, that "with 11 GM plants, we are dominated by the auto industry." Mr. Rutherford said an "incubator" building will soon provide low-overhead operation for new entrepreneurs. It's part of a master plan for diversification with new high-tech industry. The racetrack he once hoped for did not materialize.

Meanwhile, GM is scheduled to close a Chevrolet engine plant by next summer, idling 1,350. By 1985 the company plans to close a Fisher Body facility to consolidate its operations into a modernized Buick plant. Some of the 3,500 Fisher Body workers displaced may find jobs at the new Buick City.

Work is already under way on a $300 million project to modernize the 60-year-old plant, one element of which will bring robotics to production. Steel coming in one end would drive out the other as finished cars. The transformation should reduce worker hours per full-size car from 47 to 29, employing 200 fewer workers than Buick's present production methods would require.

Some Buick suppliers would begin manufacturing parts at an adjacent industrial park set up on recently cleared land.

Pittsburgh Plate Glass and Kasle Steel, which will handle body preparation, have already broken ground for plants expected to create 200 to 400 jobs apiece.

The city has one daily newspaper, the *Flint Journal*. Cable tv claims 41% penetration in an area that covers Genessee, Shiawassee, Bay and Saginaw counties. The market is also served by 11 radio stations including six am signals.

Gary-Hammond, Ind.

Population '80	**642,781**
Rank	**65**
Est. income '82	**$5,540,121,000**

Gary leaders are trying to shake the city's image as the urban blight capital of the U.S. and replace it with an image of a city on the rebound.

An enormous job lies ahead. Downtown Gary continues to lie moribund, full of boarded-up buildings and mostly empty streets. Its housing market is still stymied by high interest rates and unemployment continues to hover between 12% and 13%.

But using a two-year-old convention center, extensive airport renovation, a tax abatement ordinance and a planned industrial park as selling points, the city is attempting to market itself.

"With all that is taking place in Gary currently, with all the planning and projects and the public-private sector cooperation we've seen recently, we're convinced that Gary is going to experience a solid rebound over the next 10 years," said Charles Miller, executive director of the Gary Chamber of Commerce.

Mr. Miller is referring to several major public and private sector cooperative ventures designed to attract new business to Gary, including:

- A $15 million to $20 million upgrading during the last two years of the Gary Municipal Airport, including a new terminal, control tower, runway lighting and other improvements. Mr. Miller said civic leaders hope the refurbished airport will stimulate commuter and corporate aviation traffic into Gary and surrounding cities, including Chicago.
- A 1982 tax abatement ordinance that could "go a long way toward attracting business and investment in our community," said Mr. Miller. Under the ordinance, a company setting up operations in Gary would be exempt from property tax the first year, then would be taxed on only 10% the following year, 20% the year after that and so on. Machinery would be taxed in a similar manner, but on a five-year scale.
- Formation of a Local Development Corp., a private and public sector effort. The group, formed only recently, is equipped with private and federal funds to finance commercial development in Gary. A light manufacturing company and an art and graphics production company already have made inquiries, according to Mr. Miller.
- Plans by the Gary Industrial Foundation, a private sector group, to develop a 50-acre industrial park in North Central Gary. Land has already been purchased and the next step is to plan roads and utilities that would serve the area, Mr. Miller says.

Business leaders also have renewed efforts to attract convention business to Gary's two-year-old downtown civic center. Such business has been slow since the center was opened in 1981, but a hard-sell effort is under way.

Mr. Miller attributed these recent efforts to general warming in the relationship between business and Mayor Richard Hatcher. The mayor and his business counterparts had been at odds over how to revitalize the city, but that situation has softened considerably, he says.

All the optimism and revitalization plans in the world, however, can't alter one major aspect of Gary's fortunes—its close links with the steel industry, which continues to lag.

Tens of thousands of area steelworkers remain unemployed with little hope of widespread callbacks anytime soon. Not only that, Gary now faces a new round of layoffs recently announced by U.S. Steel Corp., this one involving white-collar workers and managers.

In nearby Hammond, less dependent on steel than Gary, there have been sparks of renewed commerce, but the movement is a long way from catching fire. The city has nearly 1 million sq. ft. of unused abandoned industrial space, which could actually prove to be a blessing in disguise, said Dewey Pearman, executive vp of the Hammond Chamber of Commerce.

For instance, Dietrich Industries, a steel reprocessing company, has moved into the abandoned Pullman Standard Works in Hammond and created 300 new jobs. That total may grow to 450 in another year.

Merrillville, another community in the area considered to be generally more stable than its neighbors, received a jolt recently. Prudential Insurance Co. announced plans to close its Merrillville offices, meaning the loss of 900 jobs.

The Gary market is served by two daily newspapers, two am and two fm radio stations, in addition to the Chicago media.

Grand Rapids, Mich.

Population '80	**601,680**
Rank	**69**
Est. income '82	**$6,106,720,000**

Grand Rapids fared better than other large industrial cities in Michigan during the recent economic doldrums. Stuart B. Cok, the president of the local chamber of commerce, claims the city is "one of the top 25 fastest-growing areas in the country—the only one in the northeastern U.S. to make the list."

While unemployment in September was still 10.8%, economists were predicting a job surge. Residential construction is showing the biggest comeback. Other new construction is increasing job rolls.

Steelcase Inc. recently completed a $50 million headquarters building. The corporation is the largest of Grand Rapids' many manufacturers of office furniture. The company has already built an energy center on a 400-acre site where it plans to invest $500 million during the next 10 years. With business volume growing by 15% yearly, Steelcase predicts it may add as many as 5,000 to its present employe roster of 7,000.

Another 4,500 Grand Rapids residents work for Amway Corp. In June, the direct sales company opened a new plant to produce all of its cosmetics and personal care items at its complex in nearby Ada. Plans call for 180 employes when its highly automated equipment gets up to speed by January.

Recently, Amway Corp. pleaded guilty to defrauding the Canadian government of custom duties and will pay a record $20 million (U.S.) fine. The direct seller said it "settled" the case to avoid costly litigation.

Both co-founders of Amway made the recent *Forbes* list of richest Americans. Richard DeVos, 57, and Jay Van Andel, 59, were reported to share $300 million apiece with relatives. Their contribution to the community is helping to rebuild downtown Grand Rapids.

In October Mr. DeVos and Mr. Van Andel cut the ribbon formally opening the $65 million Amway Grand Plaza Hotel complex. Its first phase opened in 1981 after Amway purchased and began remodeling the city's landmark Pantlind Hotel. The second phase added a 29-story glass tower with 682 guest rooms, plus banquet and meeting space. It connects via enclosed pedestrian skywalk to the Grand Center for performing arts, conventions and exhibitions, which includes the DeVos Performing Arts Hall, completed in 1980. In September, the hall's operators dedicated an art installation titled "The Grand," a work designed by artist Alexis Smith for its foyer.

Mr. Cok of the chamber of commerce said plans are to build another public museum near the Gerald Ford Museum, which now attracts 300,000 to 400,000 visitors yearly. Work should begin next year. Also, Grand Valley State College is planning to establish a downtown campus. There probably will be another hotel and possibly downtown housing, Mr. Cok added. Already, furniture maker Carl Forslund has converted five floors above its downtown retail operation into condos.

More than a third of the city's jobs are in manufacturing. General Motors Corp. operates two Fisher Body and two Rochester Products plants in the area. The corporation has recalled all laid-off workers and is bringing in workers with seniority rights from other plants. "GM has 9,000 employes here and we think that will continue to grow," said Mr. Cok.

Other manufacturers of office and related furnishings are American Seating, Herman Miller and Architectural Systems, which is finding a growing market for its computer furniture.

Retail sales in the city dropped to a recession low in 1982, but are said to have rebounded in 1983.

An independent uhf station, WXMI-TV, began broadcasting in 1982. The Public Broadcasting Service station is increasing its audience share steadily, and GE Cablevision is extending its penetration in the suburbs.

The *Grand Rapids Press* is the daily paper. The Spanish community is served by *LaVoz*, a bilingual monthly, and there's a weekly black publication, the *Grand Rapids Times*. Community weeklies are published by Advance and Cadence newspapers and the *Register* in nearby Rockford. *Grand Rap-*

ids magazine gets competition from a regional magazine, *West Michigan*.

The market is served by two network tv affiliates, an independent and a noncommercial public/educational station. The area has 11 fm stations and seven am stations, along with service from General Electric Cablevision Corp.

Indianapolis, Ind.

Population '80	1,166,575
Rank	34
Est. income '82	$11,160,718,000

National writers have often referred to Indianapolis as "naptown," but within three years the natives have become restless. Now the city wakes to the sound of jackhammers—and the smell of a growing market area.

More than $760 million in construction has been started, completed or planned in the past six years in downtown Indianapolis—a large portion since 1980.

In downtown Indianapolis, the American Union Life building was completed in October, 1982. At 38 stories high, the $50 million building is the tallest in Indiana. Of its 1.25 million sq. ft., 60% is commercially leased.

Also in 1982, Phillip R. Duke & Associates made its first mark downtown with the construction of One North Capitol, a 12-story office complex in the state capitol area. Duke's newest project, Two Market Square Center, an 11-story, $20 million building with office and retail space, should complement City Market and the Market Square Bldg.

In 1981, Robert Borns, an Indianapolis developer, changed local housing habits with the construction of Renaissance Place, a 120-condominium complex. Mr. Borns' current project is a $30 million Union Station renovation. Upon completion, scheduled for early 1985, the transportion center will give the downtown area 600,000 sq. ft. of retail shops, more nightclubs, restaurants and a 325-room "Garden of Eden" hotel.

Other office structures and retail developments in various stages of planning or construction include the R.V. Welch Office Bldg., a 12-story, $20 million tower boasting 240,000 sq. ft. of space; the Century Bldg., the largest privately funded renovation in the state at $10 million, and the Print Craft Bldg., with much of its space already leased to a high-tech company.

Indianapolis is also making several public space improvements. The Washington Street Transit Mall, a $16 million project, involves the one-way westbound rerouting of an eight-block segment of the "Main Street" of Indianapolis, providing an attractive setting for pedestrian and transit patrons. Also, the White River State Park is expected to be completed in the early 1990s. The 250-acre urban park, to be built along the White River in downtown Indianapolis, is a package that includes the Indianapolis Zoo, a water playground, a family amusement center, botanical gardens, a performing arts center and an 800-foot landmark tower.

Market analysts predict that Indianapolis will need more downtown hotel rooms, and the Commission for Downtown agrees.

Construction has begun on the Granada Royale Hometel, a 17-story structure that will have 350 luxury suites and, on its first three floors, 70,000 sq. ft. of retail space. The $30 million structure is expected to be completed by 1985. Also in the construction stage is the $6 million rehabilitation of the Warren Hotel, expected to be completed in 1984.

A mainstay of the Indianapolis economy is Eli Lilly & Co. Founded in Indianapolis in 1876, the company is the largest corporation headquarted in Indianapolis. It employs about 7,500 and its annual payroll exceeds $150 million.

INDIANAPOLIS
INDIANA

Since Oct., 1981, Eli Lily & Co. has announced nearly $110 million in projects for Indianapolis facilities. Recently completed is a building to produce Humulin, human insulin originating from recombinant DNA.

In the sports area, since 1982, the push to make Indianapolis the amateur sports capital of the country has been buttressed by $136 million in sports facilities. Indiana University-Purdue University is the home of a $21.5 million Natatorium. The new swimming facility is the site of the U.S. Diving Assn. National Headquarters and is attached by tunnel to the Track and Field Stadium, a $5.9 million complex that maintains permanent seating for 12,800 spectators. The $2.5 million Indianapolis Velodrome, completed in the summer of 1982, is one of the country's 13 bicycle-racing facilities.

Currently, construction is under way on a $77 million addition to the Indiana Convention Center that is to include a 63,000-seat domed stadium with extensive sports facilities and additional meeting and convention space.

Expected to be completed by August, the Hoosier Dome, as it is being called, is a potential home for a hoped-for National Football League franchise. At this stage, Indianapolis is the largest tv market without an NFL franchise.

To underscore the seriousness of its effort, Indianapolis played host to the 1982 National Sports Festival. The event received a tremendous amount of national coverage and media attention and was a box office success, with ticket sales topping $1.1 million and attendance exceeding 250,000.

On a negative note, Western Electric announced plans to close its Indianapolis plant, located in the downtown area. Those plans call for the company to start phasing out operations in early 1984, closing by first quarter of 1986. Approximately 50% of the 3,700 employes are pension eligible, and the American Telephone & Telegraph Co., Western Electric's parent, says it will attempt to place the remaining workers in jobs within its operations. The Indianapolis plant is one of three Western Electric plants closing, while a fourth will be scaling down.

In a positive move, International Harvester's engine division recalled some 300 employes, largely because of a contract it signed with Ford Motor Co. to use International Harvester's 6.9 liter diesel engine in all of its heavy duty pickup trucks.

December 31, 1983, will mark the debut of a new, independent tv station in Indianapolis. USA Communications, whose largest owner is Anacomp

NO SHORTCUTS TO THE FINISH LINE

When you're looking to win, you've got to be prepared to go the distance.

In a race to make the smart media buy, that means scheduling the advertising opportunities that deliver the market...the whole market...without waste.

And when you're after the New York audience, your buy just isn't complete without New Jersey's rich suburban share.

Among MSA's, affluent Bergen/Passaic, NJ, ranks 32nd in population, but 12th in the nation in Household Effective Buying Income and 17th in Suburban EBI. It represents almost 1 out of every 5 retail dollars spent in the Garden State and the "greatest" part of the New Jersey market.

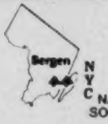
Located just across the George Washington Bridge, it has the mobility, and the means, to impact significantly on your bottom line.

But don't count on the New York or Newark newspapers to connect you to Bergen/Passaic's purchasing power.

You need The Record, New Jersey's largest and most colorful evening newspaper, with more circulation in Bergen/Passaic than all the NYC papers...and the Newark Star-Ledger combined.

Add The Record to your schedule and secure the single area that outpaces the entire New York ADI in most key demographic and income comparisons.

That last extra mile might be the hardest, but it's the one that delivers the win.



The Record
NEW JERSEY'S LARGEST EVENING NEWSPAPER
NATIONAL REPRESENTATIVE, THE SAWYER-FERGUSON-WALKER CO.
SOURCES: *S&MM SURVEY OF BUYING POWER, 1983 • ABC AUDITS, 1982

Inc., will enter the media market with WPDS-TV. Anacomp is a computer software company located in Indianapolis.

Other media serving the area include two major dailies, the *Indianapolis Star* and *News*, three network tv affiliates, two existing independents and one public broadcasting station. American CableVision and Indianapolis Cablevision, owned by Indiana Cable Co., cover the suburban ring with cable tv.

Lake County, Ill.

Population '80	440,372
Rank	93
Est. income '82	$6,012,925,000

Lake County, Ill., for years thought to be little more than an extension of the Chicago suburbs, has become a population and economic entity unto itself. An effort dating back 14 years has finally resulted in the U.S. Census Bureau allowing Lake County to be listed as a separate MSA, a significant move in the drive to attract new business to the area.

"Now that we are a primary statistical area, it shows that we are an economic entity to be dealt with," said Charles Isely, president of the Waukegan Chamber of Commerce and board member of the Lake County Economic Development Commission.

This means that in trying to appeal to prospects, Lake County would be able to present data reflecting its own population and economic health, rather than being lost in the vast sea of numbers for the greater Chicago area.

And, said Mr. Isely, the statistics will show that a stable employment rate, new jobs and new households make Lake County just as good, or better, to do business in than Chicago.

"One of our big selling points is that we have a lot of room to grow and there's a lot of open space nearby," Mr. Isely said.

Relocations and expansions over the last two years have substantially outstripped closures and shutdowns in Lake County.

Olaf Sunstrand, a Styrofoam manufacturer, has already purchased land for a facility in Waukegan, said Mr. Isely. Evanston, Ill.-based American Hospital Supply Corp. and Cherry Co., an electrical components maker, are expanding operations in Waukegan.

In nearby Gurnee, Roquette Corp., maker of the artificial sweetener sorbitol, has also moved in recently. The Libertyville/Mundelein/Vernon Hills area has also seen several corporate relocations and expansions since 1980.

Among them have been U.S. Gypsum, which relocated its research facility to Libertyville from Des Plaines; Hollister Inc., which moved its headquarters there from Chicago two years ago.; Abbott Laboratories, which is expanding its North Chicago facilities; Wickes Lumber, which has moved from Michigan to Vernon Hills, and Rust-Oleum Corp., which moved to the same community in 1978.

This three-community area already has the prosperous Hawthorn Shopping Center, the Marriott Lincolnshire Resort and Corporate Center and the giant Great America theme park, also owned by Marriott Corp. "Great America has been a definite plus for us," said Wyndham (Spike) Hasler Jr., executive vp of the Libertyville/Mundelein/Vernon Hills Chamber of Commerce.

"It has had a tremendous impact, especially at the tourist end, and it has created spilloff effects to businesses in neighboring towns."

If the plans of Richard P. Cavenaugh, president of American Colossus Corp., ever take shape, Lake County would move from an area with promise to a mecca for business, industrial and economic development.

Mr. Cavenaugh's idea is the Sports Colossus, a domed edifice that would feature a giant sports stadium and include a hotel, convention center, housing units, business meeting facilities, trade center, stores and restaurants. All would be under a single roof.

The 12 million-sq.-ft. facility would seat 75,000 spectators for baseball and 100,000 for football, including luxurious private corporate boxes.

Mr. Cavenaugh estimated the total cost to be about $1.3 billion, and he claims to have a $700 million financing commitment already in hand from a Zurich bank consortium. The project would create 15,000 to 20,000 jobs and would be an unprecedented economic boon to Lake County, he said.

Not a single shovel of earth has yet been turned on the project, however, and many observers are skeptical it ever will be.

Mr. Isely takes a wait-and-see attitude about the Colossus. If it can be built, fine, but Lake County's economic future is not being laid at its doorstep, he said. "Some people said Great America would never come to pass, but it did."

The area is served by one daily newspaper and three am and two fm radio stations in addition to the Chicago print and broadcast media.

Lansing-East Lansing, Mich.

Population '80	419,750
Rank	99
Est. income '82	$3,811,957,000

With the presence of state government, Michigan State University and General Motors Corp.: Lansing and East Lansing, Mich., have a lot going for them, according to Thomas Gottheimer, Lansing's commercial industrial officer.

The strong market acceptance of Lansing-built Oldsmobiles, in particular, has resulted in the lowest unemployment rate—9.7%—in the state. A Fisher Body division plant is also located here. What's more, no permanent GM employe is on layoff in Lansing. In fact, workers from hard-hit Flint have moved in and some people have been hired off the street.

GM has invested $226 million in plant modernization, including a $180 million modernization program that has included a 40,000-sq.-ft. plant addition and installation of $163 million in machinery and equipment.

All this is in preparation for building GM's 1985 N car, which would mark the first time GMC has used facilities in Lansing for the development of vehicles for the entire corporation. Fisher is to produce bodies for Pontiac, Buick and Chevrolet as well as Oldsmobile, where the cars will be assembled. The Olds investment is $73 million.

Why Lansing? City officials see it as the very strong spirit of cooperation between labor, management and government, partially through Quality of Work Life employe involvement programs at Olds and Fisher. The city sponsors its own Lansing Joint Labor Management Committee, which teaches labor/management techniques. The result: Strong motivation and high productivity.

Motor Wheel Corp., maker of car, truck and military vehicle wheels and brake drums, is the third largest manufacturer in the area. The high-tech corporation is investing $6.6 million in a new corporate headquarters administration and data processing center adjacent to the university.

"I think the bottom line for Lansing is that GM has made a very serious commitment for the foreseeable future," said Mr. Gottheimer. "That has impact here in terms of 'just-in-time' requirements, bringing suppliers closer to the manufacturer. We are working to locate potential suppliers in the Lansing area."

MSU is part of the commitment. "While we had a downturn in enrollment in '81 and '82," noted Jim Jordan, executive vp of the Lansing Regional Chamber of Commerce, "the student population is up into the 40,000 bracket in '83."

In September, 1982, MSU opened its research laboratories to people in the mid-Michigan area. In July, 1983, invitations were issued nationally and internationally. These visitors had an opportunity to get better acquainted with the people and skills represented at MSU in the fields of high technology—particularly in the biomedical field.

"Lansing and East Lansing have a diversity of character that's perhaps a little unusual in a community of this size," said Robert Wilcox, general manager of Jacobson's East Lansing furniture and apparel stores. "We have a small town with a large university in it. And a large town with a lot of industry and state government in it."

Recently, the Lansing Economic Development Corp. has been working with MSU and local units to develop a package for locating the Michigan Biotechnology Institute. Plans call for the site to be on or near the campus. Partially state-funded, the institute would be devoted to developing new products and procedures in the biological sciences and in engineering related sciences. Private companies would be able to adapt the development for commercial purposes in, for example, alternative types of pesticides and genetic engineering.

Institute facilities would represent an investment of $8 million to $10 million. Now under construction is the $18 million university-related Hanna Technology and Research Center.

While two shopping malls are well established in outer areas, extensive residential and commercial building and restoration are taking place in downtown Lansing.

A 10-story office building providing 155,000 sq. ft. of space recently was completed and opened for business. The long-postponed construction of a 250 to 300-room Radisson Hotel began in November. And plans call for the early start of a convention center, designed for later expansion for concerts, circuses, lectures and other activities.

The Capitol Commons, a 500-unit, $26 million apartment and townhouse development is now open and almost fully occupied. Older buildings and a theater are being renovated.

The area is served by two newspapers, four tv stations, nine am and fm stations and three cable services.

Milwaukee, Wis.

Population '80	1,397,143
Rank	29
Est. income '82	$14,435,212,000

Milwaukee is known for its Old World charm, its beer, its ethnic restaurants, its horrendous winters, its slugging Brewers, its symphony and its zoo. Now it is getting national acclaim for its latest attraction: The Grand Avenue shopping center.

In August, 1982, the doors opened on the $70 million 850,000-sq.-ft. retail venture. It is a joint effort of the city of Milwaukee, the Milwaukee Redevelopment Corp. and Rouse-Milwaukee. The Rouse organization is a subsidiary of the Columbia, Md.-based Rouse Co., famous for its other real estate successes, among them Faneuil Hall Marketplace in Boston and the Gallery at Market East in Philadelphia.

The Milwaukee project is four blocks long and has some 165 shops, restaurants and businesses anchored on each end by two of Milwaukee's old guard department stores, Boston Store and Gimbels.

In the winter, a shopper will not be buffeted by frigid winds. A system of skywalks connects the elements of the project. The skywalk bridging the Milwaukee River, supposedly the first such skywalk in the nation, opened last month.

Part of the charm of the mall is the existence of five historic buildings, the gemstone being the Plankington Arcade, constructed in 1916. Other touches include a beer wall, with products from the city's brewing heritage.

"A once drab, eroding area of the downtown now beckons with attributes from the Land of Oz," said an editorial in the *Milwaukee Journal*. There is little dispute that the mall has revitalized downtown.

According to Paula Boyd, advertising/marketing manager with Rouse-Milwaukee, more than 8 million people visited the first year. More than 1,300 permanent jobs have been provided by the project and, according to Jon Wellhoefer, deputy commissioner of Milwaukee's Department of City Development, the $30 million public investment has helped attract $200 million in private investment to the downtown area. When it opened last year, occupancy was at 80%. Now that figure is up to 95%.

Despite the recession and the 1981 closing of the Jos. Schlitz Brewing Co., projects begun or ended in 1982—including the Grand Avenue mall—represented more than $500 million in development and more than 6,000 jobs. Among the projects, on the east side of the river, is a $78 million, 30-story office building developed by Winmar Co., a real estate investment subsidiary of Safeco Corp. Another retail and office project—west of the river—is the $56 million Henry S. Reuss Federal Plaza, to be connected to the Grand Avenue mall by the extension of the skywalk system.

On the residential side, housing permits in the four-county metropolitan area are up 168% from June, 1982, to June, 1983.

Although Wisconsin has had a lingering business image problem with its history of high taxes, according to a recent tax study Wisconsin's business taxes are now the lowest of 16 Midwest industrial and Sunbelt states. That is somewhat mitigated by a high personal income tax rate, which, however, brings high quality services.

"Nobody relocates to Milwaukee," said Jack Norman, business reporter with the *Milwaukee Journal*, who says it is the southern or western suburbs that are drawing new companies, attracted by the metro area's high quality workforce. One example, he says, is the Swedish Co. ASEA, manufacturer of robots, power transformers and electronic equipment.

Other virtues of the city that might attract newcomers, said John Pritchard, senior vp-executive creative director at Cramer-Krasselt advertising agency, are its proximity to Lake Michigan, its location in a "beautiful state" and its abundant cultural opportunities.

Top among those cultural opportunities is theater, the city's "liveliest art" says Tom Strini, dance critic with the *Milwaukee Journal*. The offerings include the Milwaukee Repertory Theatre, the Milwaukee Symphony Orchestra and the regional ballet company.

Despite the shifting from heavy industry to healthcare, medical technology and high technology, some of the biggest employers in the area continue to be old-line industries. This is still a blue-collar town, with some 28% of the workers unionized. The ethnic mix of Germans, Polish, Italians and Irish is sharing more with blacks and Hispanics these days, although the total minority population, as of 1981, was still only 14% of the total metropolitan population.

Among the top employers are Briggs & Stratton, manufacturers of small gas engines, with about 5,500 employes, and A.O. Smith Co., maker of automobile frames, with 4,000 employes. Then there's the Milwaukee landmark, the Allen Bradley Co., bearer of the world's largest foursided clock. (A minute hand is said to be 6 ft. long.) The company has 4,500 employes.

The two leading newspapers serving the Milwaukee market are owned by the Journal Co. However, the editorial departments are run separately, and according to one *Journal* staffer, they are "hotly competitive," and the stories "jealously guarded." The morning *Milwaukee Sentinel* targets the more affluent reader and the evening *Milwaukee Journal* caters to the blue-collar worker.

Other papers serving the metro area include the *Waukesha Freeman*, an afternoon paper and the *Daily Reporter*. In October, a new business tabloid hit the market, the weekly *Business Journal of Milwaukee*.

Milwaukee is served by seven tv stations, including two independents and two public stations. Warner Amex won the battle for the cable franchise for the city and five other cable companies serve the suburban areas. There are 11 am and 13 fm stations.

Saginaw-Bay City-Midland, Mich.

Population '80	421,518
Rank	98
Est. income	$3,955,263,000

Located at the notch of Michigan's thumb—residents think of the state as a mitten—the Bay City/Midland/Saginaw market is a busy manufacturing center.

Saginaw and Midland, at the ends of the longest portion of the triangle, are only 25 miles apart, and there is a great deal of economic, social and cultural interaction among the cities.

Nevertheless, each has its own chamber of commerce, and each vies for retail trade and jobs. One display of togetherness among the three towns is Tri-City airport in Freeland, served by United, Republic and Freedom Airlines.

The two largest construction projects in the area in recent years have both had major setbacks. In 1980, work began on a $122 million bridge designed to raise Interstate Hwy. 75 high above the Saginaw River. The present drawbridge often backs up traffic for miles when raised. Construction was halted in 1982 after a large crack developed in a completed span.

Work was also halted temporarily on Consumers Power Co.'s $4 billion nuclear power plant in Midland. After construction began 10 years ago, up to 3,300 workers were employed when building was at its peak. But activity ground to a halt after the nuclear accident at Three Mile Island. Meanwhile, the Nuclear Regulatory Commission rewrote the rule book to prevent a chance of another accident. Coupled with other construction setbacks, the project is running 10 years beyond its projected completion date.

Additionally, this summer, Dow Chemical Co. canceled its contract to pay $300 million a year for steam generated by the nearby nuclear plant, citing Consumers Power's failure to meet the agreed-upon delivery date. The big twin-reactor plant, however, is expected to begin supplying electricity to 1.3 million customers and provide about 1,000 Midland jobs when it starts up in 1985. During construction, about 11% of the workers came from Bay City and Saginaw.

General Motors Corp. is the biggest employer in both Bay City and Saginaw, but Saginaw was hit harder by the recession. Unemployment within the city limits hit nearly 21% in August, 1982.

The figure is now down to 17.8%, and to 12.7% in Saginaw County. More than 10,000 are employed in Saginaw's auto industry and another 7,500 in related metal foundry work at 12 GM plants.

The high unemployment rate has taught Saginaw County "a lesson," says Stephen Young, vp of the Saginaw County Chamber of Commerce. "We are spearheading a coalition of business, labor, education and economic development groups to put together a program for Saginaw County. We know we have to diversify. But we have to do everything to make sure that auto industry stays here."

"The coalition has been working on business retention," says Mr. Young. "We are looking at agriculture, an important industry here. About 95% of the world's navy beans come from here. And a lot of sugar beets. We raise the food and send it elsewhere for processing. The coalition is trying to get processors to move here, or to start our own venture."

Meanwhile, downtown Saginaw recently got a $6 million state office building. Also, in a historic area on the city's west side, old buildings are being renovated for stores and restaurants.

To the north, Bay City lost 15% of its population from 1970 to 1980, but Bay County's numbers increased by nearly 3%, finding its biggest population growth among boaters. Bay City is the second largest pleasure craft port in the state, a walleye fisherman's heaven. There's a shortage of docking spaces and parking for trailers at launching sites, and work has begun on a state park redevelopment to add spaces.

Though a Kresge store moved out in September, downtown Bay City space is 85% occupied, according to Franklin Braman, executive director of the Bay Area Chamber of Commerce.

Bay City's old part of town is stripping the plastic from buildings and laying bricks on sidewalks to create a historic area that city officials hope to fill with shops. A 20-store Lafayette Plaza opened recently, and a Meijer's Thrifty Acres is rising near Interstate Hwy. 75. Mr. Braman says Bay City is a popular shopping spot for residents of towns to the north and west, and stores take in $1.38 for every $1 earned in Bay City.

In addition to its big Chevrolet parts plant, the city has Gougeon Bros., a boat marketer. It employs 200 people in Bay City and plans to open a plant to make flexible wooden propellers for GM in nearby Pinconning. In August, Bay City's unemployment rate was 14.8%.

Midland is also a manufacturing town, but its biggest employers are Dow Chemical (12,000 employes) and its subsidiary, Dow Corning (about 6,000). Midland is the home of the largest chemical complex in the nation at Dow Chemical.

"Our economy varies more according to what the chemical industry is doing worldwide," says Mike Asiala, communications director of the local chamber of commerce. "Even in poor economic times, we do fairly well because we aren't tied to the auto industry." The unemployed make up 11.5% of the county's workforce.

Midland has no dominant shopping area, but it has six small areas. "We can't compete with a market like Saginaw, which offers large malls," says Mr. Asiala. Sun Oil and Production recently moved a regional office from Tulsa, employing about 100.

The market has three daily newspapers, one in each city, several weeklies, three tv stations, six am and eight fm radio stations and three cable services.

Toledo, O.

Population '80	616,864
Rank	68
Est. income '82	$5,827,687,000

"We've always been known as a sleeping giant," said an executive at a large Toledo ad agency. "But now the giant's starting to open one eye—at least."

That statement characterizes the vast change Toledo has experienced over the past three years. It also underscores the optimism that has spread throughout the Toledo business community as the downtown area has blossomed with a major redevelopment project and some large retailers have entered the suburbs and apparently found fertile soil for their enterprises.

By far, the biggest excitement in Toledo has surrounded the SeaGate redevelopment of about 10 acres of urban renewal land in the downtown business district. Sparked three years ago by Owens-Illinois Corp.'s ground breaking for a new 35-story world headquarters, the building and rebuilding bug has spread quickly.

Recently completed or currently under construction are a 26-story Ohio Citizens Bank office building; a four-story Toledo Trust office building; a $27 million twin tower office structure being developed by Webstrand Corp., and the $27 million, 250-room L'Hotel Sofitel.

Retailing also plays a major part in the SeaGate project. Portside, an 80,000-sq.-ft. "festival marketplace" developed by James Rouse and his Enterprise Development Co., is under construction. Portside will house 80 small, high-volume shops and restaurants. Scheduled for completion within the next year, Portside is expected to draw some 5 million people into the area in the first year.

And the snowball of redevelopment will grow much bigger if plans jell for a 100,000-sq.-ft. convention-convocation center currently on the drawing boards. That center, to be accompanied by a 300 to 400-room hotel, would cater to regional conventions and trade shows.

Although the convention bureau is negotiating to purchase the land for the center, ultimate funding for the $40 million project is still up in the air. Nevertheless, optimistic city officials expect a groundbreaking by next summer.

City planners are also looking to the future for redevelopment of the Adams St. corridor near SeaGate into a thriving retailing district.

And although there currently is no downtown market rate housing to speak of, the planners have landbanked an area called Middlegrounds for future residential development.

"Everyone's hungry," said Ed Schulte, director of economic development with the Toledo Area Chamber of Commerce.

Traditionally tied to the business of car making, Toledo was particularly hard hit by the big squeeze on the auto industry through the long recession. Thousands became unemployed in the myriad metalworking and glass companies supplying Detroit auto makers, as well as those employed by a large General Motors Corp. transmission plant and an American Motors Corp. Jeep plant.

But with the auto industry on a sharp rebound, those suppliers have been experiencing some fresh business, and call-backs have begun. The major plants, which boldly invested a total of $770 million in new capacity and equipment during the downturn, now are running at 100% capacity, giving the area an extra boost.

Unemployment in the market still hovers between 11% and 12%, but the retailing and housing sectors are seeing strong signs of the market's recovery.

While there has been little new housing construction, real estate brokers report increases of more than 100% in sales of existing homes through September.

And if confidence is returning to the consumers, it's also affected the retailers. Kroger Co. entered the suburban market in the past year with plans for five large strip developments that would be anchored by Kroger supermarkets and include about five other tenants. Two such shopping centers already have opened.

The area's largest mall, North Towne Square, opened within the past three years and is anchored by Montgomery Ward & Co., Sears, Roebuck & Co. and J.C. Penney Co.

Other major retailers serving the market include Lord & Taylor and Dayton-Hudson Corp's J.L. Hudson department store.

A discount retailer, Hills Department Stores took advantage of the upturn in the market in September when it moved into three large stores abandoned more than a year earlier by Woolco. Since opening, the new stores have been doing "a booming business," say observers.

The Toledo market is served by one daily newspaper, a chain of seven weekly suburban papers, three tv stations, seven fm radio stations and nine am outlets. In addition, a new tv station—a uhf independent—is expected to begin broadcasting in 1984. Two cable companies service the area.

Youngstown-Warren, O.

Population '80	531,350
Rank	79
Est. income '82	$4,410,149,000

Youngstown's economy faces the challenge of transforming itself from a

THE NEW STAR IN THE EAST IS THE MOST POWERFUL MARKET BETWEEN WASHINGTON AND ATLANTA.

Norfolk/Virginia Beach/Newport News, Virginia is now the 34th largest Metropolitan Statistical Area. A fast-growing area of over one million people. A constellation of 11 cities and counties now joined together because, at last, the government has recognized they belong together.

And this newly designated area is "an extremely healthy economy and one powerful market," according to Ed Spar, president of Market Statistics, the producers of the *Survey of Buying Power.*

Included in the MSA are Virginia's two largest cities, America's largest coal port and one of the East Coast's primary tourist attractions. In fact, this year's tourist season was the best the area has ever seen—helped by the opening of The Waterside, a new festival marketplace on the Norfolk waterfront. Nearby a new World Trade Center is under construction. And the area has been chosen as the site of a new, high-tech National Electron Accelerator Laboratory.

But when you buy Norfolk/Virginia Beach/Newport News, you also get a bonus. A military bonus of over $300 million in on-base sales. Yet those sales aren't even included in the retail sales reports from the MSA. So our huge military concentration— including the world's largest Naval Base—makes our area shine brighter the closer you look. And our "bonus" can make your star shine, too.

For a fact-packed demographic kit on this potent new member of the top 35, call or write Dale Bowen, General Advertising Manager, (804) 446-2092. 150 West Brambleton Avenue, Norfolk, VA 23510.

Norfolk/Virginia Beach/Newport News Rises To #34.

The Virginian-Pilot
The Ledger-Star

100

heavy steel and metalworking economy into a service-based, softer goods district. Fortunately, the area's massive General Motors Corp. facilities have made the former steel valley into something of an automotive center, so that manufacturing jobs still contribute to the employment mix.

However, unemployment—16% to 20% through much of 1983—still runs higher in the metropolitan area than in much of Ohio, and it's clear that the cyclical problems Youngstown once had in the mid-1970s with low demand for steel have now turned into lasting changes, especially with the vanishing mills.

The GM assembly division in Lordstown has profited from a major overhaul and the recovery in automotive sales. Its J-car production, including the fairly successful Chevrolet Cavalier, has provided steady activity for a plant capable of employing more than 8,000 workers.

GM's Packard Electric division, with headquarters in Warren, has spread factory work throughout the Mahoning Valley, establishing satellite plants in Austintown and elsewhere. Packard accounts for 8,000 jobs or more, depending on automotive demand.

In Warren, Republic Steel Corp.—now headed for a merger with Jones & Laughlin Steel's parent LTV Corp.—has built a new but modest office building, and it has reinvested substantial amounts of money in renovating its Warren plant's blast furnace.

Youngstown has made only limited progress toward reviving the mills and renovating plants abandoned by U.S. Steel Corp. and Jones & Laughlin, and it lost the locally based Republic Steel manufacturing division last year.

Positive signs include the profitable "mini-mill" at the former U.S. Steel McDonald Mills, where McDonald Steel Co. now produces rolled steel shapes, many for truck wheel rims. But the plant employs 80, where U.S. Steel once had 3,500 jobs. Also Hunt Steel Co. took over the Brier Hill Works abandoned by J&L Steel in 1979. There, Hunt will build seamless pipe for oil drilling. The company is using relatively new technology and is to employ from 200 to 500 people.

These efforts go on despite some notable failures on the business development front. The Commuter Aircraft Corp. planned to build commuter aircraft at Youngstown Municipal Airport near Warren, and a plant was built, public financing obtained and stock sold in a private placement. But the $30 million project may not result in any planes in the foreseeable future, with foreclosure on the new 250,000-sq.-ft. plant a possibility.

Another development project, the Youngstown Steel Corp., planned to put out mini-mill products with a continuous caster using parts of the closed Campbell Works, site of the first major Mahoning Valley layoffs in 1977. But the plans ended in scandal when Youngstown Steel failed to follow through on conditions of loans and grants it received from the federal government.

Other industrial plans include at least two separate schemes for manufacturing dirigibles. The new emphasis by industrial development advocates here is on diversification away from big steel plans and toward small, though sometimes steel-related, businesses.

"With steel, you had peaks and valleys," said Weston O. Johnstone, president of the Youngstown Area Chamber of Commerce. "And when the valleys came, they were deep . . . During downturns we were the first area hit and the last to recover during good times. We've got to build an economy with many more shallow valleys."

Despite the industrial troubles of the past, the Youngstown housing market can be surprisingly resilient at times, with new developments of subdivisions supported by an area that is traditionally a net savings, not net borrowing, economy as a whole, according to local savings and loan officials.

Numerous food and retail shopping franchise businesses have opened in Youngstown and Warren in spite of recession, and the area's shopping malls continue to do well, probably aided by the efforts of Youngstown-based Edward J. DeBartolo Corp., which owns Southern Park Mall in Boardman, and the Cafaro Co.'s Eastwood Mall in Niles, halfway between Warren and Youngstown. Both mall developers are perenially in the top 10 of all U.S. mall builders, with DeBartolo frequently No. 1.

In downtown Youngstown, two senior citizens housing high rises have been built, one new, one rehabilitated from an old hotel. But the city's second-largest downtown department store, Cleveland-based Higbee Co., withdrew from the market in early 1983. Similarly, Montgomery Ward & Co., beset by its own nationwide problems, withdrew from the metropolitan area.

Fisher Foods, a Cleveland supermarket chain, stumbled in the area by trying a warehouse foods concept and then beat a hasty retreat.

The Youngstown-Warren area is served by two major daily newspapers. The area has three network tv affiliates and a public broadcasting station. It has 10 am and nine fm stations, including broadcasters in nearby Salem and those in Farrell, Pa. Six cable tv companies have laid claim to territories in the Mahoning Valley.

West North Central

Kansas City, Kan.

Population '80	519,031
Rank	82
Est. income '82	$6,034,503,000

When people mention Kansas City, they usually focus their attention on the city in Missouri. But there's another Kansas City—the one across the state line in Kansas—that cannot go unnoticed. Although there are two Kansas Cities that are separate entities geographically and politically, there is a similarity in their economies because of their close proximity.

The economy of Kansas City, like its larger neighbor, is a diverse mix of agribusiness, transportation, manufacturing, wholesaling and retailing. That diversity has helped the city avoid economic troubles experienced by other cities, but has also kept it from becoming a boom town on the strength of one particular industry.

The importance of Kansas City to the rest of the nation revolves around its central location and role as a transportation hub.

For instance, 12 trunk-line railroads serve Kansas City, Kan., and grain and other agricultural products are shopped worldwide from the rail yards here. The area is in the heart of a 10-state marketing region that includes 35% of the nation's farms and 44% of its agricultural acreage.

The interstate highway system that rings the city also is a reason for the commerical presence of many of the nation's largest trucking companies.

With the economic recovery under way, local economic observers are seeing signs of a pickup in local business activity.

"The transportation and wholesale trade activity has been much, much stronger during the last six months as more goods are moving through the system and companies are restocking their inventories," said Gerald Olson, an associate professor of economics at the University of Missouri at Kansas City.

Despite such optimism, the economy of Kansas City is not without problems. The city received a major blow to its economic base in August, 1982, when the Phillips Petroleum Co. closed its refinery, idling 735 workers.

The impact of the Phillips' closing still is not completely known, but local government officials acknowledge that the city lost a major source of jobs and tax revenue. There are also problems in downtown Kansas City, an area with many vacant stores.

But some local businessmen think things are changing for the better in the downtown area, which has continued to lose retail business to suburban shopping malls since the early 1970s. The reason behind that optimism is that the Center City Mall, a controversial 12-year-old urban renewal project that many blame for the district's decline, is being torn down. Detractors of the mall had said it closed the retail district with art objects and narrow, twisting traffic lanes that annoyed and bewildered drivers.

The city has also opened a new 30,000-sq.-ft. convention center in the downtown area and is making strides with its convention and tourism industry, despite the negative effects of the recession.

City officials, however, hear complaints that there are not enough hotel rooms to attract larger conventions to the city. So they are investigating the possibility of adding a new hotel near the convention facility.

The problems and possibilities of the downtown area aside, Kansas City is a focal point for medical research in the state. The University of Kansas Medical Center is the city's largest private-sector employer, with 5,500 workers.

Another major employer in Kansas City is General Motors Corp., with 5,174 workers at its automotive assembly plant located in the city's Fairfax Industrial District.

The plant, built in 1940 to produce bombers, was converted into an auto assembly plant in 1946, when it was leased, and later acquired in 1960, by GM. Although the plant was hit by thousands of layoffs in recent years, it has found new life recently.

The GM Fairfax plant, which makes full-size passenger cars, has added about 1,900 workers since May, 1982, thanks to a leveling off of gasoline prices that caused Americans to start returning to large cars. GM officials say the plant is now almost at full capacity.

Other major companies employing between 1,000 to 3,000 workers include Certain-Teed Products Corp., Owens-Corning Fiberglas Corp., Sante Fe Railroad and Union Pacific Railroad.

In addition, the city also has a foreign trade zone area that has attracted a growing list of basinesses.

Kansas City is served by five daily newspapers, more than 30 weekly newspapers, seven tv stations, seven cable tv companies and 13 am and 19 fm radio stations.

Kansas City, Mo.

Population '80	914,427
Rank	46
Est. income '82	$9,024,357,000

The diversity of Kansas City's economy, which has helped insulate the area from economic busts experienced by other cities, failed to protect the city from the worst of the 1981-82 recession.

In fact, the seven-quarter recession punched holes in many key Kansas City industries: Agribusiness, distribution, wholesaling, retailing, service and manufacturing.

But now the economy is starting to come back. Local economic observers say Kansas City's industrial and commercial diversity is the key to the city's economic recovery.

Despite a slump that tested the resiliency of Kansas City's economy, the area has consistently managed to maintain an unemployment rate ranging from half a percentage point to nearly 2% under the national average.

Furthermore, the cost of living in the Kansas City area generally is lower than the cost of living in other major U.S. cities.

"Kansas City's economy is coming back a little bit stronger than it did after the 1973-75 recession," said Gerald Olson, an associate professor of economics at the University of Missouri at Kansas City. "The area held its own employment-wise during the recession, and now many manufacturing companies have begun calling people back to work."

The signs of economic recovery are perhaps most visible in the area's rising rate of construction activity. The cost of money has come down moderately to the point where developers believe they can afford to borrow to finance new construction.

As a result, there has been a flurry of development announcements in Kansas City.

Civic officials estimate that Kansas City's "miniboom" will add up to $1 billion worth of development areawide in 1983 for projects in downtown Kansas City and the neighborhood surrounding the famed Country Club Plaza.

Nonetheless, there are economic problems affecting Kansas City that need to be corrected, particularly the continued depressed conditions in agriculture.

Farm income is down and improved crop yields have hurt by keeping commodity prices too low. Interest rates are too high for many farmers, preventing them from buying new tractors and other heavy equpment.

As a result, some Kansas City businesses, ranging from small equipment suppliers and feed stores to Farmland Industries Inc., the nation's largest farmer-owned cooperative, have suffered right along with farmers.

Despite the importance of agribusiness in Kansas City, the largest employer in the city is government, with 79,500 workers, according to the Missouri Divison of Employment Security.

The area's largest private-sector employer is Hallmark Cards, which has about 6,900 employes. Although privately held, the Kansas City-based greeting card company said in a recent report that it annually records more than $1.25 bilion in sales.

The area's second largest private-sector employer, despite recent layoffs, is Trans World Airlines, which has about 6,600 employes. Many of those workers are employed at TWA's huge aircraft maintenance and overhaul base near Kansas City International Airport.

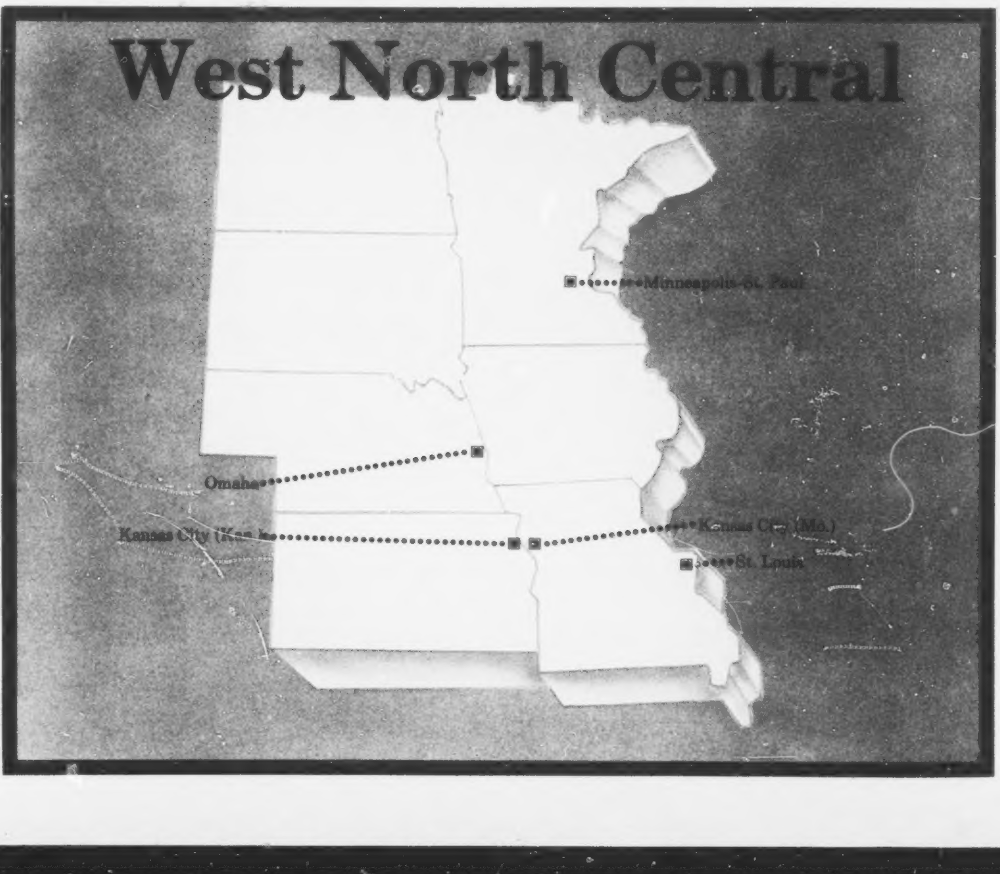
Other major employers are Bendix Corp., Ford Motor Co., which operates an auto essembly plant here, and General Motors Corp., which has one Kansas City assembly plant; another GM assembly plant is in Kansas City, Kan.

Although Kansas City is the headquarters of few *Fortune* 500 companies—Butler Mfg. and Interstate Bakeries appear on the list based on their 1982 sales—there are other sizable corporations based here, such as Kansas City Southern Industries, H&R Block and Marion Laboratories.

Kansas City also has a large graphic arts industry, ranging from printing and envelope companies to Hallmark Cards.

The city ranks first nationally in farm equipment distribution, foreign trade zone space, frozen food storage and distribution, greeting card publishing, hard red winter wheat used to bake bread and underground storage space.

Kansas City also has developed into a regional financial center, in part because of the presence of the Federal Reserve Bank of Kansas City. In addition, the city is the home of the Kansas City Board of Trade, which pioneered trading in the investment market's



first stock index futures contract.

Kansas City is served by five daily newspapers, more than 30 weekly newspapers, three network tv affiliates, two independent stations and a public broadcasting station, 13 am and 19 fm radio stations and cable programing.

Minneapolis-St. Paul, Minn.-Wis.

Population '80	2,137,133
Rank	13
Est. income '82	$23,748,181,000

There have been good times and bad times in the Twin Cities lately—a time when a newspaper died and a building boom began; a time when an airline struggled for survival and a high-tech industry flourished.

To the naked eye, the Twin Cities economy is booming. Downtown Minneapolis, especially, is in an almost constant state of renovation—so much so that by 1990, more than half of the office space downtown will have been built after 1980.

It all began with the recently opened City Center project, a square block of stores, offices and hotels in the middle of downtown. The latest addition to the project, the 606-room Amfac Hotel, opened in November.

Construction is scheduled to begin next year on what may be the tallest building in the Twin Cities, the Norwest Bldg. The building will contain about 1.5 million sq. ft. of office space, about half to be occupied by Norwest Corp. Completion is scheduled for 1987. Among the retail tenants will be a Saks Fifth Avenue department store.

Among the buildings completed in the last year are the 52-story Multifoods Tower, the 40-story Piper Tower and the 40-story Pillsbury Center.

But not all the activity has been in Minneapolis. The 25-story Amhoist Tower, containing offices and condominiums, recently opened in downtown St. Paul. Under construction is the Ordway Theatre, a $28 million, 2,000-seat opera house and concert hall that will be home to the St. Paul Chamber Orchestra and the Minnesota Opera Company.

Not all business was booming, however. The most troubled of Minnesota's major companies was Republic Airlines, which lost more than $100 million in the first six months of 1983. Republic was able to trim expenses by getting its labor unions to agree to substantial pay cuts.

Many of the area's old-line companies experienced modest growth. Meanwhile, the area's largest company, Minnesota Mining & Mfg. Co., had a 1.4% increase in revenues in 1982 from 1981, to $6.6 billion. General Mills, Pillsbury Co. and Honeywell all had single-digit rises in earnings and revenues.

The biggest winner was the Dayton-Hudson Corp. The Minneapolis retailer had increases of nearly 25% in earnings and 14.5% in revenues.

Much of the future growth is expected to be in the area's burgeoning high-tech industries. Lee Data Corp., which manufactures interactive computer terminal systems, experienced a 287% revenue increase to $53 million, and a 470% earnings rise to $11.4 million.

Dramatic increases in revenues were also reported by CPT Corp., which manufactures office automation systems; Cray Research, which makes scientific computers, and Network Systems Corp., which manufactures data communications products.

Summarizing the business climate in the area, Roger Maurer, an economist with First Bank Minneapolis, said: "Just as the local economy didn't decline as much during the local recessions in the first half of 1983, the local economy didn't recover as rapidly in the second half. But the indications in the last three or four months are that the local economy is fully participating in the national recovery."

One of those indications is that contracts for future construction rose to $166.6 million in the Twin Cities in September, up from $139 million a year ago. And for the first nine months, Twin Cities contracts were $1.41 billion, a 25% increase from the first nine months of 1982.

The employment picture was brighter, too. The Twin Cities unemployment rate in September was 5.6%, down from 6.5% a year ago.

The brightening economic picture gave the business community hope for an improving corporate climate. The state is expecting a revenue surplus of $650 million by mid-1985, raising hopes for lower corporate taxes. And Gov. Rudy Perpich said his top priority for the 1984 legislature is repeal of a 10% income tax surcharge.

The legislature cleared the way for a new Minnesota industry in 1983, when it legalized parimutuel horse racing. A racing commission will soon begin hearing proposals for metropolitan area racetracks. Wide-scale parimutuel betting isn't expected until 1985, however.

There was also vigorous activity among the local media in the past year. The most notable development was the closing of the *Minneapolis Star*. The afternoon newspaper was folded into the morning *Tribune*.

At the same time, *CitiBusiness*, a new biweekly devoted to the business community, was born. The paper, which began publishing in April, has a circulation of about 40,000.

St. Paul is served by the *Dispatch* and *Pioneer Press*. On the broadcast side, WCCO-TV christened its futuristic new communications center in downtown Minneapolis. The $18 million complex is the home for WCCO's ambitious activities in both broadcasting and cable programing.

Cable tv was finally becoming a reality in the Twin Cities. After years of law suits and political struggles, Rogers Cablesystems finally began wiring Minneapolis. Across the Mississippi River, Continental Cablevision is preparing to wire St. Paul for cable tv.

The other major entry into the Twin Cities tv market came in November of 1982 with the opening of KXLI-TV, a uhf station licensed to serve St. Cloud, Minn. KXLI's antenna, however, is located halfway between St. Cloud and the Twin Cities, which is 75 miles away, and KXLI's programing can be clearly received by many in the Twin Cities.

In all, the area is served by five vhf stations, four uhf stations and 15 am and 17 fm radio stations.

Omaha, Neb.-Ia.

Population '80	585,122
Rank	70
Est. income	$5,770,596,000

When Fireman's Fund Insurance Co. searched for a Midwest regional headquarters, the American Express Co. subsidiary said it looked at several cities before settling on Omaha.

While the company declines to name the runners-up, it was willing to say that Omaha was chosen because of its schools and what Nebraskans call the work ethic. The two factors weighed heavily, Fireman's Fund said, because they indicated Omaha would be able to provide trainable, hard-working personnel.

Fireman's Fund, which originally planned to hire 200 people, has a staff of 300 in its first months of operation. Mel Sherman, the executive in charge of the center, said further expansion is likely.

The arrival of Fireman's Fund, with a regional office, was tangible evidence that Omaha and its adjacent city, Council Bluffs, Ia., are poised for a decade of growth in the 1980s. The metropolitan area, which straddles the Missouri River border between Iowa and Nebraska, has a diversified economic base that includes the headquarters of one of the country's largest and most prosperous railroads (Union Pacific/Missouri Pacific); a large insurance company (Mutual of Omaha); a growing energy company (InterNorth), and the largest flour-milling and chicken producer (ConAgra).

Although Omaha still is regarded as an agricultural center, the economic diversification of the 1970s and 1980s

BEFORE YOU BUY SPACE IN A PERSONAL COMPUTER MAGAZINE, CONSIDER THE SPACE YOU'RE BUYING.

Most personal computer magazines are so *cluttered* with advertising, nobody reads the ads.

At *LIST*,™ The Personal Computing Software Magazine for Business Applications, we treat advertising with a great deal more respect.

For example, every full-page ad that appears in *LIST* faces a page of editorial. Instead of another full-page ad.

Another thing—no matter how many ads are scheduled to run in a particular issue, we never "bank" them the way most personal computer magazines do. There's more. Our graphic design is award-winning. So on looks alone, we represent a superior environment for advertising.

We are uniquely *single-minded* in our editorial focus. *LIST* addresses itself each month to *business issues*—specifically, to ways in which personal computer software and hardware are solving problems and creating opportunities for business and professional people.

As a result, our audience is comprised almost exclusively of large numbers of those key people, who respond with interest to what they read—and *see*—in *LIST*.*

If you're making media decisions for a software, hardware or peripherals company, give Bill Smith a call at 305-231-6904.

And let him tell you all about the value of buying space in a personal computer magazine where your ad is actually read.

*ABC Audit Pending: Publisher's guarantee—125,000 Circ.

© 1983 Redgate Publishing Company, Vero Beach, FL. All rights reserved.

has given new importance to high-tech companies. Omaha-based First Data Resources, another American Express subsidiary, is the country's largest bank-card processing company. It operates a large mailing operation (100 million bills annually) and Wide Area Telephone Service (WATS) center handling credit-check calls.

First Data Resources recently was selected by the U.S. Postal Service to handle calls nationwide on the new nine-digit Zip codes, a contract worth several million dollars a year.

Omaha is the home of Warren Buffett, chairman of Berkshire Hathaway, an investor known worldwide. Mr. Buffett, who started with a small stake 25 years ago, has accumulated wealth estimated by *Forbes* at more than $500 million. His holdings, most of them organized under the publicly held Berkshire Hathaway company, include the *Buffalo Evening News* and sizable holdings in the *Washington Post*, General Foods, RCA Corp. and the Nebraska Furniture Mart, an Omaha company that operates the largest furniture store in the country (1982 sales of $90 million).

Mr. Buffett, although one of the country's richest men, used to list his home telephone and address in the Omaha phone directory. He said he was forced to unlist his number because of the number of calls he was getting from people who wanted investment advice at odd hours.

Like Mr. Buffett, Omaha's fame is growing as a place to make money. The city's downtown development program has attracted regional attention and is beginning to win national praise as an example of how to rebuild with private money what once was block after block of empty, unproductive buildings.

In place of abandoned warehouses and stores, the city has mixed private and government money to construct a riverfront mall with a park-lined waterway leading to the Missouri River. The mall is completed, on either side, by new buildings costing nearly $100 million.

Soon to come are more downtown buildings, including a Farm Credit Bank, a Federal Reserve Bank and a new hotel. They would join a new twin tower office building (constructed by Los Angeles financier David H. Murdock), a new public library, Northwestern Bell Telephone's five-state headquarters and a combined state office building and conference center.

Much of Omaha's progress is attributable to commitments made by wealthy residents, a group headed in the last decade by contractor Peter Kiewit, architect Leo A. Daly and corporation chairman (InterNorth) Willis A. Strauss. Messrs. Kiewit and Daly are deceased, and Mr. Strauss has passed many of his responsibilities on to a younger generation of Omaha leaders.

Mr. Kiewit, who died in 1979, continues to be a considerable civic influence through his estate and foundation. During his lifetime, Mr. Kiewit recognized that without a commitment by private individuals Omaha would languish behind more attractive regional centers such as Kansas City, Denver and Minneapolis.

Mr. Kiewit, whose wealth exceeded Mr. Buffett's, paved the way for the downtown redevelopment with contributions that were matched by other business and civic interests. His estate has been organized in such a way that contributions to the community will continue to flow to various projects through a foundation.

A native of Omaha, Mr. Kiewit had a provincial patriotism typical of Nebraskans, a theme that is carried out in the title of the state university song: "There is no place like Nebraska."

The print media is dominated by the *Omaha World-Herald*, which Mr. Kiewit owned. He stipulated in his will that the paper be sold to its employes. The *World-Herald* also operates weekly newspapers in suburban communities. Other newspapers in the metropolitan area include the *Council Bluffs Non Pareil*, a daily owned by the Thomson Newspapers organization, and the *Bellvue Leader*, owned by Chicago publisher Bruce Sagan.

Omaha has three network tv affiliates and 12 am and six fm radio stations. The city has one cable company serving it, while others operate in Iowa and in suburban areas.

St. Louis, Mo.-Ill.

Population '80	**1,808,621**
Rank	**19**
Est. income '82	**$18,619,343,000**

Like an unwanted guest, the recession came early to St. Louis, stayed late and consumed more than it should.

This fall the area's unemployment rate still was above the national average, but callbacks by the auto industry were expected to improve the figures.

In fact, St. Louis' economic picture appears brighter now than it has in several years. The downtown area is in the midst of a building boom; the city's historic residential and commerical districts are being rehabilitated, and three auto companies are expanding production here.

One of the biggest changes taking place in St. Louis, however, is strictly psychological. Many residents, tired of seeing their city portrayed as a dying, decaying metropolis, have regained a long-lost sense of pride. "There's a more exciting spirit around here than I've seen in a long time," said Kennett C. Johnson, president and chief executive officer of Batz Hodgson Neuwoehner advertising agency. "You can hardly walk around downtown without getting mud on your shoes. Construction barricades are everywhere. And I find many clients are more aggressive and outward-looking than they once were. That's in contrast to the rather insular conservative attitudes we've seen so often in the past."

St. Louis has, at various times, claimed identity as the top of the Sunbelt, the easternmost western city and the westernmost eastern city.

In truth, the last description probably fits best. St. Louis' physical appearance, its economy, even its personality probably are more closely akin to East Coast cities such as Boston and Baltimore than to the younger metropolises to the west or the south.

The city, however, is also rooted solidly in the Midwest—in the stubbornly conservative "Show Me" state. Marketers report the "show-me" attitude often turns up in people's cautious response to new products. "If it sells in St. Louis, it'll sell anywhere," some say. But Mr. Johnson said St. Louis consumers also tend to have stronger brand loyalty than might be found in more trendy markets.

Like its East Coast cousins, St. Louis has had to struggle with urban decay and an economic base built on heavy industrial manufacturing. It's handling the transition better than some predicted. Though the city's population has been steadily declining, the population base of the broader area has remained stable, and the city itself has become more of a commercial center.

Peter Morrison, director of the Population Research Center of the Rand Corp., says things aren't as bad as they looked a decade ago when his organization insisted St. Louis was in terminal decline. "What's noteworthy is that there's so much more new construction down here than was apparent 10 years ago," he told a conference group. "All that construction means something is happening. It means the city is becoming less just a place to live."

The downtown's revitalization is seen as an encouraging sign, especially because national developers are getting into the act. Several downtown office buildings are being rehabilitated, and new construction projects planned or under way downtown include:

- A $135 million renovation of Union Station, an old railroad terminal, into a shopping and recreational complex to be developed by Rouse Co.
- St. Louis Centre, a $186 million shopping mall and office complex to be anchored by the city's two biggest department stores—Famous-Barr and Stix Baer & Fuller—along with a 20-story tower and 234-room hotel.
- Gateway Mall, a three-block project near the Arch, which would put office buildings on the northern half of each block and open park space on the other half.

As an auto manufacturing center, St. Louis saw employment in that sector drop dramatically from 1977 to 1982, but now the outlook's improving again. General Motors just built a new plant here and put 2,500 auto workers back on its rolls. It also decided to keep its plant in north St. Louis—once slated for closing in 1982—open for at least three more years.

Chrysler converted its idled truck plant to production of the rear-wheel-drive Fifth Avenue, and its auto assembly lines now build the Chrysler Laser and Dodge Daytona. In addition, Ford is expanding its plant here and retooling for eventual production of the Ford Aerostar, a minivan.

Although St. Louis isn't exactly a high-tech center, it has its share of industries moving in that direction. The region's three biggest employers are McDonnell Douglas Aircraft Corp., Southwestern Bell Telephone Co. and Monsanto Co.

McDonnell Douglas and Monsanto, along with Washington University, explain the presence of more than 44,000 science and engineering professionals working in the region. McDonnell Douglas Automation Co. operates one of the largest computer centers in the world, and Monsanto has a plant here that produces enough silicon wafers to meet 10% of the world demand.

One of the mainstays of St. Louis media was in the news last month, when the S.I. Newhouse-owned *Globe-Democrat* announced it plans to cease publishing Dec. 31. In November, the federal Justice Department, which sanctioned the joint-operating agreement the *Globe-Democrat* has with the *St. Louis Post-Dispatch*, said it would search for a buyer for the *Globe-Democrat*. If none was found, the paper would be allowed to fold.

The two papers have been operating under the joint-operating agreement since 1979. A powerful chain of free weeklies rings the suburbs, and their advertising inroads are seen by some as contributing to the demise of the *Globe-Democrat*.

The area also has 19 am and 21 fm radio stations, and in tv, three network affiliates, two commercial independents and a public broadcasting station. Ten cable companies serve the suburbs and outlying areas. The city hasn't yet granted a cable franchise.

Is this a Twin-killing?

By M. Howard Gelfand

Folks in these parts take their professional sports pretty seriously. A few years ago, when the push was on for construction of a domed stadium, Hubert Humphrey warned that the alternative might be a life without major league sports—a life, he said, that would turn the Twin Cities into a "cold Omaha."

That chilling specter helped get the stadium—the Hubert H. Humphrey Metrodome—built. But now, after two years of domed baseball, the stadium that was supposed to keep the Twins here is facing the prospect of their departure. The cynics, of course, suggest that professional baseball has already left Minnesota. The Twins wound up in last place with a 60-102 record in their first year in the dome, and were 70-92 this year.

Those records are a large part of the problem. Fewer than 1.8 million paid to see the Twins in their first two years in the dome—compare that with the Los Angeles Dodgers, who drew about 7 million during the same period—and if things don't improve dramatically in 1984, team owner Calvin Griffith might be tempted to head south.

When the Twins moved into the dome, they signed a 30-year lease, but the lease had a loophole as big as the great indoor stadium itself. The loophole gives the Twins the right to break the lease if attendance doesn't average 1.4 million a year after each three-year period.

So now the Greater Minneapolis Chamber of Commerce has set up a committee to try to help the Twins sell enough season tickets next year to put 2.4 million people in the Metrodome. Although Mr. Griffith hasn't said he'll move the team if the effort fails, he hasn't said he won't. And that worries the downtown businessmen who saw the stadium as a way of revitalizing the inner city.

What also worries them are some highly public overtures made this summer by a group of Tampa Bay businessmen who are trying to lure a team to their own new domed stadium (*see story on Page M-40*). The anxiety reached its highest point in October, when *Sports Illustrated* quoted one of the Florida businessmen as saying Mr. Griffith was "down to where he's selecting the spot for the toilet in his private office." (The Tampa Bay group is willing to install Mr. Griffith as a team executive.)

While Mr. Griffith is playing his cards close to his vest, there is speculation that the $24 million offered the Florida group offered may no longer be enough. Dave Mona, a public relations consultant to the Twins and a member of the chamber committee designed to help market the Twins, says: "Calvin is smart enough to realize that all of his alternatives are reasonably bright. His crisis is which of several ways to get rich."

In two years, the Twins have drawn fewer than 1.8 million fans.

Indeed, even without 2.4 million fans next year, Mr. Griffith seems destined to enjoy a considerable profit. He has been breaking even with a payroll consistently among the lowest in baseball, and next year the Twins will start getting annual payments of $7.5 million from a new network tv contract.

Critics, in fact, suggest that the downtown businessmen are trying to save the Twins from themselves—in effect guaranteeing that Mr. Griffith would continue to emphasize economy rather than quality. Mr. Griffith has a reputation for peddling high-price players in exchange for players of lesser quality and considerably more modest salary requirements.

Says Julian Empson, who led a campaign by baseball purists to prevent the construction of a domed stadium: "It's interesting that the pillars of capitalism are willing to subsidize someone for running a bad franchise."

And U.S. Sen. Rudy Boschwitz (R.-Minn.), saying Mr. Griffith "systematically milked" profits and drove the team into the ground, has threatened to introduce legislation that would require a major league baseball team to allow local investors to match offers from outside interests.

Mr. Mona responds that "the effort is to preserve major league baseball in this area rather than a 'Save Calvin' effort. The appeal is to a major league quality of life. Everybody agrees that a bailout for the Twins would fail."

Mr. Mona acknowledges that attracting fan support won't be easy "in an environment that they [the Twins] have found increasingly hostile."

Beyond selling 2.4 million tickets next year, the real effort to preserve major league baseball is aimed at finding local investors. Mr. Griffith is 72 and not on speaking terms with his only son, Clark, so sale of the team seems likely in the near future.

"We don't have an indication that the Twins are for sale," says chamber of commerce president Merlin Dewing, "but we want to be prepared should that ever happen."

But, privately, everyone involved with the ticket-sale effort agrees that it is at best a short-term—and expensive—solution. Civic leaders were proud that the Metrodome, which is also home to the football Minnesota Vikings, came in under its $55 million budget. But even if the Twins drew 1 million fans next year on their own—something they were unable to do in their first two seasons in the dome—the additional 1.4 million tickets would come to about $11 million.

"It's difficult to look beyond 1984 because if the Twins have some talent, people might go to the ballpark and say, 'This is an enjoyable experience' and come back," says Mr. Mona. "The question is, will our efforts be enough to allow them to get 1.4 million on their own, or will we need another artificial insemination job three years down the line?"

It's a question the Twins can't answer, but the evidence suggests that the Twins are prepared to reap the benefits of the current outburst of civic anxiety.

The team's season-ticket brochure is hot off the press, and its cover features not any star players but the Metrodome itself. The headline reads: "The Minnesota Twins . . . Vital to Minnesota's Quality of Life."

M. Howard Gelfand, an Advertising Age correspondent in Minneapolis, contributes frequently to Magazine.

South Atlantic

Atlanta, Ga.

Population '80	2,138,231
Rank	12
Est. income '82	$21,582,976,000

It could be called the Second Reconstruction of Atlanta. There is so much building going on that tourists jokingly ask residents when the city will be finished.

Atlanta is the transportation center of the South, and as such it continues to improve its highways, rapid transit system and airport.

The world's largest and second busiest airport Hartsfield Atlanta International, opened a $500 million terminal complex in 1980 and its fourth runway is scheduled to open next year.

The Metropolitan Atlanta Rapid Transit Authority continues building its rail lines and stations, in addition to operating 800 buses, which cover 2,000 miles each day. More than $1.4 billion has been spent in building 16 miles of rail line and 20 stations. Five more stations and another nine miles of line should be completed during 1984. The plans call for 53 miles of rail lines to be laid by the end of this decade.

Atlanta's position as transportation hub is nowhere better illustrated than where the six legs of three major interstate highways converge in downtown. More than $1.6 billion of highway and interchange improvements are under way.

The downtown lodging market is also experiencing a resurgence in building.

Three major hotels are scheduled to open during 1984, coinciding with the near doubling of the 350,000-sq.-ft. Georgia World Congress Center, the city's major convention hall. Atlanta's convention bureau claims the city is the third busiest convention city in the nation. Last year, 1,000 conventions brought 1.5 million delegates, who spent $421.8 million.

One of the hotels scheduled to open next year is noted architect John Portman's latest edition to his Peachtree Complex. The 1,674-room Marriott Marquis would be the city's largest convention hotel.

Last year saw the completion of the 52-story Georgia-Pacific Corp.'s tower and the return of that company to its place of birth. The paper products company moved from Portland, Ore.

But perhaps no company will have as instant impact on a city as the new BellSouth, the telecommunications holding company forming on Jan. 1 as a result of the breakup of American Telephone & Telegraph Co. BellSouth, which comprises the operating companies of Southern Bell and South Central Bell, will instantly become the largest corporation in Atlanta. Yes, for the first time in decades, Coca-Cola Co. will be ranked second, as BellSouth will be nearly twice the size of the beverage and entertainment company.

According to the *Sales & Marketing Management* "Survey of Buying Power," the total metropolitan area had a net effective buying income in 1982 of $21 billion. The same survey found that retail sales had increased to $11.5 billion.

Metropolitan Atlanta is covered by eight daily newspapers, the largest being the *Atlanta Constitution* (morning) and the *Atlanta Journal* (evening), both owned by Atlanta-based Cox Enterprises. The news staffs of the two were merged last year, but they continue to publish separate morning and evening newspapers.

Eight tv stations, including the network affiliates, broadcast in Atlanta—half vhf and half uhf. Twenty-nine am radio stations, 11 commercial fm stations and five noncommercial fm stations can be heard in Atlanta.

And, of course, Atlanta is the home of Turner Broadcasting System, Ted Turner's superstation and cable operation. Mr. Turner recently won the war of the all-news cable programs when he agreed to acquire—from Group W Broadcasting & Cable and ABC Inc.—and dissolve Satellite News Channels. TBS' Cable News network and its CNN Headline News remain cable tv's only news programing.

Baltimore, Md.

Population '80	2,199,531
Rank	11
Est. income '82	$18,674,846,000

If one were to write a textbook on how to reshape the economy of an ailing industrial city, they would most likely turn to Baltimore Mayor William D. Schaefer for all the right answers.

During his 12-year reign as Baltimore's mayor, Mr. Schaefer has presided over one of the boldest and most successful urban revitalization efforts in U.S. history, and many believe the inner city redevelopment effort has been the single most important force behind the city's economic liberation from cyclical smokestack industries.

Since the opening of the 130-store Harborplace shopping and restaurant complex in 1980, the city has spread its revitalization efforts over 225 acres of adjoining land covering a large portion of the city's downtown business and shopping district. And, as Mr. Schaefer begins his fourth term as mayor, he is in the midst of a new push to upgrade the city's 82-acre retail district and bolster the white collar workforce.

A study released this year by Baltimore's Johns Hopkins University highlights the transformation of the economy, reporting that white collar workers in the area now outnumber blue collar workers two to one. In 1975, more than one half of the pay in Baltimore came from blue collar employment. Today white collar salaries far exceed blue collar paychecks.

Fueled by its improving economy, which now has an unemployment level below the national average, and a new subway system that opened in November, the mayor is making his second serious push to reshape Baltimore's inner city.

The focus this time is on the Lexington Market Center, an 82-acre stretch of land somewhat removed from the inner harbor area.

Consistent with the basic objective—more white collar jobs downtown—the city has made a deal with Los Angeles-based developer David Murdock, who has agreed to provide retail shopping space and at least 1 million sq. ft. of commercial office space in exchange for the right to develop the district's prime real estate.

Already, Mr. Murdock has received rental commitments for 80% of the space available in the largest project, the Atrium at Market Place, a seven-story structure that combines new construction with the historic renovation of an existing building. The corner-

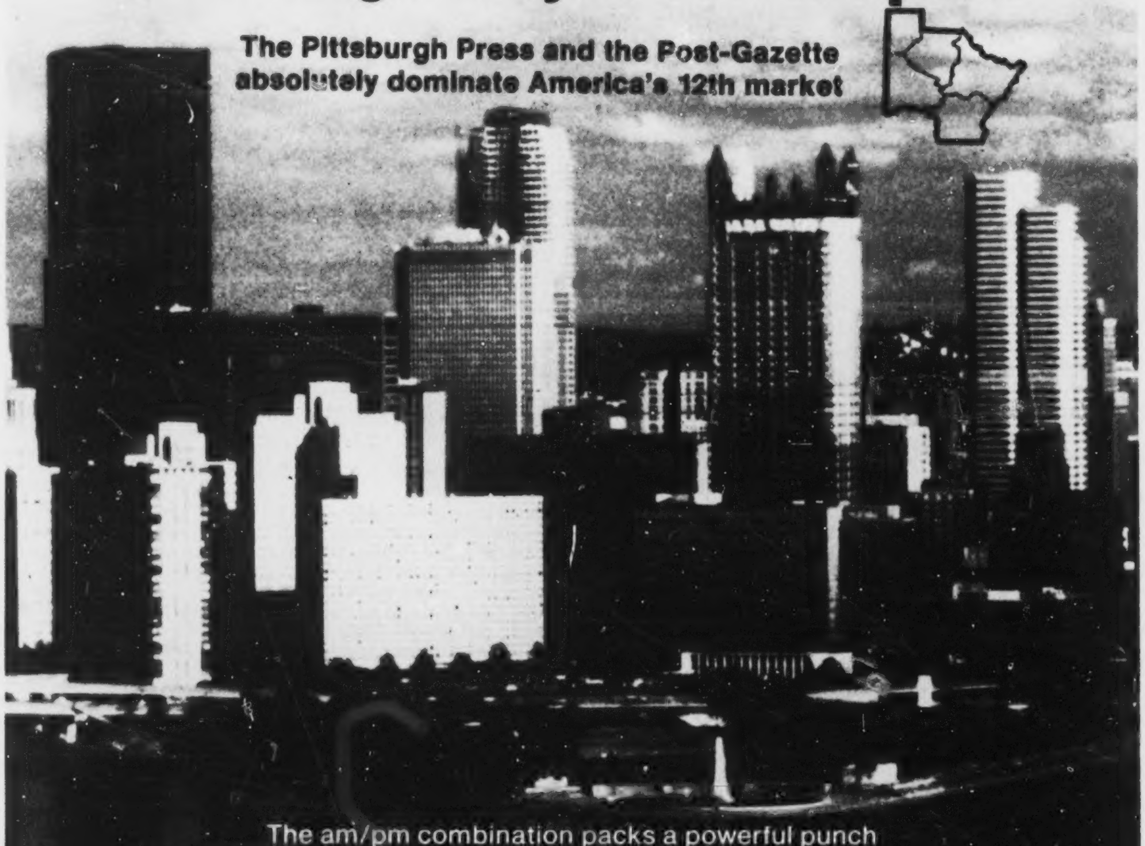
Coverage Beyond Compare

The Pittsburgh Press and the Post-Gazette absolutely dominate America's 12th market



The am/pm combination packs a powerful punch in the five-county CMSA, where 848,000 adults read the daily Press and/or Post-Gazette.

The Sunday Press, with 1,225,000 adult CMSA readers, has outstanding (62.7%) penetration, including 85.3% of the 426,700 adults in Allegheny County's $25,000 + households.

It also delivers valuable coverage of a fifteen-county tri-state area which includes Western Pennsylvania and parts of Ohio and West Virginia.

Call Bill McCormick (412-263-1336) for details of our reach and readership as researched by Belden's 1983 CMS. Or contact Story & Kelly-Smith, Inc.

For a chance to "visit" Pittsburgh via a 15 minute film presentation, contact either Bill McCormick or your nearest Story & Kelly-Smith office.

The Pittsburgh Press
A Scripps-Howard Newspaper

Pittsburgh Post-Gazette

Represented nationally by Story & Kelly-Smith, Inc.

stone of the Atrium project will be the flagship location of Baltimore's Hutzler's department store, which is scheduled to move into the new facility next fall.

The new Market Center project also includes the renovation of several historic buildings, a 700-car parking garage, luxury residential apartments and a commitment by the city to rebuild the area's infrastructure, including streets and sidewalks.

Developer James Rouse, who designed the initial Harborplace project, continues his activity along the inner harbor area. Mr. Rouse already has 1,400 new hotel rooms under construction, and another 200 are inching off the drawing board.

In addition, theme park developer Six Flags is expected to convert a massive old unused power plant into a $22 million indoor amusement park a few blocks from the Harborplace mall. If plans continue on schedule, the park would open in 1985.

The city's consortium of business leaders, the Greater Baltimore Committee, reports that development along the eight-mile stretch of the city's new subway system has not yet blossomed, but it predicts that once the initial nine-stop system is in regular operation, land values and demand for property along the route will increase.

Even some older sectors of the Baltimore-area economy fared better in 1983 than in past years. After a two-year delay, General Motors Corp. gave concrete approval for a $250 million retooling project at its Baltimore facility that will allow the plant to produce its new line of 1984 cars. The decision to renovate rather than close the plant will save several thousand jobs.

The picture at Bethlehem Steel's Sparrows Point plant was not as bright, however. During its post-war boom, the plant had 30,000 employes. Today, plant employment is at half its peak, and 4,000 of the 15,000 person workforce is on indefinite layoff.

Employment at Bethlehem's Baltimore shipyard is also down, and many believe the economic viability of the operation will hinge on the city's ability to lure the federal money needed to dredge the harbor floor.

The Reagan administration's push for more federal defense spending has boosted the local economy, which houses research and production facilities for the nation's top defense contractors. Westinghouse Electric Corp., Martin Marrietta Corp. and Bendix Corp. are all expanding their Baltimore area facilities, and the county's planning department notes an increase in hiring and expansion among defense-related companies.

Baltimore's housing market is also showing signs of improvement. The city's planning office predicts the new subway system and increased downtown employment will increase the demand for housing in the inner city. The 19th century homes in Baltimore's west-end neighborhoods are reportedly ripe for renovation and are expected to emerge as the city's hottest neighborhoods.

The city's professional sports industry had mixed news during 1983. The hometown Orioles were the winners of the World Series and broke a home game attendance record by drawing more than 2 million fans. But the news for the city's National Football League franchise was not as upbeat. A string of poor seasons and lackluster ticket sales have many predicting that 1983 may be the last season for the Colts in Baltimore.

Both the Hearst Corp.-owned *Baltimore News American* and A.S. Abell Co.'s *Baltimore Sun* newspapers print morning and afternoon editions. The city also has eight tv and 26 radio statios (11 am and 15 fm).

Charleston, S.C.

Population '80	430,462
Rank	96
Est. income '82	$3,479,511,000

Billed as "America's most historic city," Charleston—its over-all character, its architecture, urban pattern, moderate climate and coastal location all help make the area a major national tourist attraction.

Charleston is the second largest tourist market in South Carolina, with expenditures from these visitors amounting to more than $350 million annually. Part of the reason for Charleston's popularity with tourists is the Spoleto Festival USA, "the world's most comprehensive arts festival," which comes each year during May and June.

Between 125 and 140 performances in all of the arts are offered, along with many major new introductions of works by international artists. Historic Fort Sumter and Patriot's Point Naval Park (home of the aircraft carrier Yorktown, a submarine and the nuclear-powered ship, Savannah) have long attracted tourists year-round.

Meanwhile, major revitalization efforts in the historic King St. area continue at a steady pace. The older homes, shops and warehouses in the area are being restored or converted to their former beauty for use as offices, homes, apartments and specialty shops, all designed to augment the already strong retailing base of the area.

One of the largest medical complexes in the Southeast is located in Charleston. Included are five major hospitals: Charleston Memorial, Medical University, Roper, Saint Francis and Veterans Administration hospitals.

The entire Medical University of South Carolina is located in this complex, too. A short distance away, in North Charleston, is the North Trident Regional Hospital and the U.S. Naval Regional Medical Center. Major expansion and construction work have been ongoing at all these locations.

A major economic consideration in Charleston is the South Carolina State Port Authority, which brings in $1.5 billion in direct and indirect income per year statewide, affecting about 48,500 jobs. Of this total, 14,000 are in the Greater Charleston area alone.

Of the 20 ship berths owned by the state authority—more than two miles in total length backed up by more than 2 million sq. ft. feet of enclosed storage area—Charleston has 17. More than 12,000 containers on chassis can be parked in the port's backup area.

In May, 1982, the new Wando Container Terminal was opened with three new container ship berths and four special container cranes added. The 561-acre site is across Charleston Harbor from other port authority facilities on the mouth of the Wando River, 12 miles from the open sea.

The Charleston Harbor Deepening Study, authorized by Congress in 1976, is now complete and has moved into advanced engineering and design phase. The channels, deepened to 40 ft., should be capable of handling general cargo vessels of almost every size.

Elsewhere, in 1981, the area experienced the largest increase in terms of dollars invested in the state, as well as the largest increase in new dollars invested. The value of products manufactured in South Carolina climbed 16% over 1980, with one half of this increase occurring in the area.

Among the plants expanding or locating within the area have been Airco Carbon, R-M Industrial Products Co., Homemaker Rugs, Siebe Norton Inc. and USA Inflatables.

Among other developments:

- The new Charleston Marriott, with 303 rooms and costing $23 million, opened in July.
- Site work for the $50 million in new construction was begun for the Charleston International Airport with completion expected in January, 1985.
- The new $55 million downtown Charleston Center, with 430 rooms and conferences facilities, is expected to be completed in early 1984.

The area is served by two daily newspapers, five weeklies, four tv stations, 13 radio stations and various cable companies.

Charlotte-Gastonia-Rock Hill, N.C.-S.C.

Population '80	971,391
Rank	42
Est. income '82	$8,853,294,000

The roads cross in Charlotte, and therein lies the backbone of the area. Indeed, this North Carolina market is in a location that gives it efficient access to most of the major markets of the East.

Major interstates, for instance, straddle the market, making it an important transhipment point for goods and services, with the city a key contributor to the continued stable economy and growth of the entire region.

As a major wholesale center, the Charlotte area has more than 1,800 wholesale companies within its borders. Combined, these companies bring in a total sales volume of $11.1 billion annually, with the city itself accounting for $9 billion of that total.

As a major transportation center, Charlotte also has 150 actively operating trucking companies. The closing of Johnson Motor Lines, while creating some short-term problems, has not affected the over-all picture during the past few years.

Goods are not the only things that enjoy the area's transportation facilities. More than 300 passenger and freight trains pass through Charlotte weekly. Also, five commercial airlines serve the area from the expanded modern airport on the west side of the city. Charlotte is also designated as a port of entry and has a Free Trade Zone as well.

In the construction sector, low costs are a key in the number of new companies coming into the area, as well as the numerous expansions undertaken by existing companies. The city is said to rank the second lowest in construction costs in the nation.

Construction experts cite stable wage rates, favorable weather conditions, readily available supplies of a variety of building materials, a large skilled work force and a large number of experienced contracting companies as reasons for these low construction costs.

Another consideration is the state's strong right-to-work law. North Carolina is ranked second lowest in union membership in the country.

In 1982, 17 companies began operations in the Greater Charlotte area, providing direct employment to 2,600 workers, using 3.4 million sq. ft. of commercial space and investing $197.5 million.

In the first six months of 1983, a total of 140 companies created 2,086 direct new jobs, occupied 2.3 million sq. ft. and invested $129.2 million. Among these companies were Freightliner Corp., with 100 new employes occupying 72,000 sq. ft. of new space; Guest Quarters, a new 175,000-sq.-ft. hotel with more than 100 employes and investment of $10 million; Park Hotel, a 135,000-sq.-ft., $15 million investment, and Bendix Automation.

International Business Machines Corp. expanded its operations by 115,000 sq. ft. and invested $52 million in computer-banking equipment manufacturing.

Because of the low corporate tax burden in the State of North Carolina and the uncomplicated system of taxation in Charlotte and in Mecklenberg County for businesses and individuals, taxpayers are subject to only one property tax assesment and only one tax payment. The city and county jointly operate one tax department.

As for cultural opportunities, Spirit Square, Charlotte's own "Home For the People and For the Arts," a centrally located facility for the creative arts, has become a cultural focus for the entire area since it opened in 1980. Activities offered there include performances, exhibitions, classes, demonstrations and rehearsals.

Media serving the area include two daily newspapers, eight weeklies, 14 am and nine fm radio stations, four commercial and three public broadcasting tv stations, as well as cable tv services.

Fort Lauderdale-Hollywood-Pompano Beach, Fla.

Population '80	1,018,200
Rank	39
Est. income '82	$12,281,371,000

Fort Lauderdale continued its metamorphosis from tourist town to a business mecca in 1983, and its emerging base of high-tech industries cushioned the economy from the nation's recession.

Retail sales during the three-month period ending in July rose 8.9% over year-earlier levels, to $96 million. Lord & Taylor moved to snatch a share of the market in October, when it opened the first of four stores planned for this area by 1986.

"We are right in the center of the fastest growing area of the state and companies are noticing that," said Joseph Siclari, manager of economic development with the Fort Lauderdale/Broward County Chamber of Commerce. "If companies want to sell internationally they are in the center of three international airports and ports.

"Locally, they are in the center of a region with 3.5 million people, and this region is expected to be the fastest growing in the state over the next 10 years."

Fort Lauderdale is playing to these strengths, developing an infrastructure

'Play ball!' becomes hard ball

By Fred. W. Wright Jr.

Tampa and St. Petersburg—the twin cities on Florida's west coast—have established a baseball rivalry even before the first pitch is thrown.

In fact, although neither city yet has a major league baseball team, a major league rhubarb is heating up over who is going to be first to join the Boys of Summer lineup.

Both cities want a major league baseball team, and both cities admit two such teams can't survive in the Tampa Bay area. A heated race has been under way for more than a year to see who can land the most funds and the firmest promise for a major league team.

Tampa wants to lure an existing team—the Minnesota Twins have been frequently mentioned *(see story on Page M-38)*—and build a stadium with private funds. St. Petersburg wants an expansion team and a stadium with public funds.

Here's how the two proposed stadiums compare:

In Tampa, the plans call for a replacement of Al Lopez Field, which is adjacent to Tampa Stadium, home of the National Football League's Tampa Bay Buccaneers and the U.S. Football League's Tampa Bay Bandits. The cost of the stadium, which is supposed to seat 46,000, is $50 million. There would be parking facilities for 11,000, and groundbreaking is scheduled for April, 1984, to be completed in February, 1986.

For the St. Petersburg site, a downtown location in an area known as the Gas Plant, between 9th and 16th Sts. North, has been chosen. Plans call for that facility to seat 43,000, with 4,416 parking spaces and another 16,000 nearby. Groundbreaking for the St. Petersburg site is scheduled for February, 1984, with completion scheduled for September or October, 1986.

Both stadiums would be domed, air-conditioned and offer artificial surfaces for the players. Both would be multipurpose facilities, usable for other sports, concerts and exhibitions.

In the day-to-day fluctuations of the competition, some of the players and their names change. Tampa's facility is tentatively titled Tampa Bay Baseball Coliseum. St. Petersburg started with Sportsplex.

Whatever the names and numbers, however, the rivalry is merely a current battle in a war—a war of image—that has been going on for decades between the two cities.

Tampa has traditionally maintained an image of a young business community on its way up. Its skyline has been punctuated in recent years by a half-dozen new high-rise office and hotel complexes.

St. Petersburg has traditionally held an image of senior citizens sitting on green benches, playing shuffleboard or feeding pigeons. It hurts St. Petersburg that Tampa already has two major league football franchises, not to mention the Tampa Bay Rowdies soccer team. To lose the baseball war would be one more nail in St. Petersburg's old-folks image.

"St. Petersburg and Pinellas County have a not-very-favorable image when it comes to competing for major issues with Tampa," says Robert Stewart, president of a 4,000-member booster team known as the Clutch Hitters. "To counteract the age-old image of St. Petersburg as a sleepy retirement village, the stadium is a focal point." If we don't make it with the stadium, we're going to have to regroup."

Tom McEwen, sports editor of the *Tampa Tribune*, says he believes a major league baseball franchise is needed before Tampa can have a major league image.

"A major league baseball team completes the image," he says. "Now you're on everybody's sports pages all year long—not just during the football season."

Each side—the Tampa Bay Baseball Group in Tampa, the Pinellas Sports Authority in St. Petersburg—cite reasons the team and the stadium should be in their hometown.

The impact on whichever community gets the package is in millions of dollars of added revenue. St. Petersburg boosters point to 210 construction jobs, $7.4 million in construction wages, $36 million in generated local revenue per year of operation and annual sales taxes of $1.8 million.

Tampa backers say their planning—which includes the potential to expand seating to handle playoffs and even World Series games—could bring $35 million to $50 million into the community each season if the hometown team ranks near the top of its division.

The principal arguments center on location. Because the two cities are separated by Tampa Bay and connected by a series of bridges, Tampa Bay Baseball Group backers call a St. Petersburg site "a bridge too far."

Tampa is near the center of a commuter wheel, says Ray Bennett, architect and organizer of the Tampa Bay Baseball Group. More people from the center of Florida will drive to Tampa for a weekend of games during a typical 81-game season than will drive the extra distance over one of the bridges to St. Petersburg, he says.

A local baseball team will draw an annual average of 1.3 million fans if placed in St. Petersburg vs. 2.3 million in Tampa, Mr. Bennett says. "We're near the center of the wheel rather than at the rim," he says.

All of this has not been without some humor:

One of the potential backers of a St. Petersburg franchise in Florida is Florida Progress Corp., owner of Florida Power Corp., which is the local electric company.

That has St. Petersburg sportswriters attacking their keyboards with vigor. The local team should have real power hitters, they say, and every player would be a utility infielder.

Fred. W. Wright Jr. is a free lance writer in Redington Beach, Fla.

designed to attract business to the area.

The area's Tourist Development Council began putting money aside for a convention center and hired a director with experience promoting resorts. After eight years of planning, the $262.5 million expansion of the Fort Lauderdale/Hollywood International Airport finally got under way.

Despite Fort Lauderdale's growth-oriented moves, however, the nation's recession cut into the tourist industry, and the percentage of hotel rooms occupied dropped to 62.5% during the first seven months of 1983 from 70.5% a year earlier.

Yet Fort Lauderdale saw the start of nine new hotels, including the area's first hotel-convention center. Built by Marriott Corp., the $80 million, 643-room center is targeting business travelers, not tourists, and should be completed by 1984.

Unemployment hit a five-year high in January, as the national recession side-swiped the tourism and related service sectors. But the 9.1% unemployment rate stayed well below state and national levels.

Housing starts rose 190% from year-earlier levels in the second quarter and commercial construction boomed.

The chamber of commerce reported a 23% increase in office space, while available space in industrial parks declined 10%. Mr. Siclari said there will be 2 million sq. ft. of additional office space in Fort Lauderdale by next year.

Jim Garver of the Broward County Economic Development Board said Fort Lauderdale's business sector has found a niche between Palm Beach County's high-tech center and the labor-intensive industries in Miami. Fort Lauderdale is close enough to Miami to draw on the supply of unskilled labor, yet it offers amenities to attract high-tech employers, he said.

This year Racal-Milgo moved from Miami to Plantation, Sensormatic Inc. expanded and Xerox Corp. signed a long-term lease to run its Central and South American distribution business out of Port Everglades, he added.

Fort Lauderdale's Port Everglades managed to sidestep the devastating effects the Latin American recession had on the Port of Miami. A strong dollar in Europe, where Port Everglades' trading partners are concentrated, boosted import income.

The port's campaign to improve cruise and cargo business netted a 30% increase in tonnage and a 56% increase in earnings this past year, and its new 20-year master plan shows it plowing $106 million into developing one of the most significant containerized cargo facilities in the U.S.

Mr. Garver said Fort Lauderdale will continue to grow as long as it can attract the labor-intensive high technology companies that Palm Beach County cannot support.

"Our base is comprised of telecommunications, electronics and computer operations, technology related industries tied in with two other areas, aerospace and medical technology," he said.

"Growth in these areas has attracted a cross-section of industry and we are finding that like attracts like," Mr. Garver added.

Fort Lauderdale has the morning *Sun-Sentinel* and the evening *Fort Lauderdale News* serving its area. A large portion of the area's tv programing comes from a spillover of Miami media.

The market has one independent tv station of its own, six fm and four am radio stations, and receives cable programing.

Greensboro-Winston-Salem-High Point, N.C.

Population '80	851,851
Rank	52
Est. income '82	$7,593,055,000

National recognition has come to this area yet again. In late 1981, the "Triad" was ranked by Rand McNally's "The Places Rated Almanac" as the top mid-size city in terms of livability in the nation.

In addition, Winston-Salem received an honorable mention in the City Livability Award category from the U.S. Conference of Mayors.

In January, the Winston Plaza broke ground for a deluxe 327-room hotel next to the Benton Convention Center. The complex, which carries a price tag of $27 million, will be managed by the Stouffer Corp.

In April, the downtown welcomed the Roger L. Stevens Center for the Performing Arts. And a $1 billion R.J Reynolds Industries expansion project is moving ahead on schedule.

In fact, a variety of business openings and expansions continued at a steady pace across a broad and diverse field of interests. Wilson-Cook Medical, is locating both its corporate headquarters and a manufacturing facility in the Grassy Creek Business Park; Piedmont Aviation has occupied 67,000 sq. ft. in Madison Park; Central Business Systems division of Centel Corp., moved all branch operations in Virginia and the Carolinas to the area.

Other developments: General Cinema Corp., a major bottling corporation, opened a new facility in October; North State Supply Co. completed a $35 million facility on South Stratford Rd.; Triad Life Insurance Corp. opened a new $1 million building, and Hechinger Co. opened a major department store employing more than 100 people.

Despite the national recession, the economic activity in nearby Greensboro continued to move along well through the past several years, creating an upbeat business climate.

Major corporations have opened new facilities or expanded existing ones in the market. They include Volvo-White Trucks, Procter & Gamble, Interforest Ltd., Lin-PAC Corrugated, Dun & Bradstreet, Fuji Foods, Analog Devices and Lockheed.

Also, the new $65 million Greensboro Regional Airport is spurring industrial and office park development, including the new 1,600-acre corporate campus in Eastern Guilford County.

Office developments are proceeding at such a rapid pace that the speculative building market has taken up nearly all available buildings.

A new Sheraton Hotel in downtown and a First Citizens Bank Bldg., as well as many new offices, all bode well for the downtown area's future.

In the employment arena, Greensboro's unemployment rate stands about 7.5%, below both state and national averages, with the traditional employer sectors of textiles, apparel and furniture continuing to lead the way.

The majority of economic activity for the Triad is coming from the High Point area, center of the international furniture industry, which at present exceeds $100 million in new construction or expansion projects centered in or around the downtown core area.

Among the major developments already started, completed or just breaking ground are a new $20 million Radisson hotel, convention center and parking complex and the new seven-story, 300,000-sq.-ft., $10 million Decorative Arts Center in the Southern Furniture Market Center. This center is expected to have its showrooms open year-round to serve the nation's retailing and decorating trades.

Another project—the redevelopment of Market Square from a former furniture factory—continues to progress, with 500,000 sq. ft. geared to high-quality designer showrooms, plus two restaurants.

Elsewhere in High Point, a local law firm has acquired one of many landmark buildings on Main St. to convert to general office space usage. High Point Bank and Trust Co. is expanding its offices into an adjoining building downtown.

Among industrial projects completed or under way in High Point are an expansion by Myrtle Desk Co.; an addition by Schoonbeck division of Henredon to its present operation; a new Archdale Mfg. Co. plant, and a new WGHP-TV office and production facility.

All this diverse activity attests to a perceived upswing in the economy.

IN MIAMI ONE TV STATION REACHES HALF THE MARKET.

IT TAKES 5 STATIONS TO REACH THE OTHER HALF.

SIMPLE MATHEMATICS.

A lot of media buyers make the mistake of thinking that Spanish television reaches minority households without much buying power.

Well if you make that mistake in the Metro-Miami market, get ready to say adios to a lot of your clients.

Because in the Miami-Metro market, the Spanish audience means big numbers in the ratings race. And even bigger numbers in terms of buying power.

Consider: The South Florida Latin buying power is estimated at $7 billion. Miami's Latin market comprises one half of Metro-Miami's population. The median Latin household income is a whopping $22,000 plus per year. Which buys a lot of Whoppers, Big Macs, Cervezas, soap and so on.

And in this market, the Latin television market audience does its shopping in Spanish, on television, on Channel 23. the TV channel Miami's Latins watch more and believe in more than any other TV channel in South Florida.

Consider: Channel 23 is now the Number One ranked television station in prime access time in the Miami-Metro area.*

Channel 23 is also the Number Two ranked station in the Miami-Metro area during fringe and prime time combined.**

And the Number One television station in attracting women aged 25 to 54.***

Which means if you're not including Channel 23 in your overall Miami media buy, you're not talking directly to a $7 billion market.

In plain English, you can't make it in Miami without speaking Spanish.

On Channel 23.

Also, while some businesses suffered some adverse effects of the recent recession, not a single plant closing occurred in High Point during that extended down period.

All forms of media are well represented in the Triad. Morning and afternoon dailies service each of the cities, and there are six weekly neighborhood papers. There are six tv stations and more than a dozen radio stations. Two cable companies offer services in the area.

Greenville-Spartanburg, S.C.

Population '80	569,066
Rank	72
Est. income '82	$4,740,246,000

A further diversification of its manufacturing base and a strong growth in the service section characterized the economy of the Greenville area as it entered the fourth quarter of 1983.

Known at one time solely as a textile center, this industry continues to be one of great importance to the area, with substantial investments made in plant modernizations.

The area has seen an increase in diversification into high-tech, metalworking and other industries. As an example, in mid-1983, the Ball Corp. announced its Unimark Plastics division is locating a 40,000-sq.-ft. manufacturing facility here along with its division headquarters. This is the first phase of what would eventually bring three manufacturing plants onto the same site in Greenville.

Atlanta Aviation is completing a $1 million expansion that would provide about 250 new jobs in aviation overhaul and maintenance services at the Donaldson Center Air Industrial Park, where approximately 90 companies are already situated.

King's Hawaiian Bakery, National Tool and W-L Molding Co. are also making significant construction developments in the area. Additionally, Verdae Properties has made available 1,800 prime acres for industrial/commercial development.

Keeping pace with this diverse business growth, Holiday Inn has announced plans for a $10 million facility, and Comfort Inn Executive Center has completed a $3.5 million renovation project.

More evidence of Greenville's diversity is apparent in the more than 50 corporate, regional and divisional headquarters located within the area. The latest to move a major division here was J. P. Stevens & Co., the New York-based apparel marketer, which brought its accounting center to Greenville.

Recently the Greater Greenville Chamber of Commerce, in conjunction with the City of Greenville, established a professional headquarters recruitment program. This is being used to interest other companies in establishing divisional centers here.

Major building projects in downtown locations involve two new office buildings. One Shelter Centre/Southern Bank Bldg. is a 17-story, 270,000-sq.-ft. office tower; the other is the 150,000-sq.-ft. American Federal Bldg.

In an unusual private/public venture, negotiations were recently completed to allow construction of a 10,000-seat outdoor stadium, which will become the home of the newly acquired minor league baseball franchise of the Atlanta Braves.

In Spartanburg County, known as "The Fresh Peach Capital of the World," more than 82 million lbs. of peaches annually are shipped out of the country in the height of the fruit season.

Not to be thought of strictly as an agriculture center, Spartanburg has more than 300 manufacturing plants within its area, with 55 of these companies coming from 12 foreign countries.

In 1982, eight new companies invested $29.5 million and brought in 1,210 direct new jobs to the Spartanburg area. They included National Lock Hardware, Carolina Throwing Corp., Filature St. Andre, Fruehauf and Gibbs Textiles. Not to be outdone, some 14 existing operations spent $84.2 million in expansion programs during 1982.

Spartanburg has also been designated as a Foreign Trade Zone.

The area is serviced by five daily and weekly newspapers, four radio stations and four tv stations, as well as cable services.

Jacksonville, Fla.

Population '80	722,252
Rank	59
Est. income '82	$6,371,537,000

Jacksonville is changing just fast enough to keep everybody guessing as to its true identity.

Jacksonville is a southern city more than a Florida city, suggests one magazine editor. While other parts of Florida have been settled and developed largely by transplanted northerners, Jacksonville maintains a big-business atmosphere with a conservative southern pace.

Jacksonville is a young city, with a median population age of 29—compared with a Florida median age of 36.

Jacksonville—compared with New York or San Francisco or Miami, cities where fashion, the arts, culture and the like play a bigger role in day-to-day life styles—is considered more of a work-a-day town. Its commercial roots lie in commerce, finance, insurance and has a major U.S. Navy presence.

Still another viewpoint sees Jacksonville as a "working man's town," with a large blue collar workforce that is easily trainable.

Whatever the image, Jacksonville is changing and growing.

Building permits through September of this year were way up over 1982 to $458 million from $346 million.

Some major companies are relocating to Jacksonville or opening new operations there. These include the Bendix Corp., which is expected to employ 800 to 1,000 people by the end of 1984, and American Transtech—a subsidiary of American Telephone & Telegraph established in Jacksonville to handle all of the stock transfers required under AT&T's divestiture. That means another 1,500 jobs within the next six months.

Both Bendix Corp. and American Transtech will be located in Deerwood Center, an office park on the south side of Jacksonville. A few miles up the interstate, at South Point Park, two office buildings are nearing completion for Barnett Bank and Atlantic Bank.

In downtown Jacksonville, expansion continues as well. Prudential Life Insurance, which is consolidating more than a half-dozen regional offices into four, is establishing one of those in Jacksonville.

Jacksonville has always had the image of Florida's insurance and banking center. Twenty-six insurance companies have regional or national headquarters in Jacksonville. Three of the six largest bank holding companies in Florida have headquarters there, as well as half of the state's 10 largest mortgage banking concerns.

For the city's population of 700,000, spread over 800 square miles that roughly coincide with the boundaries of Duval County, growth has always been a factor. It was just a question of how fast.

The St. Johns River runs through the middle of Jacksonville and continues to be the focal point for downtown development. Saison & Associates of Charlotte, N.C., is constructing a 20-story, $300 million development along the St. Johns.

Also downtown, expansion of riverfront Metropolitan Park means more outdoor concerts and public events. Similarly, the Gator Bowl, home of the University of Florida football team, has been expanded to 82,000 seats.

More important, though, the expanded Gator Bowl will be the home for a new franchise in the two-year-old U.S. Football League—the Jacksonville Bulls.

But just as important to Jacksonville and Duval County is the construction of the U.S. Navy's new Kings Bay Trident submarine base at St. Marys, Ga., 35 miles north. The $10 billion project is expected to eventually employ 30,000 people over the next 10 years, and Jacksonville is the closest major city to the base.

Finally, the Atlantic waterfront near Jacksonville is experiencing growth as well. Traditionally ignored by developers and residents alike, the waterfront is now attracting resort developers, vacationers and corporate executives looking for beach investments.

The consolidated city-county of Jacksonville and Duval is served by two daily newspapers, six television stations—three uhf, three vhf—18 am and eight fm radio stations and two cable systems.

Johnson City-Kingsport-Bristol, Tenn-Va.

Population '80	433,638
Rank	95
Est. income '82	$3,092,203,000

High unemployment remains a grim fact of life in this eastern Tennessee/western Virginia market.

While the unemployment situation is somewhat brighter in the Tennessee towns of Kingsport and Johnson City proper, the jobless rates in their home counties is 11.1% and 10.2% respectively. In Bristol, the city that straddles the Tennessee/Virginia border, unemployment stood at 9.3% in the second quarter of 1983.

Kingsport, however, is enjoying the benefits of the $50 million expansion program of the AFG Industries glass plant in nearby Hawkins County and is anticipating futher benefits from an upcoming joint venture between AFG and the Chronar Co. The latter project carries a $6 million price tag. Also, the Strolee Co., based in California, has opened a new plant here to make baby strollers, employing 300.

Other major projects in the area include a new warehouse for Kingsport Foundry, a multimillion dollar distribution facility for the Blackburn News Agency, new offices for International Business Machines Corp. and a new psychiatric building for the Hospital Corp. of America.

Tennessee Eastman, the largest employer in the region, with 13,000 on its payroll, has been annexed by Kingsport and is expected to add $3 million annually to the city's tax coffers.

Kingsport, in turn, has been making substantial improvements in city services, including a $2 million water treatment plant, a $12.8 million sewage treatment plant, $5 million for water tanks and $1.3 million for a city garage. There have also been a number of street and highway projects scheduled, the chief ones being the widening of Wilcox Dr., Moreland Dr. and Eastman Rd., all main traffic arteries.

The Johnson City/Washington County area has seen little industrial and building growth of late, but there has been an upsurge of activity in the service sector. Nine shopping centers have been built in the region within the past few years, two of them in Johnson City. And East Tennessee State University continues to expand its medical center.

Recently, Johnson City voted in liquor by the drink, a move that, coupled with two sizable meeting facilities, is bringing in convention business. The facilities are the 8,000-seat Freedom Hall Civic Center Arena and the 20,000-seat East Tennessee State University Mini-Dome.

Bristol has been hurt by layoffs at Sperry Univac division of Sperry Corp. and Bristol Steel & Iron. Employment at Raytheon Co., though, is expected to rise gradually over the next few years, owing to a recent government contract for components for the Maverick missile. Construction is sluggish, but a large Wal-Mart complex is being built in Bristol, Tenn.

The Kingsport/Johnson City/Bristol area is served by eight am and six fm radio stations, three tv stations, three cable systems and five daily newspapers and two cable tv companies.

Miami-Hialeah, Fla.

Population '80	1,625,781
Rank	21
Est. income '82	$16,831,109,000

Latin America tightened its belt to meet debt payments to the U.S. this year, and virtually every sector of Miami's economy felt the pinch.

Hotel occupancy dropped from 63.3% to 55% during the first seven months of 1983, and Miami International Airport reported that 5.5% fewer passengers arrived from overseas.

Small retail shops in downtown Miami, upscale shopping malls like Omni International and even ritzy Bal Harbour shops noted the declining numbers of Latin American customers buying consumer goods to take home, according to Jorge C. Zayas, economist with the Dade County Office of Community and Economic Development.

Retail sales dropped 2.1% during the first quarter, and sales at Dade County department stores showed the smallest increase among South Florida's three-county area—a rise of 6.3% to $170.1 million during the three months ending in July.

Area economists say that it could be 1985 before the world's economy improves to the point where Miami can follow the recoveries of Fort Lauderdale and West Palm Beach. However, two new department stores speak to the underlying strength of South Florida's retail market.

A new Macy's opened this month in North Miami Beach, and Lord & Taylor announced plans to open a Dadeland store by 1986.

News on other fronts was not so encouraging. Exports from the Port of Miami dropped a staggering 27% in the first six months of this year. In response, international banks slowed their expansion in the first quarter, and New York-based European-American Bank closed its door, according to Tony Villamil, chief international economist of Southeast Bank N.A. in Miami.

Miami's international sector is in for another shock this year unless Florida legislators repeal a new corporate tax, Mr. Villamil added.

The so-called unitary tax is based on multinationals' instate share of their parent companies' worldwide, instead of nationwide, profits. By one estimate, it will cost South Florida's international banks $15 million a year.

Economists say it will hurt the area's reputation as a growing, international center. The state's business community agrees, and it has started a campaign to repeal the tax.

The migration from Miami to communities north continued in 1983, and the city's population grew at an annual rate of 1.1%.

Commercial building permits registered the sharpest drop in South Florida's three-county area, 39% to $73 million. Housing starts, however, during the second quarter leaped 320% over the same period last year, reaching one-third the peak levels of late 1981.

Unemployment, which rises as construction falls, has dropped since January and stood at 9.1% in September. The county reported 96,000 manufacturing jobs in June, compared with a peak of 100,300 in 1981 and 95,000 in 1982.

The city has the *Miami Herald* in the morning and the evening *Miami News* serving the area, along with Miami's daily Spanish newspaper, *Diaro Las Americas.* The area has three network tv affiliates, three educational stations, two specialty stations and one independent station. Twenty radio stations serve the area, 10 am and 10 fm. Miami suburbs are served by various cable systems.

Norfolk-Virginia Beach-Newport News, Va.

Population '80	1,160,311
Rank	35
Est. income '82	$9,547,295,000

The Norfolk MSA in Virginia now encompasses the cities of Norfolk, Portsmouth, Virginia Beach, Chesapeake, Newport News, Hampton, Poquoson, Williamsburg and Suffolk, along with the counties of Gloucester, James City and York.

A broad-based economy supported by government employment, maritime industry, a $700 million tourist industry, diversified manufacturing, agriculture, seafood harvesting/processing and all ancillary service industries are some of the reasons for June's low 5.3% unemployment rate.

Government activity alone generates $4.5 billion locally through the largest naval complex in the country, the National Aeronautics and Space Administration Langley Research Center.

One of the major recipients of defense dollars is Virginia's largest employer and the country's largest shipbuilding facility, Newport News Shipbuilding and Drydock Corp., which employs about 28,000 people.

Other major manufacturers in the area include General Electric Co., Ford Motor Co., Virginia Chemicals, Anheuser-Busch, Bendix Corp., Houmet Turbine Components and Northrup Corp.

More than 60 foreign companies, including Volvo, Mercedes-Benz, Moulinex and Stihl, operate manufacturing facilities in the area.

Along the waterfront areas, redevelopment and revitalization in several sections are extensive and continuous. The showpiece is Waterside, a $13.5 million festival marketplace in Norfolk developed by James Rouse, and the $19.4 million, 250,000-sq.-ft. Virginia World Trade Center. The center is the headquarters of the Virginia Port Authority and a center for international trade.

More than $133 million is being spent for other varied waterfront development projects currently in progress.

In Portsmouth, across the Elizabeth River and linked by a 19th century-style pedestrian ferry, is the newly completed, 25-story residential high-rise, Harbor Town, the tallest structure in the market.

Over the next 15 years, plans call for revamping the central business district in the style of Alexandria's Old Towne, as the core factor for attracting $103 million in private investment for residential and commercial projects.

In Virginia Beach, many multimillion dollar office park projects are in varying stages of completion. These include a $10 million, five-building, 300,000-sq.-ft. Corporate Center Office Park; the 36-acre office park surrounding the 10-story Columbus Center; several new hotels, and a $5.8 million rehabilitation of an electronic computer science school.

In June, a 300-room hotel and conference center opened at a cost of $25 million, as well as a 203-room, $6 million Holiday Inn executive center and a 110-unit $5 million Crosswinds Hotel on the oceanfront.

A new surge in retail store construction was heralded by the opening in 1981 of two regional malls, the Greenbrier Mall in Chesapeake, a $25 million, 678,000-sq.-ft. project, and the Lynnhaven Mall, a $55 million, 1.2 million-sq.-ft. complex.

The major existing mall, Military Circle in Norfolk, showed a marked retail sales increase during the 1982 season, despite competition from these two new malls, plus numerous strip centers.

A $1 million farmers market in a refurbished railroad warehouse called Bessie's Place was added to the 120 other speciality food and general merchandise shops in Waterside.

In Virginia Beach, Loehmann's Plaza, a 115,000-sq.-ft. facility, added 14 stores in the American Outlet Mall and 30 stores in the Virginia Beach Outlet Mall.

This retail activity produced $4.8 billion in taxable retail sales for the total MSA in 1982.

Future development projects call for $275 million in private and public investments in downtown Newport News, highlighted by twin office towers, a public square, twin luxury apartment towers and condos along a new waterfront esplanade.

In Virginia Beach, a $26.4 million strip beautification plan encompasses capital improvements to streets, lighting and utility lines, plus a multilevel Ocean Center with pier, shops, restaurant plazas, museum and theaters.

Many renovation projects are in gear, such as a department store transformed into a high-tech office building and a $4 million hotel in downtown Norfolk.

In 1984, Portsmouth waterfront will have a ferry terminal, open air theater and shops.

Keeping pace with other segments of industrial growth in the area is an $8 million British Chemical facility in Suffolk, as well as establishment of Norfolk Southern Corp. national headquarters in Norfolk.

To best serve and coordinate the economic development of the area, the five area chambers of commerce have recently merged into the Hampton Roads Chamber of Commerce.

There are 23 newspapers serving the Hampton Roads area, three dailies and 20 weeklies. There are 20 am and 24 fm radio stations, as well as seven tv stations, including affiliates of each major network and a public broadcasting station. Cable tv services are available in selected areas of Chesapeake, Hampton, Newport News, Norfolk, Portsmouth, Virginia Beach and Williamsburg.

Orlando, Fla.

Population '80	700,055
Rank	61
Est. income '82	$7,003,091,000

"We should all get down on our knees and thank the Mouse." Some say that's the quote of the year, attributed last March to Orlando hotelier Harris Rosen.

Certainly the Mouse—more specifically, mega-attraction Walt Disney World and its new Epcot theme project—have been very good to Orlando-area hotels and motels. Very good indeed.

At a time when the breakeven rate for a hotel/motel is 65% occupancy, Epcot boosted Orlando-area occupancy rates to an over-all annual average of 88% last year—and at times exceeded 100% (including no-shows).

One result has been a hotel/motel building boom, with more than 13,000 new rooms now under construction—$500 million worth and due for occupancy by 1986—within a 25-mile radius of Orlando.

Epcot, an acronym for Experimental Prototype Community of Tomorrow, opened Oct. 1, 1982. In a year, it has had a major impact on central and south Florida tourism.

Pre-Epcot Orlando was seeing 2 million to 3 million visitors a quarter. Epcot has doubled that, which means Disney World itself expects a fiscal year total of 24 million to 25 million visitors—just about double the 1982 attendance of 12.6 million.

Not everyone is cheering the Mouse, however. Some of the other theme attractions in the Orlando area are feeling the impact of Epcot in a less spectacular way. At Sea World, admissions are below those of 1982, which was in itself a less-than-glorious year. A drop in attendance at Six Flags' Stars Hall of Fame forced management cutbacks and marketing changes, while at Circus World, admissions have been running slightly below last year's.

But projections for 1983 are optimistic: 24 million-plus visitors for Walt Disney World, 2.5 million-plus for Sea World, 700,000 to Stars Hall of Fame, 1.2 million to Cypress Gardens, 1 million to Circus World.

But it's not just Mickey Mouse who's making Orlando home. Big businesses are moving in, too, attracted by the boom growth of Orlando's economy and the still-plentiful opportunities for land and sunshine.

Orlando has gotten 70% of the new business or business relocations in Florida over the past two years. The major ones include AT&T Information Systems, with 2,800 jobs; Martin Marietta, already a major employer, expanding its electronics plant, with 3,000 new jobs; Westinghouse, with its steam turbine division and 800 new jobs, and Harcourt Brace Jovanovich book publisher, which is building its new corporate headquarters, along with 1,100 new jobs, adjacent to Sea World—which it owns.

Even the U.S. Navy is coming ashore with a large research and development facility at one of Orlando's industrial parks; it expects to employ 1,200 people by 1985.

In downtown Orlando, there is an on-going project with theme redevelopment. Church Street Station, already drawing more than a million people annually, has expanded to include the Cheyenne Saloon. Two bank buildings—Barnett Tower and the Atlantic Bank Building—have added 1.2 million sq. ft. of office space.

Another sign of expansion is the Orange County Convention/Civic Center, a shiny $51 million facility that opened in February and holds 10,596 people.

Its 325,000 sq. ft. mean more conventions and more conventioneers—371,000 last year, an expected 500,000 this year.

And while Orlando's big new airport has no direct international service, it still manages to chip away at 8% of the international air market, thanks to charter flights, air crews and package tours. Orlando remains the third most popular destination for international travelers.

Orlando is also maturing, in the eyes of its leaders. Growth is no longer a haphazard process. Countywide growth management plans are being formulated and followed. "We know ahead of time where to site new industry . . . and whether we can furnish services for it," said Roy Harris, executive vp of the Industrial Development Commission of Mid-Florida, which

There are innovators and there are imitators

oversees the two-county area of Seminole and Orange Counties.

Large companies are attracted by the spaciousness of Orlando's nearby acreage. Corporations are taking large tracts of land and setting up in campus-style environments. They're moving out of cities where there is no room for expansion to areas where future growth, and land for it, is next door.

Orlando is not just dependent on tourism for survival, Mr. Harris emphasized, but added the area's economic base "is still a three-legged stool—citrus, industry and tourism."

The Orlando area is served by one newspaper—the *Orlando Sentinel Star*—three tv stations, nine fm and seven am radio stations and two cable systems.

Raleigh-Durham, N.C.

Population '80	561,222
Rank	74
Est. income '82	$5,311,420,000

If North Carolina is rightfully the "Sunbelt Superstar," then the Raleigh-Durham/Wake County area would have to be considered one of the key reasons for the state's widespread acclaim.

With the unemployment rate for the first half of 1983 running at about 4.4% (less than half the nation's average), experts have predicted continued growth for the area for many years to come.

A strong indicator of this prosperity is growth in retail trade, up 13% for the second quarter of 1983, with numerous new shops and malls opening or being expanded regularly to meet the mounting demand.

New residential construction too proceeded at an extremely strong pace. Some 2,093 units were started during the second quarter of the year alone, and single-family housing starts outnumbered multifamily units 3 to 1. Additionally, sales of both new and existing housing units were up by 45.3% from 1982.

The vacancy rate in completed apartments in May, 1983, was down to an extremely low 3.2%.

During 1982, the area saw the arrival of 11 companies, while expansions occurred at 14 existing companies. Much of the new business relocated in or near the Research Triangle Park section adjacent to Raleigh-Durham/Wake Counts. This area, now home to more than 40 major research and development and high-tech corporations, is growing steadily.

Since 1980, the area has seen about 1.5 million sq. ft. of added office and commercial development, about 90% of which is already leased. Currently, 20 major projects, representing in excess of 2 million sq. ft. of space, are either completed or under construction.

New or expanding companies include AGA Gas, which plans to construct a $15 million air separation unit and liquifier to be in operation in 1984; Ajinomoto USA, which built a $49 million plant to manufacture amino acids for the medical and nutritional fields; and Bahlsen of America/Austin Foods, which has moved its U.S. headquarters from New Jersey.

Borg-Warner opened a $3.6 million plant on 20 acres to make electrical parts for motor vehicles to control emissions. Buehler Products built a production facility in Cary, which some predict will become the company's headquarters.

Charles River Breeding Laboratories has purchased 20 acres and plans to build a $40 million, 30,000-sq.-ft. animal breeding facility in 1984; it is earmarked for private and government research laboratory work.

GTE Corp. opened a microelectronics engineering center for miniature integrated circuits in August, with the workforce to total 200 by 1985.

General Electric has constructed a major microelectronics research and development facility with the first phase representing a $55 million investment.

Some $110 million is expected to be spent over the next five years at this facility; the workforce is expected to total 1,000 by 1987.

Glaxo Inc. has relocated its new product group and plans to build a $30 million, 150,000-sq.-ft. manufacturing plant on an 80-acre site to produce pills, capsules and aerosol sprays.

ITT Corp. is establishing its North American telecommunications headquarters here. Walter Kidde division of Kidde Inc. is building a 150,000-sq.-ft. manufacturing facility on a 40-acre site and is expected to employ 250 people.

Sumitomo Electric USA is investing $20 million to $50 million in the development of a research and development complex on a 31-acre site, with operations slated to start in 1985 on fiber optics, semiconductors and computer technology.

Texas Instruments has purchased a 135-acre site for the manufacture of a variety of products. No completion date has been announced.

Watkins-Johnson Co. opened a 50,000-sq.-ft. facility for the manufacture of electronic equipment on a 50-acre site.

On the educational level, Wake Technical College has a proven track record for outstanding vocational and technical training geared specifically to the needs of the community.

Additionally, there are nine colleges and universities in the immediate area, including North Carolina State University of North Carolina and Duke University.

The Wake County area is served by three daily newspapers and 10 nondailies. There are three network affiliates, as well as a public broadcasting station. Alert Cable TV of North Carolina services the area.

There are 13 radio stations, including seven am stations.

Richmond-Petersburg, Va.

Population '80	761,311
Rank	57
Est. income '82	$7,160,726,000

A diverse industrial mix has helped the Richmond area maintain its stable economic base and continued low levels of unemployment (5% in the second quarter of 1983).

This stability has been helped by a fiscally conscious government and a law prohibiting deficit spending by the state.

The Richmond area boasts the honor of being a leading headquarters city in the South. Some 16 national companies whose stock is publicly traded and whose sales exceed $16 billion make Richmond their home base.

These include such industrial giants as Figgie International (formerly A-T-O Inc.), Reynolds Metals, Universal Leaf Tobacco, Robertshaw Controls, A.H. Robins, Ethyl Corp., Media General and CSX Corp.

Wages and benefits are competitive with other areas of the South and offer workers a better-than-normal quality of life.

One characteristic that has made this possible is the state's strong right-to-work law and industries that have a low percentage of unionization.

What has resulted, in part, is a boom year for industrial development in 1982, with 74 companies coming into the area for the first time, expanding or relocating operations.

This has produced an estimated 1,100 new jobs directly, with an investment of about $128 million.

Some of the major new companies opening in 1982 or announcing plans to start building and rehabbing facilities included Allen Industries, which reopened a 203,000-sq.-ft. plant for the manufacture of supplies for car marketers.

Also, Fiber Lam constructed a 40,000-sq.-ft. manufacturing plant on 4.5 acres to produce laminated and extrusion papers at a $3 million investment.

Raschig Corp. purchased a 120,000-sq.-ft. warehouse on 7 acres, invested $1.75 million and hired 50 new employes to handle asphalt emulsions and emulsifiers.

William Byrd Press underwent $2 million in expansion, while ICI America renovated part of a plastic film plant at a cost of $3.5 million. ICI also began construction of a 105,000-sq.-ft. manufacturing plant for Melinex polyester films, scheduled for completion in 1984.

Dean Foods built a 54,000-sq.-ft. manufacturing plant for producing margarine, while Greyhound spend $5 million on a bus terminal and maintenance facility.

For the first half of 1983, some 62 new expansion/relocation projects were undertaken in the Richmond area, resulting in investments of more than $40 million and providing direct employment to some 500 workers.

International Security Vault Systems built a 15,000-sq.-ft. security vault for computer tapes, while Chesapeake Containers spent $3 million developing a 60,000-sq.-ft. office/warehouse complex to manufacture corrugated containers.

Coler Storage Co. constructed two warehouses for tobacco storage. These total about one million square feet at a cost of $20 million.

Meanwhile, Project 1, the master plan for rehabilitation of downtown Richmond, is progressing on schedule.

Media are well-represented in the area. These include three network-affiliated tv stations, as well as two public broadcasting stations and one independent station. In radio, the area has 25 stations, 15 am and 10 fm. Chesterfield Cable Communications has cabled Chesterfield County, while Continental Cablevision has wired the city of Richmond, and Goochland and Henrico Counties. One morning and one evening daily newspaper and four weekly regional papers cover the market.

Tampa-St. Petersburg-Clearwater, Fla.

Population '80	1,613,603
Rank	22
Est. income '82	$15,566,368,000

Play ball!

That's the cry heard throughout the land—throughout the Tampa-St. Petersburg-Clearwater marketland—as professional sports and municipal cooperation mark major changes for the west coast of Florida.

The biggest of the big sports events, of course, is Super Bowl XVIII, which is scheduled to bring Tampa-St. Petersburg-Clearwater at least 100,000 visitors vying for not-enough hotel/motel rooms come that Jan. 22 weekend.

Even though the pro teams are yet to be determined, the marketing teams have been reluctantly cooperating in preparing the Tampa Bay area for the biggest event since the 1929 hurricane that changed much of the waterfront landscape.

And even as one set of task forces combine energies to promote the Super Bowl, another set is fighting to land the area's first-ever Major League baseball team, with Tampa and St. Petersburg each promising major baseball stadium construction.

In a twin-city market that traditionally has had industrial Tampa (Hillsborough County) competing with the tourist-and-retirement market of St. Petersburg and Clearwater (Pinellas County), the impact of Super Bowl XVIII and national as well as statewide economic trends are forcing cooperation, despite a spirit of latent rivalry.

Tampa, however, is momentarily back in the lead with Harbour Island, a massive, $1 billion waterfront development scheduled to take a minimum of 12 years to complete, all with private funds. Harbour Island—being constructed on a 177-acre island immediately south of downtown Tampa—would eventually become home for 14,000 residents and a place of business for another 6,000 working in offices, shops and a hotel.

Beneficial Corp., the finance and insurance company that owns the island, has even hired former President Gerald Ford as a consultant on the project. The first phase is scheduled for completion by 1985, including the first 550 of a projected 4,650 condominium units. Eventually, there would be a 300-room hotel and a 196,000-sq.-ft., nine-story office building.

Harbour Island promises to further change the Tampa skyline. Since 1980, four major office complexes have sprung up in Tampa: The 38-story Tampa City Center and the 500-room Hyatt Regency Hotel, a combined $93 million project; the 20-story, $20 million Plaza Office Tower; the 20-story, $20 million 1 Mack Center, and the 11-story, $20 million Teco Plaza.

In the West Shore area of Tampa, more than $200-million in new construction—including six office buildings and three hotels—are in various stages of construction.

There are still some rough spots. The Port of Tampa is going through a transition, due mostly to the depressed phosphate industry. But two cruise lines are beginning to originate some package tours out of Tampa.

On the other side of Tampa Bay, St. Petersburg and Clearwater share an increasingly younger population and a growing high-tech industry. Pinellas—the smallest county geographically in Florida—is the most densely populated.

The midcounty St. Petersburg-Clearwater International Airport is attracting new carriers offering daily passenger flights, and more than 2 million sq. ft. of high-tech industry is growing up around the airport.

Many of the small industries that fed the county's major electronics employers—ECI, General Electric, Honeywell—are moving out of their garages and into their small shops, contributing to the airport-area expansion.

Despite statewide declines, foreign tourism in Pinellas County helped boost the over-all total visitors up 10%, to more than 3.5 million tourists.

Pinellas also shares in the growing financial and medical fields that are finding the Tampa Bay area attractive. The Showa University Research Center, the world's first Japanese-sponsored cancer research institute outside Japan, is in St. Petersburg. Critikon, an acute care research facility, has been established in Tampa and employs more than 600 people. The equally new SmithKline Laboratories in Tampa, employing more than 300 employees, is the largest clinical lab in the Southeast.

The Tampa Bay area is also becoming one of the state's leading financial service centers for major Florida holding companies, with NCNB Corp., Sun Banks, Barnett Banks, Atlantic and Florida National all expanding in this part of Florida.

In the meantime, despite a reputation as a haven for old people, St. Petersburg and all of Pinellas County are getting younger. The median age in 1980 was down from a decade before by 2.3 years—to 45.8 years.

And people are plainly doing something besides retiring in Pinellas County. Total employment in the county rose by 43% from 1970 to 1980, while nationally the increase was 23%. Similarly, high-tech employment represents 37% of all manufacturing employes in Pinellas, compared with 13% nationwide.

In the last three years, Pinellas has created twice as many manufacturing jobs as Hillsborough. Pinellas has also led the state in new plants and major expansions for the past seven years.

More businesses are choosing to relocate in Pinellas County as well. Indeed, the attraction the Tampa Bay area has for tourists and executives alike can be measured in many ways. "Most people are here because they want to be here, not because this is where the cradle was," suggested Bill Matson, business editor of the *Clearwater Sun*. In Pinellas County, he pointed to the 26 miles of beaches along the Gulf of Mexico, and in the area in general to the lack of "smokestack industries [that] over the years have been deliberately discouraged."

For advertising executive Dickey Roeder of The Marketing Centre, the measure of living on the West Coast of Florida can be done with less dramatic statistics. After relocating from California last year, she now sees this area as a place where "the streets are clean, the traffic minimal," and while the area still lacks the big-name stores such as Saks Fifth Avenue and Neiman-Marcus, "shrimp is $17 a pound in Los Angeles and $5 a pound here."

The Tampa-St. Petersburg-Clearwater market is covered by four daily newspapers, nine tv stations—four uhf and five vhf—23 am and 16 fm radio stations and seven cable systems.

Washington, D.C.-Md.-Va.

Population '80	3,250,822
Rank	6
Est. income '82	$44,889,437,000

Washington is often described as the nation's largest "company town," and when Ronald Reagan marched into office three years ago, many thought his budget ax would take aim at the payroll of the city's largest employer—the federal government.

But the big shakeout in federal employment never occurred, and government employment in the Washington area has shrunk only about 2% during President Reagan's first three years in office.

In addition, a decade-long shift toward private-sector employment has taken hold and is adding to the stable employment base provided by the federal and local governments.

The Greater Washington Board of Trade, the city's leading business group, reports that 1983 marked the continuation of a 10-year trend that has turned around the base of the local economy. A decade ago, the public sector comprised two-thirds of the local economy; today two-thirds is controlled by private enterprise.

Even with the transition, the city has maintained its reputation as a "recession-proof" economy. The area's unemployment rate is still about half the national average, and personal income is the nation's sixth highest.

One sign of the stable economic times consists of the massive real estate ventures in the city, many of which have come to fruition during the past year. The stretch of land between the Capitol and the White House, particularly, has emerged as the hotspot for downtown development, replacing the area west of Connecticut Ave. as the center of real estate action.

More than 2 million sq. ft. of new office space and at least 1,400 new hotel rooms are either under construction, completed or have been proposed along the President's Inaugural parade route on Pennsylvania Avenue. The development of this 12-block strech is masterminded by the Pennsylvania Ave. Development Corp., a federally funded enterprise created to enhance business prospects along the capital's famous ceremonial boulevard.

Among the major projects along Pennsylvania Ave. is the renovated Old Post Office Pavilion, an inner-city shopping mall that houses 50 new retail stores, five restaurants and 60,000 sq. ft. of commercial office space. The $40 million project, which opened its doors in September, is now the largest shopping mall in the downtown business district.

Despite the success of the Pennsylvania Ave. project, some argue it will only add to the office space glut currently plaguing the downtown area. Already, the city's Builders, Owners and Managers Assn. reports that 16% of downtown office space remains idle, with the surplus expected to intensify when about one million more sq. ft. of space on 14th St. NW becomes available within the year.

Building cranes still dot the Washington skyline, as office building construction continues under the assumption that demand for space is on the rebound. PADC economic projections estimate the excess office space should be soaked up within the next two to three years.

Another project expected to fuel the downtown revitalization effort is the new D.C. Convention Center, which opened in January. Although not successful in roping the 1984 Democratic National Convention, the convention center and related enterprises are expected to add 5,000 new jobs to the local economy.

Some signs of development around the convention center can already be seen. In March, Henley Park Hotels opened a luxury facility a block away from the center, and the city's leading department store, Woodward & Lothrop, is discussing the construction of a retail and office building complex nearby.

The city's restaurant business is still among the healthiest in the country, but it witnessed a 20% decline in growth during 1983. The falloff in new restaurant openings was attributed mostly to the saturation of the market, which has the third highest per capita concentration of restaurants in the country.

Trade and professional organizations, which employ an estimated 75,000 to 80,000 local workers, were possibly the hardest hit by the recent recession. Budget cuts led to some layoffs among D.C.-based organizations, but the Greater Washington Society of Association Directors projects that some groups are now ready to rehire some portion of the idle workforce.

Tourism, the city's second largest industry, had a lackluster performance in the past year, and city officials are expecting only a 1.5% to 2% increase for the year. The number of visitors to the area had seen a slight dip in 1980 and 1981, but the industry began to rebound this spring with a modest increase every month since March.

For those who are in Washington to stay, housing costs have leveled off somewhat after the steady rise over the past decade. The average pricetag for a home, however, is still $117,000, making Washington's housing costs among the highest in the nation.

Subway expansion into the surburbs and improvements in the D.C. public school system have to a great degree stabilized movement in the area's housing market, and the Washington Board of Realtors now reports that Ward Three in upper northwest Washington has replaced Capitol Hill as the hottest real estate area in the city for young couples and families.

Despite a nationwide drop in the number of college-age people, the Washington Consortium of Universities reports steady enrollment figures this fall. Although not known as a college town, Washington's nine major colleges and universities contribute $1.2 billion to the local economy and employ 6.1% of the D.C. workers.

The Super Bowl champion Washington Redskins captured the bulk of the city's sporting interests in the last year, and the team continued its streak as an economic powerhouse as well, by selling out 130 consecutive home games. The demand for seats at RFK Stadium has kept attendance restricted to season-ticket holders, and there is a 12,000-person waiting list for the season passes.

Information-hungry Washingtonians also have several media outlets. The greater D.C. area has 13 tv stations and 18 am and 21 fm radio operations.

And the city's two morning newspapers publish on a slightly different production schedule. The Washington Post publishes seven days a week, while the *Washington Times* is printed Monday through Friday.

West Palm Beach-Boca Raton-Delray Beach, Fla.

Population '80	**576,863**
Rank	**71**
Est. income '82	**$7,400,890,000**

In the recent recession, the West Palm Beach-Boca Raton area had the good fortune to be located in a county—Palm Beach—that has the highest per capita income and the strongest retail sector in the state.

That is why Patrick Danan & Associates chose Boca Raton over Tampa, Miami and Orlando for the first of four Florida malls devoted to gourmet food. The Fort Lauderdale company claims Boca Raton is an ideal location for a $4 million mall catering to gourmet tastes and budgets. Boca Raton is a family-oriented community nestled in one of Florida's fastest growing areas, and it has a good reputation among European and Canadian tourists, the Danan company said.

Commerce officals claim that Boca Raton's sturdy base of high-tech industry helped it to coast through the recent recession. Retail sales rose 7.9% during the first quarter of 1983. In the three months ending last July, department store sales jumped 15.4% over the same period a year ago to $65.6 million.

"We are very strong on what I consider advanced technology and electronics manufacturing and there is an increasing interest in corporate headquarters and offices," explained Michael Frey of the county's development board. "Executive families are moving in, especially into the Boca Raton and Boyton Beach areas. They are younger and affluent. They reflect the companies moving in."

Patrick Danan's international food mall is set to open in mid-December, and an Ohio-based developer is building a 1 million-sq.-ft. mall in Boyton Beach, employing 3,000 people.

Projections say that Palm Beach County's population will grow 27% in the next 10 years, which would make it the third fastest-growing area in the state, according to the "Kiplinger Newsletter." Last year the population grew 3.8%, twice the rate of neighboring areas.

Mr. Frey said population growth, like growth in the retail, construction and service sectors, is tied to the county's expanding industrial base. Consider some recent developments:

- International Business Machines Corp., which makes its personal computers in Boca Raton, added in excess of 1,000 employes and announced recently that by 1985 it will have 9,500 employes, surpassing Pratt & Whitney as the county's biggest employer.
- Motorola Corp. moved its paging division and 1,000 employes from Fort Lauderdale to Boyton Beach in August.
- Castle & Cooke opened a fresh-fruit distribution operation.
- Rodime Inc. of Scotland began building a computer parts operation in

Boca Raton.

- Sensormatic Corp. left its manufacturing division in the Fort Lauderdale area and moved its corporate headquarters to Boca Raton.

In all, Palm Beach County reported 29,400 manufacturing jobs in June, and the housing industry reflected growth in that sector. Housing starts averaged 1,684 per month during the second quarter, the best showing of South Florida's three-county area.

On the other hand, commercial building permits, after an extended rise, dipped 4% to $28 million. However, analysts say the drop stems from overbuilding, predicting that sector will resume its expansion after excess commercial space is absorbed.

Business travelers propped up a drop in tourist traffic, and domestic arrivals at the Palm Beach airport numbered 133,502 in May of this year, compared with 87,089 in May, 1981, when tourism peaked in South Florida. As a result, hotel occupancy slipped only three percentage points to 70.3% in the first seven months of 1983, the best showing in South Florida.

Media serving the area include the evening *Boca Raton News* and the morning *Palm Beach Daily News*. Serving West Palm Beach are the morning *Post* and the *Evening Times*. The area has two network tv affiliates, one independent station and one educational station, along with 13 radio stations, seven fm and six am. It also receives cable programing.

Wilmington, Del. -N.J.-Md.

Population '80	523,221
Rank	81
Est. income '82	$5,309,793,000

The buzzword around Delaware these days seems to be "pro-business." And the Wilmington area looks to be one of the main beneficiaries.

Delaware's 1981 Financial Center Development Act, the creative baby of Nathan Hayward III, director of the state's Development Office, has been a key factor in luring new business to the Diamond State. The two-year-old law permits out-of-state banks to operate in Delaware, throwing in tax incentives and throwing out the ceiling on interest rates as bait.

By October, 13 new banks—including Citibank, Chase Manhattan, Morgan and Chemical Bank—had opened subsidiaries.

More are on the way, establishing Wilmington—already one of the nation's largest chemical, petrochemical and auto importing centers—as a leading financial center.

Wilmington is also a top corporate law center, with 52% of *Fortune* 500 companies and a third of those listed on the New York Stock Exchange incorporated in Delaware.

To many, of course, Wilmington means E.I. du Pont de Nemours & Co., the nation's largest chemical company, with 22,000 employes. That also makes Du Pont this city's largest employer.

But Du Pont is not the only local veteran that has made a commitment to the city's future. Hercules Corp.—Du Pont, Hercules and ICI Americas are the state's three biggest chemical companies—laid a major long-term stake in the city's fabric about two years ago when it completed its new 13-story granite and glass headquarters downtown.

Wilmington Trust Co. also built its new 14-story headquarters at the north end of the city's Market Street Mall, and this and an 11-story structure on the old Odd Fellows site are considered keys in the renaissance of commercial construction in this area.

All of these buildings were in the vanguard of a construction boom that has pushed at least a half-dozen new office buildings onto the Wilmington cityscape in the last two years.

At an average $15.50 a sq. ft., prime office space in urban Wilmington costs approximately 11% less than it would in Philadelphia and Baltimore, 65% lower than in New York, boosters hasten to add.

State and local leaders say the availability of several major transportation systems near Wilmington and an "excellent" vocational education network that provides a steady supply of skilled labor (Delaware's unemployment rate is running about 3% below the national average) have helped foster a healthy business climate.

So has an unusually high degree of bipartisan cooperation between the city government in Wilmington and the state government in Dover in putting together financial packages and other incentives attractive to business.

Rated highly important is the state's very stable fiscal situation, a position stemming from a constitutional amendment that permits expenditures to total only 98% of anticipated revenue. Economic development has been a popular target for these "extra" funds.

Under Gov. Pierre du Pont, the Delaware constitution has also been amended so that changes in any state tax laws require a "super majority"—three-fifths of the legislature—for enactment, which, Mr. Hayward says, "puts the squeeze on government to keep taxes down."

There are those who argue that the state's graduated income tax is unreasonably high with its 13.5% ceiling rate. Even that, however, was touched by Delaware's pro-business attitude three years ago, when it was lowered from nearly 20% as part of a successful effort to keep Hercules Corp.'s expansion plan in the area.

On the retail side, Delaware has no state sales tax, which attracts a sizable group of out-of-state shoppers, bolstering what officials describe as a "very healthy" commercial scene. The Christiana and Concord malls are major suburban Wilmington shopping centers. Another shopping complex, the former Merchandise Mart on Old Governor Printz Blvd., has undergone recent renovations to emerge as Merchants Square, a discount center.

Local improvements go beyond profit-making ventures.

In town, the not-for-profit Wilmington Waterways group continues its efforts to upgrade the city's waterfront, and efforts are also under way to revitalize the local Amtrak station.

The profile of downtown Wilmington is also affected by the continuing urban homesteading program pioneered here in 1973 before spreading to other large American cities. The result: Major pockets of residential redevelopment with a noticeable increase in professional newcomers.

Tourism officials say the state and Wilmington area have good-and-growing potential. It is estimated that visitors to Wilmington and surrounding New Castle County spend a yearly $2 million-plus trekking through the collection of museums, gardens and estates—including Winterthur, where Henry Francis du Pont put together what is generally considered the top exhibit of American decorative arts.

Officials hope the new business conference center at the downtown Hotel du Pont will attract convention goers. The Hilton, on nearby Interstate Hwy. 95, completed a $3 million renovation project of its own last year, and the gleam is still on the three-year-old Radisson-Wilmington hotel.

The Wilmington market is served by five daily newspapers (including two from Philadelphia), four commercial tv stations (all from Philadelphia), one subscription tv station, several cable tie-ins and six radio stations (in addition to several from Philadelphia).

East South Central

Birmingham, Ala.

Population '80	883,946
Rank	50
Est. income '82	$7,231,296,000

A listing of 81 new and expanding businesses in the Birmingham area—Blount, Jefferson, St. Clair, Shelby and Walker counties—showed these totals for 1983: $200 million in capital investment and about 2,000 jobs created.

Still, Birmingham limps along—October's unemployment rate stood at 11.6%.

Among the significant company closings and layoffs from 1981 to 1983 were those at U.S. Steel Fairfield Works (9,000), Pullman Standard (3,000) and Loveman's of Alabama (700) and at Jim Walters Resources, with 270 idled. Other closings and cutbacks took jobs from more than 10,000.

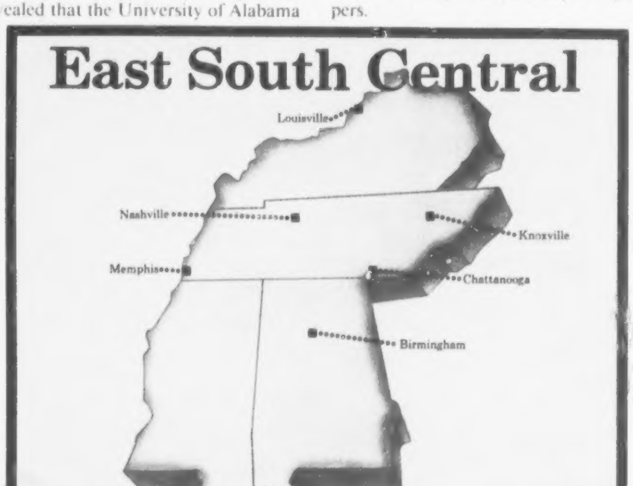
Despite all this, Birmingham has an impressive slate of construction in progress or announced. A survey of these projects as of July this year revealed that the University of Alabama in Birmingham (UAB) alone had committed $78.3 million to current and future construction; the city of Birmingham, $626.1 million (including the UAB total), and the greater Birmingham area $2.2 billion (including the totals from Birmingham proper).

Some of the significant new and expanding businesses and their announced investments include the expansion of the Alabama School of Fine Arts, with an investment of $15 million; the upgrading of the Bama Food Products facility ($2 million); the new Baptist Medical Center 524-bed hospital ($6.8 million); a new Keystone Food Co. plant ($5 million); an expanded Southern Co. Services ($115 million), and an International Forest Seed facility ($5 million).

There continues to be a good deal of construction activity in office buildings, multifamily residences and healthcare units.

But retail, warehouse and distribution projects have visibly dwindled during the past year.

The Birmingham MSA is served by 16 am and eight fm radio stations, five tv stations, seven cable tv companies and two weekly and four daily newspapers.



Chattanooga, Tenn.-Ga.

Population '80	426,540
Rank	97
Est. income '82	$3,334,089,000

In spite of some economic reverses, Chattanooga is in a generally expansive mood.

Chattanooga's sewage treatment plant has undergone $63 million in improvements; the Erlanger Medical Center witnessed a $77 million expansion, and the Provident Life & Accident Insurance Co. built a $20 million addition.

The county is developing two industrial parks, and in adjacent Dalton, Ga., the Roper Co., a marketer of stoves, has announced it is enlarging its operations.

Road and bridge construction in and around Chattanooga also is up. State Hwy. 58 is being broadened to four lanes; the C.B. Robinson Bridge across the Tennessee River was completed in 1981; a replacement for the downtown Walnut Street Bridge (which had been closed since 1979) is now under construction.

The Thrasher Bridge over one of the Tennessee Valley Authority dams has been widened. Currently, the county is building a river port near the center of Chattanooga.

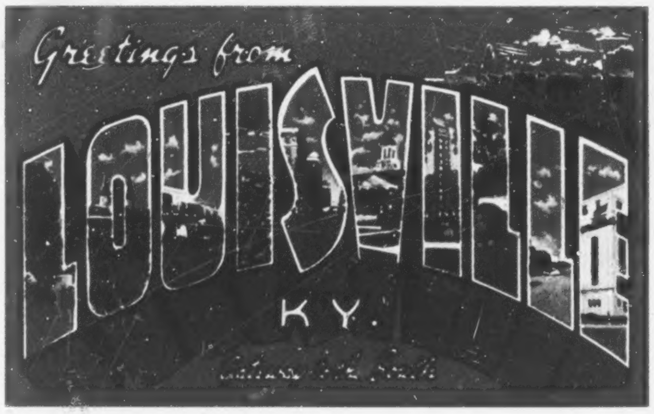
New construction includes a $45 million hotel and trade center that will boast 350 rooms and large exhibition spaces; a 1 million-sq.-ft. office building for the TVA; the $13 million Tallan Properties Bldg., and the $6 million Chattanooga Choo Choo Convention Center.

In addition, early this year, Piedmont Airlines began flights into the Chattanooga area. On the down side, there have been layoffs at Combustion Engineering, a manufacturer of nuclear boilers, E.I. du Pont de Nemours & Co., and the Rockwell International plant, which was closed altogether because of outdated equipment.

Plans for a 28-story office building had to be scuttled because of the failure of the Knoxville-based United American Bank.

The unemployment rate for the Chattanooga area, meanwhile, stands at 9.2%.

The area is served by one weekly and two daily newspapers, five tv stations, nine am and 10 fm radio stations and a cable service.



Knoxville, Tenn.

Population '80	565,970
Rank	73
Est. income '82	$4,759,381,000

The 1982 World's Fair gave the Knoxville economy a shot in the arm, but the event was far from being an unalloyed blessing.

The cost of financing it appears to have been a significant cause in the collapse of the banking empire of brothers Jake Butcher and C. H. Butcher Jr. Moreover, it never brought in the vast amounts of trickle-down tourist money its proponents had predicted.

What the fair did do, however, was bring world attention to this small city at the edge of the Great Smoky Mountains, clear a site within the city that still has great developmental promise and spark the construction of at least three major hotels.

The Knoxville bank failures, which surfaced earlier this year, counted among its casualties the United American Bank, the C&C Bank and the Southern Industrial Banking Corp.

Knoxville also suffered from the shutdown of the Knox Mfg. Co., a closing that cost 150 jobs. The textile plant, however, has now been taken over by Londontown Corp., marketers of London Fog apparel.

Much attention is currently being focused on the redevelopment of the World's Fair site. The Knoxville city council has approved plans for a shopping area there and is discussing a high-income housing development proposal, submitted by Fairfield Communities, that calls for the building of condominiums. Other on-site facilities continue to operate—either as they did during the fair or under new identities. Among these are the renovated L&N Railroad Station and the Candy Factory, both restaurants.

Recent downtown construction includes the $4.2 million renovation of the old City Hall for office use by the Tennessee Valley Authority and the $10 million Summit Towers building.

Upcoming projects are the $30 million Riverview Tower, scheduled to start by the spring or summer of 1984, and the East Town Mall, a $50 million development of 120 stores, slated for completion next July. Also near the final stage of development is the $1 million Krutch Park in the middle of Knoxville. The new fair-related hotels are the Holiday Inn (on the site), the Hilton and the Quality Inn.

Unemployment is below the state average in this region. It is at 9.1% for the Knox County and city area.

Knoxville is served by one cable company, nine am and eight fm radio stations, four tv stations and two daily newspapers.

Little Rock-North Little Rock, Ark.

Population '80	474,484
Rank	89
Est. income '82	$4,120,768,000

Little Rock-North Little Rock is beginning to claw its way out of what one resident who monitors housing construction calls a "depressing, disgusting year [1982]."

That year, while not recognized in such depressing terms in all sectors, is being put to rest by an "upsurge" in home construction permits and major commercial building activity, a low unemployment rate and renewed interest by businesses out of state to relocate in Little Rock. (Popular opinion says the city owes its name—La Petite Roche—to French explorer Bernard de la Harpe, who found a "little rock" outcrop in the Arkansas River when looking for a big green one, presumed to be a giant emerald that the Quapaw Indians told him about.)

Elsewhere, things were not as hopeful. Some 1,200 employed at the Reynolds Aluminum plant in nearby Benton County lost their jobs when the plant shut down to shift operations to Australia. And Continental Airlines dropped its service at Little Rock Regional Airport when it went bankrupt, although the six remaining airlines have picked up the slack.

Meanwhile, the Little Rock Air Center, a privately funded general aviation terminal, ramp and service facility for executive travel, has been completed at the airport. The new facility should be attractive to new business development in the area like the as-yet-unnamed addition of a major distribution center, and the move to Little Rock by a national manufacturer of electronic components that the city is keeping under wraps.

The distribution center and national components manufacturer will each employ 200 and whittle away at the unemployment rate, which averaged 7.8% from January, 1981, to May, 1983, a period in which the national unemployment rate was 9.2%. The current rate in Little Rock is 7.4%.

Nonresidential construction continued to gain momentum from the base set last year, which was 71.3% higher in value than total permits in 1981. Much of that activity is taking place downtown to take advantage of Metrocentre Improvement Funds, which offer developers considerable tax breaks in addition to capital.

Funds from Metrocentre bonds are helping in the construction of a $40 million, 35-story office complex. Some 65% of the space is already committed to seven Arkansas corporations. Completion is set for 1986.

The bond monies are contributing to financing of the $6 million restoration and conversion of the 11-story Lafayette Hotel into office space. Built in 1925 and closed in 1973, the structure would provide 100,000 sq. ft. of office space.

The final stage of a downtown development plan, which included the $50 million Little Rock Excelsior Hotel/Statehouse Convention Center complex, will be a 25-story, 247,000-sq.-ft. office building. Cost of the project, to be completed by mid-1985, could exceed $20 million.

Out of the downtown quarter, construction is under way on the 22-acre, $35 million Crystal Bay Marina development on the Arkansas River. It will include a boat marina, hotel, restaurant, retail and office space and residential quarter. Completion is set for late 1986.

The conversion of sections of Main St. and Capitol Ave. into a pedestrian mall downtown about three years ago has not stimulated retail sales in the area, primarily because of the dearth of parking, say local officials. This lack of business has influenced a number of store closures.

Sterling Stores, an institution in Little Rock for more than 60 years, ran into financial difficulties in 1983, selling out in May to Duckwall Alco Stores of Abilene, Kan. Sterling operated 47 Magic Mart Discount Stores (26 in Arkansas) and the Sterling Department Store in downtown Little Rock. Duckwall Alco converted the Magic Mart stores across the country into Alco discount stores in October and continues to run the downtown Sterling store under the same name.

State sales tax revenues, a measure of retail sales activity, increased about 6% in fiscal year 1983, ended June 30, which meant retail sales did not keep pace with inflation for the period. But an increase of 10.1% in tax collections for the first quarter of the new fiscal year indicates retail sales activity is back on a healthy schedule. Such statewide tax collections reflect the Little Rock activity because half of the state's population resides in the MSA.

Arkansas legislators, seeking extra sources of revenue, have turned their attention to advertising, to the chagrin of the Arkansas Advertising Federation, Arkansas Retail Merchants Assn. and the Arkansas Press Assn. These groups are lobbying to kill in committee a bill that would tax ad space in newspapers. Arkansas already is one of the few states that taxes preprint supplements as printed matter.

In media developments, KATV-TV, the city's ABC affiliate, changed hands this year when Washington-based Allbritton Communications purchased it from Leake TV Inc. of Muskogee, Okla. In the race for local news ratings, it runs neck and neck with KARK-TV, the NBC affiliate that Gannett Co. sold to local investors this year. An independent station, KTHV-TV started operation this summer and offers rates comparable to the leading radio stations. Storer Communications holds the cable franchise and offers 36 channels.

Competition is strong between the two local morning papers, the *Arkansas Gazette* and *Arkansas Democrat*. The *Gazette* holds a commanding lead in daily circulation and a narrow margin for the Sunday product.

Louisville, Ky.-Ind.

Population '80	1,000,621
Rank	19
Est. income '82	$8,646,201,000

Until recently, Louisville was reeling from layoffs and plant closings—but now its economy is bouncing back. Factories are recalling workers at a heartening rate, and the Derby city is in the midst of a commercial and residential building boom.

About 24% of Louisville's work force is involved in the manufacture of durable goods, a sector that has lately suffered particularly hard times. During this down period, International Harvester dropped its Louisville manufacturing division, thereby reducing its number of employes from 2,000 to 600. General Electric Co. and Ford Motor Co. have both had significant layoffs. Brown & Williamson Tobacco Corp., a subsidiary of Batus Inc., closed its tobacco plant last July and relocated to Macon, Ga. The move cost Louisville 2,100 jobs. A drop in freight traffic on the Ohio River contributed to Jeff Boats, a barge manufacturer, laying off half its workers. The Ralston Purina Co. plant was closed entirely after leaking hexane led to a huge sewer explosion.

Not all was gloomy, however. Brown & Williamson, despite its partial defection, kept its home office in Louisville and purchased an office tower in the new downtown Galleria complex. Jeff Boats, after diversifying its output, has recalled 175 employes. General Electric—although it has made a $30 million investment in industrial robots for its home appliance division—will take back 1,400 employes in January. Employment is going up at the two Ford plants in town and at the new multi-million-dollar Philip Morris storage and production facility. The ravages of the sewer explosion have been remedied, and Ralston Purina is set to reopen its plant.

Amid all of this, unemployment dropped from a high of 13.6% in December, 1981, to 10.1% in July, 1983.

The showpiece of Louisville's building renaissance is the $130 million Galleria project that opened last September. It includes two large office towers—the Brown & Williamson and the Miedinger—a department store and 60 smaller shops. Connected to the complex via a covered walkway is the Hyatt Regency Hotel. Similar walkways are to be built to the historic and recently renovated Seelbach Hotel (a $24 million effort in its own right) and to Stewart's Department Store.

The Brown Hotel, another Louisville landmark, is scheduled to be renovated during the first phase of the estimated $200 million Broadway project. The new Brown will include apartments and condominiums.

Hospital and medical research construction is also up sharply. Humana Hospital, a teaching facility that cost $64 million, opened in April, and Humana's headquarters building—slated to open in 1985—is being built at a price of $45 million. The Methodist Hospital has scheduled a $25 million expansion. And the recently opened J. Graham Brown Cancer Research Center cost $10 million.

Residential construction is up 64% from last year, according to the local chamber of commerce.

An "enterprise zone" has been set up to lure businesses into the most blighted part of downtown Louisville. To be eligible for the generous tax breaks under the plan, companies must agree to hire at least 25% of their employes from the zone. In return, they pay no taxes to the city, no state income tax on property and a smaller-than-normal inventory tax. Additionally, such companies qualify for low-interest loans and for reduced water and sewer fees. A lumber company has established an operation in the zone. The plan started in June.

Louisville is served by 11 am and 13 fm radio stations, four commercial tv stations, three cable tv services and two daily and three weekly papers.

Memphis, Tenn.-Ark.-Mo.

Population '80	913,472
Rank	47
Est. income '82	$7,871,532,000

Consider this profile of Memphis: It is a major Mississippi River port, a regional airline hub, a traditional railroad terminus and a service point for trucking lines that take goods to the rest of the country.

It is not surprising, then, to find out that Memphis is a major distribution center for the U.S.; in fact, it ranks sixth in the nation in this category.

It is also not surprising that, partly because of these factors, Federal Express chose Memphis to be its headquarters.

In April, 1982, the U.S. Department of Commerce designated areas within the city as foreign trade zones, with industries in these zones exempt from paying customs duties on imported materials until the finished products are sold in the domestic market.

One zone is on President's Island at the Port of Memphis; another is at Memphis International Airport.

According to reports published in September, new plants and expansions to that month of 1983 total 124. They generated 3,100 new jobs directly, resulted in investments of $166.4 million and used 4.4 million sq. ft. of industrial, office and warehouse space.

This increase in business kept the unemployment rate at about 9.5%,

100

while increasing retail sales figures to about 10.2% above the 1981 rate.

Residential building permits in the Memphis MSA continued to show signs of strength, posting a 17.5% increase through July.

Elsewhere, Memphis is fast gaining stature as a major national and regional medical center, especially with Danny Thomas' favorite, St. Jude's Children Hospital, a short distance from the main downtown area.

Also, the Regional Medical Center in Memphis is completing a $50 million, 40,000-sq.-ft. additional facility nearby.

Other businesses either building new facilities or expanding existing ones in Memphis this year include Malone & Hyde, with a new $5.7 million dry goods warehouse; Memphis Packing Co., adding 300 new employes to its meat packing operations; General Electric Co., expanding its lighting plant with addition of 115 new employes; Raleigh Springs Market Piace, a new shopping mall developed by Austin, Peay & Yale at a cost of $6.5 million and expected to occupy 94,000 sq. ft.

The Beale Street Area Project continues apace with the world-famous Peabody Hotel and its equally renowned live ducks. Also anchoring the downtown area with the Peabody is the refurbished Ramada Inn.

The nearby Mid-America Mall project, billed as the longest pedestrian mall in North America, was initially completed in 1976 and features a mile of uninterrupted shops, boutiques and restaurants with benches, plants and fountains replacing the former roadway down its center.

The grand opening of the first major phase of the Beale Street reclaimation area is scheduled for the spring, when a variety of restaurants, night clubs and specialty shops will be featured in restored buildings. Among those personally involved in the development and establishment of businesses appropriate to the Beale Street Project are entertainers Lou Rawls and Charlie Rich.

Graceland, the home of Elvis Presley, has become a more popular tourist attraction than originally had been expected. This, along with the new Mud Island complex at the river's edge in downtown, have been a boon to the tourist industry.

Perhaps the best-kept secret in the South is the Memphis Cotton Carnival. The 52-year-old, 16-day celebration, including a music fest, is under new professional management. It drew upwards of 1 million people this summer.

Long considered only a local celebration of "King Cotton," the carnival has expanded, featuring a wide variety of activities, parades, balls and dances. By bringing progressive marketing and promotional techniques into the carnival, organizers and local residents hope to make this yearly event self-supporting, bigger-than-ever and a major economic factor in the area.

For 102 years, Memphis was served by two daily newspapers, morning and evening. With the demise of the *Memphis Press-Scimitar*, a Scripps-Howard property, in October, only the morning *Commercial-Appeal* remains.

Numerous weeklies service the market, along with 24 radio stations (12 am and 12 fm). Tv is represented by all three networks, an independent and a public broadcasting station. A full-service cable system also services the area.

Mobile, Ala.

Population '80	443,536
Rank	92
Est. income '82	$3,219,000,000

A waterway that would eventually link the Gulf of Mexico at Mobile with the mid-American heartland is expected to open in late 1985.

Barring any unforeseen problems, the 234-mile-long Tennessee-Tombigbee Waterways System would link two of Alabama's inland waterways, the Warrior and the Tombigbee, where only limited navigation is currently possible.

More than $250 million has been pumped into the area in developing the facilities at the Port of Mobile to handle the anticipated increase in business all this would generate. One of the largest, most modern coal-handling facilities has been developed, and grain elevator space has been doubled.

Total construction in the city of Mobile during the first half of 1983 showed a decrease of 10% from the same period in 1982, but the value of residential construction was up about 63% for the same period.

Total construction value for the first six months was $51.9 million in residential and nonresidential projects. The number of apartment units issued permits was up 15%, with new housing permits up more than 100%.

In addition to the $17.7 million for apartments and the $8.6 million for new houses, other major construction during 1983 included $5.3 million for retail stores and other mercantile buildings; $2.5 million for office, bank and professional buildings, and $3.2 million for schools and other educational facilities.

The February designation of Mobile as a Foreign Trade Zone, located in the Brookley Industrial Complex and at the airport, gave added impetus to over-all industrial development in the Greater Mobile area.

M&T Chemicals announced a multi-million-dollar expansion of its Axis plant for the production of thioglycolic acid and is scheduled to open in early 1984. Harding Safety began manufacturing fiberglass open and enclosed lifeboats. A $20 million expansion program for Ciba-Geigy's chemical plant at McIntosh was announced.

Also, construction began on the Herman Maisel & Co. 10-store Montlimar Place Office Park to total about $25 million in cost.

A $55 million coal-handling project was dedicated as an expansion to the Alabama State Docks McDuffie Terminal. The Riverview Plaza Complex held its grand opening during the summer as a 28-story, 391-room Stouffer Hotel, plus office tower parking.

Union Carbide started construction of a multi-million-dollar molecular sieve plant that would be adjacent to the company's existing facility. It is expected to be completed by the end of 1984.

McRae's Department Store began construction of its new $12 million outlet to be located in Springdale Plaza.

The Admiral Semmes Hotel was purchased by Equity Management Corp. of Dallas. Renovations were started in October and are expected to cost between $12 million and $15 million before work is completed early next year.

Sales tax revenues are up 7% so far for 1983, along with a 4% rise in lodging tax receipts, and a 7% jump in bank deposits, with all this indicating a healthy, strong economy and wide business base for the entire area.

Recreation and tourist-related industries continue to be a dominant growth area for the whole region. The beautiful floral displays along the 37-mile Azalea Trail each spring attract many thousands of visitors to the city.

Over the past few years, as the New Orleans Mardi Gras has continued to lose its luster and appeal, the Mardi Gras of Mobile has been growing in popularity and scope. Additionally, for the past 26 years, America's Junior Miss has been crowned each year in Mobile.

College football's Senior Bowl played in Mobile each year. Top college seniors making up North and South football squads get one last chance to show off their talent before moving, they hope, into the pro football ranks.

The USS Alabama, one of World War II's battleships, is permanently anchored in Mobile Bay and is a popular visitor attraction.

Mobile is serviced by five tv stations, three network affiliates, one independent and one public broadcasting station, as well as 15 radio stations. The *Mobile Press-Register* publishes morning, afternoon and weekend newspaper editions.

Nashville, Tenn.

Population '80	850,505
Rank	53
Est. income '82	$7,717,252,000

Tourism in Music City during 1983 suffered an 8% to 15% drop from the levels it reached the previous two years. But even with that setback, the economic picture of Nashville can be painted only as rosy. Every turn of the highway or street seems to reveal another new construction project. The music industry is recovering—although at a glacial pace—from its faith-testing recession. Unemployment in Nashville/Davidson County is down to a civic-booster's delight: A mere 6%.

One reason Nashville has such a high level of employment is that it is the state capital—as well as the Davidson County seat. In fact, the state government is Nashville's single largest employer, with a workforce of 16,325, followed by the federal government (9,425), the city government (8,585), the public schools (7,755), Vanderbilt University and Medical Center (6,630), Hospital Corp. of America (6,500), South Central Bell Telephone Co. (4,500), Avco Aerostructures Division (4,215), Opryland U.S.A. (4,175) and Kroger Food Stores (2,960).

Construction fairly bristles throughout the town and far into the suburbs—from a $161 million convention center in progress downtown to the $500 million Nissan Motors light truck assembly plant in nearby Smyrna that officially opened in October.

After years of haggling for federal funds and casting about for a commercial patron, Nashville's historic Union Station appears to have found a savior in the Elkington & Keltner Group from Memphis.

This company has agreed to restore and develop the old railroad station into a complex of offices, shops and restaurants. It is expected that the restoration, set to start this spring, will cost $30 million and take two years to complete.

Other large projects on the books or on the way include the $80 million Highland Ridge Office Center, $35 million Brentwood Executive Center, $40 million Vanderbilt Plaza hotel and office building, $40 million Koger Properties Executive Center, $60 million Third National Bank Tower, $50 million One Nashville Place office building and $45 million Opryland Hotel expansion. The Opryland Hotel, amusement park, the Grand Ole Opry, the Nashville Network cable service and WSM (am and fm) was purchased in mid-1983 by Gaylord Broadcasting, a division of Oklahoma Publishing Co., Oklahoma City.

There have also been several recent industrial expansions: Avco Aerostructures Division leased additional space and hired more workers to meet its government contract to build wings for the B-1 bomber; Baptist Hospital is building an eight-story, $17 million

---

One year after

By Edward Morris

A year to the day after the 1982 World's Fair ended on Oct. 31, the *Knoxville* (Tenn.) *Journal* was running a front-page investigative series on "The Fall Of The House Of Butcher."

Cooperatively written by reporters from the *Journal* and the *Nashville Tennessean*, the series detailed the creation and collapse of the Knoxville-based banking empire of brothers Jake and C.H. Butcher Jr. The former, who failed twice in his attempt to become Tennessee's governor, was the moving force behind the World's Fair, and his banks provided much of its financing.

The fair and the Butchers have been the biggest things to happen to Knoxville in ages. Both are still very much on the minds of the citizens of this city, and both have their share of scournful detractors and eloquent partisans.

Unlike a carnival that folds its rides, packs its trucks and moves on, a World's Fair doesn't just vanish when the ticket booths come down and the souvenirs are cut to half-price. At the 72-acre fair site in downtown Knoxville, visitors can still tour the lofty Sunsphere, which symbolized the event's energy theme. Restaurants continue to operate in the sphere and in the charmingly restored L&N Depot.

The Holiday Inn that was built there especially for the fair appears to be thriving. And there are all sorts of plans afoot for turning the mostly deserted site into a "festive retail area." Amid the acres of empty concrete slabs and stairways that lead nowhere stands the empty U.S. Pavilion. If everything goes well, it will be reopened as a permanent science and technology center in early 1985.

Those who have been intimately involved with the fair look back on it with considerable fondness and pride. They tend to discount the horror stories about housing scams and traffic jams that appeared periodically in the national media during and after the exposition.

"The catalytic effect for the community has been phenomenal," boasts Mayor Randy Tyree, who presided over the city throughout the course of the fair. "It did a lot for our self-confidence." Mr. Tyree also maintains that it did a lot for state and local revenues, citing a $5 million gain for the city, $2.5 million for the county and $20 million for the state. He says that once the site is restored to commercial use, it will generate an estimated $15 million for Knoxville within its first 20 years.

The Sunsphere is a visible reminder of the Knoxville World's Fair.

In anticipation of fair traffic, Mr. Tyree says, $226 million was spent on interstate highway construction within the city and another $3 million for improvement of other local roads. Before this massive building project, three interstate highways had funneled into two-lane connecting roads to form what Mr. Tyree calls "the world's largest parking lot."

The upgrading took three years to complete, but now traffic pretty much breezes through Knoxville, and the prediction that there would be collosal traffic tieups during the fair never came true.

Carol Schroeder, a researcher with the Knoxville Chamber of Commerce, says: "The fair was marvelous. We were appalled at some of the articles that came out about it. It was the best experience we've ever had here." She admits, though, that the event may have been a disappointment for those who came seeking entertainment instead of enlightenment: "If you didn't want education, you probably didn't like it." She says the chamber gets a lot of inquiries from people who were introduced to Knoxville through their fair visit and who now want to live there.

For an event that drew approximately 11 million people, the fair was remarkably low on crime and chicanery.

Brenda Pritchard of the Knoxville Better Business Bureau says most of the complaints—around 5,000—were about housing. Many of these, she explains, were the consequence of the inadequate computer system used by the housing service and not from any calculated deception.

Ms. Pritchard's appraisal is echoed by Sgt. Steve Stinnett of the Knoxville Police Department's crime analysis unit. He says felonies during World's Fair year were actually down 5.2% from the year before. "Larceny was probably the biggest problem we had associated with the fair," he says. "You know, someone would put a camera down and someone else would steal it." Except for the addition of some parttime officers and a reshifting of assignments, the fair caused little alteration of local police activities.

Certainly, Knoxville is not caught up in collective post-pavilion depression over the closing of the 1982 World's Fair. But the ripple effects are so far-reaching in this small city that, in a way, the fair isn't over yet.

Edward Morris is an ADVERTISING AGE *correspondent in Nashville, Tenn.*

structure as part of its $46 million expansion program; Ford Motor Co.'s glass plant is expected to spend $88 million upgrading and adding to its facility. Bridgestone Tire Co., Tokyo, recently bought the old Firestone Tire plant in suburban LaVergne and plans to invest $30 million in modernization.

As evidence of the music industry's resurging health, all the major record labels in the U.S. maintain Nashville divisions: CBS Inc., RCA Corp., MCA Inc., Mercury/PolyGram and Capitol/Liberty/EMI. There is similar representation by music publishing companies.

The city abounds with dozens of top quality recording studios, and several impressive video production companies have set up shop in the past few years. In addition, all major music trade magazines have bureaus or representatives in Nashville.

The Nashville Metropolitan Metro Airport is serviced by 15 airlines and has approximately 226 flights daily. There are 16 colleges and universities within the metro limits.

Nashville has 10 am and 11 fm radio stations, five tv stations, one cablevision service and two daily papers.

West South Central

Austin, Tex.

Population '80	536,688
Rank	77
Est. income '82	$5,249,544,000

Austin's drawing power for new industry is symbolized by its selection—after a nationwide search—as headquarters for MCC (Microelectronics and Computer Technology Corp.), the national consortium of high-technology researchers.

This Texas city sits on the edge of the hill country and at the lower end of a chain of lakes on the Colorado River. In the downtown area, the river is called Town Lake and is bordered by greenbelts and hiking and bicycle trails. Although Austin is an important retirement area, the median age in the county is under 27.

Into this surrounding, MCC will bring relatively few jobs to Austin but, in turn, it is attracting related industries with thousands of jobs. Chase Econometrics forecasts employment in Austin will grow faster than in any other U.S. city and at more than twice the national rate in the next nine years. The number of jobs will rise at an average annual rate of 4.2% from 1982 to 1992, increasing from 265,000 jobs to 400,000. The national average is 2% a year.

The Austin metropolitan area labor force grew from 293,800 people in September, 1982, to 310,800 a year later. The increase in the number of jobs available kept the unemployment rate, unadjusted for seasonal changes, at 4.4% for September, up more than one-half point from August, but lower than the 4.7% a year earlier. Austin has consistently had the second lowest unemployment rate in Texas, itself one of the more fortunate states during the recession.

Jobs in the construction sector rose to 15,300 in September, up from 14,000 last year. Wholesale and retail trade jobs were up to 62,300 from 60,000 in September, 1982. Government jobs were up from 80,400 to 81,200 this September.

Industries in Austin include Abbott Laboratories, a pharmaceutical company; Tandem Computers and Lockheed Missles & Space, both of which are under construciton; expansions of Motorola Inc. and International Business Machines Corp., and homegrown Tracor Inc. In addition to city and county government employes, Austin is the state's capital, as well as home for federal facilities, including Bergstrom Air Force Base and a regional Internal Revenue Service office.

The University of Texas at Austin, St. Edward's University and Houston-Tillotson College also are major employers and sources of potential employes. Other institutions of higher education include Concordia College and Austin Community College.

Meanwhile, developers no longer able to pour money into saturated larger markets are turning to Austin. Building permits were up 25.2% in 1983 through September, representing more than $643.1 million in construction. New commercial building permits totaled $171.7 million through September, down nearly 9% from the same period in 1982.

Part of the reason for the decline is the value of several major projects with permits issued in 1982, including $93 million for three downtown high-rise office projects.

In addition to the modern new office structures, Austin is enjoying a renovation of historic structures downtown. Sixth St., a seven-block strip of historic buildings, draws crowds to restaurants, bars and live theaters, as well as street-corner vendors. A major low-rise apartment complex is nearing completion. Two historic hotels are undergoing restoration, and the Hyatt Regency, in its second year of operation, is maintaining an 80% occupancy rate—the highest for Texas Hyatts and in the top 10 among all 70 of the company's hotels in the U.S.

New residential permits for the year through September were up 49%, compared with 1982, representing $408.4 million in construction. Permits had been issued for more than 4,400 single-family homes in Travis County and for more than 500 in the bedroom communities of Round Rock and Georgetown. The Travis County total is expected to surpass 6,000 by the end of the year. Demand for new homes is so strong that entire communities, including retail, office, industrial and school facilities, are being built within a few years. The average price of new homes sold during the third quarter was $92,280, up 18.8% from a year ago.

Home resales through September were nearly 3,800, up 30% from the same period in 1982. The average resale home price for September of this year was $86,883, up from $79,632 in 1982.

Austinites continue to be embroiled in growth vs. no-growth debates, but the question has become moot as the area continues to grow.

The not-so-good news about Austin is its energy supply. Voters, with only 15% turnout, in October defeated $583 million in bonds to finance the city's share in a coal-fired generating plant and construction of a waste-to-energy plant. The latter lost by 27 votes. Overwhelming approval, however, was given for $39 million in bonds for a series of small-scale energy conservation and solar projects.

Austin has one major daily newspaper, the *Austin American-Statesman.* There are three network-affiliated tv stations and one Public Broadcasting Service station, which is on the University of Texas campus and known for production of "Austin City Limits." There are eight fm and six am radio stations, including an all-Spanish language station, plus three stations in surrounding smaller communities.

Baton Rouge, La.

Population '80	494,151
Rank	86
Est. income '82	$4,717,945,000

A petrochemical industry on the rebound, the return of the Democrats to state office and a run-in with the law by Louisiana State University football great Billy Cannon have dominated the news down on affluent South Sherwood Forest Blvd. in Baton Rouge, La.

Baton Rouge, whose population went up 31.6% from 375,628 in 1970 to 494,151 in 1980, traces much of that upswing to its burgeoning petrochemicals business, ribboned along the Mississippi from 10 miles north of the city to 40 miles south. That sector of the economy accounts for 6% of the total workforce, but supports three jobs outside the industry for every petrochemical worker, city officials estimate.

The petrochemical industry, which usually trails the rest of the economy going into a tailspin and coming out of one as well, is just beginning to fight its way out of a depressed state that brought closures and layoffs of up to 21% of the industry's entire workforce of 14,000.

The industry, which traditionally spends $1 billion or better each year on expansion projects, has cut capital expenditures in half during the past few years. USS Chemicals, owned by U.S. Steel, closed down, throwing 500 out of work. Negotiations are under way to reopen the plant under new ownership. Ethyl Corp., affected by the recession and the trend toward more nonlead gasoline products, has cut back its workforce by about 200 people.

The corridor is seeing a slight turnaround as about 1,500 of the 3,000 laid-off employes have returned to their old jobs in recent months. The unemployment roll stood at 10.2% in August, a slight decline from previous months, but still too high for comfort.

A number of government workers tied to patronage jobs entered the ranks of those unemployed in Baton Rouge, the state's capital, following the election of former Gov. Edwin W. Edwards back to the governorship. (Under Louisiana law a governor cannot serve more than two consecutive terms.) In October, Gov. Edwards defeated Republican incumbent Gov. David Treen, who had been the first non-Democrat in the state house since Reconstruction.

Despite the change in administrations, the stability of the government workforce remains a strong arm of the Baton Rouge economy, accounting for some 22% of the labor force. While much of this is attributable to the state government, a large percentage reside in jobs at LSU, a campus with 30,000 students, and Southern University, with an enrollment of 8,500.

The university system contributes heavily to the construction industry in the city, which registered a record $247 million in construction contracts in 1982, a record already broken in the first three quarters of 1983, during which $340 million in new construction (commercial and residential) were started.

Other developments include a number of small office complexes in the South Sherwood Forest Blvd. area in the city's outlying wealthy southeast quarter. Of the $35 million in new residential construction permits let in September, most are for homes in this area. This one-month figure is three times the number of permits in September, 1982, local officials say.

That area is also seeing extensive construction work at Jimmy Swaggart Ministries, headquarters for the tv evangelist/revivalist. The projects include two 12-story dormitories, an activities building and a sanctuary seating 7,000—all to be finished by September, 1984, when Jimmy Swaggart

Your first week of TV monitoring is on us!

You pick the market from the 75 that BAR monitors every month. We'll send you a full report of all spot TV schedules monitored there for one week.

It includes station call letters, day, date, time, length and program name, plus estimated cost of each schedule...arranged by brand, parent company, and product class.

Spot by spot, you analyze how the stations aired your campaigns. You learn how your competitors are using TV. With this information, you can plan ahead to make the most of your TV expenditures.

Offer is open to advertisers and advertising agencies. No obligation. Call George Seekamp at (212) 221-2630.

BAR BROADCAST ADVERTISERS REPORTS, INC.

100

Bible College is scheduled to open to a freshman class of 500. The evangelist's newly completed World Ministry Center is nearby.

Phase 1 of the renovation of Catfish Town continues with the conversion of warehouses into office complexes along the Mississippi wharf area downtown.

A federal grant is helping finance the project. Total cost of Phase 1 is about $25 million. Phase 2 calls for restaurants and entertainment to be built in the area, which would complement other attractions along the Mississippi, including the USS Kidd, a Navy destroyer permanently anchored in the river and open to the public. Construction is in progress on the nearby Naval War Museum.

Meanwhile, Baton Rouge motel developers expect the city will not only be a stopping place for tourists heading into New Orleans to visit the 1984 World's Fair, but will serve as a base of operations as New Orleans becomes overcrowded with tourists.

Shoney's Inn recently opened for business, a La Quinta motel is almost finished, ground has been broken on the luxury Granada Royale and one of the city's three Holiday Inns has a new addition.

Baton Rouge officials already are signing up bus tours that will use the city as home base, while making forays into New Orleans for the fair and into the surrounding countryside dotted with plantation homes.

As for football legend Billy Cannon, a heart-tugging drama began to unfold during the summer when the onetime LSU star was indicted by a federal grand jury on charges of counterfeiting. He subsequently pleaded guilty and was sentenced.

Among Baton Rouge media, the *Morning Advocate* has shown steady growth. Its circulation of about 78,000 is twice the size of the *State-Times*, its sister paper. The combined papers are owned by media mogul and publisher Douglas L. Manship who also owns WBRZ-TV, the city's ABC affiliate, the combined WJBO/WFMF (fm) radio stations in Baton Rouge, as well as other media properties in Texas and Illinois. Total CATV Inc. is the local cable franchise and has a 32-channel capacity.

An upstart business monthly, *Greater Baton Rouge Business Report*, was recently named the best business tabloid by the American Chamber of Commerce. The publication, founded by Rolie McCollister, is a year old.

Dallas, Tex.

Population '80	1,957,378
Rank	14
Est. income '82	$24,829,986,000

While the economic recession took its time leaving the Lone Star State, the diversified economy of the Dallas MSA has weathered the storm nicely. Unemployment rose to 5.7% by the end of 1982, but optimistic business forecasts brightened the outlook for the new year.

The optimism surfaced in the business communities in Dallas and nearby Ft. Worth, revealing no fewer than nine new office towers dotting the skylines. Ambitious plans for construction of several new buildings signified increased confidence in the continued success of the marketplace.

One key to the area's success is the wide variety of businesses and industry. The rush of corporate relocations has cooled from the frenzied pace of the late 1970s, when Diamond Shamrock, American Airlines, Boy Scouts of America and Associates Corp. of North America moved here, leading a headlong rush to Sunbelt prosperity.

These companies have grown internally, along with a general rise in high-technology companies in the Plano-Richardson area and the newly announced "Metrocrest" area in northwest Dallas County cities of Addison, Farmers Branch, Carrollton and Lewisville. Increased military budgets have aided growth in high-tech companies in eastern Tarrant County. Companies such as E-Systems, Bell Helicopter, LTV-Vought, General Dynamics and Aerospatiale have enjoyed defense department contracts that have boosted employment.

One dark spot, however, has been the performance of the consumer products division of Texas Instruments, which forced layoffs of thousands of employes throughout TI facilities. The company announced in October that it would withdraw from the heated personal computer field.

Part of the Dallas market's financial growth was attributed to multi-million-dollar loans to the booming energy industry. The price bubble burst, however, in late 1982, and a year later several major bank holding companies announced major losses, attributable to forfeited energy loans.

Growth in the Dallas area has been led by areas such as Las Colinas, a 120,000-acre development that includes either the national or regional headquarters for companies such as International Business Machines Corp., Xerox Corp., Caltex Petroleum, Bozell & Jacobs/Southwest, Boy Scouts and Zale Corp., which built new national headquarters there.

Far North Dallas and Plano have been highlighted by phenomenal growth with Canadian-based Daon's development of The Quorum, a smaller taste of the Las Colinas idea. The Quorum development has spurred one of the largest retail spurts in the country with some nine major department stores—including Bloomingdale's, Saks Fifth Avenue, Marshall Fields, Sakowitz, Neiman-Marcus and a major test model Sears store—in four regional shopping malls within a two-mile radius.

The airline industry has enjoyed some success in the Dallas-Fort Worth area, despite the demise of Braniff International in May, 1982, and the general decline in profits among competitors in the industry.

The area of greatest competition is at Dallas Love Field, where upstart Muse Airlines, with its unusual no-smoking policy, is successfully challenging the profitable Southwest Airlines for regional passengers. Braniff, now owned by Hyatt Corp., is planning to fly again.

The area also is becoming the "Third Coast" in the motion picture industry with the opening of the Dallas Communications Complex in Las Colinas. Francis Ford Coppola recently completed filming "The Silkwood Story," starring Meryl Streep and Cher. Several rock acts, including David Bowie and Genesis, have used the new complex to produce video clips for MTV:Music Television.

One of the market's biggest hurdles in growth was vaulted in this August when voters approved the DART (Dallas Area Rapid Transit) proposal calling for the development of light rail and bus transportation from the central business district to the Dallas suburbs.

The Dallas MSA is served by two daily newspapers, the *Dallas Times Herald* and *Dallas Morning News*, five weekly publications, six tv stations, 22 radio stations, including eight am, and several cable companies.

El Paso, Tex.

Population '80	479,899
Rank	88
Est. income '82	$3,068,077,000

El Paso, Tex., and the International Monetary Fund have one thing in common—they both have been affected by the economic ills of Mexico.

At the foot of the Franklin Mountains of arid southwest Texas, El Paso and its 479,899 inhabitants are integrally linked in commerce, culture and language, with a population mass of 1 million in Juarez across the Rio Grande, just three minutes from downtown El Paso.

So when the Mexican government, under new President Miguel de la Madrid, devalued the peso three times between February, 1982, and the spring of 1983, shock waves were felt down on Mesa Ave. in El Paso, not to mention the main streets of U.S./Mexican border cities from Brownsville, Tex., to Tijuana.

The peso dropped from 25 to 75 to the dollar in the first devaluation, and citywide department store sales slumped 4%.

By the end of the year, after the second devaluation had dropped the peso to 150 to the dollar, citywide department store sales were off 18% compared to 1981, according to the Federal Reserve Bank of Dallas.

Downtown El Paso retailers were hardest hit. Mexican nationals account for well over 50% of all retail sales in that sector, and up to 80% in some major stores. The number of Mexican's crossing the border dropped 2.4% during the year, and those who did cross bought less with their devalued pesos. Merchants cut store hours, employes were laid off in this city, where 24% of the work force is involved in retail sales.

By the time the peso was allowed to float in spring, 1983—amounting to another devaluation, which has dropped the peso to about 173 to the dollar—many mom and pop stores and large retailers had been boarded up.

Department store sales in the first five months of this year dropped 21% compared with the same period in 1982, a figure even worse than it appears because of the depressed 1982 period. But the shakeout seemed to have run its course by the summer when retail sales began to rebound. In the four weeks up to Oct. 8, for example, department store sales were up 34%, although the year-to-date figure was still off 11% from the comparable period in 1982.

Unemployment has dropped—down to 10.8% in August, 1983, from 11.1% a year earlier—and, more important, the total employment base has increased by 36,000 in what local officials see as a climb out of the recession. Construction has picked up and so have the requests by companies across the U.S. for information on the

---

For Tulsa, 'average' is unique

By Martin Zook

In 1981, Ogilvy & Mather looked at the northeast Oklahoma oil town of Tulsa and liked what it saw. The city, the ad agency found, had an extensive and developed cable system and a not-so-"unique" market composition. The conditions, in other words, were ideal for testing for cable.

O&M got even more than that.

The agency's first survey, conducted in May, 1981, caused ripples in the television world because it showed that in a market where there is an extensive cable system, network shares eroded steadily.

That weakening, says O&M spokesman John Hunt, has accelerated as Tulsa Cable Television has added channels, including service requiring extra charges.

The findings provoked even more interest after *Reader's Digest* used them last year as the basis for its own survey, which turned into a highly visible trade advertising campaign. *Reader's Digest* found that cable viewers, on the whole, had not sacrificed magazine reading to spend more time in front of the tube.

The results of both studies reflect emerging trends in the tv industry that likely will fragment and balkanize markets, making it more difficult to reach targets, Mr. Hunt says.

"Within the Tulsa market, there was something unique, a 36-channel cable network," he says. The system is 10 years old in January and has progressed steadily, more than tripling the number of channels it offers.

The selection of programs is diverse and representative of what the norm is expected to be in middle-America markets across the country by the end of the decade, he adds.

In addition to the basic service, which includes four superstations, Tulsa Cable offers four extra pay channels, ranging from Walt Disney to Playboy. Mr. Hunt says cable systems across the country will include one or two extra channels, as well as several superstations, by the end of the decade. Almost 60% of the households in the cable company's franchise subscribe. Tulsa Cable is the only company serving the city, and latest figures show 110,000 subscribers.

If the state of the cable art is unique in Tulsa, the market isn't, says Mr. Hunt. The market is similar to other "middle America" cities with growing cable households.

This year's survey, with results scheduled to be released soon, will show "significant" further erosion of the network share, says Mr. Hunt. He declines to quote any figures.

If the survey portends things to come to other markets, as Mr. Hunt claims, it will complicate advertisers' decisions.

The *Reader's Digest* survey showed the reader most likely to read a magazine was the cable viewer. According to Don Horton, the magazine's advertising director, the O&M and *Digest* studies paint a picture of a fragmenting advertising market, with the upper-end consumer the most likely to watch less network, more cable, but not at the expense of magazine reading.

No longer, says Mr. Hunt, can advertisers on network television anticipate reaching the comprehensive markets as often as before.

"It's a horrendous scatter shot," he says. "The whole thing is a can of worms."

The *Reader's Digest* ad campaign encouraged advertisers to expand their magazine advertising budgets. The results did not spark any direct sales, says Mr. Horton, but did open up for review the rumblings from the Tulsa market.

O&M says its study shows the need to better target advertising. Mr. Hunt also says the trend shows a need for advertisers to diversify their budgets to maximize exposure.

There may be even further revelations from the Tulsa market in coming years.

Tulsa Cable plans to establish direct communications with its customers. At first, the company anticipates adopting technology that would allow it to turn services on and off from its offices, rather than send a truck to the site. In addition to cutting overhead, it would pave the way for the company to offer other direct services, such as banking, bill paying and even shopping.

Futuristic?

"No," says George Stewart, marketing and program director at the cable company. Within a year, Tulsa Cable would like to establish that direct contact.

GOP packs its trunk for Dallas

By Tom Bayer

Republicans won't start swarming into Dallas for the 1984 GOP convention until mid-August. But some members of the press began moving into Dallas last summer to get ready for coverage of the Republican show of shows that is expected to pump a quick $20 million into the Dallas economy.

Dallas has long been a major convention city; huge numbers of delegates gather throughout the year for professional meetings, trade shows, fraternal conclaves and fashion, houseware, toy and other exhibitions. And each group deposits a tidy sum that ripples through the economy, multiplying the economic impact of those first dollars spent on convention services, hotels, entertainment, food and retail goods.

By comparison, the Republican National Convention is a small group. Expected are 2,000 delegates, 2,000 alternates, another 2,000 VIPs and spouses. The Mary Kay Cosmetics annual seminar, which had to be rescheduled for an earlier date to make room for the Republicans, expects at least 32,000 for its gathering.

The Republican National Convention, however, will have a much greater impact than the ordinary convention of 6,000 to 8,000 delegates. The GOP gathering is a major news story from start to finish.

It will be covered by 10,000 members of the press corps who will often focus their cameras and typewriters on Dallas, especially if the convention is more of a "coronation" without controversy.

The impact of that news coverage could last for 20 years or more. With that in mind, the Dallas Welcoming Committee and numerous businesses have been working overtime to accommodate the needs of the press and delegates well in advance.

Members of the press, for example, have already been sent copies of a comprehensive fact book that presents information about Dallas and neighboring Fort Worth. It even includes a straightforward and realistic statement about one controversial bit of history that always will be associated with Dallas, the assassination of President John F. Kennedy in 1963. An updated and expanded fact book will be sent to the press as the convention date nears.

The news media have already reserved the necessary parking spaces and negotiated for certain settings or backdrops for tv broadcasts. At least 23,000 of Dallas' 32,500 hotel rooms have been reserved for a minimum five-night stay, although most involved in the convention will be staying for at least two weeks.

Officially licensed souvenirs, from the trivial to the expensive, are being prepared, and volunteers are being recruited to drive VIPs, lead tours or help with other civic tasks during the convention. The committee is cataloging volunteers' names and other resources on computer so members of the press can quickly find where to go for various services.

At the same time, a city press room or Dallas Information Center is being created with shelves of books and information to be used by the press during its coverage of convention activities.

In addition to literature and information on the city and its sights, the committee is providing the press with a hospitality room and computers with pertinent databanks.

Welcoming committee officials explain that their early start was prompted not only by a desire to put Dallas' "best foot forward," but also by the problems networks will face in the summer of 1984, when they will have to cover the Democratic convention in San Francisco, shift to Los Angeles for the 1984 Olympics and then to Dallas for the Republican convention.

Tom Bayer is ADVERTISING AGE*'s Dallas bureau chief.*

maquiladora program.

Therein lies one of the strong points of the El Paso economy. *Maquiladora* is the twin-plant concept in which a U.S. company operates a distribution or manufacturing facility in El Paso and ships raw materials or subassembled goods duty free to its companion plant in Juarez. The cheap labor finishes the product in Mexico and ships it stateside, where duties apply only to the value added. The Mexican side gets employers and technology transfer; the U.S. gets the goods at low cost.

El Paso also is served in this program by Chihuahua, a city 233 miles south of Juarez that has 24 such plants employing 6,000. *Maquiladora* has attracted a relatively diversified manufacturing base to El Paso since the program was conceived in 1965, although its critics say it encourages too many industries seeking low-skilled, cheap labor in El Paso, much less in Mexico.

On the corporate side, Rockwell International is adding 300 more to its work force. Allen-Bradley is rebuilding its business after siphoning off much of it in earlier years to Taiwan. GTE is expanding its El Paso operation and Tonka Toys has moved to the city from Mound, Minn. Reflecting the shakeout in the computer games business, Atari has let 350 workers go.

The construction industry had climbed out of its tailspin by early summer when cumulative commercial and residential building permits for the first six months hit $199 million, a 22.9% increase over the year-earlier period. Residential construction alone was up 91% in value for the period.

Melvin Simon & Associates of Indianapolis, developer of the Cielo Vista Mall, a popular shopping center located about 10 miles out of the center city in El Paso's middle to upper-middle income east side, is preparing to begin construction next year on a similar shopping center on the more prosperous west side. The new center would add further pressure on downtown merchants, who have begun to hold street fairs to attract business.

The street fairs reflect a change in market strategy by the downtown merchants, proving to be a benefit to the city's two major newspapers. Traditionally, the downtown merchants have advertised in the Juarez media to reach their main customers, but they are pushing the fairs and other promotions in the El Paso English-language press in hopes of pulling in El Paso residents and lessening their reliance on the Mexican national trade.

The combined operations of the evening and Saturday *Herald-Post*, a Scripps-Howard newspaper, and the morning and Sunday *Times*, a Gannett Co. paper, lost a number of major advertisers in 1982, when the recession and peso devaluations caused a number of them to close down. They also registered sizable declines in classified, auto, real estate and employment advertising in 1982, primarily because of the recession, but those sectors are improving in 1983. Circulation has slipped across the board in the evening and morning papers.

Group W Cable of El Paso holds the local cable franchise, offering 27 channels in the city. There are 19 radio stations serving the area, including eight am.

Fort Worth-Arlington, Tex.

Population '80	973,138
Rank	41
Est. income '82	$10,432,034,000

There is a saying in Fort Worth, aimed primarily at Dallas, its chief rival 30 miles to the East, that "Fort Worth is where the West begins and Dallas is where the East peters out."

That statement says a lot about Fort Worth and adjoining sister city Arlington, the least of which is that Fort Worth is where East and West happen to meet.

Cowtown remains the moniker for this city, although steel and glass towers rise from the knoll above the low-water crossing on the Trinity River, where 19th century cowpokes used to drive cattle along the Chisholm Trail to Abilene, Kan.

It is a city where "basic" meets "frill" without much contradiction: Angelo's, a beer and barbecue place with sawdust floor and entryway dominated by a towering stuffed grizzly, attracts the same crowds that patronize fine dining in downtown Fort Worth and Dallas. Move on to Billy Bob's, billed as the world's largest nightclub, and you'll find that the dancers improvising the Cotton-Eyed Joe on the 30,000-sq.-ft. dance floor are the same culture mavens who patronize the Fort Worth symphony and opera.

"Where the West begins" also identifies Fort Worth-Arlington with the growth region of the country. While the major eastern and northern cities (Dallas is not that far east, either) have suffered population declines, the Fort Worth-Arlington population has grown 22.4% the past decade, according to U.S. Census data.

Growth has spawned a huge construction industry, which accounts for 6% of the area's work force. The homebuilders among them are ecstatic about the recent turnaround in single and multifamily projects. Permits for single and multifamily dwelling units for the first half of 1983 totaled 19,865, compared with 5,788 for the corresponding period a year ago.

The immediate cause for the reversal is a drop in interest rates, freeing up the mortgage market. But underlying that reversal is a persistent demand reflecting the strong economic base of Fort Worth-Arlington and its surrounding Metroplex (including Dallas). Bolstered by defense, electronics,automotive parts and assembly and banking industries, the area recorded an unemployment rate of 5.4% in August, compared with the 7.6% jobless rate in Texas.

Much of the boom in the new housing is taking place in Fort Worth's affluent southwest quadrant. One such development is CandleRidge, a 1,200-acre plot designed for 13,000 residents. Regional planners estimate that up to 120,000 more will be living in this quadrant in the next 10 to 20 years, requiring the construction of freeways, parkways and possibly commuter rail lines to hustle the population into the city's downtown commercial center with a minimum of hassle.

In preparation for that growth, both in the southwest sector and in other growing parts of the city, Fort Worth citizens passed a referendum proposal Nov. 8 calling for the creation of a Fort Worth Transportation Authority to be funded by a limited sales tax.

The facelift of downtown Fort Worth that began in the mid-1970s continues. A nine-block area of Main St. coursing through the business center has been renovated in a joint venture between the Bass Bros. Enterprises and the City of Fort Worth.

New office construction has included City Center, a two-tower, 1.5 million-sq.-ft. office complex. The 33 stories of Tower I, or First City Bank Tower, already are well over half leased. Just-completed Tower II, with 850,000 sq. ft., has just come onto the market and is a big reason Fort Worth's downtown occupancy rate has slipped to 80%.

Just off Main Street is the "Caravan of Dreams," a turn-of-the-century restoration project designed to stimulate development of the performing arts. The two-story project includes a 200-seat theater, art gallery, dance studios, library, jazz and blues club, all-night restaurant and rooftop garden for desert plants. The creator is Edward Bass.

Construction remains heavy at one of the area's biggest new-business magnets, the Dallas/Fort Worth (DFW) Airport, split down the middle by Dallas and Tarrant counties. Two new runways under construction and one on the drawing boards for 1985 are among the improvements being financed by $322 million in revenue bonds issued by DFW the past two fiscal years.

The airport's reflection of economic ills facing the nation's airlines has left a bittersweet taste in the mouths of many Fort Worth area residents. Braniff Airways filed for bankruptcy last year, throwing 8,000 out of work in the local market. The void left by the Braniff loss in airport business—325,000 fewer passengers enplaning per month at the time—has been filled by six new airlines, including United, Northwest Orient, Midway, Jet America and Transamerica. Trans World Airways moved into the market just before the Braniff bankruptcy. The others came later.

The area keeps its fingers crossed that American Airlines can avoid the troubled skies.

It is Tarrant County's second largest employer at 8,000, behind General Dynamics (16,500) and just ahead of Bell Helicopter Textron (7,500), both major defense contractors.

Fort Worth media include one newspaper, the *Fort Worth Star-Telegram* and spillover from the two Dallas metropolitan dailies. It has one network affiliate and two independent tv stations. Besides Dallas-based radio stations, the market has six am and eight am stations of its own. In cable tv, it has two services, one in Fort Worth and one in Arlington.

Houston, Tex.

Population '80	2,735,766
Rank	8
Est. income '82	$37,435,660,000

Not many trends are going in Houston's favor lately. The city known as the buckle on the Sunbelt has taken on somewhat of a tarnished appearance, now that the recession has hit full force—a blow even more difficult to take as the rest of the country recovers from economic ill effects.

In the usual economic health indicators, Houston has taken it on the chin. Unemployment, for example, once well below all national averages, is expected to climb to 10% by the end of the year, up dramatically from its average of 6.6% in 1982, and 4% years ago.

Severe reductions in commercial and residential building have added to the city's diminishing reputation as a boom town. Commercial building activity is off 39% to $1.3 billion, down from $2 billion in 1982, when it had already started to taper with a 6.4% drop from 1981's whopping $3.1 billion.

In residential building, the news is slightly better, as predictions indicate activity may be stabilizing at near-1982 levels. For the first seven months of 1983, residential building was up 0.8% at $1.6 billion from $1.59 billion in 1982.

Yet another indicator, hotel occupancy, shows considerable slack in the city's economic leverage. Cutthroat competition is the name of the game in the city's lodging industry, thanks to record overbuilding followed by a dramatic decline in business. Average occupancy in the city is down from 61% in 1982 to a recent low of 55%. New hotel projects are on hold in most cases, while operating hotels fight back with rate cuts, extra services and occasional raids on competition's guest rosters to help fill empty room.

And, the city once known as the energy capital of the nation is deep within a domestic drilling slump. Companies marketing drilling supplies and services to oil and gas explorers and producers have taken a dive—many ending in bankruptcy liquidations or reorganizations.

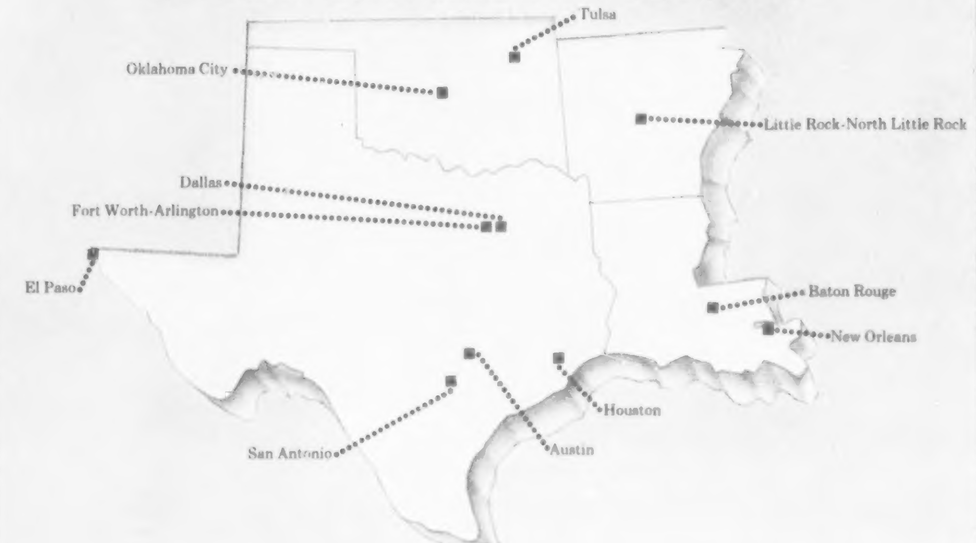
While the oil and gas business has moved out of the spotlight, however, the city's retailing picture has enjoyed a recent shot in the arm with the opening of The Park, a $125 million, 185,000-sq.-ft. mall in downtown Houston. The shopping emporium, spiced with as many as 20 food service establishments, has generated as much enthusiasm locally as the Galleria did when it opened here more than a decade ago.

Still unknown factors in the city's outlook are the results of a $500,000 ad campaign to change the city's image from a cowboy town to a sleek, sophisticated urban mecca. In addition, the recent sale of one of the city's two newspapers will contribute an infusion of new blood. The 98-year-old *Houston Post* was sold to the Canadian-based Toronto Sun Publishing Corp. for $100 million, plus the value of the *Post's* working capital, estimated at $30 million.

The prevailing thought is that regular readers of the *Post* will be in for a surprise as the *Toronto Sun* takes over. If the *Post* hopes to catch up with the *Houston Chronicle*—which has more circulation and advertising lineage—it will no doubt be remade in the *Sun's* image—grabbing readers with a tabloid replete with screaming headlines, color pictures and short, punchy stories.

The city is served by three network tv affiliates, two independent stations and an educational station, along with 26 radio stations, 11 am and 15 fm. Houston receives cable programing from Gulf Coast Cable Television.

West South Central



New Orleans, La.

Population '80	1,256,256
Rank	32
Est. income '82	$12,815,874,000

While high energy costs and high interest rates were plunging most of the U.S. into recession in the early 1980s, New Orleans, along with much of southern Louisiana, was riding the crest of an oil and gas boom.

Shipbuilding, drilling platform fabrication and oil field service and supply activities continued from the late 1970s at fever pitch until demand fell for offshore territories, their wells, fleets and hard-hat crews.

Heavy marine builders like Avondale Shipyard and Halter Marine saw contracts and payrolls shrink, sending financial shock waves through the New Orleans-area economy. By mid-1982, local unemployment began hitting records of 10% to 12%, as other industries either closed or severely curtailed production. Kaiser Aluminum shut down its Chalmette plant south of the city, and GHR, the nation's largest independent petroleum refinery, went bankrupt.

But by fall of 1983, the energy scene seemed to be stabilizing, generating enough hope and motivation for oil companies to bid a total $1.55 billion for the right to lease two billion acres of waterbottoms in the western Gulf of Mexico. (The bids were twice as high as the government had anticipated.)

Yet even in "off year" 1982, Louisiana petroleum production had an estimated value of $30.4 billion—second only to Texas and a fourth of the U.S. total of $134 billion. The Pelican State's natural gas production reached $15.5 billion, with even greater potential for future value once that commodity is fully deregulated and the Tuscaloosa sands across southern Louisiana are exploited.

Some industrial bright spots in the Crescent City did not lose their luster during the recession, including the NASA-Michoud facility, where Martin Marietta is working hard to perpetuate construction contracts that would eventually provide booster fuel tanks for at least 232 Space Shuttle flights through the mid-1990s. In 1983 the company won a three-year, $505 million pact from the National Aeronautics & Space Administration to build 26 more of the giant tanks and to buy materials for 21 more.

High-rise office building and hotel construction was a stellar performer during the early 1980s, with some of the impetus coming from the city's reputation as a convention and tourist center and some in anticipation of the 1984 World's Fair rising along the Mississippi River not far from Canal Street. The four-parish metropolitan area boasts more than 25,000 hotel and motel rooms, with three-fourths of them within walking distance or a short taxi hop to the fair site.

One of the residual benefits of the fair is expected to be the $25 million riverfront marketplace being fashioned by Rouse Co. On the West Bank in Jefferson Parish, Rouse has also bought Oakwood Shopping Center, next to which it plans to develop a $216 million corporate center.

F.W. Dodge-McGraw Hill reported that the New Orleans area saw nonresidential construction contracts total $527 million in 1981, $1.2 billion in 1982 and $247 million in the first eight months of 1983. The $500 million Canal Place, near the French Quarter, is in its second phase of construction and houses such retailers as Brooks Bros., Saks Fifth Avenue and Gucci.

An added impetus for growth in the central business district has come from the Downtown Development District, which is funded by a special property tax. The revenues fund a capital improvements program and special services, such as free noon-hour public Brown Bag Concerts.

Another big-ticket construction item has been the $750 million parallel span and approaches for the Greater New Orleans Mississippi River Bridge, which will double the current four-lane capacity between downtown and the West Bank, a booming area. Traffic flow on the new span should start by 1985, when a new elevated West Bank expressway also is scheduled to open.

The Port of New Orleans continued to suffer declines in tonnage and dollar value of commerce during 1983, though strong container cargo traffic was bucking the recessionary trends.

Calling on New Orleans' ingrained sense of history that long ago led to restoration of the French Quarter, preservationists and investors have teamed up—with a big assist from federal tax incentives for historic buildings—to rehabilitate many areas, from the warehouse district to Coliseum Square and the Irish Channel.

Popular with tourists and natives alike are the revitalized Audubon Park and Zoological Gardens, which receive close to 1 million visitors yearly and are now ranked among the top three in their class and among the top 10 for any size nationally. Millions of dollars have been spent to place zoo inhabitants in natural settings—even to the extent of recreating a Louisiana swamp, populated with alligators and other aquatic and wild life.

The market is served by one daily newspaper, 13 am and 13 fm radio stations and six tv stations, including a public broadcasting station. One cable company serves the city.

Oklahoma City, Okla.

Population '80	860,969
Rank	51
Est. income '82	$9,116,968,000

Oklahoma City's immunity to the national recession was dented when the price of oil began to recede in the summer of 1982. But the state capital's economy has remained relatively healthy because of the large number of government jobs and diverse manufacturing employment.

While the oil sector weakened, construction set records in the two residential categories. Also, General Motors began recalling workers to its plant there, and retail sales have remained level.

As a result of the oil slump, federal bankruptcy court in the city was swamped with a record number of filings by businesses. Many of the businesses were small oil-related companies that sprang up in the heady days of the late 1970s and early 1980s.

One noteworthy failure was that of the Penn Square Bank, which is still being unraveled.

At the same time, Oklahoma City's economy was not rocked as hard as Tulsa's by the oil and gas industry slump. For one thing, the capital city's manufacturing sector is less dependent on the oil industry.

Additionally, stability in the manufacturing sector has allowed it to add jobs while Tulsa was losing jobs. It is now believed that for the first time in the state's history that the manufacturing sector in Oklahoma City is larger than in Tulsa. Perhaps even more significant are those 60,000 to 65,000 jobs in the government sector. The security of the government jobs has buoyed the employment statistics.

Residential construction, reflecting lower interest rates, is well ahead of the healthy paces established in 1982. Permits for almost 6,300 multifamily units, including apartments and condominiums, had been issued through September, 240% better than last year's pace. In addition, almost 4,500 single-family permits had been issued through September, more than 200% ahead of the pace set a year earlier.

The glut of residential housing has dampened the appreciation rate. The local Board of Realtors reports only a 0.2% increase in the average sales price. Apartment vacancy rates are running between 20% and 24%.

There has been little office construction this year, after two strong years. One major downtown project, Leadership Square, is nearing completion, but is 98% unleased. It is owned by a partnership that includes Metropolitan Life Insurance Co.

Meanwhile, although it is unclear whether unemployment has bottomed out in the city, there is one major indicator that the recession in the state is in a trough. The number of active oil rigs, while down 70% from the lofty levels of January, 1982, is climbing. And although no one holds out hope that the oil industry will bounce back to the levels of the late 1970s and early 1980s, analysts are saying that even a modest recovery will stabilize the state's economy.

Oklahoma City has three daily newspapers, five tv stations, 13 am and 14 fm radio stations and one cable company.

San Antonio, Tex.

Population '80	1,071,954
Rank '80	38
Est. income '82	$8,846,365,000

Attempting to create its own identity, one apart from the other Texas giants—Dallas and Houston—San Antonio is a city in transition.

Because of that, it is a community of contrasts—old renovated buildings alongside gleaming high-rise office towers and futuristic electronics manufacturing plants near an army post founded before the Civil War.

The military presence in San Antonio—five major installations within the county limits pump more than $1 billion annually in paychecks and government contracts—remains the city's economic bedrock, as it has since World War II.

Tourism is another big factor in San Antonio, partially because of all of those transient military people. More than $800 million was spent in the area in 1982, and an expansion of the city's convention center is planned. With that expansion will come an 850-room Amfac Hotel, which, when completed in 1986, should be the city's largest.

Within the last three years, business and civic leaders, headed by San Antonio's charismatic, Harvard-educated mayor, Henry Cisneros, have made strong efforts to diversify the local economy, concentrating their efforts on light manufacturing and high technology companies.

The work has borne substantial fruit. Control Data Corp., in the center city area with a plant employing 120, will expand its facilities to four buildings and 1,000 employes. Advanced Micro Devices of California opened a $60 million microprocessor manufacturing plant this year that plans to expand and employ 2,000 by 1988. Farinon Electric, Sprague Electric and Tandy Corp. all have electronics assembly facilities in the city, and Datapoint Corp., a home-grown, automated office manufacturing company, has 3,200 employes locally.

Austin, just 70 miles north of San Antonio, was chosen as the headquarters of Microelectronics and Computer Technology Corp., a research consortium of a dozen major high-tech companies. That move is expected to bring even more high-tech research and development and manufacturing operations to the corridor between the two cities.

These companies will come, Mr. Cisneros said, because of the availability of productive, nonunion labor—San Antonio's unemployment rate is under the state's, but higher than that of Austin and Dallas—and by the city's quality of life. Chase Econometrics recently projected San Antonio would be the nation's 10th fastest growing city in the next decade, almost entirely because of those two factors. Austin, helped by advanced university programs, topped the list, while Dallas ranked 26th and Houston, No. 1 two years ago, fell to 79th.

More recently, however, Mr. Cisneros and privately funded job generation groups have targeted a portion of high technology, that of biomedical manufacturing, as the source of the Alamo City's future growth and have shifted their efforts accordingly. A large public, private and military medical research base already in place is expected to smooth that new approach to economic development.

Meanwhile, general growth was slowed but not stopped by the recession. As the city enters 1984, it will find itself with an excess of office space (more than twice as much as existed in 1980), single-family detached homes (some 8,000, or a two-year supply, are now on the market) and apartment units (1983 saw an estimated 12,000 new units built, an alltime record). Developers and financial backers say they are not worried, but are now prepared for a tremendous growth expected in 1984 and 1985.

Retailers are gearing up for that growth as well. The city has five regional shopping malls scheduled for construction within the next two years, including a luxury center downtown a block from the Alamo that will feature the area's first Lord & Taylor store. Houston-based Sakowitz and Neiman-Marcus of Dallas have both announced San Antonio stores, but have not confirmed locations or opening dates. Target, a unit of Dayton-Hudson Corp., opened six local stores last April, and officials of the Minneapolis retailer promise another subsidiary, Mervyn's, will be in town by 1985 with several units.

While devaluation of the Mexican peso slowed some San Antonio expansion plans, especially for retailers, new growth generated by people and businesses fleeing Houston, Dallas and the Northeast more than picked up the slack.

San Antonio continues to have a surprisingly high total retail sales volume, approximately $5.5 billion, but a low median household income of $19,936. The city's 1.1 million population is young (median age 28.2) and largely Hispanic (54% of the population).

There are three major newspapers in San Antonio, the morning *Express* and afternoon *News*, both owned by News America Corp., and the all-day *Light*, owned by Hearst Corp. There are five tv stations representing the three major networks, the Public Broadcasting System and the Spanish International Network, and two cable tv systems—Rogers Cablesystems with 165,000 subscribers and Bexar County Cablevision with 13,000 subscribers.

Tulsa, Okla.

Population '80	657,173
Rank	63
Est. income '82	$7,295,249,000

Tulsa, at least until the summer of 1982, enjoyed a high degree of immunity to the economic ills that beset the rest of the nation. Often the city led the country with the lowest unemployment rate, despite a migration by workers seeking employment.

But that immunity was stripped away abruptly in the summer of 1982, when the prices of oil and gas began to plummet. It brought a sobering end to the widespread notion that the city's economy was not dependent on the energy industry.

Despite the slump, there continue to be underlying signs of strength, and some economic indicators point to a modest rebound.

Tulsa's unemployment rate began an almost uninterrupted climb from a low of 2.9% in August, 1981, to a post-World War II high of 10.4% in June. Most of the gains occurred beginning in the summer of 1982.

The unemployment rate has subsided to 9.4%, reflecting some improvement in the oil and gas industry, as well as an exodus of people who had sought work in the Sunbelt city.

A number of jobs, especially in the manufacturing sector, are permanently lost, according to a handful of local analysts and employers. They point to the steady decline in the durable goods sector: At the beginning of the year, that sector accounted for 55,700 of the 324,000 jobs in the metropolitan area, dropping to 41,600 in May.

The durable goods sector depends heavily on oil rig manufacturing. With a high inventory of rigs, there is little prospect of a strong recovery.

At the same time, jobs in the service sector have been growing. Until a year ago, they increased at a pace that offset the loss of manufacturing jobs.

Residential building is setting a record for the number of multifamily units (primarily apartments), and single family home construction is well ahead of last year's pace. The more than 1,500 single family permits issued through September already exceed the 1,275 issued last year.

Sales have picked up modestly, but have not been able to absorb the supply as a record number of homes are for sale in the area. The average sales price of about $73,000 is only 2.5% ahead of last year's average price. Industry experts predict a further weakening.

Retail sales are running 2% behind last year's sluggish pace. Still, Homart Development Co. opened a 55-store addition to the Woodland Hills Mall last year. The mall is one of the top performers in the Sears, Roebuck & Co. subsidiary's chain.

Several top retailers, including Sakowitz and Sanger-Harris, are entering the Tulsa market for the first time. Sanger-Harris, with a store at Woodland Hills, reports sales have exceeded projections, but gave no figures.

Sakowitz plans to open its first store in 1984, when the first phase of the $200 million Kensington Center is opened. Tulsa has two daily newspapers, 12 am and 10 fm radio stations. There is one cable service in the city.

Mountain

Albuquerque, N.M.

Population '80	419,700
Rank	100
Est. income '82	$3,715,557,000

Thanks to a jump start from the housing industry, the Albuquerque economy is moving again.

The city issued permits for 1,805 new homes through September, compared with only 695 during the same period in 1982. The local Board of Realtors estimates its members will sell about 6,400 homes in 1983 for more than $500 million, the largest volume in the 62-year history of the board. Apartment managers here report occupancy rates of 90% to 100%. Housing officials say a persistently tight rental market in the face of record-breaking housing starts and sales indicates a continued migration to Albuquerque.

The city's share of a state-sponsored $100 million low-interest home loan program virtually sold out only one week after it began Oct. 1. The legislature authorized similar programs for following years, financed by severance taxes on oil and gas and minerals.

A city-fostered housing revival in downtown Albuquerque, stalled by the recent recession, sprang to life earlier this year with the approval of a 210-unit, $5.4 million garden apartment complex in the Alvarado metropolitan redevelopment area, to be built by Dinerstein Interests of Houston. Nearby, the first eight units of the 20-home Fruit Street Townhouse project went on the market in September.

A group of investors from California and New Mexico recently bought the old Hotel Plaza near the downtown convention center, announcing plans to restore it and open its 115 rooms to visitors in 1984.

The city welcomed record numbers of visitors in 1983. In mid-October, most of the city's 10,000 hotel and motel rooms were booked as the International Arabian Horseowners Assn. gathered at the state fairgrounds, and the Aircraft Owners and Pilots Assn. met at the convention center.

During the National Collegiate Athletic Assn. basketball tournament here this year, nearby communities played hosts to travelers who could not find lodging in Albuquerque.

In retail, Albuquerque consumers bought nearly $1.6 billion in goods during the first three quarters of 1983, or 5% more than through September, 1982. Third-quarter sales rose nearly 13% higher than during the same period in 1982, an indication of increasing improvement.

According to a recent survey, the average weekly wage here has risen during the past year from $283.29 to $300.76. Average pay in Albuquerque and New Mexico still ranks low nationally, however.

Government, service industries and sales employ 72% of the 195,400 people in nonagricultural jobs in Greater Albuquerque. One in five workers is on a public payroll. Because many of the jobs here are defense-related, the city is vulnerable to cyclical downturns of the defense industry. Manufacturing accounts for only 9% of the workforce.

The Albuquerque Industrial Development Service, an arm of the chamber of commerce, has worked to ease the city's dependence on government jobs by attracting several clean, electronics-based industries to Albuquerque in recent years.

Among them is GTE Network Systems, which employs more than 1,000. GTE produces advanced electronic communications devices here and has just started fiber optic research, development and production in its Albuquerque plant.

Sperry Flight Systems has 1,000 employes, up from 730 in January. Sperry has announced plans to eventually triple its labor force here. The company just finished a 180,000-sq.-ft. expansion of its Albuquerque plant, and should begin working next spring on another 175,000-sq.-ft. addition.

Signetics, a maker of computer chips, started production in its new Albuquerque plant in July. Signetics employs 403 and should hire another 200 by the end of 1984.

Intel Inc. should begin producing computer chips during the first quarter of 1984 in its new Rio Rancho plant on the outskirts of Albuquerque, company officials said. Intel employs 350, and should have from 750 to 900 employes here by the end of 1984.

DeVore Aviation announced in October it will build a 100,000-sq.-ft. plant here to produce its new single-engine airplane, eventually employing 400 people to build 1,000 aircraft a year. Pulse Systems will lease property this year in Albuquerque to begin producing gas lasers.

In July, the Albuquerque City Council established an $8.2 million urban enhancement fund, the earnings of which are to be spent on a variety of projects ranging from landscaping along roadways to supporting the symphony orchestra.

City officials expect federal approval early next year for a foreign trade zone in Albuquerque, offering customs and tax advantages to exporters and importers as an incentive to store goods and operate businesses here.

Pacific Southwest Airlines and Delta Airlines began operating at Albuquerque International Airport this year, and America West, a regional carrier, will begin in December. Total passenger operations at the airport through September were up 18.7% from 1982.

The city has two daily newspapers; in tv, it has three network affiliates, two independents and one public broadcasting station. A vhf station is due to start broadcasting from Santa Fe this year. Albuquerque has 12 am and 11 fm radio stations, as well as one cable tv service.

Meanwhile, the first issue of *Albuquerque Living*, a city monthly published by Starline Creative Printing, hit the newsstands in November. Worldwide Corp. and Accent West have announced tentative plans to start publishing monthly city magazines later this year.

Denver, Colo.

Population '80	1,428,836
Rank	27
Est. income '82	$16,865,657,000

Although the recession of 1981 took its toll throughout Colorado, many other states would probably envy the consistently below-average jobless rates found here. Furthermore, the state and its major metropolitan area, Denver, both have emerged with strong prospects for growth.

Energy, once the prime mover for growth in Colorado, is still in the doldrums, with relatively lower prices meaning lower income for the state's energy interest. However, gains are being logged in other areas, notably in areas such as service industries and retailing. Manufacturing is growing as well, particularly in the high-tech companies that have adopted the Boulder-Denver area as their base.

"We look at 1984 with a high degree of optimism," said Tucker Hart Adams, chief economist with United Banks of Colorado, one of the state's major multibank holding companies. "The nation, mountain region and Colorado will experience a stabilizing economy with both the business and private sectors benefitting from a continuing recovery."

Other states may have looked longingly at Colorado's experience of the recession. Unemployment stayed about two to three percentage points lower than the national rate and is expected to decline steadily through 1984 and 1985. Even with relatively high joblessness in 1982 and 1983, the state's high-tech entrepreneurs continued building their companies.

Currently, some 750 companies fall into the high-tech category, according to researchers at the University of Colorado. Ranging from small shops to one home-grown *Fortune* 500 company, Storage Technology Corp., most are clustered in the Boulder-Denver area. State political leaders, notably Gov. Richard D. Lamm, expect more growth in the high-tech sector and are working to foster it with academic programs designed to make the state more attractive to both engineers and their employers.

However, real estate in the downtown area has been depressed, with office towers going vacant and lease arrangements marked by generous concessions. Oxford-AnsCo Development Co. delayed the fall opening of the Republic Plaza, downtown Denver's tallest high rise at 56 stories, until March, 1984. It stretched out construction work on the building because less than 10% of it was leased.

Overbuilding, which rapidly changed the downtown Denver skyline in the last two years, has been blamed

WHEN BUYING SOUTHERN CALIFORNIA...

DON'T OVERLOOK THE NATION'S FASTEST-GROWING PMSA-RIVERSIDE/ SAN BERNARDINO

Chase Econometrics says the Riverside-San Bernardino PMSA is the nation's fastest-growing . . . California population figures confirm Riverside to be Southern California's fastest-growing county.

In step with this phenomenal growth pattern is The Press-Enterprise, the newspaper that is displaying uncommon growth in this uncommon newspaper market.

Our daily audience, as defined by Scarborough, is more than 300,000 adults for an average daily issue and nearly 450,000 over five days.

That's merely the beginning. For more from Scarborough on this booming market and medium, call us or talk with your Sawyer-Ferguson-Walker representative.

The Press-Enterprise

3512 14th St.
Riverside, California 92501
(714) 684-1200

Circulation: 115,617 Daily; 122,681 Sunday • *Sources: Scarborough, 1983*

for the delays. However, the collapse of the energy boom has been primarily at fault for the office construction downturn. Energy companies that use Denver as a base for the oil-rich areas in Colorado and Wyoming no longer need the amount of office space once projected for them.

Additionally, plans recently fell through for a major convention center at the city's railroad station to replace facilities considered inadequate for big-time conventions. The property, however, is said to be ripe for development if terms can be met.

One company braving the real estate development difficulties is the Tabor Group, a partnership headed by Williams Realty Developments, Tulsa. The group, which involves the ubiquitous Rouse Co., is constructing the $260 million Tabor Center, that will be the city's biggest office-hotel-retailing complex.

Scheduled for completion in mid-1985, the center will grace the end of the one-year-old 16th Street Mall, a mile-long retailing strip in the center of downtown Denver.

Mr. Adams, the United Banks economist, said he expects nonresidential construction to continue slumping generally while other areas that have remained strong are expected to continue doing so. Mr. Adams said the state's "diversification" has been the key to its weathering the recession well and will continue to be its strong suit.

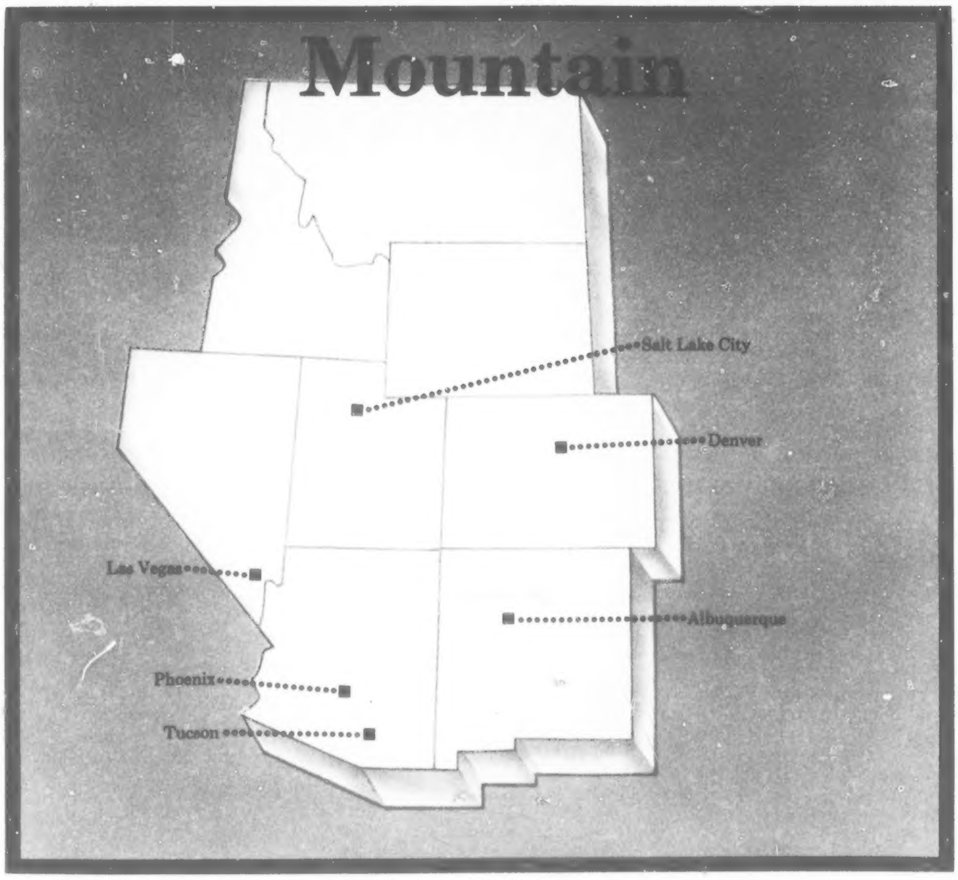
Population growth slowed substantially in 1982 after a decade of sharp increases, while Mr. Adams forecasts that 1984's growth will amount to about 2%. He expects continued steady growth somewhat less than the 2.7% annual average population boom of the 1970s.

With the expected growth will come more inflation, which has stayed above the national average consistently since about 1977. Two percentage points above the national rate is the expected pattern, yielding an inflation rate of 6% in 1983 and 7.7% in 1984. Personal income, however, is expected to grow by nearly 10% in 1984, assuring consumers more disposable income.

Retail trade in the Denver area is expected to grow nearly 9% in 1984, reaching $1.6 billion out of total personal income of about $3.4 billion.

Ski industry officials said they had a record year in the 1982-83 season, and barring snowlessness, expect more of the same in 1983-84 with the national recovery freeing up tourist dollars. Over 8 million lift tickets were sold and skier expenditures were up 7.2% in the 1982-83 season. Ski resorts, although located outside the Denver-Boulder area, bring revenue into the city through visitors who stop in Denver.

The Denver-Boulder area is served by two strong daily papers, the *Rocky Mountain News* and the *Denver Post*, approximately 30 radio stations and seven tv stations. Construction of a cable tv system is under way in Denver proper, while suburban areas have long had cable systems.



Las Vegas, Nev.

Population '80	463,087
Rank	90
Est. income '82	$4,782,445,000

It used to be a piece of cake to grow in Las Vegas. But these days it has become a real marketing challenge.

Las Vegas in the 1960s and 1970s, before competition from Atlantic City, was like the motion picture business in the 1940s and 1950s before tv. The market used to consistently have 12% to 20% annual growth rates. The average was 16%.

Anybody, seemingly, could open a store, put in some slots and some crap tables and make money. But the market matured in the last three years. Some 4,000 new hotel rooms came into being and the timing couldn't have been worse. It isn't only Atlantic City. There's also the recession, higher air fares and the devaluation of the Mexican peso (high rollers from Mexico are important to Las Vegas).

The moaning and groaning now being heard in Las Vegas appears to be coming mostly from people who rode the crest of the constantly expanding market in past years and who didn't have to do any kind of marketing and advertising to grow.

"What's happening," said Howard Anderson, former public relations and marketing director with Howard Hughes' Summa hotels organization in Las Vegas, "is that the children are getting off the street. We're talking about the people who are blaming everybody else but themselves for not being aggressive marketers."

According to Mr. Anderson, now president and owner of KRXV Inc., which operates two fm radio stations covering 200 miles of the highway across the desert leading into Las Vegas, it used to be that hotels and casinos in the market relied almost exclusively on newspaper publicity for attracting visitors. "A flack," as Mr. Anderson refers to this person, "took pictures of some bimbo out by the pool and wrote a caption about it being 80 degrees in Las Vegas before sending the picture to Des Moines, Ia., where it was 30 below."

In Mr. Anderson's opinion, that's what passed for marketing in the pre-Atlantic City days. Now, he said, marketing sophistication has come to town.

Properties that have professional marketing people in charge appear to be doing very well. The Las Vegas Hilton and Flamingo Hilton, for example, reportedly contribute nearly 50% of the total profit of the Hilton chain.

Today's marketing doesn't fight Atlantic City, instead efforts are made to tie-in with what are sister operations there. Las Vegas is being positioned as an economical place to vacation, offering more than just gambling. "Brand name fun at generic prices" is one of the advertising themes.

Promotion, publicity and merchandising are all combined to constantly push special events, some of them slightly exotic. The Tropicana, for instance, a Ramada resort and casino, last month was host of the final race of the 1983 U.S. National Championship Gas Balloon series. And, of course, it was a cross promotion with the Tropicana in New Jersey, with the helium gas ballon race beginning on the Tropicana's golf course in Las Vegas and finishing on the Atlantic City boardwalk.

The Tropicana also has scheduled a $1 million Craps Tournament for the summer of 1984, billed as the richest gaming tournament in the world. No more is there only a "flack" taking pictures at pool side. The Tropicana, typically these days, has a special events and promotions director and a separate tournament director in addition to a public relations and marketing staff.

Competition from Atlantic City can't be ignored. The trend towards the East Coast gambling center is undeniable and may be irrevocable.

Las Vegas had 11.6 million visitors last year. But Atlantic City is anticipating 27 million people this year.

Las Vegas is expecting $1.9 billion in gross gambling revenues in 1983. Atlantic City should be only a tick behind, with a $1.8 billion total.

It's not that Las Vegas is going backwards. It's just that Atlantic City, with an estimated 50 million people in close to it, is gradually overtaking Las Vegas as the gambling mecca of America.

There have been recent bankruptcies, the Riviera and Aladdin hotels among them. Previously, about 12% of people visiting Las Vegas came from the East Coast. The estimate now is that Las Vegas has lost about 7% of these people to Atlantic City.

Southern California is being called upon to make up the slack. Howard Anderson's KRXV organization claims that some 28 million people travel Interstate Hwys. 15 and 40 each year between Los Angeles and Las Vegas. The area within 400 miles of Las Vegas, which had been generating about 34% of the market four years ago, is now accounting for 48% of Las Vegas' growth. Marketing to Southern California has become much more ag-

---

Grand Forks reads like Anyplace U.S.A.

By Janna Q. Anderson

Earl King is the monarch of magazine sales in one of the smallest markets in the country—Grand Forks, N.D. He has a few thoughts about what the folks in these parts read.

Situated on the North Dakota-Minnesota border, about a one-hour drive from Canada, Grand Forks is home for about 39,000 hardy midwesterners. The second-largest city in the state, it's the center of activity for the University of North Dakota, a nearby U.S. Air Force base (which holds much of this nation's nuclear strike potential), and farm folk from miles around.

Mr. King, who declines to give his age, has been in the magazine distribution business in this area since 1937. He began as a distribution clerk, took three years off to fight in World War II, then returned to sales. He worked his way up, saved his money and 10 years ago he bought out the business, renaming it King News Inc.

His company delivers magazines to vendors across the northeastern edge of North Dakota and the northwestern corner of Minnesota. He also has a retail store about 10 blocks away from downtown Grand Forks.

When you ask Mr. King about the evolution of the magazine market since the 1930s, he'll tell you straight out, "It changes every day."

"A couple of the big things that have changed, though, are prices and the adult magazines," he says. "Prices have gone up so much. *Woman's Day* and *Ladies' Home Journal* sold for 15 cents once. Now they're up to 75 or 79 cents. And when the adult magazines—*Playboy*, *Penthouse*, that type—came in, they slowly took over the sales lead."

According to Mr. King, readers in Grand Forks and the surrounding small towns are reading *People*, *TV Guide*, *Cosmopolitan*, *Good Housekeeping*, *Ladies' Home Journal* and *National Enquirer*. "They're the other top sellers," he says. "Sales used to be more seasonal years ago. More would sell than in the slow winter months, with fewer selling in spring and summer because of all the work to be done on the farms. Now it's leveled off.

"Despite what some people might guess, I'd say folks around here are pretty average magazine readers. What they read is no different from other parts of the country."

Others tend to agree with Mr. King's assessment.

Felicia McCann is magazine and accessories buyer for the 690-store B. Dalton Bookseller chain, based in Minneapolis. She decides what its stores in 48 of the 50 states will sell.

"B. Dalton brings in quite a bit of profit from its magazine sales," she says. "We have a list of 100 titles that each store must stock. In addition, we put out a list of titles the individual stores may choose from to fill out their racks. Generally, each store carries about 200 titles.

"We're constantly reviewing magazines to see if they'll fit the demographics of our customers. We decide on a title-by-title basis what to put on the lists. The sex, age, income level and education of most of our customers is pretty much the same. They're people who want to buy books—their needs tend to be specialized and they have specific ideas about what they want to buy."

According to Ms. McCann, the people who buy magazines at B. Dalton are men and women with some college background. *Playboy*, *Penthouse* and *Architectural Digest* are some of the chain's top sellers. "I wouldn't say there's not much difference at all between readers in a metropolitan market like Minneapolis and a smaller market like Grand Forks," she says. "The only thing may be nuances—*Glamour* and *Vogue* will sell better in a metro area, while *Family Circle* and Woman's Day will be bigger in a small city."

Mr. King says *National Enquirer*, *Good Housekeeping*, *People* and *TV Guide* sell best at Grand Forks grocery and convenience stores. Generally, the demographics at these places are lower in education and income.

The B. Dalton outlet in Grand Forks is located in the city's big new Columbia Mall. Manager Brenda Metcalf says the top sellers there are *Cosmopolitan*, *Playboy*, *Penthouse*, *TV Guide*, *People*, *Glamour*, *Mademoiselle*, *Woman's Day* and *Ladies' Home Journal*.

"The news magazines don't sell as well as the entertainment, adult and women's titles," she says. "It depends quite a lot on what's on the cover. During the week of the Grenada invasion and the Beirut bombing, we returned a number of copies of *Newsweek* and *Time*. If Princess Grace was on the cover, they may have sold out.

"We try to carry something for everyone, with a lot of decorating, sports, children's and art magazines. I do order every computer magazine I can get—only a few copies each of all the titles. Art magazines sell really well. *Architectural Digest*, *Art Digest*, *American Film* and *Western Art* are just some of the titles you'd think might not sell well, but they do. We also have political journals like *National Review* and *Foreign Relations*. We only get a few copies of these to sell, but they sell steadily.

"No one age group can be pegged as buying the most magazines, and it seems to be both men and women who are interested. I'd say the public's taste in magazine selection in Grand Forks is pretty much like anywhere else."

It seems about the only thing changing on the magazine scene in this corner of the world today is rack sales.

"They're always on the rise," says Earl King. "Every year they steadily increase. Business is good. So, even though I'm past retirement age, I'm sticking with work. I'm not in any hurry to sit home and watch soap operas all day."

Janna Q. Anderson is the travel/entertainment editor of the Forum, *a daily newspaper in Fargo, N.D.*

gressive.

What Las Vegas has over Atlantic City is hotel rooms, by a more than six to one margin. The current count for Atlantic City is about 8,000 hotel and motel rooms, compared with more than 50,000 for Las Vegas.

Hotel rooms mean conventions. In October, the best October in two years for Las Vegas, 63 conventions were held, attracting more than 90,000 delegates. They were estimated to have pumped some $60 million into the local economy.

That's only one of the upbeat notes. Another is a forecast by Chase Econometrics, a subsidiary of Chase Manhattan Bank, figuring Las Vegas as among the country's 10 fastest growing cities of the 1980s (in terms of employment growth).

Five tv stations serve the market, including KVVU-TV, a nonnetwork affiliated station 30% owned by Johnny Carson. There also are three network affiliates and a PBS station.

On the radio side, Las Vegas is about a 20 station market. Daily newspapers are the *Review-Journal*, *Valley Times* and *Sun*.

Phoenix, Ariz.

Population '80	1,50[illegible],052
Rank	25
Est. income '82	$15,232,668,000

Phoenix is rapidly becoming one of the high-tech centers of the Southwest and the nation. It's also getting big and occasionally smoggy.

It is estimated that more than 79% of all electronics, computer and aerospace companies in Arizona are in the Phoenix market.

Phoenix has come a long way—fast—since the days some 40 years ago when youngsters rode to school in Tempe and other parts of the market on horses. It wasn't quite that long ago that the area seemed the Dust Bowl of the West and a place to stop on the way to California.

No more. Most of the people who have come here and made the market grow are *from* California. Next in order are newcomers from Illinois, New York and Ohio. They might no longer be recognizable as they start attending rodeos, a favorite sport in Phoenix. Mercedes, Porsches and other exotic pieces of machinery are parked side by side with giant-wheeled pickups in the parking lots of elegant shopping malls and restaurants as well as the half-dozen ride-'em-cowboy arenas in and around the market.

In its rise from the "arid zone," which historians in Phoenix say is a misconception about the name "Arizona" (contending it's an Indian and not a Spanish name), Phoenix has become one of the major western manufacturing and commercial centers.

Among the companies that have relocated their headquarters, started from scratch, or shifted major western facilities to Phoenix: Amerco (U-Haul), American Express (western regional card division), Circle K Food Stores (a 7-Eleven rival), Motorola's semiconductor group, Siemens components group, Sperry Avionics and flight systems divisions, Honeywell information systems and process control divisions, and Goodyear Aerospace.

There are dozens more, including the startup this year of Phoenix-based America West Airlines, which recently began service to midwestern and Canadian destinations, in addition to California and Southwest service. Greyhound Corp. and its Armour units were earlier arrivals.

Further, the region that surrounds and feeds into Phoenix isn't "arid" anymore. Agriculture ranks third behind manufacturing and tourism among the state's major industries (nearly all of them closely related to Phoenix interests in one way or another), and it is moving up fast. Arizona just recently obtained federal rights to a large share of Colorado River water that had been going to California.

But high-tech industries and their growth has been the main story in the Phoenix market. The influx of middle-and-upper-income high-tech personnel has had a significant effect on increased retail sales and new housing.

While nationally the housing industry suffered, Phoenix showed its first annual housing start increase in five years in 1982. According to *Arizona Republic* and *Phoenix Gazette* researchers, high-tech industries played a major role in a manufacturing output increase from $3.6 billion in 1979 to $5 billion in 1982.

Electronics, computers and aerospace account for some 42% of the market's manufacturing work force. The fastest rate of growth was in the computer sector, but the highest volume of manufacturing shipments came from electronics.

High-tech industries accounted for 32% of the value of all manufacturing shipments out of the Phoenix market in 1980 and was expected to continue on the increase. By comparison, high-tech products accounted for only 6% of the value of all manufacturing shipments nationally in 1980.

By 1990, according to the *Republic* and *Gazette's* projections, the annual direct economic impact of high-tech manufacturing on the market will reach $3.8 billion, a 140% increase over a 10-year period.

Phoenix is regarded as one of the fastest growing markets for employment in the U.S., and it was in the computer electronics and aerospace industries that close to 14,000 new jobs were created just at the beginning of the boom—from 1970 to 1980.

The average age in the Phoenix market is 29.5, relatively low considering it has a retirement population of 224,000. This group accounts for 22% of households in the market, and the area's retired persons couldn't be considered low income. Eighty-five per cent of Phoenix retirees own their own homes, and 14% have second homes in the state or elsewhere.

The large retired population also accounts in part for the development of Phoenix as a regional and national healthcare center. The healthcare industry in the market has more than 40,000 employes in 29 hospitals and related healthcare facilities.

If the Phoenix market has a couple of shortcoming amidst all the "growth" figures and projections, it's the area's sweltering summer heat and perceived lack of cultural attractons. *Republic* columnist Tom Fitzpatrick has complained of a lack of entertainment, but evidence to the contrary is beginning to accumulate. His own newspaper started a free entertainment weekly in October that has been running 40-plus pages of events and entertainment listings, plus ads and features on local and visiting show business and arts personalities. The weekly, *City Life*, was started to check competition from *New Times*, an already successful free weekly that focuses much of its attention on arts and entertainment in the market.

The market has seven daily newspapers, eight tv stations, 37 radio stations, two business publications, four locally edited magazines and three outdoor companies, as well as cable services in Phoenix and its suburbs.

Salt Lake City-Ogden, Utah

Population '80	910,222
Rank	48
Est. income '82	$7,712,134,000

A relatively young community, Salt Lake City dates to 1847, when Brigham Young led a tired band of pioneers to the valley between Great Salt Lake and the Wasatch Mountains. It was the place, he declared, where they could reach twin goals of prosperity and isolation.

Descendants of those first settlers have significantly fulfilled the prosperity part of the prophecy, but it has come at the expense of isolation. The Salt Lake City/Ogden market today is booming—largely because what was once ox-wagon remote has become jet-age centrality.

The Donnelly Marketing Information Services of Dun & Bradstreet said

For years, advertisers and their agencies said we were hard to buy.

We listened.

Now we've responded with the...

CRMA

City & Regional Magazine Association

NETWORK DISCOUNT MEDIA PLAN

Target local. Buy National. With your choice of America's hottest upscale publications *in 28 markets nationwide!*

Through the CRMA Network Discount Media Plan, you can buy pages in 5 to 28 of our member magazines with:

- one order
- one closing date
- different advertising copy in various markets, regardless of product or ad coloration
- a savings of UP TO 30%!

NATIONAL REACH

With this Network plan, you can order a customized selection of local magazines with the convenience of a single national magazine buy. Select the markets *you* need — *without* the waste circulation of national publications. The more CRMA Network magazines you buy, the greater your discount! (Maximum discount based on 20 magazines.)

NATIONALLY SYNDICATED READERSHIP STUDY

Both primary audience surveys and a nationally syndicated readership study demonstrate the efficiency of a Network buy. According to MRI (Fall 1983), our City/Regional Magazine Group reaches 17,229,000 adult readers every month — one out of every 10 Americans! Only 14 national magazines have bigger audiences...only 11 reach more men...only six reach more managers and professionals...and only three reach more readers with household incomes of $50,000 or more. NO SINGLE PUBLICATION reaches, for example, more heavy users of rental car services or more Diners Club members.

UPSCALE READERSHIP

Highlights of the 1983 Don Bowdren Primary Readership Study show conclusively that City & Regional Magazines have the right demographics:

College graduates 54.8%
Top management 24.7%
Management or professional 68.1%
Median household income $48,998

TARGET LOCAL. BUY NATIONAL.

the Salt Lake/Ogden metro area was the ninth fastest-growing in the country. Estimates are that the area grew 9.2% from 1980 to 1983.

Companies such as American Express Travelers Cheques division and Sinclair Oil have established headquarters in the city. To house the accompanying newcomers, the city has had an unprecedented commercial building boom. Attractions for the newcomers include a favorable tax base, which in part allows tax-free warehousing of goods destined elsewhere; a stable, well educated work force; central location, and an intangible but attractive "quality of life."

No fewer than 14 major development projects are either under way or recently completed. A flood of Saudi Arabian capital is spearheading construction of the Triad Center near the city center, as well as the International Center near the expanding airport.

The first Triad Center tenant, scheduled for early next year, will be the many units of Bonneville Broadcasting, the Mormon Church-owned broadcasting giant, which counts KSL tv and radio stations among its family. When completed in 1992, the Triad Center is expected to cover 26 acres, cost nearly $500 million and house businesses, offices and residential units in a complex including a 40-story tower—the city's tallest structure.

Newcomers already in place on the city skyline are the Marriott and Sheraton hotels, to be joined soon by a 24-floor Ramada Renaissance hotel. The Salt Palace, a community sports and convention facility, recently expanded and renovated itself, and other downtown construction includes a new Symphony Hall and a renovated home for the local ballet troupe.

Other high-rise office complexes have also opened recently or are under construction throughout the valley. At least for the present, a minor glut of commercial space exists, resulting in some of the least expensive rental rates anywhere in the nation.

Population growth has brought about renewed retail activity, and the Salt Lake/Ogden area now houses 11 regional shopping malls. Four of those have opened since 1980, and three are located in the heart of the city—two in Salt Lake and one in Ogden.

And while the population has shown steady growth, it has also managed to stay busy. During July, while the nation as a whole was celebrating a drop from double-digit unemployment to a 9.5% rate, Salt Lake's jobless rate had dipped to 7.7%

The decision by Western Airlines to make the Salt Lake City International Airport, the major hub for its system, has brought about major changes in the air transportation picture. The airport recently opened an additional concourse and equipped all gates with climatized second-level loading bridges (made in Ogden). In addition, plans call for the construction of a fourth terminal.

Figures for June, 1983, revealed that passenger counts were up an impressive 16% from the previous year, while air freight tonnage increased a whopping 73%.

Of course, there are blemishes. Utah's wage scale is below the national average, as is per-capita income. Those figures may be tempered somewhat by the above-average family size and large number of youth in the state.

Utah continues to lead the nation in the number of bankruptcy filings. Chapter 11 reorganizational petitions increased nearly 50% in the first six months of 1983, compared with the previous year, and Chapter 13 personal filings were up 63%.

Still, besides the increased commercial activity, there are many areas of optimism for the local economy. Utah's mineral and energy reserves—primarily low-sulfur coal—are a potential windfall. Pacts are being drawn to ship huge quantities to the Orient, a move that would boost the mines and railroads of the region.

Tourism and recreation will continue to expand in the near future. World-class ski resorts are located just outside the city, and the accessibility is a big plus to sportsmen. At least three major resorts are being developed, and others are being expanded and enlarged.

Three vhf tv stations cover the network spectrum, while an independent uhf also shows respectable numbers. A construction permit has been awarded by the Federal Communications Commission for another station. Salt Lake/Ogden is also something of a rarity by having two noncommercial stations broadcasting—both vhf.

Through a system of translators, relays and cable, Salt Lake tv and radio signals are distributed throughout Utah and into sizable portions of six surrounding states. The Salt Lake area of dominant influence is geographically the largest in the nation.

Three daily newspapers—two in Salt Lake and one in Ogden—serve the metro area.

Tucson, Ariz.

Population '80	531,443
Rank	78
Est. income '82	$4,966,356,000

Like other Sunbelt markets, Tucson is spreading out as it grows. The market takes in all of Pima County in southern Arizona and covers 9.240 sq. miles. It has more than 90 shopping centers, with several more in the works.

To be sure, much of that territory is agricultural land or empty space, populated mainly by desert plants that bloom gloriously in the spring. They had plenty of water this past fall, as sudden record rains washed out several outlying communities and cut Tucson off from its main trading partner, Phoenix. But local officials say the September/October storms won't have any lasting effect on the economy.

"It was just a freak thing that didn't affect many people at all in the main part of the market," said Steve Vierck, manager of urban affairs for the Tucson Metropolitan Chamber of Commerce. While that comment wouldn't go over too well with families whose homes were nearly buried in mud (and not all of it occurred in Pima County), it is backed up by other government and business sources. They of course do not want to see Tucson lose its momentum as one of the Southwest's fastest-growing markets.

The population of Tucson has grown 31% since 1975, and the market is carving its own place in the Sunbelt with an influx of relocating companies and new ones springing up, mainly in electronics and high-tech areas. The market is also a popular retirement destination, with most of the newcomers arriving from California and Michigan. An estimated 25% to 35% of the market is "retired households," according to a survey by Tucson Newspapers Inc. and the Valley National Bank of Arizona.

There is also a large college market within the Tucson MSA boundaries. Enrollment is averaging close to 55,000 at the University of Arizona and Pima Community College.

With the bulk of the market's population—working people—sandwiched in between, the median age of the Tucson market comes out to 29.7, according to the newspaper and bank survey.

The survey also indicates that Tucson folk are spending less time shopping in Phoenix—about two hours northwest of Tucson—and instead are finding what they want in Tucson. Retail sales in the market were $735,000 in 1970, $2.2 billion in 1979 and $2.45 billion in 1980. Retail sales for 1985 are projected at $5.1 billion.

The U.S. government is the largest employer, with Ft. Huachuca, an Army base, leading in employment (11,065). The University of Arizona comes next, with 9,078 employes as of 1982, and Davis-Monthan Air Force Base is listed third with 7,125 employes. Two other local and national government employers—Tucson Unified School District and U.S. government civilian branches—follow. The market is heavily institution-oriented in employment, though local leaders tend to play down the military influence on the market while stressing industrial growth.

Magna Copper Co., Phelps Dodge Corp. and International Business Machines Corp. are the three commercial entities appearing in the top 10 of Tucson employers, and Magna's appearance should come as no surprise. Mining is one of the main civilian industries in the market. According to the U.S. Department of Interior's Bureau of Mines, 10 of the 15 leading copper mines in the U.S. are located in Arizona, and four of those, including Magna and Phelps Dodge Corp., operate extensively in Pima County, the Tucson market. Falling copper prices, however, have resulted in a drop of production value from a record high of $915 million in 1979 to $869 million in 1980. But that 1980 level was still 46% higher than the 1978 level.

Tourism was off slightly to about $700 million in transportation, lodging, food and other expenditures during 1980-81, according to estimates. This was blamed on the general economy. There was also, more recently, blame placed on the effect of the Mexican peso devaluation, which kept normally robust Mexican visitors and consumers at home. They still have easy access to the Tucson market from the interior of Mexico via Aeromexico, which chose Tucson as its Arizona destination during the 1960s.

The market has four daily newspapers (if you include the University of Arizona's *Daily Wildcat* and the legal Daily Reporter), seven tv stations, and 12 am and six fm radio stations.

Pacific

Anaheim-Santa Ana, Cal.

Population '80	1,932,709
Rank	15
Est. income '82	$29,158,500,000

The optimistic economic outlook in the Anaheim-Santa Ana-Garden Grove market, as expressed by the business leaders of Orange County early this year, appears to have been well founded. The recession has begun to fade, leaving this burgeoning market with such problems as congested transportation, inadequate airport facilities and high unemployment, which is still the lowest in California.

While unemployment reached 10.8% nationally and 11.1% for the rest of the state, Orange County's high thus far has been 8%, evidence that it made its way through the recession with relative ease.

And the market's economy is probably healthier than the national average, thanks to the great diversity of businesses located here. Many of them are new high-technology plants that are undermining the dominance of aerospace industries, which provided 36% of all manufacturing employment in 1982. Computer companies expanded payrolls by 63% in the latter half of the 1970s, a pattern followed by communications and electronic equipment makers. It is estimated that Orange County will receive about $13 billion in defense and aerospace-related federal contracts in 1983.

There are more than 500 electronics companies in the market, one of the eight biggest concentrations of such plants in the country. Radio and tv equipment led manufactures in 1981, followed by computer equipment, oil field machinery, aircraft equipment and nonelectrical components. Japanese plants, including Toshiba, Mitsubishi, Yamaha USA and Ricoh, have opened in recent years.

Top employers in the market include Hughes Aircraft with 13,600 employes, Rockwell International (10,000), Pacific Telephone (8,000), McDonnell Douglas Astronautics (5,600), Beckman Instruments (5,385), Disneyland (5,000), Fluor Corp. (5,000) and Smith Tool (5,000).

Although Orange County is not home base for any of the major energy-producing companies, three of the market's largest corporations—Baker International ($2.5 billion in revenues), Smith International ($1.2 billion) and Varco International ($100 million)—all depend on oil exploration as an outlet for their goods and services.

Migration into the area continues, but at a slower pace as newcomers are met by out-of-reach housing prices. Average price of a new home is about $260,000 and that of a resale about $135,000. The Economic Development Corp. has all but stopped soliciting new business to the area, yet new endeavors continue to move in.

Santa Ana, the county seat and second largest city in the market behind Anaheim, is making a massive effort to upgrade a somewhat worn image with the development of a new $14 million world trade center, a multimodal transportation center, and a refurbishing of many of the existing old buildings around town. The transportation center will be a main station for both Amtrak and the new high-speed "bullet train," which is scheduled to travel between San Diego and Los Angeles starting in 1988.

The recent opening of the new world trade center emphasizes developers' aims of becoming a major force in international trade. More than 25% of the businesses in Orange County are reportedly involved in foreign trade, with one out of seven local jobs dependent on it.

Elsewhere, executives at John Wayne Airport are preparing a 20-year master plan with an environmental impact study that forecasts annual increase in airport traffic from 2.6 million passengers today to 6.1 million and then on to a peak of 8.1 passengers per year. But the airport's 905 acres are already congested and lack land for expansion.

Costa Mesa's South Coast Plaza is said to be the largest regional shopping center in the U.S. and contains such prestigious department stores as Neiman-Marcus, which has chosen the plaza and the Newport Center/Fashion Island in Newport Beach as the site of its West Coast stores.

Tourism is another big plus for Orange County's economy. Home of Disneyland, Knott's Berry Farm, the California Angels and the Los Angeles Rams, the area offers varied sports and entertainment. Expansion projects were recently completed at the area's theme parks, as well as at the Anaheim Convention Center, where new hotels are rising and on the drawing boards to handle increased visitor traffic. A record-breaking 160 conventions and 720,000 convention delegates are expected to use the facilities this year.

In addition to the spillover coverage by the major metropolitan daily newspapers in neighboring Los Angeles County, the area has four major dailies, 20 independent weeklies and another 30 weeklies published by chain newspaper operations. There are also numerous other ethnic, student and business publications; two am and seven fm radio stations; three tv stations and eight cable services.

Fresno, Cal.

Population '80	514,621
Rank	84
Est. income '82	$5,426,369,000

To most Californians, Fresno, located just about halfway between Los Angeles and San Francisco, has been the state's outback. But although it is located in the most productive agricultural county in the world, according to the local chamber of commerce, it is shedding its farm image and taking on a boom town look.

According to a new report by the National Planning Assn., Fresno County is among the five California counties expected to see the "most growth in the absolute number of jobs" by the year 2000. And the economic upturn is already taking effect.

In August, Macy's opened a $28 million department store in a Fresno shopping mall and of the 500 employes, all but 35 were hired from the local area. *Fresno Bee* business editor Ted Reed said the new store is probably the most significant business event for Fresno in 1983.

"What it did was elevate the level of mass marketing because of the Macy's image," Mr. Reed says.

According to Mr. Reed, the location of Macy's in a shopping mall away from the downtown was a sore point in the store's development. The city council and chamber of commerce had wanted the new store to locate in the downtown area, but Macy's planners were adamant that the mall was more suitable.

"County services and other offices are located downtown, but shopping has gone to the malls," says Mr. Reed, pointing to a lack of development in the downtown area.

In October, a $20 million 322-room Centre Plaza Holiday Inn was opened, bringing in an additional 400 jobs. Other hotels in the city saw a strong increase in business. The 167-room Ramada Inn had an occupancy rate of about 93% during the summer, compared with 78% the summer before.

Fresno is the only city in the United States within a two-hour drive to three national parks. With Yosemite's natural wonders only 94 miles away and Kings Canyon and Sequoia National Parks within easy driving distance, it has become a stopover for travelers from throughout the state.

One sour note for Fresno was that after years of being one of the top five test markets in the nation, it was dropped altogether from the influential Dancer Fitzgerald Sample test market list in 1983.

Mike Robbins, account executive with Theilen & Associates, one of the major ad agencies in town, says that because Fresno has been geographically isolated, with a minimal media spillage from San Francisco or Los Angeles, it has been used to test everything from cigarets to detergents. The reason given for its elimination as a test market, says Mr. Robbins, was that media rates were not consistent with the rest of the country. In particular, Fresno's tv ad rates were allegedly higher than similar markets elsewhere in the country.

Fresno's financial base is the multibillion-dollar agricultural industry, including cotton, almonds, rice, wheat, grapes, citrus fruit and cattle. But California's harsh 1982 and 1983 winters took their toll on many of these industries.

Late plantings and crop destruction from record rains resulted in losses estimated at between $275 million to $300 million, according to the state's Department of Food and Agriculture. And when the agricultural industry hurts, jobs hurt, with youth and minorities particularly hard hit.

The region does have a large minority population, with 30% of the people having Hispanic surnames. The Fresno area of dominant influence has the 11th largest Hispanic community in the U.S., according to Strategy Research Corp., Miami.

The warm Mediterranean climate that Fresno offers and its closeness to mountains and lakes have made participatory sports and activities a large part of community life. Fresno has a symphony, several theaters, one of the most progressive zoos in the state, an arts center and a new Metropolitan Museum of Art, Science and Natural History.

The market is served by two major

daily papers, the *Fresno Bee* and the *Clovis Independent*. There are three network tv affiliates, a SIN International Network Spanish affiliate and several independent tv stations. It has 21 radio stations, including 10 am signals.

Honolulu, Hawaii

Population '80	762,565
Rank	56
Est. income '82	$8,094,301,000

If you grew up in Honolulu in the 1960s, you were sure to come across old 45 rpm discs bearing the label of "49th State Records." The local company that put them out had jumped the gun a bit.

Through some adroit political machinations, Hawaii's nonvoting congressional delegation overcame opposition by choosing to let Alaska go first when the question of statehood came up for consideration in 1958.

Such was the genesis of Hawaii's becoming the 50th, not the 49th, state in the union in March, 1959.

That was nearly 25 years ago, when Honolulu—the island of Oahu, really—was more or less a sleepy tropical metropolis, though one filled with the potential that would transform it into a vibrant and alluring urban phenomenon.

It has been alluring enough for Honolulu's population to grow by more than 250,000 in the years since. Currently, the Honolulu market area accounts for about 80% of the state's population.

As Hawaii steps into its silver jubilee year, Honolulu is a market at the hub of transition. The influence of agriculture—mainly sugar cane and pineapple growing—has waned steadily in the 25 years since statehood. From 1940 to 1980, according to the research department of the First Hawaiian Bank, the sales value of sugar and pineapple as a percentage of the gross state product dropped from 38% to 7%.

To fill the vacuum, the state's economy has diversified into one based primarily on service industries. Long known for its natural beauty laced with exotica, Hawaii has become one of the world's leading tourist destinations. No surprise, then, that tourism and tourist-related businesses are the No. 1 revenue producer in the state today.

In 1982, Hawaii recorded 4.2 million visitors, the most ever and an increase of 4.3% from the previous year. Through July of this year, the visitor count reached nearly 2.6 million, up a slight 2.6% from the same period in 1982. Honolulu, of course, serves as the primary arrival, accommodation and departure point for most of these visitors.

But tourism and its attendant problems—sensitivity to economic cycles and the sometimes disconcerting paradox inherent in mixing natural beauty with man-made developments—have led state and local leaders to seek an even more diversified base.

One current topic of considerable interest is the luring of high-tech industries to the market, something that has gained a kind of cachet in various areas throughout the country.

Heightening interest in this area was Castle & Cooke's recent purchase of a 20% interest in Intelect Inc., the state's leading high-tech company. C&C, which owns large parcels of land through its long-standing Dole pineapple operations, has developed a program of land-cost subsidies for companies locating in its proposed Mililani high-tech park, 10 miles from the Honolulu city limits.

According to First Hawaiian Bank estimates, currently there are about 142 high-tech businesses accounting for $200 million in annual revenues and 4,000 jobs in the states. The state has committed itself to increasing these numbers through its support of a body called the High Technology Development Corp., which was created to promote the development of high-tech facilities by helping in site selection, construction and issuance of revenue bonds.

Supporters of this approach to diversification point to Hawaii's central location, between the Mainland and the Far East, as a prime advantage to developing high-tech interests. But all of this is not likely to come easy. Business interests in Honolulu and the state single out "restrictive" laws and taxes as needless obstacles to furthering development.

An acidic *Forbes* article in January reflected this argument: "The 'paradise' state is a veritable purgatory for business, with a stagnant agricultural economy and a powerful political and labor union bureaucracy that has smothered attempts at industrial development."

Indeed, both the city and state have had a long tradition of liberal politics often antagonistic to business interests. But indications are that state and local leaders are lending a more sympathetic ear to promoters of business, especially as Honolulu emerges from the recession hard hit, though not as hard as many more industrialized markets.

The economic effects of the recession, as with other events, hit Honolulu later than the Mainland. But the market is recovering. The unemployment rate in Oahu stood at 5.9% in July, down from 6.2% the year before (the Neighbor Island rates were higher). Construction, however, has slowed a bit, dropping by 2.3% through June to a value of $677.9 million from the same period in 1982.

One market condition that could hamper efforts to expand business in Honolulu is housing cost, among the highest in the nation. The average price for a single-family home on Oahu stood at $182,600 in July, and the figure keeps escalating.

Nevertheless, if the last 25 years have proved anything, it is that Honolulu continues to attract more residents and businesses, those seeking pleasant tropical surroundings and an outdoor life style.

Honolulu is served by five daily newspapers (including ones serving the Japanese, Korean and Chinese communities), five tv stations (including three network affiliates and one public broadcasting station), 17 am and nine fm radio stations and two cable services.

Los Angeles-Long Beach, Cal.

Population '80	7,477,503
Rank	2
Est. income '82	$53,359,755,000

Business analysts are already weighing the economic impact of next summer's Olympic Games in the Los Angeles-Long Beach market, but by any measurement, the significance of the XXIII Olympiad in this market should be enormous.

In addition to preparing the scattered sites for 20 or more separate athletic events, the city fathers and organizers have spearheaded some frenetic activity aimed at presenting the best of all possible appearances for the area. The huge, sprawling MSA includes all of Los Angeles County and covers 4,080 square miles, 75 miles from north to south and 70 miles from east to west.

In late October, word was released that the $272 million construction project to add new terminals and roads to Los Angeles International Airport will be completed on target, before the start of the Olympics next July 28. With other improvements being paid for by the airlines, including the new $100 million United Airlines terminal, the total bill for the refurbishing could hit $750 million. And as the countdown to the start of the games progressed, the Los Angeles Olympic Organizing Committee (LAOOC) reported a total of 30 individual sponsors, as well as licensees for everything from beer mugs to playing cards.

The Los Angeles-based Economic Research Associates, hired by the LAOOC, estimated the over-all economic impact of the Olympic games at $3.3 billion. This includes all of Southern California (the five-county area), although a bulk of the money—$948 million—would be in Los Angeles County.

One of the sports-oriented work projects not directly related to the Olympics was the new $100 million, three-to-five-year expansion program at Hollywood Park racetrack. Work on the $30-million first phase is now under way and is scheduled for completion by November, 1984.

Visitor facilities in Los Angeles may have been a bit spotty before, but the new downtown appears to be getting its act together as the area's prime hospitality center, with an eye on the upcoming Olympics, of course. Supporting this objective this past spring were such openings as the Sheraton Grande hotel and the magnificent Crocker Court complex, new restaurants and numerous other services.

But the steady decline of retail sales in the downtown area over the past decade was recently highlighted when May Co. California said it will move its corporate offices from its downtown building to a remodeled flagship store at Laurel Plaza in North Hollywood. The company said it would keep its downtown store open, but other retailers, including the Broadway, have moved west toward the Harbor Fwy. Declining sales also forced the closing of Bullock's downtown store in June, after 75 years.

Except for the bankruptcy and closing of Schwab's Pharmacy, the 51-year-old Sunset Blvd. soda fountain where new screen stars were said to be discovered and Hollywood legends were born, the movie-tv-entertainment business appeared to be booming. Among the tv producers looking for yet other profitable investments—some outside the state—were MCA Inc. and Lorimar.

Meanwhile, total employment in Los Angeles fell by 2.4% in 1982 from the previous year, with manufacturing and construction industries showing the biggest decline. Transportation equipment factories showed the largest losses of any major industry group, with motor vehicle and the aircraft and parts sectors accounting for most of the job losses.

But after two years of job declines and the worst unemployment since World War II, there are signs the Southern California employment outlook is brightening. Hughes Aircraft, Northrop, General Dynamics, Rockwell International and other aerospace companies are hiring thousands of engineers for new defense projects. Major supermarket chains, department and discount stores and other retailers are staffing up and expanding payrolls to take advantage of the emerging recovery. For all of 1983, about 175,000 jobs will have been added in Southern California, with employment accelerating to 250,000 in 1984, say economists.

In the high-tech area, about 268,000 workers are involved in making such products as space vehicles, missiles, aircraft and parts. And in one of the biggest industrial transitions in this century, 225,000 jobs in the manufacture of computer and electronic equipment were created in Los Angeles in only a few decades.

Among the area companies that reported heavy losses in the volatile videogame and home-computer business was Mattel Inc., which attributed a $156 million loss in the second quarter this year to its electronics division. On the other hand, Los Angeles-based Western Airlines, prepared to file for bankruptcy five years ago, has made some drastic cost reductions and streamlined its management and appears on the road to recovery.

The Ports of Long Beach and Los Angeles appear ready to dominate U.S. international trade in the decade of the 1980s. The Port of Long Beach, recognized as the West Coast's leading seaport, posted a record 4,650 ships carrying nearly 50 million metric tons of cargo and the number keeps growing. A commitment to the shipping needs of the next several years has sparked a five-year, $500 million capital development program at the Port of Los Angeles, second busiest passenger port in the U.S., with shipments of 39.9 million metric tons of cargo also recorded for 1982-83.

Adding to the luster of the revival of downtown Long Beach were the recent openings of the $60 million Hyatt Regency hotel, the $15 million IDM building, the $7 million Shoreline Village and the $60 million twin Arco office towers. Altogether, these projects are expected to add 17,000 jobs to the once moribund downtown area.

Developers are putting up condominium and apartment projects in downtown Long Beach at a record pace, with more than 500 such housing units in 14 separate projects either pending approval or under construction. One spur toward development has been the decline in interest rates for mortgage bonds, plus the over-all development of downtown Long Beach, an area that covers six square city blocks, or 421 acres of the central business district. More than $1.2 billion in new construction is committed, and that figure is expected to rise to $3 billion by 1990.

The rich and varied media mix serving the Los Angeles-Long Beach market includes 22 daily newspapers, four of which are considered major metropolitan papers that extend beyond the market; more than 150 weeklies produced by 35 different newspaper chains; 21 am and 26 fm commercial radio stations; seven vhf and five uhf tv stations; 24 cable tv companies providing service to the metropolitan area and outlying communities, and a wide variety of ethnic, student and business publications and city magazines.

Oakland, Cal.

Population '80	1,761,759
Rank	20
Est. income '82	$25,091,535,000

It has taken more than 100 years, but Oakland, Cal., is finally coming out from under the shadow of San Francisco as its own market.

"If we hadn't been lumped together with San Francisco all these years, we'd probably already have a better image," says John Christenson, manager of the Oakland Economic Development Department. But the image of Oakland, in Gertrude Stein's words, as a place where "there's no there there," is a haunting one, and the new Census Bureau breakdown of Oakland as its own market could go far to aid the city's image.

"There is a definite trend of businesses moving out of San Francisco and into Oakland," said Bruce Koon, business editor of the *Oakland Tribune*. It's been marked in 1983 by the

move or announced move of at least five major companies, including AT&T Information Systems moving its West Coast headquarters to Oakland, Equitech Financial Group, Sperry Corp. and IMS (a major holding company) all relocating to Oakland. Matthew Bender & Co., a major legal and accounting publishing company, is moving its headquarters to Oakland in early 1984.

Other major companies already headquartered in this East Bay city include the Clorox Co., Safeway Stores and Kaiser Industries.

Two of the key factors encouraging businesses to make the move to Oakland are its excellent transportation and available housing. It puts companies, employes and "affordable housing" in reasonable proximity, according to Mr. Christenson. Oakland is headquarters for Bay Area Rapid Transit (BART), a high speed rail system that has connected Oakland not only with San Francisco, but with all points of this sprawling market.

Because of the tremendously high cost and low availability of housing in San Francisco proper, it has been common for San Francisco workers to live on the opposite side of the bay and make the 20-minute commute.

At the Oakland Airport a new commuter terminal is scheduled to open in early 1985, linking the area even more conveniently with Los Angeles and other points in Southern California.

Located on the mainland-side of the San Francisco Bay, Oakland is a unique city in many ways. It is one of the few cities in America with a majority black population, and often "black" and "poor" tended to come across in the same breath. But it's not necessarily so. In Oakland, ethnic diversity crosses all classes and economic levels. Oakland has a large and powerful black middle to upper middle class, which has had a significant influence in business and politics.

Perhaps one of the most glamorous signs of a cultural and business "renaissance" in Oakland was the opening in 1983 of the Oakland Hyatt Regency hotel. For October, the new hotel had 62% occupancy and expects to see that improve throughout 1984.

Other hotels are expanding and remodeling as fast as they can, hoping to pick up more of the expanding visitor and convention business, which saw 49,000 convention delegates in the city this year.

The Port of Oakland, a major West Coast facility, is just completing a 20-year modernization program that has turned the port into the second largest containerized port in the U.S.

But for all that has happened in Oakland, there are still projects that have not come to fruition. As an example, Mr. Koon cites the announcement two years ago that Bechtel Corp. would be building its new headquarters in Oakland, but when economic hard times hit, those plans were stalled.

Another area that has not yet felt the surge of new dollars is the downtown retail enterprises. Between the regional shopping malls and the pull of the classy downtown San Francisco stores just minutes away, retail expansion has been at a virtual standstill.

One major change on the media scene in Oakland this year was the sale of the *Oakland Tribune/East Bay Today* by Gannett Co. to a group headed by Robert Maynard, who had been editor of the paper.

Oakland's primary daily newspaper is the *Oakland Tribune*, but it is served by both the *San Francisco Chronicle* and the Brown Publishing Group. It has one tv station of its own—independent KTVU—but is served by all the San Francisco-based stations. Radio stations include three am and one fm station, in addition to signals received from San Francisco stations, and Oakland is wired by one cable company.

The economic difficulties that have engulfed the rest of the nation somehow seem less noticeable in Ventura County. That's probably because a diversified economy that includes agriculture, government and military employment—as well as an expanding light industry and business base—have helped to minimize the over-all effects of the passing recession on this Pacific coastal market.

The area continues to absorb the overflow population from neighboring Los Angeles and the San Fernando Valley, but there are signs that controls on new housing and commercial development may be making an impact. Thousand Oaks, near the county line, and Ventura, the county seat, have already enacted growth control ordinances limiting residential construction. On the other hand, Simi Valley and Camarillo have been the most popular areas for recent growth, including new high-tech companies, because of the "open door" policy that prevails for major new industrial plants.

Although 1982 was an off year as far as new construction was concerned, a surge of activity at the end of the year buoyed optimistic hopes for a rebound this year. About $50 million in new projects that would boost the sagging building industry has been launched by Oxnard businessman Martin V. Smith. It includes a $2 million renovation of the Oxnard Produce Center, which would generate 1,000 new packing and farm-related jobs in the city.

The past year was one in which many long-planned or proposed projects took shape and moved ahead in the revitalization of downtown Oxnard. Among these programs was the start last spring of the $34 million Ocean View office high rise, a 12-story office and retail center that represents just the start of more than $200 million in planned construction in the business district.

Over-all economic hard times nationally had no visible effect in the area in 1982, with shopping malls generally reporting slight sales increases over the previous year. However, the recession managed to keep retail sales from increasing more than 5%.

On Oxnard's retail front, the building that once housed the defunct Fed-Mart store until late 1982 reopened last spring as a Target store, one of 19 such outlets to open its doors in Southern California, creating 450 jobs. Adjacent to the Target, a unit of Dayton-Hudson Corp., Minneapolis, is the site of a new 45,000-sq.-ft. Ralphs supermarket, which is scheduled to open in late 1983. In other retail building activity, Lemon Grove Plaza, a $5 million neighborhood shopping center, was completed early this year, and Esplanade Mall, the largest mall in the area and second largest in Ventura County, has begun major additions.

In Ventura, work continued on the downtown sector, much of which has been designated a redevelopment area, and several renovation projects were completed. Military installations continue to have a great economic impact. The Pacific Missile Test Center at Point Mugu has an annual payroll of more that $131 million. Of that, civilian pay is reportedly more than $109 million and about 80% of that figure is spent in the market.

Port Hueneme, the only deep-water harbor between Los Angeles and San Francisco, posted record-breaking profits in fiscal 1982, a reported 58% jump over the district's profits a year earlier.

Port Hueneme, which celebrated its 35th anniversary this spring, is expected to continue to experience increased shipping and cargo business, with most rapid growth coming in the offshore oil support industry based at the port. Movement of drilling supplies rose from 108,000 metric tons in 1981 to 167,000 metric tons last year.

The port's facilities are overcrowded, however, being committed to both deep-draft cargo vessels and offshore oil boats. Because of the space squeeze, the harbor district has launched an aggressive campaign to acquire an adjacent Navy wharf and 26 acres of backup land at the U.S. Naval Construction Battalion Center, the Seabees.

The harbor also supports the port needs of Vandenberg Air Force Base in the space shuttle program, the army's National Training Center at Fort Irwin and naval construction projects in the Pacific. The total economic impact of the Navy in Ventura County adds up to more than $1.06 billion.

Media covering the market includes some penetration by the big metropolitan newspapers in neighboring Los Angeles as well as five major dailies within the area. There is also considerable radio spillover from Los Angeles and nearby Santa Barbara, plus five am and six fm radio stations within the market. The area is served by tv stations located outside the market, in addition to seven cable services, two of which are based in Ventura.

Like many cities in the Pacific Northwest, Portland is coming out of the recession fitfully. The city's pros-

Asian refugees: An invisible market

By Bruce Williams

There are some 22,000 immigrants and refugees from Southeast Asia living in the Seattle-King County area.

Yet they seem to have dissolved into the manmade thickets of this international city as effectively as they once disappeared among the tropical jungles of their native lands. Moreover, the local business community has made little effort to find them, despite its recent exertions to attract and serve Japanese and Chinese visitors.

Washington was the third most popular destination for refugees and immigrants fleeing Southeast Asia after the Vietnam War; only California and Texas attracted more of the newcomers. During the peak influx, from 1979 to 1980, about 70 to 100 school-age children joined the Seattle School District's bilingual program each week, overwhelming the staff's efforts to place them in the proper classrooms. By January, 1982, approximately 35,000 Asians lived in King County.

But when the Reagan administration cut the length of their resettlement aid from three years to 18 months, an exodus began, which, to date, has shrunk their numbers by about 18%, says Bill Pierre, who chairs a refugee forum of King County.

Those who remain still seem to be invisible. "[The white society] doesn't know where to reach them," remarks Assunta Ng, publisher of the *Seattle Chinese Post*, the city's weekly Chinese-language newspaper. "A lack of knowledge hinders the [few attempts]," she says.

A local merchant who reached out to the Southeast Asians because of his religious convictions agrees. "I'm afraid the attitude is one of distrust and dislike," the merchant says. "They're not being openly accepted unless they have money."

The American businesses that do try to cater to the new market indeed find it confusing and diverse. Roughly 40% of the immigrants are Vietnamese; about 35% of those Vietnamese are really ethnic Chinese. The remaining 60% is a nearly even mixture of Laotians, Cambodians and Cambodian hill people from the Mung and Ming tribes.

"I would be surprised if anyone was reaching out to the [Southeast Asian] market," replies the advertising manager of a large department store here when asked if he was pursuing their business. "It took a while for everyone to get going on the Japanese and Chinese."

Last spring, when United Airlines and Japan Air Lines began nonstop service to Tokyo and Hong Kong from Seattle, doubling the number of flights among those cities, local hotels, stores and restaurants began a concerted effort provide interpreters, international signs and special services.

"We've got interpreters, brochures, menus and handouts in [Japanese, Chinese] French, German, Italian and the Scandanavian languages," says the ad manager. "We've targeted the tourists." He suggests that merchants believe Southeast Asians read neighborhood newspapers, watch local tv and listen to the radio, unlike visitors who stay only a few days.

Ms. Ng sees things differently. She is frustrated that Safeway, which has increased "tremendously" its variety of ethnic foods and has hired some clerks who speak Southeast Asian languages, won't advertise in her paper, which has a circulation of about 5,000. Although the refugee forum headed by Mr. Pierre will for a fee translate advertisements into several languages, Ms. Ng says businesses harbor an "attitude of suspicion" about ads rendered into Asian tongues. Of the city's big advertisers, only Sears has placed ads in her paper, she says.

Tv and radio seem to be media even less likely to reach the Southeast Asian communities. Mr. Pierre says the more affluent Southeast Asians make a videocassette recorder player one of their first big purchases. "American commercial tv is not relevant to them," he explains. They buy tapes out of Hong Kong, where programing in their own languages and related to their cultures is readily available.

Yet Mr. Pierre thinks there are several untapped opportunities to be exploited. He notes that Seattle City Light, the city's electrical utility, has published many of its brochures in the major Southeast Asian languages, and he suggests that insurance companies could sell a large number of auto policies if they made an effort to reach the minority communities.

There are some stirrings of interest among businesses here, however. An advertising executive who handles the regional account for a major fast-food chain recently told the company's marketing staff that Seattle soon may have a significant Asian population.

More important, perhaps, the Southeast Asians seem gradually to be integrating themselves. Mr. Pierre says that the rate of unemployment among the immigrants is showing a "steady improvement," although it remains very high, at 30% to 40%.

Vicki Raider, supervising teacher in the Seattle School District's bilingual program, comments that Southeast Asian children are acclimating themselves rapidly, sometimes so fast that they dismay their parents. She emphasizes that there remains a wide disparity between those immigrants who lived in the cities and were part of the college-educated, professional class and the tribal people who lived among the hills throughout Cambodia and Laos.

"The Vietnamese and Laotians who were on the college level fit right into Western culture. The difficulties are with families that lived in the country on the land," she remarks. "Parents are freaking out. They don't understand their children and their children don't understand them."

Still, for the moment most of the commerce in the Southeast Asian community is conducted by neighborhood businesses, which, Mr. Pierre hastens to point out, are not just food stores or shops selling traditional cooking utensils and clothing.

"There's a new, large number of Southeast Asian businesses," he says. Until they become a significantly larger economic force, however, there is not likely to be much of an effort to reach them or their customers.

Bruce Williams is an ADVERTISING AGE correspondent in Seattle.

perity always has been heavily dependent on the fortunes of the wood products industry, and relatively recent diversifications into high tech haven't dampened significantly the roller-coaster rides on which the housing cycle periodically takes the Portland economy.

Tektronix, which makes video display products, oscilloscopes and other computer-related hardware, remains Portland's major industrial employer, and the past couple of years haven't been very good for the $1.2 billion company. Earnings have been flat, and an austerity program continues to reduce employment at the company, largely through early retirement programs and a hiring freeze. Tektronix currently has about 117,000 workers on its payroll in the Portland area; employment dropped by about 300 in the company's first fiscal quarter and should continue downward through the year.

The company's results improved significantly in the first quarter, however, the most promising statistic being an alltime record for first-quarter orders, which totaled $300 million.

Over-all, the unemployment rate in the Portland area improved steadily in the first half of the year, dropping from 12% in January to 8.9% in June, but rose a full point in July, to 9.9%. The rate declined again in August, to 9.8%. Still, state officials said employes remain cautious and prefer increasing overtime to hiring new workers.

The recession, which hit Oregon harder than its neighboring states, is illustrated by a couple of startling statistics. In 1982 Oregon's population declined by 4,550, the first year-to-year loss in the state's history. State officials expect population growth to average about 1.2% a year in the 1980s, less than half the 2.6% rate achieved in the 1970s, when many residents tried to dissuade people from migrating to Oregon. Total nonagricultural employment in Oregon has dropped by more than 90,000 from the 1979 peak of 1.05 million.

Yet development continues, even in the face of gloomy conditions. The office vacancy rate in Portland reached 16.9% in June, the fourth highest rate recorded in 24 major cities in the nation, but developers have been undeterred; 1.2 million sq. ft. of office space was added in the metro area in 1982, and this year another 1.4 million sq. ft. are slated to rise amid Portland's skyline.

Cornerstone Development Co., a Seattle company owned in part by Weyerhaeuser Real Estate Co., plans to develop the $83 million South Waterfront Project along the Willamette River in downtown Portland. The project features 51 residential units, a luxury hotel, two restaurants, retail shops, an athletic club and a marina for 207 boats.

Residential building activity also soared this summer, with the number of building permits issued in the Portland area rising 91% in June, compared with weak figures from a year ago. The area continues to account for almost all of the single-family homes being built in the state.

Trade and travel have emerged as particularly bright spots in Portland's economy. Since airline deregulation began, 10 airlines have started service at Portland International Airport, and after three years of declining traffic, 1983 may prove an exceptionally good year, with passenger counts exceeding the record set in 1979. As part of its major expansion into international service, United Airlines has begun nonstop service from Portland to Tokyo, eliminating the need for travelers to stop first in Seattle. A new master plan for the airport terminal envisions a three-phase expansion of the facility that initially would permit the airport to accommodate 5 million passengers annually. Later additions and modifications would allow the airport to handle up to 12.5 million passengers annually, or three times the current level.

The visitors bureau at Portland reported that the number of visits to its office jumped 24.2% over last year in August; most of the new tourists came from California and Canada, but 21% of the 7,705 visitors were Oregonians.

The Portland area is served by seven tv stations and a cable franchise, 27 radio stations and one major daily newspaper, the *Oregonian*. Specialized business and neighborhood papers publish on a variety of schedules.

Riverside-San Bernardino, Cal.

Population '80	1,558,182
Rank	24
Est. income '82	$17,497,223,000

Promising commuters from adjoining Los Angeles and Orange Counties a refuge from smog and high-price housing, the Riverside-San Bernardino-Ontario market has begun to live up to its billing as one of the "fastest growing" markets in the U.S.

It's a boom that real estate brokers and construction executives attribute to overcrowded conditions in the neighboring markets.

They say it leaves the two-county market (San Bernardino and Riverside counties) as the next obvious area for growth and expansion in Southern California.

This is evidenced by a resurgence in the housing industry; this spring, housing starts outnumbered those of Los Angeles for the first time. Current residential building contracts are running 81% ahead of 1982. Over-all growth of the market has averaged 3.1% annually from 1970 to 1980, according to the U.S. Census Bureau.

While spillover from Los Angeles and Orange counties accounts for much of the growth, lower housing costs, fewer constraints on land use, a favorable mixture of industry likely to experience expansion and defense growth (MX missile activity at Norton Air Force Base) are contributing factors.

The market also has an advantageous position as a central distribution center. Riverside, for example, stands at the convergence of three railroad lines and many major freeways intersect the area. During the economic downturn of the early 1980s, Riverside County actually increased the number of retail business establishments, adding 626 new businesses, and it also added 113 new plants or companies to the roster of manufacturers.

Ontario International Airport is already the third largest volume freight distribution airport in California, with 14 regularly scheduled carriers flying in and out in increasing numbers. Airport sources predict passenger traffic for 1983 will hit near 2.4 million for the best year in the facility's history.

Near-term growth in the market is expected to take place in western San Bernardino County, which has adopted a "pro-growth" attitude and is offering the availability of industrial development bonds and building grants. Most likely growth areas are the western communities of Ontario, Rancho Cucamonga, Fontana and Montclair, where the market's transportation assets all come together.

The western part of the market is the site of numerous future industrial and commercial developments, such as the Chevron Land & Development Co. Ontario International Center, located at the former Ontario Motor Speedway, and Ontario Industrial Partners' 1,350-acre Commerce Center just east of the airport.

But because the Interstate Hwy. 10 corridor between San Bernardino and Redlands is a more attractive place for executives to live, some economists say the area may have more potential for commercial and industrial growth than the Ontario Airport area. In comparing the east and west San Bernardino Valley, the airport is a key factor in stimulating land sales, but the east valley has the same cheap land, large parcels of it and good access to freeways.

Meanwhile, the era of steelmaking and auto racing, once two of the market's most notable activities, finally came to an end this year with shutdown of the last blast furnace at the Fontana mill of Kaiser Steel and demolition of the Ontario Motor Speedway, the so-called "Indy 500 of the West."

The Kaiser shutdown eliminated 700 jobs and yet another 2,000 employes are scheduled to be laid off by year's end.

Demolition of the 80,000-seat Ontario Motor Speedway, a site now owned by Chevron Land & Development Co. and where attendance was declining, began in July, a project that by the end of the year will leave the land ready for Chevron's planned $1-billion, 8 million-sq.-ft. commercial/light industrial/residential development. It's a project that's expected to add at least $12 million in annual revenue to the City of Ontario's operating budget.

The City of Riverside stands in the middle of the explosive growth taking shape in the market. The city and county are headquarters for such industrial companies as Bourns Inc., a leading manufacturer of critical measurement instruments; Fleetwood Enterprises, largest manufacturer of mobile homes and recreational vehicles in the U.S.; Butcher Boy Frozen Foods; the Moistomatic divison of the Toro Co., which manufactures sprinklers, and grocery wholesaler A.M. Lewis. The county's largest industrial employer is Rohr Industries with more than 2,000 employes. Rohr is one of the nation's largest manufacturers of aircraft engine pods and high-tech engine components for rocket and aircraft engines.

Riverside is also a vital part of the nation's defense operations. The Air Force command center for all bombers and missiles covering the western states and Pacific area operates out of March Air Force Base, the oldest field on the West Coast, covering 8,000 acres east of the city.

Media serving the market includes three major daily newspapers (plus spillover from neighboring Los Angeles) and 12 weeklies; four am and two fm radio stations; two tv stations and three tv cable services.

Sacramento, Cal.

Population '80	1,099,814
Rank	37
Est. income '82	$13,594,799,000

While other California cities have gone wild with high-technology growth industries, Sacramento may be developing into the biotechnological capital of the future. Already two major genetic engineering companies—Calgene and Plant Genetics—have moved into the Sacramento area, and experts point to the tremendous intellectual resource of the University of California at Davis, a nationwide leader in agricultural research, as a major lure to new biotech companies.

Although so far no biotech company has made money, venture capitalists are betting millions that current research will turn this into a multi-billion-dollar industry.

But by no means has Sacramento turned away from the high-tech companies. In fact, according to a Bank of America survey, Sacramento is the No. 1 market cited by Silicon Valley companies when it comes to discussing their expansion plans.

A proposed sports complex would include a stadium with a capacity of 55,000 and a 17,000-seat arena.

A group of investors, led by the current owners of the National Basketball Assn.'s Kansas City franchise, has proposed building the facility at no cost to the city, but construction depends on rezoning agricultural land in the northern part of Sacramento.

The new stadium, if approved, would pave the way for a major sports franchise to come into the Sacramento market.

Reasonable land costs have put the average price for an existing single family home at about $79,000 in 1983, which is $35,000 less than the California median house price and $42,750 less than the median for California's coastal metropolitan counties, according to the California Assn. of Realtors.

The tourist industry in Sacramento has taken a mighty leap. Once Sacramento, although historically interesting and the state's capital, was simply a stopping point for travelers on their way to Lake Tahoe or the Sierras. The lovely weather and many attractions of the area, however, brought in over 10 million tourists in 1983. Income from the tourist industry should reach $500 million this year, with projections of a 10% increase in 1984.

Traditionally, because government has been the largest employer in the region, with trade and services, the employment rate has been vary stable. In 1983, however, the unemployment rate hit a high of 11.5%, and although predictions call for a decline to about 9.9% in 1984, it is a result of the seasonal nature of the agricultural industry, which pushes the rate way up during the winter months.

On the industrial front, Hewlett-Packard has built the first of several plants that the company expects to construct in the community of Roseville. Currently about 1,000 employes are working there, but tentative plans include a future 500-acre complex that could employ up to 23,000 people.

One side development of the high-tech growth of Sacramento and the trend in recent years for city dwellers to move to more rural areas has been the development of a new planned community called Eaglecrest, in the Sierra foothills. According to the economic report by the Bank of America, this may be a glimpse of the future.

Eaglecrest "is designed to create a self-contained community of electronic cottages in the midst of a mountain forest." Each house would be connected by cable so that computer communications between homes and offices would be possible. High-tech workers would have a homework station for "telecommuting" to work. According to the report, if telecommuting catches on, electronic cottages will offer more people the opportunity to live in rural environments while holding well paid professional and technological positions.

Interestingly enough, Sacramento, for all its high-tech look, still has minimal cable tv access. The city reportedly had a difficult time deciding on a cable contractor and now is having a hard time coming up with a contract. Thus cable tv is a minor factor.

The two major newspapers in town are the *Sacramento Union* and the *Sacramento Bee*, both morning dailies. Also, there are five tv stations and a multitude of both am and fm stations. Although local media is not much influenced by San Francisco, the major am stations with large Sacramento audiences are San Francisco-based.

San Diego, Cal.

Population '80	1,861,846
Rank	18
Est. income '82	$21,788,162,000

One way of looking at San Diego is to walk along the ocean side and the bay side of Mission Beach, with a few twists and turns up and down the alleys and narrow sidewalks of this four-mile spit of land between the Pacific and Mission Bay.

Fifteen years ago, Mission was a funky place to live, populated largely by hippies and others trying to make the rent while figuring out what to do with their lives. The landmark Belmont Park roller coaster, in a state of near collapse, was shutting down. Hardly anyone ever wore shoes.

Today, Mission Beach is cute, trendy, in a seemingly constant state of renovation, filled with upwardly mobile young couples with young children—and it's expensive. Even the old roller coaster is being restored. On Sundays, the whole length of Mission Beach is alive with runners, joggers, cyclists and tv sets blaring the San

Golden Gate slowly opens to gay market

By Lynn Berling-Manuel

The San Francisco gay market is coming out of the closet, and business is sitting up and taking notice.

Although there are no "official" data on the percentage of gay people in San Francisco, estimates put it at anywhere from 10% to 20% of the population and higher. But demographics are hard to come by because it is a market segment that crosses all economic levels, social strata, occupations and races.

And although San Francisco may be more upfront and accepting of its gay population than many areas of the country, there are still many gay men and women not excited about identifying themselves.

"Actually, the National Gay Business Assn. is right now looking at a proposal to implement a national marketing study," said Roger Gross, president of the Golden Gate Business Assn. (GGBA), an organization of gay-owned businesses and businesses sympathetic to the gay community.

With more than 700 San Francisco Bay Area businesses within its membership, including some "straight" companies—Crocker Bank, Hibernia Bank and Hyatt Regency Hotel, for instance—the GGBA has become the leading advocacy organization for gay business in San Francisco.

"We're being identified as an entree for business organizations in San Francisco that want to reach the gay market," said Mr. Gross, a practicing local attorney. And there seems to be little doubt of the potential clout of the gay market when mobilized.

Atlas Savings & Loan opened its doors two years ago in the heart of San Francisco's predominately gay Castro Street district. Its advertising and marketing program targeted the gay community specifically, and it has identified itself as a gay institution. And since it opened its doors, it has broken virtually every industry record, going from zero assets on opening day to $80 million two years later.

"Most traditional banks are pleased if they can show $1 million to $2 million in assets after the first year," said Todd King, now manager of Crocker Bank's Castro district branch, but who was hired away by Crocker from Atlas.

Peter Frisch, publisher of *The Advocate*, a national gay newspaper with 83,000 subscribers, confirms the gay market's loyalty to brands and products that have targeted that market. "Our national accounts are coming to realize that, for example, if one of our readers has a choice of several comparable brands of gin and one advertises with us, our gay reader will go out of his way to buy that brand," Mr. Frisch said.

In fact, national advertising accounts have begun to identify the gay market as a viable segment. Besides *The Advocate*, which has more than 17,000 subscribers in the San Francisco Bay Area, the *Bay Area Reporter*, a 14-year-old gay newspaper with 28,500 circulation in and around San Francisco, has also seen such a breakthrough.

"We've certainly had success with certain kinds of companies and products," says Bob Ross, the paper's publisher. Alcoholic beverages, hospital plans and "growing companies" have been key accounts for the *Reporter*, he says.

The Advocate has just received the results of its 1983 readership survey, as conducted by the Simmons Market Research Bureau, and the findings are revealing. Because a large percentage of its readership is in San Francisco, all categories were broken down for San Francisco, as well as its other primary markets. (San Francisco is actually *The Advocate's* third largest circulation area, with 17,000, after New York and Los Angeles.)

The median household income is $42,600 per year for its San Francisco readership, about $8,000 a year higher than its over-all readership. More than half (56.6%) are managerial/professional, 96.2% are employed and 57.5% are college graduates (15.3% have master's degrees and 10% have doctorates).

Another telling point is that the average household size is 2.1 persons, and this explains much of the lucrative potential of the gay market. The trend appears to indicate that often a household is composed of two working people, usually with no children, thus a much higher level of disposable income is available.

But it is not wise to stereotype this market too much. In many cases, as noted by several people interviewed, it's become more common for other family members, such as an aging parent, to move in with a gay son or daughter. Because there are usually no children involved, there can be more flexibility.

The Advocate has targeted three areas for its 1984 advertising sales plans: Personal computers, videocassette recorders and travel. The reason is clear from its survey data, according to Mr. Frisch: Of its readers, 44.2% own a vcr and 36% intend to buy one; 12.5% own a personal computer and 20.4% plan to acquire one. On the travel side, 20% had taken five or more trips in the last 12 months.

But even within the gay market, there are segments.

"We're seeing the emergence in the last three years or so of a distinct gay women's market," notes David Lopez of the San Francisco Chamber of Commerce.

Mr. King, the Crocker Bank manager, concurs. "My experience has been gay women are much more conscientious about their personal finances than gay men. The point is you just can't group everybody together," he says.

There are some pitfalls for products and businesses looking at the gay market. "There can be real resentment, if it's thought that a business has approached the gay market simply for speculative reasons," points out Mr. King. "On the other hand, gays can almost blindly support a business because it bills itself as gay, and a lot of people have been ripped off because of it."

The Castro district's "battle of the banks," as its been dubbed by some of the GGBA members, is an interesting look at companies trying to find a position they're comfortable with in the gay market.

There are six banks or savings and loans within a three block area in the Castro, including Atlas, Crocker, Bank of America and Hibernia, with Atlas apparently king of the hill. It's approach has been to clearly position itself as a gay bank.

Crocker opened its doors in January, 1983. The Castro area was an untested market, but there had been speculation on just how successful a bank in the gay neighborhood might be. So far, virtually all of its advertising has been in gay-oriented media and so far, according to Mr. King, probably 75% of the bank's clientele is gay.

The Crocker powers that be, however, couldn't quite commit themselves to naming the bank the Castro branch, which would have clearly labeled it as a gay neighborhood bank; it pulled up short and named it the Market-Noe Street branch, two nearby cross streets, but not anything that would connote a gay neighborhood.

Still, old ways die hard. There is still great sensitivity about marketing by sexual preference, but like the targeting of blacks or Hispanics, the gay market expects to have an impact.

The closet door will never be shut again.

Lynn Berling-Manuel is a free lance writer in Oakland, Cal.

Diego Chargers football game. There are still a few junkers and modest cars around, and there are still a few "summer rental" signs, but for the most part Mission Beach has become upscale and rather serious about itself.

It represents a facet of San Diego that hasn't yet shown up clearly—that it's a young market moving up rapidly in several business areas.

The market still relies heavily on tourism, but not quite as much as in the past. The only recurring graffiti theme noted in the beach areas is "Tourists Stay Out," or words to that effect. According to the San Diego *Union* and *Tribune*, the tourist business in San Diego had its weakest year in a decade during 1982, when visitors dropped 0.8% from the 1981 level. The nationwide economic recession was blamed.

The San Diego Zoo and Sea World reported attendance decreases in 1982 of 1% and 9.3%, respectively. Business from Tijuana and elsewhere in Mexico was down 6.6% from 1981. This was mainly because of two major peso devaluations during the year. More recently, the peso was devalued again, and the Mexican banks were nationalized, meaning Mexicans and U.S. citizens living in Baja California could visit and shop in San Diego only by exchanging their pesos on the U.S. side at tremendous losses.

Department store sales during 1982 were 12.9% below 1981 in the city and down 9.7% in San Diego County. But business in the beach areas, La Jolla, Del Mar and other communities in the northern part of the market is reported to be keeping pace with past years and growing in several areas primarily retail, including fashion boutiques and restaurants.

This reflects a shift in which housing in these areas is becoming far more for permanent living than for summer vacationers—which in turn reflects the growth in the market of high-tech industries and the relocation of older, established companies. Examples are Signal Cos. (Mack Trucks among its many subsidiaries), which moved its headquarters to the La Jolla area from Beverly Hills, and Wickes Corp. Another is Lexocorp, which has consolidated Los Angeles and Orange County operations in San Diego and is challenging the giants of the computer and word processor industry with a standard electronic typewriter/computer/word processor hookup system.

A recent Office Products and Systems Show at the San Diego Convention and Performing Arts Center had more than 30 San Diego-based exhibitors in computer, word processing and related fields.

Personnel staffing these and other new high-tech and light industry companies come from a population that has grown an average of 3% a year over the past 12 years. The average age as of 1980 was a surprisingly low 28.8, and most of the increase in population (from 1,357,854 in 1970 to 1,861,846 in 1980) was in the 25-to-34 age group.

The market in general didn't sparkle quite so much as its affluent enclaves. Total "civilian" employment was down 1.5% from 1981. "Civilian" is a word used often in San Diego because of its large military population. Government accounted for 20.7% of employment in the market in 1982 and was the third largest employment sector in the market behind services and wholesale and retail trade.

San Diego is a big college market, with 11 separate colleges and universities and eight community colleges. Total enrollment as of 1982 was more than 170,000, including 44,212 in community colleges and 31,265 at San Diego State University. The population, as of the 1980 U.S. Census, also included nearly 200,000 retired people, or at least people over the age of 65.

The shopping center boom in San Diego—from four in 1955 to 193 as of 1982 figures—is helped by the area being so spread out. It takes in 4,261 square miles. There is also income, at last count estimated at an average of $19,501. County sources said it would be safe to speculate that that has gone up considerably since 1980.

According to Copley Newspapers, San Diego ranked fifth in total personal income among the major markets as of 1982 and fourth in income growth from 1980 to 1981.

Like many other markets, San Diego has discovered the charm of its older sections and is making a spirited effort to restore them and clear the way for private developers to play a major role. The main restoration—"renaissance" as local leaders put it—is taking place in downtown San Diego and along the formerly commercial and semiblighted main waterfront.

The San Diego market has two daily newspapers—Copley's morning *Union* and afternoon *Tribune*—plus affiliates of the three major tv networks, one independent tv station, a public tv station and 35 channels available on cable. More than 40 radio stations reach the market from local facilities and from Orange County, Los Angeles and Mexico. There are more than 100 weekly newspapers in the market.

San Francisco, Cal.

Population '80	1,428,836
Rank	27
Est. income '82	$23,008,390,000

San Francisco has been a city without cable cars for almost 20 months, but come June, 1984, the legendary transportation system should be climbing halfway to the stars once again.

The $58.2 million project is scheduled for completion June 1, in time for the Democratic convention, which opens July 16 in the city's Moscone Convention Center. A total of 30,000 people are expected to be in town for the event, including delegates, alternates, guests and media personnel. The same month, San Francisco is scheduled to be the host of the Lions Club international convention, which will be as big or bigger than the Democrats' gathering.

The tourist industry is San Franciso's No. 1 revenue producer and for the fourth year, that business has been flat. Although figures for 1983 are not compiled yet, 1982 was down 8% from 1981, and San Francisco Convention and Visitors Bureau estimates for 1983 indicate that there might be some growth, but not much.

But San Francisco is holding its breath for 1984, which brings not only the Democrats and Lions Club, but the Major League Baseball All-Star Game, and the city is predicting that many of the half-million sports enthusiasts pouring into Los Angeles for the Olympics will include San Francisco on their vacation itineraries.

The catalyst for much of the convention business that's expected in San Francisco is the $126 million George R. Moscone Convention Center, which opened in December, 1981, on an 11-acre site. Plans call for the 21-acre Yerba Buena redevelopment complex that houses the Moscone complex to be encircled by a bevy of hotels now under construction or in the planning stages. An 1,800-room Marriott hotel is scheduled for completion in 1987 and a 1,033-room Ramada Renaissance is slated to open nearby in May, 1984.

In all, nine hotels are projected to be built near the center by 1987, with three additional hotels planned for construction near the San Francisco International Airport.

With prime land going for hotels and office buildings, and the general trend to downzone many other desirable areas of the city, housing has become a problem of both fabulous cost and limited quantity. Rents for the smallest apartment in the least desirable area of town begin at about $400.

One trend that has had a major impact on San Francisco housing is the movement of gay professional and managerial people into the old neighborhoods, where they are buying up the old Victorian homes and turning them into architectural and design showpieces.

Neighborhoods that were once predominately black and Chicano are now populated by wealthy and white upper class gays. The quality of the neighborhoods has improved, but lower-price housing has simply vanished from the city limits.

The affluent-scale market is also served by an endless array of boutiques, gourmet shops and restaurants.

"The side effect of this is that the business community is leaping into the old neighborhoods like North Beach and Chinatown," noted Donald White, business editor of the *San Francisco Chronicle*. These were traditionally ethnic, family-oriented neighborhoods, but housing is rapidly turning into office space and restaurants, and the homes and lower-income hotels are being pushed out.

The movement of people to outside of the San Francisco market, meanwhile, has created a tremendous commuting and parking problem.

Currently, the office vacancy rate is a mere 5%, and prime space is very high. Thus, few new companies are moving their headquarters or corporate offices into San Francisco. But it is still a premier location for corporations such as Levi Strauss & Co., Standard Oil of California, Crown Zellerbach and Foremost-McKesson.

One major new project proposed in 1983 is a new domed stadium to be built in the Cina Basic district of San Francisco, a light industry area. If the plan is approved, this area would provide optimum locations for shopping, high income apartments and office buildings.

The impetus for the new stadium is the San Francisco Giants baseball team, which has made it clear to the city fathers that if a domed facility cannot be built, it plans to move its franchise elsewhere at the end of its contract period. The team plays at Candlestick Park, an outdoor stadium famous for being the coldest and windiest location for a major league baseball game.

If the new stadium is approved and constructed, Candlestick would probably be torn down, at an estimated cost of $10 million, to make way for low-income housing.

The city has two major dailies, the morning *Chronicle* and the afternoon *Examiner*. The market is served by three network tv affiliates, two major independents and one public broadcasting station. It has 11 am and 20 fm radio stations. It is also served by one cable system.

San Jose, Cal.

Population '80	1,295,071
Rank	30
Est. income '82	$19,958,376,000

The San Jose market is one thing: Rich with a capital R.

This market of 13 different communities, all linked by the computer and high-tech industries, has the highest median income in California, the second largest proportion of personal investors in the nation (next to Stamford, Conn.) and a business founded firmly on the silicon chip. Silicon Valley, as it has been dubbed, has seen a decade of growth virtually unparalleled in American business history, and expansion is the byword.

But that same expansion and growth has put a premium price tag on all land in the market. Marriott's Great America, a popular local theme park in Santa Clara, will be sold in 1984. Developers made the Marriott Corp. an offer it seemingly couldn't refuse when they bid $900,000 per acre on the park's land, bringing the total price to about $80 million. But according to Jim Tucker, executive director of the San Jose Economic Development Office, industrial land throughout the region is approaching that same $900,000-per-acre price.

And the prices of land and the rapid industrial growth have made San Jose a victim of both a limited supply and high prices of housing. Prices for existing homes are about double the national median price. In most parts of the country $100,000 will buy you a showplace, but in San Jose it will buy you a starter home, or maybe a nice "fixer-upper." The housing shortage is attributed not only to the declining availability of land, but also to increasing restrictions on development in an effort to control "the quality of life."

Because of the very high housing costs, many people have moved out of the area and commute, with resulting traffic jams that rival Los Angeles at rush hour. But, according to Mr. Tucker, transportation planners in the area are "euphoric" about the new Guadalupe Corridor, a combination light rail and expressway system for which state and federal sources have approved funding. The $400 million project would be completed in phases, with construction beginning in 1984 and completion set for 1989.

The computer industry, meanwhile, has seen changes of its own. Semiconductor companies, after difficulties, are recovering. Currently, the San Jose market produces 34% of the nation's semiconductors, with sales up 15% in 1983 and a projected increase of an additional 24% in 1984.

Unemployment has dropped from a high of 8.1% in 1982, during the height of the recession, to 6.9% this September. Much of the unemployment stemmed from layoffs in the semiconductor industry.

Economic developments are happening outside the computer industry as well. In May, the San Jose City Council opened Coyote Valley, an 18,000-acre site that's being transformed from agricultural land to industry. Controversy has surrounded the Coyote Valley development. Some partisans have pointed to delays in the project as evidence of a "no-growth" attitude by the city.

The area's $120-million-a-year agricultural industry continues apace. But rather than the orchards of a decade ago—San Jose was once known as the prune capital of the world—high cash crops that can be grown on small pieces of land form the base of production. Garlic, mushrooms and other "gourmet" high-profit crops are the most common.

In 1983, three area canneries closed because, between the demise of the big crops and the cost of land, they found more suitable locations.

The automobile industry, which once employed nearly 10,000 people in Santa Clara County, basically left the area this year when the Ford plant in Milpitas closed its doors.

The San Jose market also boasts the greatest concentration of venture capital investments in the U.S. According to 1983 Regional Perspectives on Santa Clara County, published by the Bank of America, of the $7.2 billion in venture capital now invested in the U.S., more than one-third is in California and more than half of California's share has gone to companies in the San Jose market.

The three major reasons, according to the report, include a concentration of talent, past successes and a competitive, knowledgeable banking community. In 1983 and 1984, close to 100 companies will receive infusions of venture capital, and along with the growth and investment of the last 10 years, this is the foundation for the "continued economic prosperity" of this tremendously wealthy market.

The market, covered by spillover from the San Francisco market, has one network tv affiliate and four independents of its own. The two major daily newspapers in the market are the morning *San Jose Mercury* and afternoon *San Jose News* editions (they combine editions on Sunday), as well as the *Peninsula Times-Tribune* in Palo Alto. There is also a weekly business paper, *Business Journal—San Jose*, which was launched in mid-1983. The market has six am and seven fm radio stations. It has two cable services.

Seattle, Wash.

Population '80	1,607,469
Rank	23
Est. income '82	$18,824,832,000

It's clear Seattle has been in a recession—a reduced rate of layoffs at Boeing Co. passes for "good" economic news here these days. And as Boeing goes, so goes much of Seattle.

After nearly three years of major reduction, employment at Boeing seems to be leveling off. The payroll at the area's largest employer stands at about 58,000, down 13% this year and off nearly 30% from the record high in December, 1980. But earlier estimates that employment in the state's aerospace industry would fall 11% in 1984 and a further 4% in 1985 have been revised, and many local experts now call for layoffs to bottom out by the end of this year or early 1984.

Another indicator of stability is that the number of orders for new Boeing airplanes announced from July 1 through September exceeded the total for the first half of the year; by the end of last month, the value of this year's orders had surpassed that for all of last year.

The upturn at Boeing is only one hopeful sign for the Puget Sound region. The rate of unemployment in Washington state fell from 10.4% in June to 9.9% in August, marking the first time the indicator has been below 10% in two years. The rate of unemployment in Seattle remained even at 9.3% in large part because more than 7,100 workers in major industries were on strike. But a year ago the rate in the city stood at 10.5%, and nearly 10,000 more people from a smaller workforce were without jobs.

Although Seattle has lost 2,192 residents since the 1980 Census, its suburbs and neighboring cities continue to grow. Of the 154,519 people who have moved into Washington state since 1980, a total of 74.6% have come to the Puget Sound region.

It is not surprising then that housing is perhaps the most dramatic indicator of Seattle's improving economy. The number of building permits issued in King County by October was more than double last year's total figure, and banks in the area issued 5,638 mortgages in August, compared with just 3,469 in the same month a year ago.

Although 47.6% of the housing units in the city limits are rentals, vacancy rates have fallen dramatically in the last six months. In the city of Seattle the vacancy rate was just 4%, but the greatest improvement was evident in the suburbs, where rates have been cut nearly in half in the last six months, from the middle teens to single digits.

Commercial developers appear particularly optimistic. Although recently the office vacancy rate has ranged from about 9% in Seattle to around 20% in suburban office centers to the east, developers have invested in three office towers that will add a total of 3 million sq. ft. of space in Seattle between now and early 1985. First Interstate Bank of Washington recently opened a 48-story tower, the first of the new buildings to be finished. The state has begun to work on a $100 million convention center that will straddle Interstate Hwy. 5, which runs through the city just east of the business district.

A considerable amount of renovation continues along Seattle's waterfront, much of it undertaken by the Cornerstone Development Corp., in which the Weyerhaeuser Co. is a major partner. Many of the projects combine retail and office space with condominiums and apartments.

In the past four years, 2,500 hotel rooms have been added here, and the number of airlines serving the Far East from the Henry M. Jackson International Airport (formerly Sea-Tac International) doubled to four last spring, when United Airlines and Japan Air Lines began daily service to Tokyo and Hong Kong. Plans call for Seattle to host a convention of travel agents and tour operators from all over the world next summer, part of the city's growing effort to become a major tourist destination.

In addition, civic leaders continue working to improve trade with China and Japan, as the Port of Seattle battles to remain among the top three container shipping terminals on the Pacific Coast.

The media in Seattle have been making front-page news themselves recently. A long legal battle over a joint operating agreement between the *Seattle Times* and the *Seattle Post-Intelligencer*, the city's two major dailies, finally ended Oct. 11 when the U.S. Supreme Court refused to review a lower court's ruling that the arrangement could stand. The joint operating agreement allows the two papers to merge all but their editorial departments. The Hearst Co.'s *P-I*, classified a "failing newspaper" under the Newspaper Preservation Act of 1970, had long run far behind the *Times*, owned by Seattle's Blethen family and Knight-Ridder Newspapers, in circulation and advertising sales.

Seattle is home to three network affiliates, a Public Broadcasting Service station owned by the University of Washington and two cable operators. Two independent stations with headquarters in Tacoma also broadcast here. About 20 commercial radio stations, half of them fm, call Seattle home.

A number of neighborhood papers and suburban dailies supplement Seattle's major media. *The Weekly*, a news magazine, and *Pacific Northwest Magazine*, a regional monthly, also are based here.

Tacoma, Wash.

Population '80	485,643
Rank	87
Est. income '82	$4,297,993,000

Tacoma suddenly seems to be a new city. A number of ambitious civic projects have been completed in the last year, and when they are considered with the city's recent commercial successes, the triumphs suggested that Tacoma finally has reason to get over its feelings of inferiority to Seattle, only 30 miles north.

The most visible symbol of Tacoma's new look is the huge Tacoma Dome, a multipurpose arena that opened last April. Made of wood, the dome's blue roof rises next to the freeway on the city's east side in what was recently a rundown neighborhood. Comparisons with the taller Seattle Kingdome are inevitable, but Mike Gebauer, manager of the city-owned facility, insists the Tacoma Dome isn't a stadium, although it can accommodate every sport except baseball and swimming. He prefers to call the dome an "arena," pointing out that an adjoining convention center provides ample exhibition space for trade shows and that sophisticated sound and video systems make the dome ideal for concerts. Indeed, the arena already has played host to everything from the Billy Graham Crusade to a concert by David Bowie. This season, the Seattle SuperSonics basketball team will play several home games under the dome's wooden beams.

This fall the city also opened the Pantages Theater, once a vaudeville house, now a performing arts center that was remodeled at a cost of $4.5 million. The Pantages is a part of a new downtown that includes a renovated train station and a marina.

Tacoma's biggest business coup over the last several years undoubtedly was luring Sea-Land, one of the world's largest container shipping companies, to a new terminal at its fast-growing port on Commencement Bay. Sea-Land was the Port of Seattle's best customer, accounting for 12% of $1.9 million of the agency's marine revenues, and one-third of Seattle's container shipping volume. Tacoma had to promise $30 million in improvements to bring Sea-Land to the undeveloped site, but when Sea-Land completes the move in 1984, about 2,000 jobs and a $27 million annual payroll will sail the city's way. The port also is developing a $15 million world trade center that will include 140,000 sq. ft. of space for a variety of businesses on the waterfront, including Sea-Land. The first part of the center is scheduled to open in May, 1985. Tacoma's bread and butter employers continue to be Weyerhauser and Tacoma Boatbuilding, a large shipyard.

Tacoma Boat, in the headlines recently because of a strike and changes in top management, has rehired the 2,200 workers it fired during the walkout.

Weyerhaeuser is recovering from what chairman George Weyerhaeuser often refers to as the "worst forest products industry depression since the 1930s." In 1979, at the height of the last building boom, Weyerhaeuser earned $511.6 million, or over $4 a share. Earnings plunged to $277.9 million in 1980, and fell all the way to $168.9 million, or 90 cents a share, in 1982. The company undertook a major reorganization, cutting overhead by about $150 million a year and reducing its salaried work force by 20%, but analysts expect Weyerhaeuser's earnings to pick up this year.

These improvements have not yet translated into a booming economy in Tacoma, however. In August, the rate of unemployment in the city stood at 11.1%, down from the 11.5% in July and 12.3% a year earlier, but still significantly higher than in Seattle.

Bordering the city are two big military bases. More than 29,000 active duty personnel are assigned to McChord Air Force Base and Ft. Lewis; another 49,555 dependents live on and off base. Their influence is hard to calculate, but while Seattle, Everett and other cities to the north have experienced wild fluctations in vacancy rates over the past year, and even greater swings in other indicators such as building permits and new construction, Tacoma's numbers have remained almost unchanged.

Tacoma's major media include the daily *Tacoma News Tribune* and the *Pierce County Herald* (published three times a week). The city has 10 radio stations; five of them are fm, including one public radio station operated by Pacific Lutheran University. Two independent tv stations are headquartered here; network programing comes from affiliates in Seattle.

SHELL ALPERT'S DM WAR COLLEGE IS ALL YOURS.

This is the "private one" you've read so much about, heard others rave about, wanted to find out about!

Whether you're new to direct marketing or an old pro, bringing Alpert's famous War College to *your* office, *your* people, gives *your* firm an updated battle-ready competitive edge. A private workshop/clinic that's prepared and conducted solely for *you*.

You've read about it in the NY Times, Wall St Journal, Ad Age, Zip Magazine, Direct Marketing, DM News, Folio, Focus, Catalog Age, Cable Marketing, to name a few. Fortune-500 biggies like Hershey, Merck, Armco, Xerox — plus hundreds of smaller organizations — have profited from Alpert's free-wheeling, beans-spilling, *mind-opening* approach to direct marketing.

A one- or two-day War College gives your managers and staff the opportunity to interact with, learn from — be inspired by — one of direct marketing's foremost field generals. To find out more about this custom-targeted "combat training" program (and its *very affordable* cost), write or phone today for your FREE BATTLE-PLANNING PORTFOLIO!

The Shell Alpert Direct Marketing War College, 444 Lakeview Ct., Dept. N12, Langhorne, PA 19047 215/752-3433.

Cameras top paper ad gains

New York—Advertising spending in newspapers increased in 11 of 16 measured categories in September, according to figures compiled by Media Records.

The biggest gains were shown by cameras and photo supplies, up 83%, to $473,800; cosmetics, makeup and manicure products, up 66%, to $333,200; soaps and cleansers, up 48%, to $207,300, and alcoholic beverages, up 37%, to $2.7 million.

Declines in year-to-year spending figures for the month were recorded by headache remedies and sedatives, down 95%, to $1,800; soft drinks, down 39%, to $343,400, and cigarets, down 36%, to $3.8 million.

This Flash Report of newspaper ad investment is compiled for Advertising Age by Media Records from tabulations of 35 dailies and 24 Sunday editions in 15 cities.#

Olympic eagle hitting the road

Chicago—A joint promotion by Olympic Games sponsors Budget Rent a Car Corp. and Southland Corp. (7-Eleven) is taking the Games' official mascot on a 50,000-mile trip around the country.

A costumed "Sam, the Olympic Eagle" began the 10-month tour last week in Bangor, Me., with appearances at 7-Eleven stores in the area.

Traveling in a specially equipped Ford truck supplied by Budget, Sam and his entourage will visit all 48 contiguous states before ending the promotional swing July 28, 1984, in Los Angeles for the Summer Games' opening ceremonies.

Providing transportation for Sam is Budget's second Olympics-related joint promotion. Earlier this year, car-rental customers were offered an Olympic warmup suit (manufactured by Games sponsor Levi Strauss & Co.) for half the retail cost (AA, Oct. 10).

Children will get to have their pictures taken with Sam during the 7-Eleven appearances and will be given a "1984 Olympic Games Fun Book" with games and puzzles.

While the children's book clearly announces it is provided courtesy of Budget and Southland, restrictions against use of the Olympic mascot for "overtly commercial purposes" preclude advertisements by the companies within it.

Similarly, neither company will use Sam in print or broadcast advertising.

The benefits for Southland are obvious, but the promotion fits Budget's interests as well. A company spokeswoman explained that with its large number of off-airport, neighborhood locations, Budget has sought greater visibility for the truck-rental side of its business. A Budget truck will be sitting in the parking lot at each 7-Eleven Sam visits.

Also, Budget next year will sponsor a pro-stock drag racer on the National Hot Rod Assn. circuit.

The Budget logo will appear on both the car itself and the trucks that carry car and crew from race to race.#

Clairol offering Jazzing

New York—Clairol is introducing Jazzing, a new semipermanent salon hair-coloring line, which will be handled by Wiseltier & J.A. Handman Ltd.

The agency also is responsible for creating new-image print advertising for the professional products division, which will be appearing in consumer and trade publications.

Plymouth Voyager: A whole new way to get around.
Voyager seats 5 with plenty of carrying space
It's 3 feet shorter than a big wagon. Garaging is simple
With rack and pinion steering, it parks like magic
Or, would you believe, an option for 7.
Voyager is designed for easy, graceful entrances and exits.
Front wheel drive keeps it going through snow and wet spots.
With 2 passengers, Voyager has more carrying space than a big conventional wagon: 129 cubic feet.
The Ins and Outs of Voyager are unbelievably versatile
Would you believe it handles like a car? Believe it!
Voyager: America's most versatile wagon.
Would you believe the mileage? 37 24
A little magic goes a long way
Would you believe a 5 year or 50,000 mile Protection Plan?
You won't need Magic to own one
Plymouth. Best built. Best backed.

In addition to some unusual promotions, Chrysler Corp. will run print ads for the Plymouth Voyager that include the line, "You have to see it to believe it." The campaign was created by Kenyon & Eckhardt.

Chrysler aims minivan promos at women, via shopping malls

By JESSE SNYDER

ATLANTA—Chrysler Corp. will turn to some offbeat methods to market offbeat vehicles—the new Dodge Caravan and Plymouth Voyager minivans.

The official January introduction of the small, front-wheel-drive van-station wagon will be backed by a heavy conventional advertising campaign. Early teaser ads break in print Dec. 19 and on tv Dec. 24, to build awareness, and the first-quarter blitz starts the first week in January.

But Chrysler will unleash a series of promotions aimed at getting nontraditional Plymouth and Dodge buyers behind the wheel. They range from a shopping mall test-drive program to a Kellogg's cereal sweepstakes. Women are prime targets because the seven-passenger wagons are family-oriented, and Chrysler executives believe women will make or influence a majority of the purchases.

Mr. Campana would not reveal spending, but said the vehicle will get Chrysler's biggest push of the 1984 model year.

The heavy initial tv schedule, which begins on the

P&G slates cable ad hike

By MAURINE CHRISTOPHER

NEW YORK—Procter & Gamble is poised to give cable tv a big shot in the arm, with reports indicating its spending in the medium will more than double next year.

One report circulating here is that P&G, the largest national advertiser and widely regarded as a trendsetter, is calling for a specific percentage of its over-all tv ad budget to be allocated to wired tv for brands using the medium.

P&G confirms that its cable spending is increasing, but would not acknowledge a revamped policy on cable or that it will specify a percentage *(see earlier story on Page 12).*

Sources suggest that the Cincinnati company will aim for a spending level substantial enough to compensate for the fact that cable homes are considerably more difficult to reach with conventional network tv shows than are non-cable homes.

Eldridge Plowden, P&G cable ad manager, would not comment on a report that its future strategy calls for cable to be included from the early brand-planning stages in the over-all budgets of most advertised brands at a level of about 5.6%.

A P&G spokeswoman said that cable is getting regular consideration in budgeting already, and that most of the company's 65 advertised brands are using it. Brands not using catv currently are Dash,

Y&R, Dentsu set venture revamp

TOKYO—The international joint venture of Dentsu and Young & Rubicam is slated to change dramatically this week, sources say.

To improve the agency's potential for growth and to position it separately from its parents, Dentsu and Y&R officials are giving the agency its own chairman and president for the first time and renaming it, these sources contend.

The new chairman will be Alexander Brody, formerly Y&R's international president before becoming a consultant last January, and the new president will be a high official of Dentsu.

Up until the change, a four-person steering committee made up of equal representatives from the two agencies has been running the

last minute news

Zila to introduce herpes-relief ointment

LAS VEGAS—Zila Pharmaceuticals plans to introduce Zilactin, an ointment that claims "treatment for symptomatic relief of herpes virus infections," in at least five western states by the end of the month. The company has named Sullivan & Brugnatelli, New York, to handle Zilactin and other drugs that will be introduced by mid-1984.

NBC wins Magid news consultancy from ABC

LOS ANGELES—NBC-TV has hired Frank Magid Associates, an influential tv news consultancy, away from ABC. Frank Magid is expected to head a team that will check in at NBC News in January, after his company's contract with ABC expires. Mr. Magid said talks are under way for his company to consult ABC stations in Detroit and San Francisco.

New Rondelle Labs unit readies laxative

Johnson tests 2nd lotion

By PAT SLOAN

S.C. Johnson & Son is testing new Curel skincare lotion in Tucson as a possible entry into the therapeutic segment of the estimated $500 million hand and body lotion market.

The effort comes just as the company gets ready to make its first move into the over-the-counter drug business (AA, May 24, '82).

According to sources, Johnson's new Rondelle Laboratories will launch its first such product within the next few months, possibly a laxative.

Curel, although from the personal care division, could be considered a bridge product between personal care and otc because it's a therapeutic entry. It would compete with Westwood Pharmaceuticals' Keri lotion, and in fact takes on Keri through direct comparisons in advertising created by Foote, Cone & Belding.

Ads also state that "seven out of 10 consumers prefer Curel to the leading therapeutic lotion."

It is no secret that the personal care division at the Racine, Wis.-based company has produced few success stories in recent years, and it could use a winner.

In 1982, Johnson withdrew Achieve conditioning shampoo from test market. Enhance, a shampoo and conditioning system, has never really caught on in its shampoo form and as a conditioner lost ground after initial success, dropping from close to a 5% market share to less than 3%.

Soft Sense, a skin lotion introduced in 1981 with an ad campaign that emphasized "All you feel is soft," was on target with a 7% share by 1982, according to the company, although competitors maintain it never achieved original share goals and has been declining since.

Chuck Goldthwaite, personal care division general manager and a former Chesebrough-Pond's executive who worked on Vaseline Intensive Care, the No. 1 hand and body lotion, maintains Soft Sense is the No. 3 lotion over-all and No. 2 in drug and mass merchandisers.

Although Soft Sense originally stressed a cosmetic positioning, the later "Healin' Feelin'" campaign had therapeutic overtones.

According to Mr. Goldthwaite, both Soft Sense and

Body Flowers
BODY SPRA
PERFUMED DEODO

"It follows you everywhere," says advertising for Gillette Co.'s new Body Flowers deo-cologne spray. The Advertising to Women-created spots break in early '84, and Gillette has set a $12 million ad and promotion budget for the introduction (AA, Oct. 3). N W Ayer will soon be taking over the brand from ATW, which was fired last week *(see story below)*.

Gillette departure stuns ATW; other accounts stand by shop

New York—Gillette Co.'s abrupt decision last week to fire Advertising to Women not only stunned the agency, but also fueled speculation that personnel cuts and further client defections could be next.

Spokesmen for ATW's four remaining accounts, however, denied any plans to review or drop the agency.

"We did not anticipate losing the account," said ATW exec vp Walter Kiores, whose agency was informed it would lose $20 million of Gillette business only hours before the formal announcement Dec. 6. ATW had been planning staff additions to handle the January introduction of Gillette's Body Flowers deo-cologne.

On Wednesday, Gillette executives from Boston flew here to meet with the agencies winning pieces of the ATW business. Spokesman for Young & Rubicam, Marschalk Co. and N W Ayer all agreed that it was far too soon to predict what marketing moves lie ahead for the various products.

Y&R gains Silkience and For Oily Hair Only (FOHO) skin and haircare lines ($14 million), Ayer adds Body Flowers ($11.1 million) and Marschalk gets Toni ($4 million).

Gillette's decision to terminate its seven-year relationship with ATW resulted from corporate reaction to negative publicity surrounding ATW chairman John Ernst's guilty plea in August on charges of tax evasion. Mr. Ernst since has resigned from the agency.

In a prepared statement, Gillette said the action "follows a review of the tax proceedings in which Adver-

DDB shuffles account team on Polaroid

By GAY JERVEY

Over the past several weeks, Doyle Dane Bernbach has restructured the staffing on the $50 million to $60 million Polaroid account, which now is divided into two divisions.

Group vp Rein Luik was given responsibility for the instant camera giant's troubled domestic business.

DDB's decision comes at a time of increased pressure on Polaroid account team members, who have undergone frustrating months of trial and error, according to a source close to Polaroid.

Over the past year, no Polaroid campaigns—and several different tacks have been attempted—have achieved satisfactory levels in recall testing.

Last month, Ogilvy & Mather was awarded Polaroid's new videotape business in a competition involving DDB and several agencies. At the time, according to a Polaroid spokesman, the decision was made in order that DDB could concentrate on the instant camera and film business.

The source close to Polaroid agreed that the company was concerned that DDB's talent and manpower might be diluted by incremental business. However, the source also noted that the selection of Ogilvy arose out of Polaroid's increasing orientation to market research, a movement fueled by the company's new marketing management.

As such, Polaroid's marketing cadre is putting increasing pressure on DDB's creative staff to conceive and implement ideas that are guided by certain objective parameters of market research, a well-known Ogilvy strength.

James McConnell, who since

NBC shreds sked; CBS adds 5 new shows

By DIANE MERMIGAS

NBC-TV is preparing to introduce as many as six new series in January to boost its generally languid prime time performance.

The third-place network is expected later this week to announce the changes, which likely will affect every night except Sunday.

Meanwhile, CBS has decided to drop its Saturday movies and will fill that slot and others with five new series.

In some cases, NBC will move some existing half-hour comedies to new time periods to achieve more compatible program lineups, an NBC source said.

The only certain change is the introduction Jan. 6 of Lorne Michaels' "The New Show." The live hourlong satirical brainchild of the original executive producer of NBC's irreverent "Saturday Night Live" is scheduled to air three times a month at 10 p.m. (ET) Friday.

The same time period will be filled on the fourth Friday of each month, at least until spring, by a new Dean Martin celebrity roast, which was once a seasonal staple on NBC.

For more than a month, NBC has aired movies in the 9 p.m.-to-11 p.m. time slot, replacing "Manimal" and "For Love and Honor." The shows now are getting a second-chance broadcast.

But NBC sources say both series, along with "Rousters," another new fall entree, are sure to be canceled due to poor ratings.

Sources at NBC say a total revamp of Friday is expected to be built on "The New Show." One scenario is that "Mr. Smith" and "Jennifer Slept Here" (which have each averaged about a 10 rating/16 share this season) will be canceled and replaced at 8 p.m. Friday by the new adventure, "Leg Men."

NBC programers last week reportedly were contemplating pairing the Fred Silverman comedy "We've Got It Made" (which has been yanked temporarily from the schedule) in the 9 p.m.-to-10 p.m. Friday time slot with a new half-hour comedy like "Double Trouble," a saga about mischievous twins from Embassy Television.

Another thought being pondered by NBC program executives last week was how to di-

ABC says 'Amelia' will sell

By JAMES P. FORKAN

New York—ABC-TV, which officially has not placed "Something About Amelia," a tv drama about incest, on the market or arranged screenings for interested agencies and clients, expects the prime time movie to sell between now and its Jan. 9 air date.

Due as an "ABC Theater" drama at 9 p.m. on Jan. 9, a Monday, "Amelia" deals with father-daughter incest, with Ted Danson of NBC's "Cheers" as the father of a 13-year-old girl.

Despite its taboo subject, an ABC spokesman said after checking the ad sales department, "We don't anticipate it being a [sales] problem."

Some family-oriented accounts such as General Foods or Procter & Gamble undoubtedly will avoid the drama, various sources agreed. But the ABC spokesman said there are no sponsor "pullouts," simply because the Monday movie package (replacing "Monday Night Football" as of Dec. 26) yet has to be offered for sale.

Besides running "parental discretion" advisories before "Amelia" as well as in tune-in ads in newspapers and *TV Guide*, ABC will follow the movie with a spe-

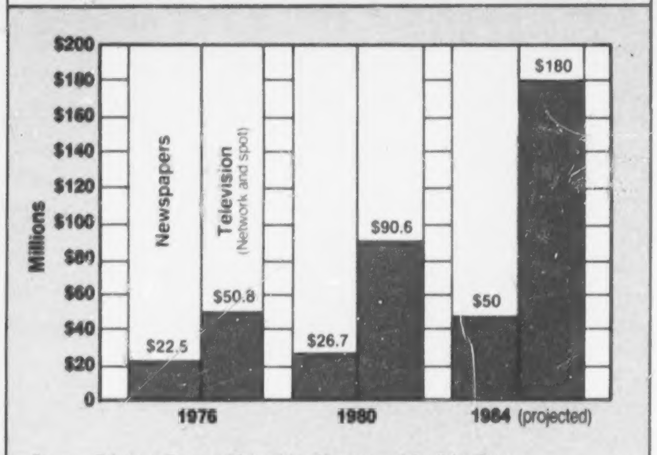
Tv's grip on political ads

Political ad spending, tv vs. newspapers



Sources: Television Bureau of Advertising, Newspaper Advertising Bureau

Newspapers actively seeking politicians' 'vote'—for ad buys

By STUART EMMRICH

New York—"The newspaper challenge ...is to demonstrate that issue advertising can win elections."

That statement from a Newspaper Advertising Bureau booklet being sent to newspapers might be termed the medium's battle cry for 1984, as it moves to capture a much bigger share of the political advertising money.

In a bid to combat the clear dominance of tv in political advertising, NAB has begun a program to woo campaign operatives on the national, state and local levels (AA, Dec. 5).

Representatives of NAB made a pitch for newspaper advertising to the Republican National Committee and the Republican Congressional Committee last month, and are scheduled to bring their newspaper advertising story to the Democratic National Committee this week.

Individual presidential candidates will be approached early next year.

NAB also has prepared brochures, work kits and slide presentations that tell local newspapers what they can do to more effectively attract political advertising.

'84

Marketing the Candidates

And the bureau isn't alone in its efforts. Papers as diverse as the *Eugene* (Ore.) *Register-Guard*, the *Tampa Tribune* and the *Kingston* (N.Y.) *Daily Freeman* have all started programs to attract political advertising from local candidates. They have sent out letters offering help, held seminars on political advertising, created sample ads and vigorously presented cases for newspaper advertising.

While newspaper executives around the country acknowledge there is little they can do to stop the lion's share of a candidate's ad budget from going to tv, they are determined to make sure that in

(Continued on Page 68)

Buyout may trigger big Metromedia shift

By DIANE MERMIGAS

Top executives of Metromedia have decided to close a year of roller-coaster stock prices and fortunes with a proposed $1.5 billion leveraged buyout that represents the largest merger/acquisition in broadcasting history.

They say being a privately held company will give them more control to expand interests in areas such as independent tv programing and cellular radio.

But the proposal offered last week by John W. Kluge, 69, Metromedia chairman-chief executive officer-president, and his three top lieutenants is being perceived by some as a possible first step toward even more dramatic developments for the Secaucus, N.J.-based company and the industry.

The offer consists of cash and notes valued at $43.50 for each share of Metromedia stock. In a leveraged buyout, the assets of the company being acquired are used as collateral to finance the purchase.

In addition to Mr. Kluge, the prospective buyers are Robert M. Bennett, senior vp of Metromedia and president of Metromedia Broadcasting; Stuart Subotnick, senior vp-finance and administration, and George H. Duncan, senior vp-telecommunications. The four men, who will collectively contribute 4.5 million shares of their own stock to the deal, will form a corporation with Boston Ventures Limited Partnership, which specializes in buyouts.

Previously, the largest broadcasting transaction was A.H. Belo Corp.'s offer last summer of $606 million for six tv stations owned by Dun & Bradstreet. That offer still is under review by the Federal Communications Commission.

Some industry observers believe that if the Metromedia buyout is successful, it will spur other broadcasting companies to do the same. Companies mentioned as being ripe for similar leveraged buyouts include Storer Communications, United Television and Chris-Craft Industries.

Analysts such as Anthony Hoffman of Cralin & Co. are speculating that last week's announced buyout could be a step toward an eventual merger with a large company such as Gulf & Western Industries, Coca-Cola Co. or 20th Century-Fox.

Such a merger would be especially advantageous before the FCC lifts a rule limiting ownership of tv stations to seven—a move that would increase the market values of Metromedia's outlets. Such a merger would assure Mr. Kluge of sufficient cash reserves to follow through on his current cellular radio development.

> "The whole focus of Metromedia. . .will be [on] cellular radio. I think [the plan for] a fourth network will go by the wayside."
>
> — ***analyst Anthony Hoffman***

"The whole focus of Metromedia as a private company will be to raise money for cellular radio. I think their aggressive attempt to build a fourth network will go by the wayside," Mr. Hoffman said.

Metromedia has spent between $400,000 and $1 million applying for each of about 50 cellular radio licenses

(Continued on Page 70)

Lauds improved regulatory climate

Helm eager for ANA work

By RICHARD L. GORDON
and NANCY GIGES

P. Allport

D.F. Helm Jr.

New York—The presidential heir-apparent selected by the Assn. of National Advertisers, DeWitt F. Helm Jr., is a package goods executive credited with successfully taking his drug company into cosmetics, toiletries and pet care products.

The Helm choice sets the stage for the first change in the association's presidency in 23 years. ANA leaders noted that in addition to his marketing experience, he has been involved in two other trade groups, the over-the-counter drug industry's Proprietary Assn. and the Cosmetics, Toiletries & Fragrances Assn.

The selection of Mr. Helm was made late last month (AA, Dec. 5), though the official announcement by ANA chairman Robert Goldstein, vp-advertising at Procter & Gamble, was not made until last week.

Reached at ANA's Washington office last week, Mr. Helm said he has no prepared agenda and plans to spend the coming months getting to know the ANA board and membership.

"I'm fortunate to have a period of time to meet with a lot of members and ask a lot of questions without being saddled by a lot of day-to-day questions," he said.

Mr. Helm, former president of A.H. Robins Co.'s consumer products unit, said he'll make his first appearance at an open ANA function Dec. 13 at the market research workshop in New York.

A self-described "preacher's kid," whose North Carolina and Virginia roots can be heard when he speaks, Mr. Helm praised what he called a greatly improved regulatory climate for advertisers in Washington.

"I believe in fighting when you have to fight, when the pendulum swings too far the other way," he said. "But the situation has improved."

The exec vp position was created by the board in anticipation of

(Continued on Page 70)

Ad Age going twice-weekly

Chicago—Advertising Age will begin twice-weekly publication next April with the introduction of a midweek edition that readers will receive in addition to the current Monday edition.

"This decision, which we've had under consideration for several years and serious study in recent months, is a natural evolution for us," said Rance Crain, editor-in-chief of Ad Age and president of Crain Communications Inc.

"There has been an enormous growth of news of immediate interest to the entire marketing community and an increasing appetite for such news among our business readers. Our move to increased frequency will enable us to respond to that and to better serve our readers."

Ad Age has been published weekly on Mondays since it was founded in 1930 by G.D. Crain Jr.

In addition to the usual strong Ad Age emphasis on delivering significant and timely news to its readers, the new midweek edition will include the Magazine section, which will move from its current home in the center of the Monday edition.

The Magazine section was established in its present format in February, 1982. It will continue to include each week an in-depth "Special Report" on a specific marketing, advertising or media topic, plus feature articles and such popular AA columnists as James Brady and Michael Gartner.

"Our Magazine section has come to be recognized as an increasingly important part of Ad Age," said Rance Crain. "Comments from readers and advertisers, as well as our research surveys, which show more than half our readers save some of the Magazine sections for permanent reference, tell us this."

Current subscribers will receive both issues of Ad Age each week as part of their basic subscription.

"The electronic revolution, which has helped whet the business community's appetite for more and speedier information, also has made it possible for us to make transitions to respond to that need," explained Todd Fandell, editor of Ad Age. "Reporters in our major news bureaus write and transmit material from video display terminals. Their stories are edited and made into ready-to-print page forms in a matter of hours in our Chicago office.

"This speed capability allows us to step up the pace of our news coverage without inhibiting our companion mission to bring superior perspective and depth to our reporting of the 'why' of news events and trends," Mr. Fandell said.#

world news roundup

Chicago—**Beatrice Foods Co.** is considering a realignment of its international agencies, following the consolidation of its domestic business (AA, Nov. 14). The decision is expected early next year.

Paris—**Tobacco and alcoholic drink** marketers, banned from advertising on traditional French tv, will be able to do sponsor programs on Canal Plus, France's pay tv channel, following a decision last week. Canal Plus will start up at the end of next year.

London—**Atari has consolidated** all its non-U.S. advertising, worth nearly $10 million, with Doyle Dane Bernbach's London office. The account had been split between DDB, which handled games, and Young & Rubicam, which handled Atari's $2.25 million non-U.S. computer business.

Bonn—**Apolinaris Brunnen**, marketer of Apolinaris mineral water, will soon launch a half wine/half water beverage called Winzer Schorle in German restaurants and bars. Agency is Inex, in Koblenz.

London—**Gannett Co.** will decide by Jan. 1 whether to pursue plans to publish a European edition of *USA Today*, sources here say.

Manila—**McDonald's Corp.** is fighting a boycott instigated by political and business foes of the government of President Ferdinand Marcos. A widely circulated boycott list cites McDonald's four outlets

(Continued on Page 40)

Media General renames Tanner

By STUART EMMRICH

Four months after William B. Tanner became the target of a federal investigation into possible tax fraud and bribery charges, the media services company of which he had been chairman has been renamed.

William B. Tanner Co., based in Memphis, is now Media General Broadcast Services.

The new name more clearly reflects the company's ownership by Media General and the new management team now in place at the subsidiary, according to Alan Donnahoe, vice-chairman and chief executive officer of Media General, the Richmond, Va.-based parent company.

May ease negative publicity

The name change also is expected to help the wholly owned subsidiary overcome the negative publicity prompted by the federal investigation in August (AA, Aug. 15) and to assure clients that the company is not about to close.

Mr. Donnahoe declined to attribute the name change to the federal investigation—which is not expected to reach any resolution for at least another month, according to sources—but acknowledged that "a great deal of adverse publicity" was caused by the investigation into Mr. Tanner's operations.

"This seemed the logical thing to do at this time," Mr. Donnahoe said.

Soon after the federal investigation began, Mr. Tanner and another associate, company senior vp-treasurer Earl Funk, took what Media General described as a leave of absence to put together their defenses against possible federal charges.

Now, however, James Linen IV, who had been acting as president-chief executive officer of the subsidiary, has succeeded Mr. Tanner as chairman-chief executive officer, and L. Donald Robinson, president-ceo of Independent Television Sales, a Katz Television subsidiary, has been named president.

Although Media General has not made a public announcement on Mr. Tanner's status with the company, Mr. Donnahoe said that Mr. Tanner has resigned as chairman of the company and will act as a consultant to Media General Broadcast Services.

In discussing the changes at the company he now heads, Mr. Linen said the Media General subsidiary has not been unduly hurt by publicity that surrounded Tanner Co.

Client list intact

"We've lost some clients and we've gained some clients, but the basic client list has remained intact," Mr. Linen said.

He did acknowledge the name change was one effective way to assure both present and future clients that the company was on solid footing.

"We wanted to make sure that there was no concern about the future viability of this company," Mr. Linen said. "This is an important part of Media General, and the company is going to stand behind it."#

NBC lands Grossman for news

By DIANE MERMIGAS

Lawrence Grossman, president of the Public Broadcasting Service for nearly eight years and a former network ad executive, will succeed Reuven Frank as president of NBC News next May.

Mr. Grossman, 52, will leave his public tv post in February or March, when he begins a three-month transition into his new network post.

The PBS board last week immediately established a committee to find a successor.

Mr. Frank, 63, a 30-year veteran of NBC News and one of the earliest producers of network news documentaries and prime time magazines, will remain with the network as coordinator of the network's election year coverage through the summer conventions, as he earlier said he would do.

Afterwards, Mr. Frank will revert to producing news programs for the network. Mr. Frank's departure from the news presidency was anticipated (AA, Dec. 5).

Mr. Grossman was considered by many industry observers to be an unlikely replacement candidate given his heavy advertising, non-news background in broadcasting.

Grant Tinker, NBC chairman, was instrumental in the pursuit of Mr. Grossman, and explained that he was more interested "in the person than in his experience."

Mr. Grossman worked with Mr. Tinker, Mr. Frank and NBC president Robert Mulholland while vp-advertising for the network from 1962 to 1966.

Tom Petit, exec vp-news, was passed up for the job. However, Mr. Grossman said in an interview he plans to retain Mr. Petit in his current post.

Mr. Grossman has been instrumental in making public tv more competitive with the commercial networks. He was responsible for persuading PBS stations to support the one-hour expansion of "The MacNeil/Lehrer Report," which occured last fall.

Affiliates 'magic'

NBC officials could be looking for Mr. Grossman to work the same kind of magic with network affiliates, who have been resisting one-hour expansion of the "NBC Nightly News" for years.

Mr. Grossman headed his own advertising and production company, Lawrence K. Grossman Inc., from 1966 until he joined PBS as president in 1976.

Mr. Grossman began his media career in 1953 on the staff of *Look* and joined the advertising division of CBS Television in 1956.#

corrections & clarifications

- Contrary to an earlier item (AA, Dec. 5, P. 109), Richard Barthelmes is the new advertising director of *Gourmet*.
- The toy retail sales figure of $9 billion quoted by Toy Manufacturers of America in last week's wrapup (AA, Dec. 5, P. 112) was for 1982. Latest estimates for 1983 by various industry sources put retail volume at $10 billion or more.
- *Boston Business Journal* erroneously reported its ad linage figures for October. The correct figures are: 1983-81.8, 1982-42.5, year-to-date 1983-640.4, year-to-date 1982-354.0 (AA, Nov. 21, P. 56).

Here's the certain way to deliver your advertising message to more than 75,000 decision makers in the industry that buys the most computers and office automation equipment.

The nation's largest industry is financial services. According to a recent article in *Advertising Age*, its sales volume is over $1 trillion a year. This industry purchases $6 billion of computers and related software each year—more than any other industry in the U.S.

By advertising in *Wall Street Computer Review* and *Computers in Banking*, you reach the key decision makers in this industry in the most appropriate editorial environment while taking advantage of low-cost combined rates that offer major savings.

Stage and screen put to the test

By Louis Weisberg

A home is no longer merely a castle. It's also an amusement park.

And, as the emphasis on home entertainment options increases, so do the worries of Hollywood and Broadway producers. Indeed, while Hollywood boasts about its recent bonanzas at the box office, it is silent about the grim fact that ticket sales have shrunk from roughly 90 million per week in 1946 to 20 million today, while production costs have mushroomed to an average of $12.8 million per picture.

True, cable and pay-tv have opened up a new market for the studios, but, like foreign films and rereleases, income from this new source is rarely substantial enough to take a picture from the red to the black. Likewise, while much hoopla has been made about the phenomenal sales of consumer product spinoffs from movies like "E.T." and "Annie," few films offer this potential.

On the Broadway scene, the Great White Way has attracted more attention of late for the decline of its audiences than for its plays. Add to this unpleasantry skyrocketing production costs—the average Broadway musical now has a pricetag of $4.5 million—and you've got the scenario for the kind of corporate melodrama that is all too familiar these days.

So how are producers finding relief? Through beefed-up advertising campaigns and increasingly sophisticated marketing strategies. Once an ad in the *New York Times* and a few posters were all any play worth its proscenium needed. Now Broadway producers set aside 10% to 20% of their weekly box office grosses to help sell more tickets.

New Yorkers are showered by upwards of 50 tv spots a day featuring enticing glimpses of Broadway's latest hit. While Broadway ad budgets are still too small for Madison Avenue, there are several agencies in New York, such as Ash/LeDonne and Serino, Coyne & Nappi, that specialize in promoting plays.

Back in Hollywood, the growth of the advertising and marketing industry has been of nothing less than Cecil B. DeMille proportions. Fewer than 10 years ago, a successful film grossed roughly $7 million. Now studios spend an average of $6 million just on marketing a nationwide release.

"Nineteen years ago," says Steve Rose, senior vp-marketing at Paramount Pictures in New York, "there were only about three smaller agencies involved in film marketing. These first agencies were primarily creative resources. About 10 years ago, the Madison Avenue agencies realized the enormous potential revenues the movie business represented and began going Hollywood."

There are several difficulties inherent in the nature of show business that make the marketing of entertainment products unlike any other. One is that "there is no brand loyalty to studios and producers the way there is to other manufacturers," says Richard Porter, management supervisor of J. Walter Thompson's entertainment group in Los Angeles. "Every product is entirely new and entirely on its own," he adds.

Thus, corporate image campaigns are useless, and even a successful campaign might not work for another film of the same genre.

The nemesis of show business marketing is the extremely short shelf life of the product. "A film is a retail product," says William Soady, executive vp-general sales manager at MCA/Universal Pictures, "but unlike toothpaste or pantyhose, it has only one to two weeks to convince an

(Continued on Page M-10)

Louis Weisberg is a Hollywood-based free lance writer.

Test

(Continued from Page M-9)

exhibitor to keep it on his shelf."

Computerization could be making the heat to open "hot" even greater. According to Vincent Canby of the *New York Times*, computerized bookkeeping now makes it possible "virtually from the first hour of the first day of the first engagement of any movie in any city . . . [to] predict what that movie will earn during the next 20 years."

Also making it harder to sell exhibitors, whom Gordon Armstrong, MCA/Universal Pictures' vp-advertising, publicity and promotion, describes as the "real customers" of movies, has been the recent passage of "antiblind" bidding laws in 22 states. "Blind bidding" refers to the Hollywood practice dating back to the 1940s of requiring theater owners to pay upfront guarantees and pledge a percentage of box office receipts for films they've never seen.

Antiblind laws mean that filmmakers have to pay for advertising—from $2.5 million to $3 million just to open a film—without guarantee of placement.

To ensure that a film will open strong, advertising is carefully formulated and scrupulously tested, usually more than six months in advance of an opening. Manning Rubin, president of Creative Alliance in New York, a boutique agency that has been involved in campaigns for "The Empire Strikes Back," "The Best Little Whorehouse in Texas" and "National Lampoon's Vacation," among scores of others, is sometimes brought in before shooting starts.

"We're often given only the script and a list of the stars and asked to come up with several different concept ads," Mr. Rubin explains. "The studios test different looks to find the one that positions or categorizes the picture in the best place commercially."

Market research is playing an increasingly important role in positioning. When Richard Lederer, vp-advertising at Orion Pictures, discovered through research that few people seemed to know who Somoza was, he decided to position "Under Fire," a highly politicized film about Nicaragua and the Sandinistas, as a romantic adventure. Print ads showed stars Nick Nolte and Joanna Cassidy looming larger than life over a collage of battle scenes, *a la* "Gone With the Wind."

Industry sources almost unanimously deny that studios consciously try to lure audiences with misleading advertising. They claim that it's word-of-mouth that ultimately sells tickets, and attracting the wrong audience would almost certainly create bad word of mouth.

But changing a film if test screenings reveal ways of making it more attractive is widely acknowledged. This practice can attenuate the artistic value of a film, as when actress Jacqueline Bisset's "Class" was cut, based on test screenings, into a light, teen sexploitation film rather than the study of a woman's mid-life crisis the actress thought it would be.

VACATION

The film industry's focus on youth pays off. Recent hits are adventures such as "The Empire Strikes Back" and comedies such as "National Lampoon's Vacation."

Test screenings can also help increase the effectiveness of a "highbrow" film and win it larger audiences, as when "Julia" was recut, based on sample feedback, to make it stronger and less confusing.

Another "practice" the major studios deny and decry is concept testing, or testing ideas for pictures. They maintain that it is impractical, because a story is only as good as its execution. By the time a movie based on feedback from questionnaires is released, the public's tastes may have changed.

Nonetheless, some movies, such as this year's "Private School," are more inspired by researchers than muses. "Private School," produced by Barry & Enright Productions, was said to be conceived as a result of interviews that featured such questions as, "Would you go see a movie about a teenager fulfilling his sexual fantasies with an older woman?"

What evolved—through what many industry observers consider an unnatural process of selection—was a standard teen sexploitation epic released by Universal Pictures. "Private School" failed to set anything but critics on fire, in spite of its meticulous inclusion of the correct smattering of jokes about breast size to please the young males and its avoidance of too much toilet and genital humor to please the young females—all as per test findings.

While the future doesn't augur well for concept testing, other marketing techniques seem definitely in the stars for the film industry. Here are three views:

- "We're going to see more tracking studies to test public awareness of movies prior to their release and more sophisticated means of monitoring advertising effectiveness," says Sandy Reisenbach, executive vp-worldwide advertising and publicity at Warner Bros.
- "There'll be more testing of films before final releases," propnesies Steve Hayman, senior vp and director of Foote, Cone & Belding's entertainment division in Los Angeles.
- "I think we're going to see more segmentation of both media and audience in order to utilize advertising dollars most effectively," says Irv Ivers, MGM/UA's president of worldwide marketing.

The target audience for Broadway is females 24 to 40 years old, according to Jeffrey Ash, president of Ash/LeDonne. Hollywood's best supporting demographic is the 14-to-24-year-olds. "Moviegoing is a major facet of dating and young adult life," says Olen Earnest, vp-marketing research for MCA/Universal Pictures. No wonder, then, that Hollywood is focusing more and more on the youth market.

Promotions for Paramount Pictures' hits, "An Officer and a Gentleman" and "Flashdance," illustrate how effective segmentation can be, particularly for reaching that all-important youth market. Capitalizing on youth's propensity for music, Gordon Weaver, Paramount's president of marketing, played the Pied Piper and based his campaigns for "Officer" and especially "Flashdance" on the pictures' appealing songs.

"Long before we began visible marketing [of "Flashdance"] Mr. Weaver explains, "we supplied rock videos to MTV and to the growing number of shopping malls and record shops that show them—all excellent forums for reaching young people. We even supplied videos to a chain of gas stations in France and to theaters in Germany, where they are shown as short subjects."

After the music became popular, Mr. Weaver used it in creating trailers and tv and radio spots. "Up Where We Belong" and "What a Feeling," the titles of the movies' hit songs, were used as slogans in the print ads. "Coordination of all media is essential in an effective campaign," asserts Mr. Weaver.

Through Paramount's nationwide network of 42 agencies, Mr. Weaver was able to buy time on local tv and radio stations that draw a young demographic. Approximately 4,000 "Flashdance" trailers were supplied to theaters at the beginning of 1983, even though the film wasn't released until April.

"Movie marketing is an awareness of what's happening in the world," sums up Mr. Weaver. "I get updated profiles of 500 U.S. cities every three months. You've got to treat each market on the basis of its own unique characteristics."

More delicate handling is required for films like "On Golden Pond," "Chariots of Fire" and "The Big Chill." Although these pictures have done extremely well, nothing about them has obvious mass sales appeal. The strategy for selling films like this is to open "small" and allow time for good reviews and positive word of mouth to build. "On Golden Pond," for example, opened in December, 1981, in only one Canadian and two U.S. cities. Ad costs were thus kept down while the movie got a chance to win favorable interest. More than 1,000 prints were released in January, with print and tv ads featuring quotes from lavish reviews. By the time of the full-scale release in March, the public was primed. "On Golden Pond" went on to win several important Oscars and become a box-office champ.

Surprisingly, Broadway, which is generally considered an "artier" arena than Hollywood, is no more anxious than tinsel town to take expensive chances on long shots these days. Thus, while Hollywood plays it safe with sequels like "Jaws 3-D," Broadway does likewise, especially with blockbuster musicals and revivals.

The result has been the demise of Broadway as the center of theatrical creativity. "While Broadway will probably always be the big pot-of-gold for theater as far as making money is concerned," says Frank Levy, copartner of the prosperous way-off-Broadway Catalina Productions in Sherman Oaks, Cal., "for developing material Broadway is obsolete. It's just too expensive."

Broadway advertising focuses primarily on tv. In 1975, Ash/LeDonne used tv spots to help turn the musical "Pippin" from a flop into a hit, and now tv is as common for Broadway shows and their road companies as Maalox in the stars' dressing rooms.

Segmentation of audience and media in promotions for plays is a recent development. "The Wiz" was advertised extensively on minority radio stations with great success. Mr. Ash, who handles all the advertising for the Schubert theaters, uses a larger proportion of his budget on radio spots for Los Angeles than New York productions. Future theater marketing will probably feature more segmenting.

Will the increasing emphasis on marketing and commercial considerations affect the quality of the plays and movies of the future? "No," maintains Richard Fischoff, president of Carson Films, whose background includes pushing for such high-quality projects as "Kramer vs. Kramer" and "The Big Chill."

"Serious projects," he says, "have traditionally had rough going. But there are always people who feel passionately enough about a worthwhile project to persevere through all the rejection and see it through." The show must go on.

Variety's top 10 rental* champs

42nd St. sings the blues

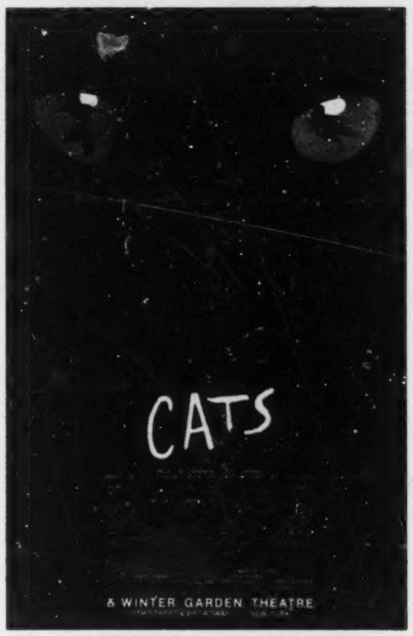
By Barry H. Slinker

Despite the sensational success of the boa-dripping, high-heeled men in this season's hit musical "La Cage Aux Folles," Broadway producers are faced with the prospect of another disappointing year on the Great White Way.

Statistics for the first 20 weeks of the 1983-84 Broadway season, combined with a skeptical forecast of the months to come, are putting producers' ability to draw customers to a severe test.

"We're not faring very well so far this year," says George Wachtel, director of research for the League of New York Theaters and Producers, the industry's trade association. Mr. Wachtel notes that for the first 20 weeks of the season, ticket sales, the chief indicator of how well the theater is doing, were down 10% from this time last year, to 2.7 million. Likewise, only seven shows have opened, seven fewer than last season. Only four of these are still running, alongside eight holdovers from last season and five survivors of more than two years.

Indeed, Times Square and environs look positively gloomy, as only 17 houses out of 36 on Broadway are lit (not including several shows in previews). And this only two years after Broadway was enjoying its biggest boom in a decade.



"Cats," a British musical, was Broadway's box office champ last season.

On the more positive side, Broadway had hardly rolled out its carpet this year when "La Cage" proved a huge critical and popular hit, matching last season's superhit "Cats." And with the rest of Broadway riding on "La Cage's" frock-tails, theater capacity is up 15%, with 88% of all seats filled. As of the 23rd week of the season, gross receipts, at $90 million, are also up 6% from the 1982-1983 season.

Still, producers are spinning sad stories of spiraling costs and tumbling creativity. Even the most successful producers shun optimism.

For instance, Francine LeFrak has co-produced such recent hits as "Crimes of the Heart," "Nine" and "My One and Only," but she readily points out that "the economics of Broadway are crazy." She and other producers bemoan the cost of mounting musicals, which has risen to more than $4 million; even dramatic plays can cost several million. Meanwhile, ticket prices have soared to an average of almost $30, including discounted tickets, compared with only $8.33 a decade ago. The American theater, which Wolcott Gibbs once called "the aspirin of the middle classes," today costs more like a session

---

Barry H. Slinker is a New York-based free lance writer.

Carr

(Continued from Page M-18)

Mr. Carr wasn't through yet with "Tommy." He sent out each of the film's stars solo to promote the film in different territories. When Mr. Carr was finished, "Tommy" ended up breaking house records in 90% of the venues it played.

After "Tommy," movie companies weren't throwing up their arms any longer. They were throwing open their doors, crying for Mr. Carr to do promotional work for them.

But he could not be bought. For no fee (you read correctly—zip), he consented to assist the producers in promoting "The Deer Hunter," a grim saga about the Vietnam experience that starred Meryl Streep and Robert De Niro. "Lord Delfont [a prominent British film producer] personally called and asked me to help," remembers the humble Mr. Carr.

The producers pegged "The Deer Hunter" as a "hard sell" that could result in one big bundle of money being lost.

Not to worry. Mr. Carr arranged for some very important private screenings of the film in major markets, just to get a little word of mouth going, you know. He then recommended that the movie open for one week only at a small theater in New York and a big one in Los Angeles.

The movie would play for a week in late December to qualify for Academy Award consideration. It would be a one-week run and out, figured Mr. Carr.

"I knew they'd kill each other trying to get in in New York," says Mr. Carr. "I wanted to get the movie talked up on the cocktail circuit in New York. It worked. In Los Angeles, they added midnight showings for the week it played. There was incredible demand to see the movie."

Mr. Carr and the producers prepared to wait for the Academy Award nomination annoucements in early February. Mr. Carr confidently predicted "Deer Hunter" would get multiple nominations.

Sure enough, the film picked up the nominations. "The Deer Hunter" opened nationally the week the nominations came out and eventually became a financial success.

Mr. Carr's involvement with "Deer Hunter," however, went further. He designed a series of ads to attract different segments as the weeks wore on. There were ads to pull in the female romantics and the Clint Eastwood action crowds, among others.

Mr. Carr's track record leaves little doubt that he knows something about promoting a Hollywood product. "The biggest mistake that's still made in promoting movies," says Mr. Carr, "is misjudging a movie's audience. Producers still assume they know more than they really do. And there's no substitute for creating an aura of excitement when you're advertising a movie."

He also believes many movies bomb because producers and distributors don't give enough attention to the timing of a movie's release. Good movies get lost too often, says Mr. Carr, when they're released at the end of a big season with a lot of mediocre junk. "They get buried in the shuffle," he says.

Putting his Hollywood expertise aside, Mr. Carr marched into uncharted territory last summer when he opened "Cage" on Broadway.

"Cage" went into rehearsal late last spring as an unknown quantity. The show had plenty of name talent working on it—including Jerry ("Hello Dolly") Herman composing the score, Arthur ("Gypsy") Laurents directing and Harvey ("Torch Song Trilogy") Fierstein writing the book.

Talent alone, however, wouldn't make "Cage" work. "It had to be an event," adds Mr. Carr. "People don't pay $35 or $45 for nothing. They expect to see an event." His first time out on Broadway, Mr. Carr really never had to test his promotional mettle.

Before the show's out-of-town tryout in Boston, Mr. Carr printed up a few bus cards and unveiled a big sign in New York's Grand Central station with the colorful "Cage" logo—a chorus "girl" swathed in a red feather boa. An anchor tattoo decorated one arm suggestively thrown forward.

"We did spend many weeks

with a Park Avenue psychiatrist.

These economic problems are compounded by a dearth of good writers and directors working for Broadway. They appear to have fled the high-stakes gamble of spending months or even years on a play only to have it close opening night.

Jeffrey Ash, president of Ash/LeDonne, an entertainment advertising agency, says his hopes for a better Broadway season were dashed because "it seems there's still a lack of good product."

To Judy Gordon, co-producer of "Barnum," a hit musical of several seasons back, the need for more talented writers and directors poses an even more crucial problem for Broadway's future than do high costs. "The talent just hasn't been developed for the theater," she says. "These people can get so much more upfront money from television and films."

Times Square and environs look gloomy, as only 17 houses out of 36 on Broadway are lit . . . two years after enjoying its biggest boom in a decade.

While these problems nag producers, marketing strategies are constantly being tested to broaden and entice the theater-going public.

And whereas in the past producers would advertise by running just a big quote ad in a New York paper, the emphasis today is definitely on tv.

"A good commercial is essential," says Ms. Gordon, who believes tv is the most important aspect of marketing a show.

Mr. Ash, while concurring with Ms. Gordon, says he believes that the most crucial aspect in Broadway advertising is creating a strong over-all campaign.

Says Mr. Ash, "Producers' budgets can't compete with the Burger Kings and Fords, so they have to take advantage of every penny." To Mr. Ash, this means tying together the campaigns for tv, redio, print and posters, thus letting each medium reinforce the other.

If there's one thing producers want to capture on tv, it's the razzle dazzle in a play or musical.

Because the theater is mostly a visual medium, Mr. Ash says, tv is its best showcase. And if there's one thing producers want to capture on tv, it's the razzle dazzle in a play or musical. The advertiser's trick is putting that dazzle in a 30- or 60-second spot, which preferably is then broadcast several weeks before the show opens in New York. The object is to build a heady advance sale and create a buffer to possibly indifferent or even hostile reviews.

Ash/LeDonne typically creates tv spots while the shows are out of town, then has them ready when the box office opens in New York. The agency's successful spot for "La Cage" was a special case.

"With 'La Cage,' we went to Boston to film a spot just for the Boston market," recounts Mr. Ash. "We filmed only the chorus' legs and wigs because the costumes and sets weren't even complete." But the spot proved so successful that it was shown in New York, where an advertising blitz and favorable word-of-mouth messages sent advance sales of tickets soaring.

Normally, a profusion of tv spots doesn't pay off directly in terms of ticket sales. Rather, it is the producers' hope that they will spur enough initial business to create the kind of word of mouth necessary to keep a show running. But the failure of a re-

(Continued on Page M-22)

---

making sure we were happy with that logo," says Mr. Carr. "That's something we knew we would have to live with for a long time."

When "Cage" opened in Boston, Mr. Carr didn't have to worry a second longer about promoting the show into an event. "We saw those ultraconservative Bostonians jumping to their feet to applaud 'Cage,'" says Mr. Carr, "and we knew this was going to be big."

Magazines and newspapers called, wanting to do features on the show. RCA Records asked to record the cast album *before* the show opened. Mr. Carr consented, and the album hit the streets three days before its Broadway opening.

Aside from the free promotional fallout generated by the show's hit status, Mr. Carr is spending money only for weekly print ads in New York papers.

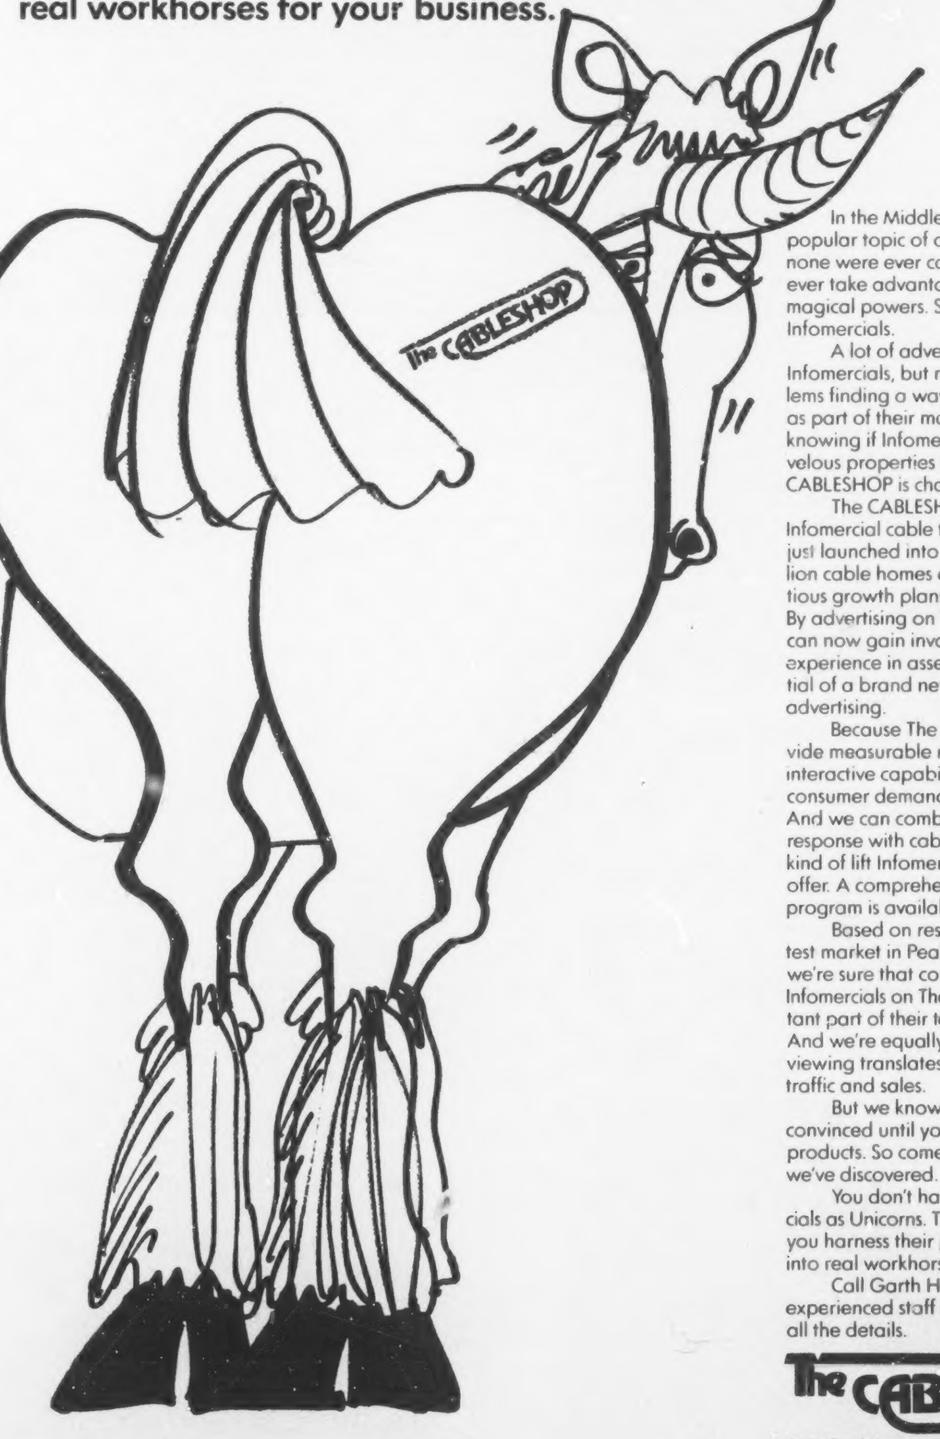
A slew of "La Cage" promotional tie-in products aren't planned. (There'll be no toilet paper, although it was suggested to Mr. Carr.)

Even though the dough is rolling in from "Cage" faster than he can count it, Mr. Carr says he has no intention of retiring from show business.

"I made enough money off of 'Grease,' to retire, if I'd wanted to," says Mr. Carr. Humbly. No, retirement isn't what he wants. He wants more hits. More events. More of anything that he can promote like crazy to a populace starved for entertainment.

Help Stamp Out Unicorns

The CABLESHOP will change Infomercials from imaginary creatures into real workhorses for your business.



In the Middle Ages Unicorns were a popular topic of conversation. Alas, since none were ever captured, no one could ever take advantage of the Unicorn's magical powers. So it is today with Infomercials.

A lot of advertisers are talking about Infomercials, but most are having problems finding a way to put them to work as part of their marketing mix. Or even knowing if Infomercials do have the marvelous properties claimed for them. The CABLESHOP is changing all that.

The CABLESHOP is the first all-Infomercial cable television service. We've just launched into almost a quarter million cable homes and we've got ambitious growth plans in the top 30 markets. By advertising on The CABLESHOP, you can now gain invaluable marketplace experience in assessing the upside potential of a brand new form of television advertising.

Because The CABLESHOP can provide measurable results. We've got an interactive capability that helps gauge consumer demand for your Infomercial. And we can combine the power of direct response with cable television to see what kind of lift Infomercials provide for your offer. A comprehensive market research program is available as well.

Based on results of our nine-month test market in Peabody, Massachusetts, we're sure that consumers will make the Infomercials on The CABLESHOP an important part of their television viewing habits. And we're equally certain that consumer viewing translates into increased retail traffic and sales.

But we know you won't be fully convinced until you try it for your own products. So come on and discover what we've discovered.

You don't have to think of Infomercials as Unicorns. The CABLESHOP will help you harness their powers and turn them into real workhorses for your business.

Call Garth Hallberg or any of our experienced staff at (212) 980-6686 for all the details.

A jug of wine, a loaf of bread, a Fifth of Beethoven

Outdoor concerts are a breath of fresh air for music lovers

By Mark Liff

You'd think an outdoor classical music concert on a sultry summer evening in an idyllic suburban setting would need no special promotion. For the most part, these performances do sell themselves.

Two of the better known outdoor music concerts, the Ravinia Festival in Highland Park, Ill., and the Tanglewood music festival in Lenox, Mass., draw crowds of classical music lovers (and avid picknickers) each year.

Each festival's setting is appealing, but each has its own way of being heard.

Ravinia, with its marketing efforts, leaves nothing to chance; the Boston Symphony Orchestra's Tanglewood festival in the picturesque Massachusetts Berkshires believes that the opportunity to unwind in sylvan surroundings with the sound of live classical music is enough of a selling point.

Ravinia offers discount coupon books for its outdoor music series; there are special buses from the downtown business district and northern points to make the trip a bit easier to the suburban Chicago site; park-and-ride service drops off music lovers at its gates.

Selling the 12-week Ravinia summer season is more. It also includes mail distribution of flyers, a print effort and a television and radio advertising campaign.

But selling the 12-week Ravinia summer season is more. It also includes mail distribution of flyers, a print effort and a tv and radio advertising campaign prepared with the assistance of its advertising consultant, Leo Burnett USA.

Also, working with Foote, Cone & Belding's research department and nearby Northwestern University, Ravinia is conducting a computerized analysis of its audience demographics and interests.

Concertgoers at Ravinia have a choice of seating: Reserved seats in the pavilion or blankets on the lawn.

Tanglewood has attracted more than 300,000 music lovers in each of the past two years for its nine-week season. The festival spends nearly all of its $230,000 annual promotion budget on print ads and 400,000 flyers, which are mailed to those who inquire about upcoming events and distributed to inns, hotels and shops in the community.

"You come [to Tanglewood] to find the Boston Symphony in a magnificent setting, performing great music," says Vera Gold, promotion coordinator for the Boston Symphony. "There is a different program on Thursday, Friday, Saturday or Sunday. If a tourist came for the weekend, he could come to Tanglewood three or four times and see different things."

Tanglewood's marketing begins in the spring, with print ads in the *New York Times*, *Boston Globe* and several Connecticut-based papers, Ms. Gold says. There also is a radio ad campaign.

The first ads list the complete summer series. "Many of the people are serious music lovers and that [print ads] is how they find out about our program," Ms. Gold says. "Many tickets are sold through the mail. We've had several concerts sold out completely in advance last summer—that was through advertising."

The first ads run the entire program so the potential audience member can plan ahead, Ms. Gold says. When the summer season begins in July, the *Berkshire Eagle*, the area's major paper, runs ads listing programs.

Also, Tanglewood prints 400,000 brochures, which are distributed throughout New England—in shops, inns and other places where tourists might stop, Ms. Gold says. "We mail 45,000 of them to 'Friends of Tanglewood,' the festival's contributors who have an opportunity to purchase tickets before they go on sale to the general public," she adds. Brochures also are sent to anyone who requests one.

Though attendance has stead-

42nd St.

(Continued from Page M-21)

vival of "Mame" this fall points out the fallibility of even the most heavily advertised venture.

"Mame" producer Mitch Leigh saturated the New York tv market as many as 50 times a day for three to five days a week well before opening night. But negative reviews and mediocre word of mouth closed "Mame" within weeks of its opening.

On the other hand, Mr. Ash successfully kept the musical "On Your Toes" running despite its being all but panned by Frank Rich, the *New York Times'* powerful theater critic. Aided by good word of mouth, the advertiser sought to attract dance aficionados, as well normal theatergoers, keying ads on the show's star, ballerina Natalia Marakova, and on the famous "Slaughter on Tenth Avenue" ballet sequence.

The importance of getting a quick jump on attracting ticket buyers prompts many producers to rely on revivals and British imports—with no guarantee of success. Then what is it that best sells a show? A star name? A list of critics' raves?

A star name is not always a bankable commodity. The two shows (both revivals) that have already closed this season boasted big names—Ms. Lansbury in "Mame" and Cicely Tyson in "The Corn is Green." And last season, the publicists' dream cast—Elizabeth Taylor and Richard Burton—in a revival of Noel Coward's "Private Lives" did little to prevent it from dying at the box office.

As Mr. Ash says, "In the end you have to have good product —that's the crux."

But Ms. Gordon believes that Lansbury, Tyson and perhaps even Taylor are no longer the type of stars that will draw the increasingly young Broadway audience.

Today, nearly 50% of theatergoers are 35 years old or younger. Mr. Gordon says it's such actors as Dustin Hoffman (who will star in a revival of "Death of a Salesman" later this season) and Al Pacino (now appearing in "American Buffalo") who are the sure-draws.

Likewise, while every producer can name a play that died despite critical raves or thrived despite terrible notices, they do not slight the power of the pen. Mr. Ash even goes further. "Despite whatever else happens with a show, in 90% of cases the *New York Times* review is critical in determining success or failure," he says.

Before fretting about reviews, producers first have to line up backers for their multi-million-dollar extravaganzas. Rising costs have ended the days of "angels" putting up a few thousand dollars to back a new show. Fortunately, Hollywood has come to the rescue in search of product to film, and movie studios are co-producing more and more Broadway shows.

Ms. LeFrak, who co-produced "Crimes of the Heart," with Warner Bros. and "My One and Only" with Paramount, sees Broadway as a natural source for moviemakers. "I went to 'My One and Only' last night, and there were so many Hollywood business people there it wasn't to be believed," she says.

MCA/Universal Pictures, one of the backers of the new musical "Doonesbury," has instructed Ash/LeDonne to film a two-minute promotion to run in New York area movie houses and perhaps on airlines bound for New York.

Producers' attempts at advertising on cable and public tv have proved less fruitful.

According to Ms. LeFrak, the pioneering public tv spots were dropped because "we couldn't judge their effectiveness." And producers have backed away from cable, too, because of residual payments, which are made on a different scale than network tv, thus raising costs.

HE MEANS BUSINESS

ily gone up, Tanglewood faces some competition from the Saratoga Music Festival, on the other side of the Berkshires in New York State. "That would take more of the New York crowd now," Ms. Gold points out.

Still, she maintains, there is no real competition with Saratoga for the serious music lovers —there are enough to go around, it seems.

"We would like to have enough money to increase the advertising budget where we could possibly do some television advertising," Ms. Gold says. "We could possibly reach a different audience, a broader audience with a wider range.

Tv advertising also could serve as a "backup for print advertising, too," she adds.

Rock and country music concerts also are held at Tanglewood, but these are presented by a promoter who contracts with the festival site. "It is a big seller that goes back to the early '70s," Ms. Gold says.

Tanglewood itself does not offer any special promotions or tie-ins with lodging services. Tourists are referred to the "Berkshires Vacation Guide," published by the Berkshires Hills Conference, to find housing during the music season. Inns, hotels, motels and even private homes for miles are packed throughout the Berkshires, with reservations necessary months in advance.

By comparison, Ravinia is more a "commuter" festival, drawing a large part of its audience from the Chicago area. As such, it does other things to get the music lover into the suburban park, including the park-and-ride and special bus services; the Chicago & North Western Transportation Co. also runs trains to Ravinia's west gate.

Unlike Tanglewood, Ravinia also has a coordinated tourist program, featuring tie-ins with various hotels. The Ambassador East Hotel in Chicago, for example, offered a $196 per couple deal last year, featuring two nights deluxe accomodations, Ravinia Pavilion seats for a night, wine and cheese tray on arrival and full breakfast each day.

The Hyatt Lincolnwood in that Chicago suburb offered a $49 single ($59 double) package, with deluxe accommodations for one night.There also was a blanket for a Ravinia picnic and lawn admissions tickets.

But key to Ravinia's current promotional effort is its audience survey.

"Similar questionnaires were distributed on carefully selected performance evenings to the festival's lawn audience [general admission] in 1982 and to the pavilion audience [reserved seats in the open-air pavilion] in 1983," a Ravinia spokesman says. "The objective was to gather the needed information to form an objective base of data on Ravinia's audiences."

The survey examined the audience demographics, the decision-making process in purchasing tickets, when the decision was made, where the audience member found out about the performance, advertising awareness, factors influencing the decision to attend and audience behavior.

Ravinia's print ads run in the Chicago dailies and in the surrounding communities, depending on the performance being sold, the spokesman says. Tv spots are 10 seconds and 30 seconds in length that "span the season from [James] Levine to [Pinchas] Zuckerman," the spokesman says. Print ads also ran last year in *The New Yorker*.

Viewers are directed to call R-A-V-I-N-I-A, a special phone number, to charge tickets. The phone system has been increased in recent years to handle a larger audience. There also are various mailings throughout the year.

One of the most popular marketing techniques Ravinia claims to have initiated—and now sees copied elsewhere—is its coupon book offering a 20% discount.

More than 1,000 volunteers in 75 communities throughout the area sell these $25 books for $20, giving potential customers a chance to essentially work up their own subscription series. Discount books also are available in banks and shopping malls.

It all makes listening to music under the stars that much more worthwhile.

Actor George Hearn, dressed to kill, co-stars in "La Cage aux Folles."

Meanwhile, no one's yet given up on the current season. Producers are crossing their fingers in hopes of more hits on the order of "La Cage" that might spark a creative and financial resurgence.

Possible contenders include such musicals as "The Rink," starring Liza Minelli, and "Going Hollywood," a remake of the Kaufman/Hart play "Once in a Lifetime." Hopes are highest for a nonmusical British import, "Noises Off."

In the meantime, the sound of sharpening knives is heard as the tough New York audience awaits.

Before you can get it on film, you have to get it on paper.

Creating Effective TV Commercials

Creating Effective TV Commercials by Huntley Baldwin can help you do both. And do it right. Baldwin takes you through the entire commercial creation process, from first assignment to final assessment, with the insight gained only by a person who has been through the process again and again.

His book tells you how to be creative and, perhaps more importantly, how—and when—not to be, what a sound strategy should contain, the "real intangibles" of the creative process, what a commercial can realistically be expected to do. It's all covered in depth in this fascinating study.

But there's more. **Creating Effective TV Commercials** also discusses execution; hard, soft, and other assorted sells; demonstration, slice of life, presenter/spokesperson; commercial formats and how to use them best for your product. And it cuts through the "mystique" of production techniques—animation, live action, film, tape—and shows you how to use them to strengthen creative effects, and how to make them work harder—and smarter.

And there's more. **Creating Effective TV Commercials** shows you how to put together storyboards that tell the story and how to sell them persuasively without overpromising. It even gives hints on how to live with "legal" and how to use research as it was meant to be used—as a chisel for making good commercials better rather than as a hammer for destroying them.

Creating Effective TV Commercials is must reading for any copywriter, art director, account executive, or advertiser. It's the result of Huntley Baldwin's 16 years in the agency business as writer, associate creative director, and, finally, creative director and senior vice president at Leo Burnett USA.

It's a book you cannot afford to be without. Order your copy today. Only $24.95

Politics

(Continued from Page 3)

next year's elections, daily papers do a better job of snaring a significant portion of that money.

"This is something we are keenly interested in," says Hank Dain, NAB's director of political advertising.

"The committee [that sets bureau priorities] felt there was a real void here that had to be filled."

In moving to fill that void, newspapers are bucking a strong trend favoring tv.

In 1976, political candidates spent $50.8 million on tv advertising, more than twice the amount they put into newspapers. In 1980 that spread grew: The $90.6 million spent on air time for tv commercials by candidates represented more than three times the total attracted by newspapers.

Newspapers lag badly

While Mr. Dain said he expects that the bureau's efforts will help newspapers attract approximately $50 million in political advertising in 1984, he acknowledged that newspapers will still lag far behind tv. (The Television Bureau of Advertising is projecting that tv will get $180 million in political advertising next year.)

So far, the bureau's efforts have been encouraging, Mr. Dain asserted, explaining that the Republican national committees were especially interested in the "one order/one bill" system that allows national candidates to place an ad in any paper in the country through the NAB.

In 1980, President Reagan spent $2 million on newspaper advertising through the one order/one bill method.

The Republicans also were pleased that newspapers were switching to Standard Advertising Units, a change that makes it easier for national advertisers to place the same ad in a variety of newspapers, he said.

In Iowa, where the eight Democratic candidates are now slugging it out in a crucial party caucus campaign, the *Des Moines Register* is trying to make sure that the pattern of previous elections—where almost all of the candidates' advertising dollars went to tv and radio—isn't repeated in 1984.

"We are more aggressive than we have ever been in going after political advertising," said Charles Edwards, advertising director of the *Register*.

The paper started working early this year on attracting political advertising. It is contacting the local and national offices of the various candidates, has been holding seminars on newspaper advertising and sending out brochures and sales materials on the newspaper and its readership.

The paper also is sponsoring a debate among the Democratic candidates Feb. 11, and is publishing a special tabloid section on the upcoming caucus the next day.

Advertising in that tabloid is "pretty much a must for candidates who want to reach our voters," Mr. Edwards said.

Another paper said to be gearing up for the 1984 elections is *USA Today*, which as a national newspaper may be in a unique position to attract political advertising.

In trying to compete with tv in the upcoming elections, however, newspapers face the problem of a crowded and quick primary season, two factors that increase the necessity for grabbing the voters' attention.

■ "Newspapers are good when you want to discuss the issues in a campaign, but newspapers can't do what tv does, and that is to show the candidate as a person, to show how he looks, how he sounds, how he comes across to people. And that, in the end, is going to elect a candidate," said Raymond Strother, media consultant to Sen. Gary Hart (D., Colo.).

Candidates are increasingly relying on the "emotional effects of tv" to get across a certain image to the voters, NAB's booklet acknowledges, and "a lot more than image is needed to elect a candidate," Mr. Dain points out. "You have to get the facts across about the various issues in the race, and you have to provide real logic as to why a candidate should be elected. That's where newspapers come in," he said.

The NAB suggests that newspapers can also compete with tv for "image" advertising by convincing candidates to run high-frequency, small-space ads that can act as reinforcement for more in-depth issue advertising.

In the upcoming Democractic presidential primaries—which because of the wide field of candidates will generate more advertising dollars than the Republican race—newspapers also have to overcome a belief by some media consultants that the print medium is not cost-efficient in reaching Democrats.

Although a 1981 survey by Simmons Market Research Bureau found that newspapers are read by 72% of people who voted in the last political election, another survey by Market Opinion Research indicated that those voters are more than likely Republicans.

The survey by MOR showed that 64% of the people who identified themselves as Republicans said they read campaign stories in their newspapers almost every day, while only 55% of the people who called themselves Democrats said they did so.#

Ethical ads in politics asked

Washington—American Assn. of Advertising Agencies president Len Matthews challenged a roomful of political advertising experts Dec. 9 to join the ad industry in a collective effort to improve the ethics of the 1984 campaigns.

Asserting that many people believe ethics hit a new low during the 1982 congressional campaign, Mr. Matthews told the bipartisan group that only labor leaders and car salesmen ranked below advertising executives and politicians in a July Gallup study of the public's view of various professions.

"The best way for politicians to move up that Gallup poll in public credibility is to act more responsibly and ethically," Mr. Matthews said. He explained that the Four A's is concerned about what unethical and misleading political advertising does to the public's image of advertising generally.

Charles Adams, Four A's exec vp, outlined the six-point Code of Ethics for Political Campaign Advertising, adopted by the association in 1982 and listing specific practices that are considered unfair.

The code also specifies that the advertising agency must stand as an independent judge of fair campaign practices.

Sharing the platform with Four A's leaders were Paul Kirk, treasurer, Democratic National Committee; William Greener, communications director, Republican National Committee; Dorothy Ridings, president, League of Women Voters, and Nicholas Lemann, national correspondent, *Atlantic*.#

High Court eyes cost of time

Washington—The U.S. Supreme Court last week asked the Reagan Administration to say whether it believes states or only the federal government can control the rates charged by radio and tv stations for political ads.

The justices are debating whether to review a Texas law, struck down by the lower courts, that requires broadcasters to make discount ad rates available to political candidates and political issue groups year-round.

Federal law requires stations to offer discount rates to candidates for the 45 days before a primary election and 60 days before a general election; no discounts are required for political issue advertising.

The High Court last week also permitted tv and radio stations to air commercials financed by the tobacco industry without disclosing the industry as the sponsor.

The court turned aside a petition from a California antismoking group contending that broadcasters should have identified ads placed by "Californians Against Regulatory Excess" as tobacco industry advertising.

The CARE group was formed, with heavy funding from the industry, to defeat a 1980 state referendum calling for mandatory "no-smoking" areas in most enclosed public places in the state.#

BERNARD A. MITCHELL

Chicago—Bernard A. Mitchell, founder of Jovan Inc., the Chicago-based fragrance company, died here Dec. 5. He was 71.

Mr. Mitchell gained recognition in the fragrance business when he launched Jovan in 1968, which marketed Musk Oil and later extended its line to include such products as Oil of Mink, Sport Scent, Sex Appeal, Man by Jovan and Woman by Jovan fragrances. Mr. Mitchell sold Jovan to British-based Beecham Group Ltd. for $85 million in 1979.

Before founding Jovan, Mr. [illegible]ell founded and headed Mitchell Manufacturing Co., which marketed fluorescent desk lamps and air conditioning units, and later formed Fulton Industries, an industrial conglomerate.

JOHN E. JAYME JR.

Leesburg, Fla.—John E. Jayme Jr., 78, founder of the Jayme Organization, died here Nov. 22.

Before launching the Jayme Organization, a Cleveland advertising agency, in 1947, he worked for Westinghouse Electric Corp. and Goodyear Tire & Rubber Co.

He served as chairman and president of the agency from its founding to 1965, and continued as chairman through 1972, when he sold his interest to key associates.#

Gillette departure stuns ATW

(Continued from Page 2)

tising to Women's former chairman was involved in federal court earlier this year. . .events surrounding that proceeding had led to a strain in the client/agency relationship."

For beleaguered ATW, last week's news only confirmed that 1983 has been a very bad year.

In addition to its chairman's run-in with the law, the agency lost the $3 million Minnetonka account, although not as a result of the tax charges. Unable to resolve what were described as mounting differences over creative philosophy and execution, the two split last August.

Creative satisfactory

As recently as October, Gillette said it would stick by ATW, despite Mr. Ernst's tax problems. Sources close to Gillette said the brand groups were satisfied with ATW's creative work, particularly for the new Body Flowers drive.

"If they gave them Body Flowers, they were clearly happy with them," said Smith Barney analyst Jack Salzman. "That is potentially a very big introduction for them."

As such, speculation mounted that last week's decision came from someone high up in the corporation. However, a Gillette spokesperson denied those reports, saying, "When something like this happens, somebody higher up may be informed, but this was a divisional, Gillette North America decision. The personal care division was the client, ATW was the agency and it all resulted from a review of client-agency relations."

Longtime Gillette watchers say the company simply would not allow its reputation to be soiled through an association with Mr. Ernst.

What remains unclear is whether Gillette's exit will encourage other clients to follow suit. The loss leaves ATW with a scant list of clients: Charles of the Ritz, *Good Housekeeping*, National Coffee Assn. and G.D. Searle & Co. consumer products unit.

Laurie Wright, new-products director at Searle's consumer products unit, confirmed that ATW currently is working on some Searle assignments, and said there is no consideration of dropping the agency from its roster. The Skokie, Ill.-based company splits its consumer unit new-product projects between ATW and Cunningham & Walsh, Chicago.

According to a spokesman for National Coffee Assn.—now ATW's biggest client, spending $20 million-plus—there are no plans to leave or review its account.

Robert Miller, Charles of the Ritz Group president, said: "No, we're not planning to split. They continue to be our agency." According to Leading National Advertisers, Charles of the Ritz spent $10.8 million, excluding newspapers, last year though ATW.

Jack Siegrist, promotion director, *Good Housekeeping*, also said no agency review is planned. In 1982, *Good Housekeeping* spent $300,000 in advertising, according to LNA.

Whatever the future of Advertising to Women, one thing is clear: The Gillette reassignment comes at a time when the personal care division—particularly some of the brands handled by ATW—could use a marketing transfusion.

Gillette's personal care division swung into the 1980s on the highly successful launches of Dry Idea deodorant/antiperspirant and Silkience haircare products.

They were followed in 1981 by Aapri apricot facial scrub, whose sales surprised even Gillette. In less than a year, Aapri managed to snare 9% of the $133 million facial cleanser market, and Wall Street embraced Gillette as one of the hottest new-product performers.

Since then, however, the division has had some disappointments, most notably Silkience's share erosion—from 3.6% in shampoo to 3% and from 6% to 4.3% in conditioners over the past year—and FOHO's inability to generate consumer interest.

"FOHO and Silkience are waning brands," said Salomon Bros.' Diana Temple. "In hindsight, the positioning of FOHO as a concept did not have as much appeal as Gillette had predicted. I think they will wait it out on that one to see how Revlon's and Lever Bros.' new products do." (Revlon early next year will introduce Hair's Daily Requirement, and Lever is rolling out Dimension shampoo.)

Silkience revamp seen

As for Silkience, Young & Rubicam is expected to overhaul the brand as it did Right Guard deodorant. Indeed, Y&R's work on Right Guard, which over the years had slipped from being a household favorite to an also-ran, clearly led to its latest assignments.

Analysts also said Gillette may drop the Silkience skincare offshoots, which have not matched the success of the original hair line.

"Plus," said Smith Barney's Mr. Salzman, "they made a mistake by pulling back support on the original Silkience hair products. They thought the advertising for the skin [lotion] could carry both.#

This story was written by reporter Gay Jervey, with contributions from senior reporters Pat Sloan and Christy Marshall.

Coffee ad probe sought

Wailuku, Hawaii—A consumer group here has asked the National Advertising Division of the Council of Better Business Bureaus to investigate claims made in the Advertising to Woman-created campaign for the National Coffee Assn.

The group, Consumerwatch, has challenged the NCA ad's contention that coffee has a calming effect on people. Earlier this month, the Center for Science in the Public Interest, a Washington-based consumer group, urged the Federal Trade Commission to investigate a number of claims made in food advertising, including the NCA ads (AA, Dec. 5).

Aimed at 18-to-34-year-olds who grew up on soft drinks with caffeine, the NCA ads claim that coffee "picks you up and calms you down," ending with the message, "Join the coffee achievers."

"Yes, there is an inquiry and we have responded," said NCA spokesman Bill Brooks. He declined further comment.

The yearlong $20 million campaign is using tv and cable exclusively. Flights are running on all three networks and on three syndicated shows: "Thicke of the Night," "Solid Gold" and "Fame." Three cable services are also in the media mix: MTV: Music Television, USA Cable Network's "Night Flight" series and WTBS' "Night Tracks."

The ads are clearly upbeat: Rock music entreats consumers to "hold on tight to your dreams." The camera cuts quickly to a variety of celebrities, including singers David Bowie and Joe Jackson, Cincinnati Bengals quarterback Ken Anderson, marathon runner Allison Roe, the singing group Heart, author Kurt Vonnegut and actresses Cicely Tyson and Jane Curtin.

However, the claims about coffee's calming attributes are based on attitudinal research between 1961 and 1979, rather than clinical scientific study, the Hawaiian group contends.#

Atari founder develops revolutionary tv

By TOM BAYER

SUNNYVALE, CAL.—Officials of Atari founder Nolan Bushnell's Catalyst Technologies Inc. are quietly showing investors, programing executives and major advertisers a "smart black box" that is being described as the first innovation in tv since the advent of tv itself.

The company claims the revolutionary development has the potential to engulf advertisers, the tv industry and consumers in a futuristic new world much earlier than had been imagined.

Its developers believe the system—named ACTV and pronounced "active"—could thrust consumers, advertisers and programers into a new interactive age.

Tv advertising could be aimed at homes with preselected demographics and psychographics; present measurement techniques could become obsolete; tv programs could actively and instantly involve viewers, and education could change radically.

ACTV and its new technology have been enthusiastically endorsed by industry leaders who have seen the system in its rough, first-generation form.

Officials of Lucasfilm Ltd. have expressed interest in being a supplier of programing. A major national consumer goods advertiser has expressed an interest in being a charter advertiser for ACTV, and in funding research to be conducted in a pilot city.

CT executives would not reveal the identity of the advertiser, pending contractual agreements and actual research plans.

ACTV is based on a sophisticated microprocessor that is attached to a viewer's tv set, and on new methods of program production. Catalyst Technologies expects that within the next two years it will contract with programers and cable networks to produce and distribute this type of programing.

The development has the potential to eclipse Mr. Bushnell's own creation of Atari, which he introduced in 1972 with Pong and simi-

last minute news

Squibb moves Theragran vitamins to O&M

PRINCETON, N.J.—Squibb Corp. will assign the $8 million Theragran vitamin account to Ogilvy & Mather following a review that included incumbent Jordan, Case & McGrath and two other undisclosed agencies.

Izod parts company with Grey Advertising

NEW YORK—Izod LaCoste, a division of General Mills, and agency Grey Advertising have parted company. The makers of the alligator shirt apparently have not yet named a new agency for the estimated $2 million account.

Ogilvy talking with Rolf Werner Rosenthal

NEW YORK—Rolf Werner Rosenthal, one of the last major independent medical communications agencies, is now in merger discussions with Ogilvy & Mather International. The negotiations concern a stock exchange. RWR would "operate separately but as a full member of OMI," a spokesman said. In 1982, Rosenthal reported a gross income of $5.3 million on billings of $38 million. A full announcement (or completion of negotiations) is expected in January.

GM considers reorganization by car size, not brand name

By JESSE SNYDER

DETROIT—General Motors is eyeing sweeping organizational changes that would alter sharply the way its cars will be marketed, industry sources said.

The changes include creation of a "small-car" group consisting of Chevrolet and Pontiac and a "large-car" group composed of Buick, Oldsmobile and Cadillac. "In a year, you won't recognize GM," one observer said.

Each group would be headed by a group executive and would take over the marketing and administrative functions, to the extent of having single marketing staffs—one for Chevrolet and Pontiac, for example.

But the changes would also allow for authorizing more dual dealerships, in which a dealer could structure his inventory by consumer segment and across car group lines. For example, Pontiac could be teamed frequently with Buick to appeal to "expressive" or "style-conscious" car buyers. Chevy and Olds often would be paired at the dealership level to attract those who prefer conservative styling.

Cadillac, at the top of the price ladder, would continue to be marketed separately most often.

A GM spokesman declined comment on any plans. He did say that "about 15 months ago we announced the appointment of John Debbink, former general manager of Delco Morraine division, to coordinate a corporate organizational review. That review goes on and there is absolutely nothing to report from it. We said this group would look at the whole organization and in time get back."

Under the reported plan, Chevrolet and Pontiac would offer nothing larger than an intermediate-size car such as the A-body Chevy Celebrity-Pontiac 6000.

Buick, Olds and Cadillac (BOC) would lose their

Divested Bells head into uncharted terrain

By ROBERT RAISSMAN

In the world's largest business reorganization in history, at midnight on Dec. 31, AT&T will divest itself of its wholly owned telephone companies and $154 billion in assets, giving birth to seven new and independent regional holding companies.

With that move, AT&T itself plunges into a market that already has in a short time become one of the most competitive ever. While much has been made of that, not much attention has been focused on the 22 regional phone companies, now reorganized and operating under the new holding companies.

The new year finds them wrestling with a number of communications problems, not the least of which is shaping advertising messages to a somewhat puzzled public.

The entire advertising process is changing for these companies and a lot is at stake. They have to explain why their customers may be getting six different telephone bills, who they must call if a telephone line snaps, who to call if the phone is out of order.

These external communications challenges, and new marketing challenges likely to come, will keep a steady stream of advertising coming from the 22 general ad agencies that now serve them *(see accompanying chart at right).*

According to ad managers at the regional phone companies, the budgets to be funneled through agencies will remain low for the present,

NEWSPAPER

Top auto ad execs shift at Ford, K&E

DETROIT—The new year will find some auto marketing veterans missing and at least one new face, as Edsel Ford moves to advertising manager of Ford division.

A number of marketing executive changes were made at Ford last week.

In the Chrysler Corp. ad-executive suite, John J. Morrissey is leaving as chairman of Kenyon & Eckhardt here after five years. The Birmingham, Mich.-based operation will now be headed by Peter Dimsey, exec vp-manager.

Mr. Morrissey joined K&E from Ford division general marketing manager back when Chrysler's survival was in doubt.

"There is no question Chrysler has turned the corner. But I wouldn't want to spend that five years over again," Mr. Morrissey said in an interview.

His contract with K&E had run out. "Both sides lived up to our agreement, and the time has come to do some other things in advertising and marketing," he said.

There have been no talks with Chrysler, he said, and J. Walter Thompson USA, where he worked before joining Ford, "does not beckon again."

At Ford Motor, there were a number of executive changes in addition to the new position of Mr. Ford.

Ross Roberts is moving to general marketing manager of the Lincoln-Mercury division, from Ford division market representation manager, and B.J. Coughlan shifts to general sales manager

Edsel Ford knows the ads he likes

By RALPH GRAY

Edsel B. Ford II is moving into advertising and marketing on his way to making the Ford, name on the Ford Motor Co. buildings stand for his.

Edsel Ford is the great-grandson of founder Henry Ford, and last week was named advertising manager of the Ford division. He was marketing product plans manager.

Douglas T. McClure, who was Ford division ad manager, becomes ad director of the Ford corporate marketing staff, a vacant position.

"Getting the opportunity to go into advertising is a rounding process that I believe in the long run is going to benefit me," Mr. Ford said in an interview. "I'm a product man and I'm excited about having the opportunity to create messages that talk about the great stuff we've got."

Mr. Ford has been marketing product plans manager of

Controversial print ad for Coors beer.

Coors pulls campus ads

GOLDEN, COLO.—William Coors, chairman of Adolph Coors Co., has ordered the discontinuation of a print ad campaign that he believes is "tasteless" and improperly using sex to sell Coors beer.

The color ad appears in the Dec. 22 issue of *Rolling Stone*.

That ad features a surrealistic view of a swimsuit-clad female perched between two Coors bottlecaps. Copy offers a poster for $2. The ad uses Coors' flagship theme: "The best of the Rockies is yours."

Foote, Cone & Belding, Chicago, created the ad, which is part of a two-pronged print campaign aimed at the college market. Other ads depict "physcially fit" males and females in similar settings, says a Coors spokesman.

Mr. Coors reportedly ordered the campaign's end after agreeing with complaints aired in a letter to him from the editor of the *University of Colorado Daily*, who charged the ads were tasteless and using sex to sell a product.

Regardless, the poster campaign has had a "four-to-one" favorable response from those who have contacted the brewery, said the company.#

Quaker rolls snack 'candy'

By JANET NEIMAN

Quaker Oats Co.'s long-awaited encore to its Chewy Granola Bars will come in February, when the company begins marketing nationally new Granola Dipps.

The four-item line of milk chocolate-covered, chewy-style granola bars will be backed by $24 million in advertising.

For nearly a year, Quaker chairman William Smithburg has been hinting about additions to Quaker's lineup in the wholesome snack products category (AA, Feb. 28).

The Granola Dipps line includes all four flavors in which Chewy originally was introduced: Chocolate chip, honey & oats, peanut butter and raisin & almond.

Dipps is said to have a slightly crisper texture than Chewy, and one trade source likened the taste to Hershey Foods' Whatchamacallit candy bar.

While retailers appear predisposed to take on the new line, several say they are faced with shelf-space problems. In western regions and some parts of the Midwest, the Dipps introduction follows a rollout of General Mills' Nature Valley Chewy Granola Bar.

Some buyers say they will be exchanging Dipps for some of the hard-texture Nature Valley products; others may eliminate Carnation's Trail Mix granola bars and some of Hershey's New Trail line.

Foreseeing heavy demand for Granola Dipps, one retail buyer fears Quaker will run into supply problems if it goes through with a national introduction in February.

When Quaker Chewy debuted on the East and West Coasts in 1981, Quaker was forced to pull the line out of eastern markets and put it on allocation in the West because of supply problems.

Dipps represents Quaker's second salvo at General Mills' leading position in the nearly $300 million granola bar category.

Quaker has made at least one obvious change in its marketing strategy this time around—choosing a name that could not be copied by Nature Valley.

The $24 million in support being pledged for Dipps tops the $20 million budget Quaker promised when it introduced Chewy, as well as the $17 million General Mills said it would spend on Nature Valley Chewy.

Tv, heavy couponing and newspaper ads will accompany the introduction. Quaker-owned Ad-Com is believed to have the Granola Dipps assignment.#

GE plans new drive via Chiat

By PAT SLOAN

Early next year, General Electric will begin its first business-to-business campaign in 30 years.

The campaign will aim to serve all the company's various operations with the obvious exception of consumer products.

Observers expect the campaign gradually will increase in scope as GE strives to position itself on the leading edge of high technology for the 1980s. One source noted GE is communicating that on a small scale, "but it's going to get much bigger."

With industry spending for capital improvements on the upswing, the GE campaign will be timely.

The initial $5 million effort created by Chiat/Day, New York, will portray GE's divisions as synergistic units that are advantageous to do business with.

GE said it was not ready to comment on its new ad plans yet. Bart Snider, project manager of corporate marketing, also was vague about the fate of business commercials being aired by consumer agency BBDO. Shown on such programing as "Monday Night Football" and "60 Minutes," these spots began two years ago as extensions of its consumer campaign.#

"There used to be a major reason to leave this town. I don't believe that's true anymore. . .There was a lack of sophistication. . .that has changed and now we're finding a readiness to work with local agencies. . ."

— Tom McElligott, founder, Fallon McElligott Rice

"One of my goals is to increase the creative reputation of the agency. I've worked real hard on that since I've been here. . ."

— William Dunlap, new chairman, Campbell-Mithun

Hot agencies sparking new Twin Cities interest

By M. HOWARD GELFAND

MINNEAPOLIS—If you're talking visibility in the Twin Cities advertising community, 1983 has been the year of Fallon McElligott Rice.

While many of its competitors were quietly recovering from the recession, the upstart agency, now in its third year, was grabbing attention, awards and accounts.

Yet there's been plenty of other activity in the Twin Cities lately—activity the Fallon McElligott Rice phenomenon at once underscores and obscures.

Only a decade ago, many outsiders viewed the Twin Cities as a two-agency town: Campbell-Mithun and Everyone Else. Business was leaving for larger New York and Chicago.

No more. Many accounts are leaving home for the Twin Cities these days. The success of Fallon McElligott Rice, already claiming billings of $18 million, helps illustrate the area's continuing emergence as a creative and financial spot on the advertising globe.

At the same time, the attention given to FMR shadows the accomplishments of the more established agencies here.

Says Tom McElligott, the leading creative force behind the agency: "There used to be a major reason to leave this town. I don't believe that's true anymore. Ten years ago, there was a lack of sophistication here. People here didn't understand how to

'U.S. News' mulls offer for its purchase

By RICHARD L. GORDON

WASHINGTON—Future ownership of U.S. News & World Report Inc. is up in the air as management of the nation's No. 3 newsweekly ponders a big-dollar purchase offer from an undisclosed bidder.

The bid for control of the 50-year-old company—employe-owned since 1962—was confirmed by company president James H. McIlhenny last week. He refused to identify the bidder, and one likely candidate—real estate millionaire Mortimer Zuckerman, chairman of *Atlantic Monthly*—claimed he is not involved.

Mr. McIlhenny said employes will get more information "as early as possible," but he said, "We're not anywhere near any significant next step."

No single *U.S. News* employe owns a significant block of stock in the company, and the greatest number of shares are held in trust for employes in the company's profit-sharing fund, a staffer said.

U.S. News & World Report president McIlhenny refused to discuss the number of shares outstanding, or identify the profit-sharing fund trustees who can vote those shares.

Employes were told in a memo only that the offered price for the company is "significantly above its appraised value."

Staffers put the current value at $420 a share. There were rumors that the offering price could be as much as four to five times the company's book value.

"We intend to conduct ourselves completely in the best interest of our employes," Mr. McIlhenny said. He indicated there has been interest from other would-be purchasers over the years. "There's a difference between idle conversation and an offer," he added. "This is an offer."

There was immediate speculation about a Zuckerman connection to *U.S. News* because he and the company are already partners in a $200 million office building,

Low-alcohol beers on tap

By ROBERT REED

A rash of low-alcohol beers is expected to hit the market next year as brewers try to thwart declining sales and find a way to address the public's growing concern about alcohol abuse.

Already, two regional brewers have introduced low-alcohol brews, and most of the major beer makers are "looking into" the category and formulating test plans, sources say.

These beers have less than 2% alcohol by weight, less than those of regular brews, which range from 3.6% to 4% in alcohol content.

C. Schmidt Brewing Co., Philadelphia, entered last week with its Break Special Lager, and in September, Cincinnati-based Hudepohl Brewing Co. premiered Pace beer.

Of the major players, No. 1 Anheuser-Busch, already set to bring out a number of new products in 1984, is going to introduce a low-alcohol beer next year, competitors say (AA, Dec. 12).

Stroh Brewery Co. and G. Heileman Brewing Co. executives say they are examining the possibility, while Miller Brewing Co. is "looking at the category but not seriously looking," according to a company spokesman.

Robert Rechholtz, exec vp-marketing for Adolph Coors Co., says the segment is "the natural evolution of the light beer market," (which now garners about 20% of beer sales) and is in line with the American consumer's move to moderation of drink and diet.

Mr. Rechholtz declined to say if Coors also is working on a low-alcohol entry.

But when A-B does come to the fore, it is likely the others will follow, analysts say. The brewing industry is approaching a new-product explosion, and each brewer is attempting to offset flat or declining sales by creating new market niches such as low-alcohol or even flavored beers.

"To give the [low-alcohol] segment credibility, a big brewer will have to come up with it," says Bob Pohl, exec vp-general manager of Hudepohl.

"The others [larger brewers] will follow," says William Elliott, president of Schmidt. "A lot of extra brewing capacity out there has to be filled."

Mr. Elliott added that the low-al-

Ad spending seen climbing 13.8%

By CHRISTY MARSHALL

NEW YORK—Advertising spending will be up 13.8% to $85.4 billion in 1984, according to Robert Coen, senior vp-media of McCann-Erickson.

Speaking at the annual Paine Webber Media Outlook Conference, Mr. Coen reported that in '83 ad spending totaled $75.1 billion, 12.5% more than in '82.

"Advertising spending in 1983 was stronger than many of us predicted a year ago when we were expecting a slow and delayed economic recovery," Mr. Coen said. Earlier this year, he estimated national broadcast would be up 11%, national print 8% and other national 10%. In reality, all three areas were up 12%.

"A year ago, we didn't think consumers would start spending until after the tax cut in the middle of the year," Mr. Coen said. "However, they didn't wait and they came out much stronger and faster than we expected; '83 has really been a very good year."

Looking forward to 1984, the McCann executive said national broadcast would be up 13% to $15.2 billion.

Of that, network tv would increase by 12% to 13%, spot tv will be up 13%, radio (network and spot) would be up 12% to 14% and cable advertising would be up 20% to 30%. National print (magazine and national advertisers in newspapers) will be up 14% to $7.8 billion. Other national spending will be up 14% to $24.9 million. For the grand total, the media outlook for 1984 tallies out to a 13.8% increase to $85.4 billion.

The biggest gain in spending this year was enjoyed by the direct-mail industry; spending was up 14% from '82 to $11.8 billion. Magazines were a close second with a 13.5% increase, attributable primarily to increased buys from automobile and cigaret advertisers, Mr. Coen said.

Network tv advertising was up 12.5% to $7 billion; radio grew 12% to $1.3 billion; spot tv increased 10.5% to $4.8 billion; newspapers were up 9.5% to $2.7 billion, and other media climbed 9.4% to $10.4 billion.

For the total ad picture, local newspaper increased 14.5% to $17.4 billion, local tv was up 14% to $4.3 billion

U.S. shifts ad account policy

WASHINGTON—A new top-level government strategy has been approved to see that chunks of the government's big ad accounts are channeled to minority-owned ad agencies and agency suppliers.

At the same time, the new policy opens the way for agencies holding major government accounts to get longer contract periods without renewal competitions.

The new directive was issued by the White House office of federal procurement policy, part of the White House office of management and budget.

Under the plan, which became effective last week, agencies holding major government accounts will be called in twice a year by White House purchasing policy officials to review their subcontracting programs.

Discarded in the new Reagan strategy is a controversial Carter administration policy requiring that ad agencies have a chance to compete for the government's major accounts every three years.

The American Assn. of Advertising Agencies had protested that the mandatory competition every three years was wasteful and artificial, and it discouraged top ad agencies from pitching for government accounts (AA, Jan. 25, '82).

That change is most important in military recruiting, which accounts for about three-quarters of the government's $200 million ad spending.

While the Air Force already uses five-year contracts, the Army, Navy, Marine Corps and joint-service ad programs have stayed with the three-year contracts that are objectionable to the Four A's.

A 1978 federal law requires holders of government contracts worth $500,000 or more to develop subcontracting plans aimed at minority companies. In one such agency plan, Army agency N W Ayer has targeted 9% of its subcontracted business for minorities, a Pentagon purchasing official said last week.

The new policy represents a trade-off for ad agencies holding government contracts. The closer inspection of subcontracting performance by a new layer of reviewing officials means more paperwork. But the longer contract periods mean fewer renewal competitions.

In theory, the three-year competition cycle was meant to prevent agencies from locking up choice government accounts under long-term contracts. With more opportunities to bid, minority companies stood a better chance, the argument went.

In practice, fewer agencies have been willing to go to the expense of competing for the biggest government accounts. Even where there is competition, incumbents rarely have lost an account. Even without serious competition, the incumbent must go through the cost of pitching the business.

Growing impatience with the system led the Four A's to begin lobbying the Reagan administration nearly two years ago. The organization's proposal, which split Defense Department ad executives, called for extending the government ad agency contract to a maximum of nine years. Pentagon executives later told the White House they supported a switch to a five-year maximum.#

Merged cable networks set launch

By MORRIE GELMAN

ANAHEIM—The cable tv shakeout continues as the Entertainment Channel joins with ARTS to become an advertiser and cable system-supported service on Feb. 1, and Spotlight pay cable service ends on the same date.

The new service is to be known as the ARTS & Entertainment Network, or simply A&E. Hearst Corp., ABC Video Enterprises and RCA Cable each will own one-third of the cable network.

The Entertainment Channel, which folded March 31 after less than a year of operation and with less than 50,000 subscribers, was a joint venture of RCA and Rockefeller Center. The latter holds an interest in RCA Cable.

Advertising, as it is with the Hearst/ABC Video Enterprises ARTS service, will be a key source of financial support for what will be a basic cable service when the Entertainment Channel is added.

A president and key officers of the new A&E company, which will be based in New York, still are to be selected.

As A&E comes on as another high-profile attempt to tap the cable audience, Spotlight becomes another high-visibility dropout.

The service has been managed by Times Mirror Satellite Programming since May, 1981, and is owned by four major cable companies—Cox Cable Communications, Storer Communications, Tele-Communications Inc. and Times Mirror Cable Television.

After folding its around-the-clock pay cable movie service Feb. 1, Spotlight's assets will be acquired by Showtime/The Movie Channel, giving these services an opportunity to close the wide gap that Home Box Office has opened in the pay tv competition.

Showtime/The Movie Channel, which operates as a separate 24-hour-a-day pay tv service, has more than 7 million subscribers.

It was imperative for Spotlight, if it was to compete in the marketplace, to market itself outside the cable systems of its four partners.#

Ogilvy hands over reins

NEW YORK—David Ogilvy, founder of Ogilvy & Mather and its worldwide creative guru, officially passed the torch last week to Norman Berry, creative director of O&M's office here.

Mr. Ogilvy had been creative head of Ogilvy & Mather Worldwide. At the age of 72, he announced it was time for a successor.

"For 10 years, I have functioned as creative head of OMW at the international level," Mr. Ogilvy said. "The time has now come to give this impossible job to someone a bit younger.

"I nominate Norman Berry, provided he can also continue as head of New York, where he is indispensable. Norman has a genius for leading creative people. He is a glutton for hard work. His enormous experience here and in Europe is matched only by his monumental common sense."

Mr. Berry, 52, founded Davidson, Pearce, Berry, Spottiswoode, London, now a subsidiary of Ogilvy & Mather. He joined O&M in mid-1979 and now sits on the board and the O&M executive committee.

The news of the Berry ascension came last Thursday morning as the entire agency staff was getting ready for the agency's annual Christmas fete that includes a Broadway matinee. This year it was off to the Shubert Theatre to see "A Chorus Line."#

Flexibility a plus, exec says

By SARAH STIANSEN

DALLAS—Advertisers with the most flexibility in their media mix will fare the best in the coming year, according to Hugh O'Brien, senior vp-director of media for Bozell & Jacobs/Southwest.

Factors influencing the media picture in the year ahead will include a tightening of broadcast advertising availability due to the Winter and Summer Olympics and political advertising, Mr. O'Brien said at a media outlook news conference here.

Summer will be particularly tight, he says, because of the summer games and national political conventions, providing networks with a better chance than they've had in the past to do well in the scatter sales market.

Mr. O'Brien also sees a "dramatic growth in radio, both local and national," and points to many advertisers that have rediscovered the effectiveness of the medium.

However, he sees slowed growth in the startup of radio networks.

Fm continues to be strong, according to agency research, with 62.3% of listeners.

Prices will increase 9% and 8% for spot and network radio, respectively, he predicts. The highest predicted cost increase will be in spot tv, with an 11% increase from year-earlier costs, followed by nighttime network tv, with a 10% jump in prices. Increases for other media should all be less than 9%, he says.

Those cost increases, Mr. O'Brien says, represent a "good news, bad news" situation for advertisers. While price increases are still higher than the rise in consumer prices, they are lower than the double-digit increases the industry has seen in recent years.

While predicting increasing fragmentation of audiences for all media, Mr. O'Brien points to several positive effects of growing competition.

He sees the newspaper category benefiting from the launch of *USA Today*, which has caused many papers to improve color, introduce special sections and consider satellite transmission of news.

He also points to more aggressive marketing by the newspaper industry, the repositioning of many of the women's service magazines and networks' "awakening" to the cable challenge, planning their programing more competitively.

For the networks, he says, we will see more experimentation but also more stability. He mentioned increases in game shows on daytime tv, miniseries and made-for-tv movies as examples.

For cable tv, Mr. O'Brien sticks by what he calls Bozell & Jacobs' "revisionist" philosophy. While cable has not provided the programing breakthroughs once expected, it is viable for advertisers, although he sees a "massive shakeout" in services.

Local cable could be a growth area, especially for retailers, which he says are becoming more sophisticated in their choice of media.#

Living it up

Spiegel Inc. continues to aim for the coveted affluent audience with a new $1.5 million ad campaign beginning this month in fashion and home furnishings magazines such as *Glamour, Town & Country* and *Vogue*. Marsteller Inc., Chicago, handles.

First-quarter growth for spot tv ads in limbo

By JAMES P. FORKAN

NEW YORK—The beauty of national spot tv's first-quarter growth appears to be in the eye of the beholder.

Some broadcast executives at a financial seminar thought the quarter's spot tv increase might not be as strong as expected as recently as last month, while other executives saw no blemishes ahead.

Blair Television, the No. 1 national tv sales representative, expressed satisfaction with its sales bookings so far and was "reasonably optimistic" about a healthy quarter and year ahead.

Roger Rice, Television Bureau of Advertising's president, when asked if the spot picture looked softer than expected, replied, "Oh no! First quarter's taking off."

ABC stations probably will jump by 20% in first-quarter business, Mr. Rice figured, while the other stations should see gains of about 14% over the first quarter in '83.

At Blair Television, Jim Kelly, senior vp, said its orders are "running nicely ahead, say 12% to 14%," for the first quarter.

TvB projections for full-year 1984 a few weeks ago stood about 16% for national spot (AA, Nov. 21), but that could be lowered to about 14%, Mr. Kelly said. The slow fourth-quarter scatter sales pace and spot business may "dampen" the initial quarter somewhat, chiefly in prime time, he said, since the networks' daytime, early-morning and late-night dayparts are "tight."

Among Blair's bookings for the initial quarter, Mr. Kelly disclosed, are "pretty big spot buys" by the automotive, package goods and fast-food categories, with airlines and the phone companies also offering promising signs.

Videogames have been "off all year" in tv spending, so "there'll probably be no influx" in the first quarter, by which time these marketers "generally have shot their wad" in any case, the senior vp said.

The home computer companies, however, may be active spot buyers, he added, citing Coleco Industries, which has placed orders for its Adam computers, and International Business Machines, which probably will be a "heavy" first-quarter client, for its PCjr.

At the media outlook conference staged by Paine Webber Mitchell Hutchins here early last week, a broadcast panel indicated that the spot marketplace would be softer than expected.

"In recent weeks, tv broadcasters have lowered their estimates of over-all [spot] revenue increases for all 1984 to an average of 12%," down from the earlier projected 14% or better gain, one panelist, James T. Lynagh, president, Multimedia Broadcasting, Cincinnati, said.

Another panelist, John J. McCrory, Greenwich, Conn.-based president of Times Mirror Broadcasting, when contacted several days after the conference, said the "dramatically eroded" network market in the '83 final quarter has caused many broadcasters to become "more conservative."

Indicating that not only Blair but Katz Communications, Petry Television, Harrington, Righter & Parsons and others already are enjoying strong first quarters, Mr. Rice said the broadcasters at the Paine Webber session were "corporate broadcast people" and thus "not as up to date" on a nationwide basis as the national sales reps.

The TvB executive remained confident that 1984 "is going to be a strong year" for tv in general, although he said there are "wide swings" in sales performance from one market or region to another, as well as between network affiliates and independents.

Another group owner with stations across the U.S. said the failure by the tv networks to sell much of their fourth-quarter inventory (AA, Nov. 7, *et seq.*) has hurt spot business, since clients historically address their spot buying after network business is set.

An ADVERTISING AGE panel on the '84 outlook foresaw "extraordinary demand" for spot tv due to political spending and to the Olympics sharply cutting network tv availabilities (AA, Nov. 7). But according to this group owner, the Olympics and political advertising may not be as big a plus for local stations as originally thought.

Many accounts are staying away from the non-ABC affiliates during the Winter and Summer Olympics coverage, especially in prime time, he said, noting that their rationale is that "maybe it's a good idea to hold back those dollars till after the Olympics."

As for political spending, this executive said the local campaign spending generally brings in more dollars to the stations than does the presidential campaign.

David Poltrack, vp-research, CBS/Broadcast Group, said that from the networks' perspective, the outlook is "still fairly bullish."

Full-year 1984 should find network volume up 12.5% to 13%, with another 2% to 3% owing to the Olympics, he added.#

Ad spending seen climbing 13.8%

(Continued from Page 3)

and other local media advertising increased 13.2% to $11.1 billion. In total, local and national media spending was up 12.7% to $75.1 billion.

For the third straight year, the gross national product has continued its surge, increasing 7.8% in 1983, and Mr. Coen forecasts it will be up another 10% next year.

Ad growth was 12.7% in '83, and Mr. Coen hedged on '84, confessing he is not convinced advertising will outpace the economy again.

Comparing the first nine months of '83 to the same period in '82, Mr. Coen found both automobile and restaurant (*i.e.*, fast-food chains) advertising was up 21% in the three media (network and spot tv and magazines).

Food and toiletry advertising in network tv, spot tv and magazines was up 7%; drug/remedies up 13%; cleaners/waxes up 8%, and candy/soft drinks up 10%.

While Mr. Coen does not expect automobile spending to increase another 21% in 1984, he does predict continued strong growth in all the other categories.

Of the secondary product categories, Mr. Coen found cigaret (magazine) advertising was up 20%, apparel (network tv and magazines) up 21%, beer up 18%, pet foods up 5% and insurance up 18%, while liquor dropped 13% and oil companies declined 17%.

"Liquor has been dropping for a couple of years," Mr. Coen said, adding that the liquor business has been badly affected by the economy. "It should show some improvement next year," he added.

For the first year, Mr. Coen presented a separate slide on cable tv. "I am just starting to see big numbers and to see cable starting to siphon some money off the networks," he said. "It is begining to be a source of dissolution."

Mr. Coen found, for the first nine months of '83, cable ad revenues were up $169 million, a 55% increase over the same period in '82. For the year, he expects it to be up to $250 million, as compared with $164 million in 1982. And he predicts yet another 20% to 25% gain in 1984.

In a study of spending patterns in election and Olympic years, Mr. Coen has found the networks profit heavily from the events. For instance, in 1980, in spite of the U.S. boycott of the Moscow Olympics and the recession, network tv spending was still up 11.5%. That year, spot tv was up 13.8%, local tv up 10.6%, spot radio up 17.1% and local radio up 10.3%.

Advertising in magazines has turned around. Magazine ad pages in the first 10 months of 1983 have been up 8% as opposed to the first 10 months of '82. "There is a lot of potential ad growth next year," Mr. Coen said.

A longtime watcher of the surge in direct mail, Mr. Coen saw that growth rate dip to 8.3% in the first half of 1983 from 9.6% in the same period a year earlier. But that backslide is temporary, he said.

Newspaper growth was slight in the first three months of 1983—up a mere 1%, flat but better than the same period in '82, when it was down 3%.

He predicts steady growth in retail linage—it "is going to start taking off," Mr. Coen said. "That will be the biggest volume gain of any category except classified." Classified linage was up 11% in the first nine months, compared with a loss of 5% in the same period of '82.

Taking an international look at ad spending, the U.S. is up 13% in '83 over '82; Japan is up 7%; Germany is up 5%; France is up 9%; the U.K. and Canada each are up 11%, and Italy is up 27%. While U.S. ad spending will increase to $85.4 million in '84, the rest of the world will be up 11.2% to $66.7 million.

Mr. Coen also explained how media availability in international countries is starting to expand, *i.e.*, in Sweden with advertising on videocassettes, in France on free radio and regional tv, in Germany in a cable tv test and in the U.K. through a new satellite system, a second commercial channel and the expanded amount of programing in the early-morning hours.

Probably the greatest surge in commercial spending has come in Italy where private tv advertising has gone from $49 million in 1976 to $727 million in 1983.

In 1990, ad spending will be up to $147 billion in the U.S. and $140 billion for the rest of the world. The trend to bigger and better media budgets continues.#

U.S. demands data on tv sports ad deals

By CRAIG REISS

The Justice Department's antitrust division officially has initiated a sweeping investigation into the three tv networks' sale of product exclusivities in live sports programing.

It has demanded all pertinent records and contracts from 1981 through 1983 from the networks, the nation's three largest breweries and their advertising agencies.

The investigation, which is limited to Anheuser-Busch, Miller Brewing and Stroh Brewery and concerns only live sports programing, could have a fundamental impact on the way hundreds of millions of dollars are spent on network tv.

Furthermore, the investigation could have ramifications for the millions of dollars spent with tv stations that broadcast local sports events.

If the practice is found to violate fair trade laws in sports, it could be banned or restricted in other types of programing in which exclusivities are sold, such as miniseries and specials.

Stroh chairman Peter Stroh has championed the challenge to exclusivities, claiming in essence that network deals with A-B and Miller prevent Stroh from gaining access to what is considered the most effective programing vehicles for reaching the beer target audience (AA, June 20, *et seq.*)

In the last few months, Stroh representatives have appeared before Justice Department officials at least twice to present facts supporting their arguments against exclusivities.

Mark Sheehan, spokesman for the antitrust division

Roman Meal sets Olympics tv spots

Tacoma, Wash.—Roman Meal Co. hopes to persuade a younger, more active consumer to try its multi-grain variety breads in a new $2 million tv campaign. It breaks during ABC-TV's telecast of the Winter Olympic Games, Feb. 8 to 19.

Two tv spots identify the product with nutrition, health and fitness, continuing the theme introduced last year after Cole & Weber replaced McCann-Erickson on the account: "Roman Meal. When you know what's good for you."

In one spot, a young boy drops down and spins into the popular break-dance routine made famous in the film "Flashdance."

The spots for Roman Meal, the official bread of the Winter Olympics, will continue for eight weeks following the ABC telecast, with spot tv, radio and print media in about 80 markets.

Budget for the total campaign is expected to equal the amount spent during the first six months of 1983—almost $3.5 million, according to Leading National Advertisers.

Roman Meal bread traditionally has appealed to nutrition-conscious women over 50, but lately has been aiming to tap the aging fitness-focused baby boomers, both men and women, age 25 to 49.

The company further is capitalizing on the health and nutrition trend with a new line of Natural Foods products in limited rollout in the West (AA, Nov. 7).#

Lansdowne folding creates conflict at JWT

Ty-D-bol looks for shop

By BESS GALLANIS

Two new products in the expanding automatic segment of the toilet-bowl cleaner category are moving into national distribution. And one is looking for a new agency to handle the introduction.

Drackett Co.'s Vanish Bowl Brite is scheduled to roll out nationally in the first quarter of 1984 with heavy ad support (AA, Dec. 19), and Ty-D-bol Double Action recently began shipping nationally after an 11-market test earlier this year.

But Ty-D-bol, marketed by Jamaica, N.Y. based Knomark Inc., now finds itself in the midst of an agency search.

The search was begun because Lansdowne Advertising, which has handled all Ty-D-bol products, is being folded into J. Walter Thompson USA, New York. Lansdowne had operated as an independent unit of JWT Group, holding company of the U.S. agency.

The problem is that JWT handles R.T. French Co., which has an entry in the category, called Bully.

Jean Goldberg, vp-sales and marketing at Knomark, said that when the company was informed of the consolidation it became necessary to look for a new shop, because of the conflict situation. There was no perceived conflict on the part of Knomark until that time, he said.

Since JWT client R.T. French is a bigger advertiser, he added, it is Knomark that must go elsewhere.

Ad support for the new Ty-D-bol Double Action will include spot tv in 28 markets, and cable advertising is being considered. Also, on-package 40¢-off coupons will be used along with two couponed newspaper ads in New York and Boston beginning early in January, according to Mr. Goldberg.

A 30-second spot produced by Lansdowne and aired in the test markets showed the product coming up over the horizon, preceded by a flotilla of existing Vanish brand products. Drackett's Vanish line leads the entire category.

In the case of new Bowl Brite, a competitor says he

(Continued on Page 20)

Wrigley uses NutraSweet in sugar-free bid

By JANET NEIMAN

CHICAGO—Wm. Wrigley Jr. Co. will become the first major chewing gum company with aspartame-sweetened, sugar-free gum when it puts Wrigley's Extra into West Coast markets early next year.

But its test-market introduction will be nearly concurrent with the limited introduction of aspartame-sweetened bubble gum from Menlo Park, Cal.-based National Chicle Co. And it is likely to be followed within months by aspartame-sweetened bubble gum from the Leaf Confectionery division of Huhtamaki Group's Leaf Inc.

Wrigley's Extra, in spearmint and peppermint flavors, is said to use a "patentable" new technology to create a gum that will be advertised as having "extra refreshing flavor that lasts an extra, extra, extra long time."

Extra represents a new attack by Wrigley in the sugar-free market, where American Chicle's Trident and Life Savers' Care*free each hold about 10% of the unit volume of the total gum market, and American Chicle's Chewels holds about 2.5%.

Each of those products is sweetened with saccharin; Wrigley's Orbit sugar-free line has mannitol and sorbitol. Orbit has had little impact on the category since its original sweetening agent—xylitol—was removed following a cancer scare in the late 1970s.

The NutraSweet (G.D. Searle & Co.'s brand name for aspartame) content is expected to be prominently promoted in the advertising.

Wrigley is promising "unprecedented advertising support," via BBDO, featuring up to 44 commercials per week during the introduction, and direct-mail samples to one in three homes in the test markets, including Portland, Ore., and Seattle.

Five-stick packs of Extra will sell for 30¢ a pack, a price comparable to other sugar-free gums, but 10¢ higher than Wrigley's Orbit sugar-free gum and 5¢ more than its regular line.

Introductory promotion for Extra will include special 15¢ retail pricing.

If Wrigley is successful in marketing a sugar-free gum, it could

Behind-scenes look at Cabbage Patch pr

NEW YORK— When you've handled the pr for a product phenomenon like the Cabbage Patch Kids, what do you do for an encore?

"The challenge facing us now," said Robert Wiener, exec vp, Richard Weiner Inc., Coleco Industries' pr agency, "is how to maintain the momentum so it doesn't dissipate."

Agency president Richard Weiner gave credit to the pr account team, headed by Bob Wiener, for the phenomenon, while Mr. Wiener, in turn, shared the laurels with Barbara Wruck, Coleco's own pr manager, and with the advertising agency, Richard & Edward's. "Obviously, pr played a major part in the Cabbage Patch success," said the exec vp, "but it was a team effort, working with the advertising developed by Richard & Edward's."

As is usually the case with so-called "overnight successes," the dolls were not assured hits from the start. Since early November, "things have been happening on their own momentum," Mr. Weiner

(Continued on Page 18)

This year's auto shows will feature a number of stunningly aerodynamic prototypes you can't buy.
And two you can.
From Germa[illegible] 5000S luxury sedan
and wagon.
Audi: the art of engineering.

New Audi battle cry: Wagons, ho!

Audi is taking on the likes of Mercedes. BMW, Volvo and Saab with the introduction of the Audi 5000S wagon. An ad campaign breaking in January emphasizes the Audi brand name and cites Audi engineering advances. The "Audi: The art of engineering" campaign is mostly print, with long copy blocks explaining aerodynamics, design and an extended warranty. *(See story on Page 22.)*

Busy signal? Fairchild, others dial into telecommunications

By STUART J. ELLIOTT

NEW YORK—The scramble for position in the communications and telecommunications industry is reflected in the rush by the business press to launch publications covering this booming market.

The new year will bring several new projects, including one from powerhouse Fairchild Publications (AA, Dec. 19). The reason? Thanks to deregulation, the breakup of AT&T and other recent developments, the field is "going bonkers," as one observer put it.

AT&T's expansion into newly contested fields means the availability of more advertiser and subscriber dollars to support more publications.

Fairchild's publication, which is "in the planning stage," according to president Daniel Newman, probably will debut in early '84.

There have been reports that two Fairchild trade papers, *Electronic News* and Multichannel News, have been working on ventures for the market. While Fairchild "started out with two conceptual approaches," Mr. Newman said, "I'm sure it'll blend into one."

CMP Publications, Manhasset, N.Y., will introduce *Communications Week* on Jan. 30, with an initial controlled circulation of 50,000 to 60,000.

The publisher also owns such titles as *Computer Retail News, Information Systems News* and *Electronic Buyers' News.*

Initially, the frequency of the CMP tabloid newspaper will be every-other-weekly. An increase to weekly frequency is projected for the latter part of '84.

Tom Cooper will be group publisher of *Communications Week* and Jack Dolce will be associate publisher. A b&w page is $5,900; a color page is $6,750. For those not in the industry, a one-year subscription will cost $65.

Television Digest, Washington, publishers of such newsletters as "Television Digest," "Satellite Week" and "Communications Daily," will bring out—probably in February—a weekly newsletter called "Common Carrier Week."

The circulation goal is 1,000 within two years of launch. An annual subscription will cost $327.

These publications are not expected to be the only newcomers in the field.

Other business publishers also are said to be readying entries, though none appear to be ready to discuss their intentions.#

'Thicke' awaits station renewals

By BOB MARICH

HOLLYWOOD—"Thicke of the Night," the ambitious syndicated talk show from MGM/UA Television, is awaiting word on its fate after wrapping production here.

"We are guardedly optimistic" that stations will extend "Thicke" past its original 26-week commitment, said Fred Silverman, the former network tv executive whose production company makes the syndicated series. "I would say within the next week to week and a half, we'll hear from [tv stations] one way or another."

Metromedia's seven-station group, a partner in the show and the backbone of "Thicke's" lineup because the stations reach about 24% of U.S. tv homes, wants to continue with the show, Mr. Silverman said.

Bob Bennett, Metromedia senior vp-tv broadcasting and production, threw his weight behind continuing "Thicke," saying that its ratings "have been moving in the right direction," and "when you're that close, it deserves to go on."

MGM/UA Television Group president Larry Gershman said "Thicke's" current station lineup reaches about 83% of the U.S. A 70% clearance is needed to continue.

National advertisers in the barter series have been promised a 2.0 rating, he said, and "we've been below that, but only marginally so." To date, 100 90-minute-long programs, enough to carry "Thicke" through the February sweeps as planned, have been made.#

GM 'division by size' on January agenda

By JESSE SNYDER

DETROIT—General Motors may approve a move to consolidate its car divisions into large and small-car groups (AA, Dec. 19) as early as Jan. 9, when its board meets to consider sweeping organizational changes as part of a continuing review of operations by a special group.

Top brass at GM wouldn't confirm or deny the change, which would see large cars form the Buick, Oldsmobile and Cadillac group and Chevrolet and Pontiac become the small-car group. But one senior executive said the big/small car move was on.

President F. James McDonald would say only, "We've been doing things the same way a long time and ought to take a look to see if we can do it more efficiently some other way." But the result of the review group might be to leave the divisions where they are, he added.

Chairman Roger Smith said of the ADVERTISING AGE report, "That's your story. You wrote the story. I'm not going to deny your own story."

At any rate, the review group is considering the option of the two-unit car reshuffling, which also would divide the assembly division and Fisher Body.

Under the plan, one group vp would control the large-car group with no cars smaller than midsize except exclusive divisional "image" cars. The small-car group wouldn't have anything larger than midsize.

Administration, marketing development and engineering functions would be combined within groups, sharply reducing divisional autonomy.

Under the plan, each of the divisions would gain a more distinctive market image than in the past, when each division offered a broad range of sizes and price was the dividing line.

GM's consent agreement with FTC. See Page 18.

Instead, Chevrolet and Pontiac would market small, inexpensive cars designed to appeal to youthful buyers just entering the new-car market. Olds and Buick would offer larger, more expensive vehicles. Cadillac would have the highest price, mostly large cars in a variety of styles (AA, Nov. 14).

GM would authorize more dual dealerships, most frequently linking Chevy and Olds for buyers favoring more traditional, conservative styling and Pontiac and

United's awareness hitting lofty heights

By SCOTT HUME

adWatch

In winter, a consumer's fancy turns to thoughts of. . .the Winter Olympics and getting away to someplace warm.

That's one possible explanation for the dramatic rise in awareness for United Airlines' advertising during November.

Last month, 221 or 17.7% of the 1,250 adults sampled named United when asked what airline advertising first came to mind from all seen in the previous 30 days.

That percentage represents the highest share of first responses United has garnered in the 20 months ADVERTISING AGE's exclusive adWatch poll has been conducted.

Coupled with a 4.7 percentage point drop in awareness for Eastern Air Lines, United's gain made it No. 1 in the airline category for the second time this year.

United unveiled two new advertising campaigns during the time the survey was conducted, both from Leo Burnett USA, Chicago. The

Murdoch stirs wrath of Royko

By ROBERT REED

CHICAGO—Rupert Murdoch officially takes over the *Chicago Sun-Times* next month, but only after thwarting an 11th hour bid from a local investor group attempting to buy the tabloid out from under the controversial press baron.

Mr. Murdoch's arrival means the departure of the popular Pulitzer Prize-winning columnist Mike Royko. He is taking "a leave of absence" because he believes the sale to Mr. Murdoch means an advent of sensationalism, staff cuts and "a sacrifice of serious journalism" at the newspaper.

Mr. Royko announced his decision Dec. 21, the same day parent company Field Enterprises signed a definitive agreement with Mr. Murdoch's News America Publishing.

Up until 24 hours before the deal was finalized, a local real estate investment group, JMB Realty Corp., was pushing a counteroffer of $100 million for the *Sun-Times*, its real

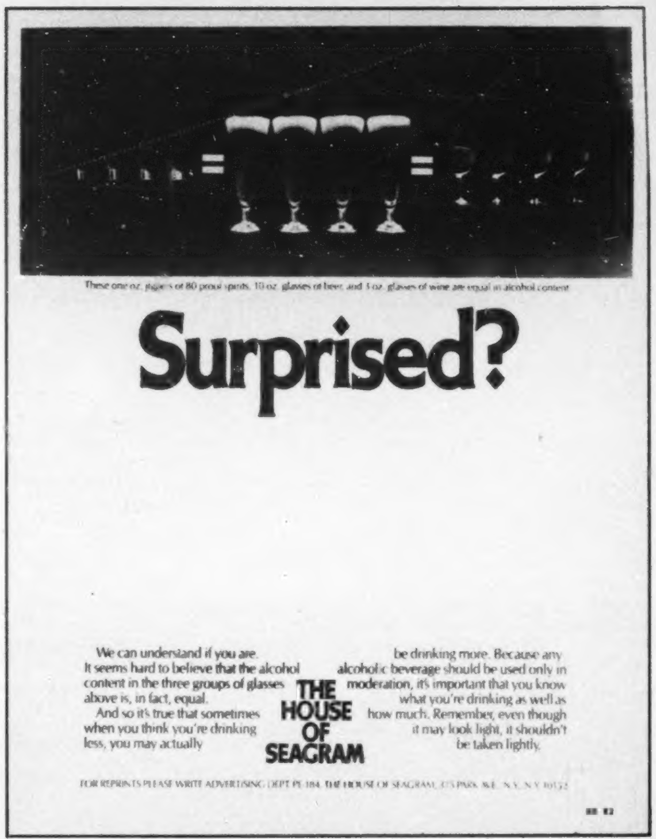
DUESSELDORF—**The West German Post Office** has awarded its $5 million telecommunications account, formerly with Lintas:Hamburg, to Team/BBDO here.



These one oz. jiggers of 80 proof spirits, 10 oz. glasses of beer, and 5 oz. glasses of wine are equal in alcohol content

Surprised?

We can understand if you are. It seems hard to believe that the alcohol content in the three groups of glasses above is, in fact, equal.

And so it's true that sometimes when you think you're drinking less, you may actually be drinking more. Because any alcoholic beverage should be used only in moderation, it's important that you know what you're drinking as well as how much. Remember, even though it may look light, it shouldn't be taken lightly.

THE HOUSE OF SEAGRAM

Longtime alcohol-moderation advertiser House of Seagram currently is running a print ad headlined, "Surprised?"

Spirits marketers get word: 'Tis the time for caution

By GAY JERVEY

This holiday season's annual moderation messages from the distilled spirits industry may prove to have a greater than usual impact on celebrants, thanks to heightened anti-alcohol sentiment.

Companies such as Seagram and Bacardi Imports and industry associations such as the Distilled Spirits Council of U.S. have been conducting such cautionary efforts for years, warning partygoers not to drink and drive.

But this year's efforts come at a time of increased public awareness and concern about the issue of drunken driving, as well as growing pressure on the alcoholic beverage industry to confront the issue of alcohol abuse and perhaps modify its year-round ad programs.

During the past year, such groups as Mothers Against Drunk Driving and Students Against Drunk Driving have been gaining attention, not only from the public but among federal and local government officials as well. Their ammunition? Grass-roots support has been fueled by the despair and outrage of victims and their survivors.

The President's Commission on Drunk Driving, noting that half the 50,000 highway deaths each year "involve the irresponsible use of alcohol," this month urged a nationwide public and legislative commitment to social and legal change, including a federal law that would force states to raise the minimum drinking age to 21.

Last month the New York City

From Peter to pope, tv's new Vatican hope

By ELIZABETH GUIDER

ROME—When Pope John Paul II prays with convicts at a prison in Rome Dec. 27, the occasion will be historic for two reasons.

Not only will the pontiff confront his would-be assassin, Ali Agca, now serving a life sentence, but the film of that meeting, shot by the new Vatican Television Center, will mark a media milestone for the Roman Catholic church.

Unlike the miles of footage shot by the international news networks to chronicle the pope's every public move, this new tv operation has the special blessing of the pontiff himself.

In fact, he signed it into existence in an official Latin document Oct. 22, the fifth anniversary of his election to the throne of St. Peter.

It is the latest example of an increasingly sophisticated effort by

In-flight book sale shows Webb consumer shift

By ROBERT REED

Webb Co.'s plan to sell its three in-flight magazines (AA, Dec. 19) signifies a strategic shift in its publishing division's game plan.

The St. Paul, Minn.-based printing and publishing concern is breaking away from in-flight magazines and concentrating more on acquiring other types of consumer magazines. In addition, Webb will continue to build upon its other holdings and develop its budding custom publishing business.

Webb has signed a letter of intent to sell its three in-flight magazines to Delaware North, Buffalo, N.Y. Webb produces in-flight magazines for Trans World Airlines, Northwest Orient and Frontier Airlines.

Delaware North's publishing group already produces in-flight books and a consortium of professional sports magazines and programs. Its in-flight magazines represent Delta, Air Cal and Butler Aviation.

Both companies pay the airlines for the rights to produce the magazines and make their money by selling advertising.

Terms of the acquisition are pending, but the deal is expected to close before the end of the year or in early 1984, according to Stanley Sills, president of the Delaware North publishing group.

A year ago, Webb executives were saying the in-flight publications were an important entry into the consumer magazine segment and would serve as a starting block for acquiring other airline magazine properties.

"We had intended to grow and envisioned acquiring a number of in-flight books. But as we approached mid-1983, it was apparent that was going to be difficult to accomplish," says Robert Sallman, president of Webb.

At that time, Webb lost a bid to acquire United Airlines's in-flight magazine from its chief competitor, New York-based East/West Network.

When the bidding went further than Webb was willing to go, the company pulled out and soon after began to reevaluate its commitment to the in-flight group, says Robert Haugan, Webb chairman and chief executive officer.

"Having only three magazines, we felt the possibilities weren't as interesting as they might have been," Mr. Haugan says.

While Webb is the second-largest publisher of in-flights, it competes primarily against East/West, which publishes 10 such magazines, making it easier to group buys for its advertisers.

To combat this, Webb, Delaware and American Airlines, which produces its own book, formed Air Group One, a sales organization designed to link ad buys under one magazine network. Yet the diversity of the three organizations made it sometimes difficult to effectively sell under one marketing umbrella, say Webb executives.

Delaware North contends that having one owner for most of the magazines in Air Group One will make it easier to sell the package.

"We intend to expand our position and improve our capabilities to become the biggest and the best," Mr. Sills says.

For Webb, the divestiture means it will concentrate on the acquisition of small magazines in various fields while building on the success of its other consumer books, such as *Family Handyman*, Mr. Sallman says.

Family Handyman is expected to contribute nearly 25% of the publishing division's total revenues this year and continue to grow in circulation. In-flight will serve up only 14%. Webb is expecting to have $53 million in revenues from the publishing division.

In addition, Webb is developing its custom publishing business. Custom publishing is the production of magazines for companies and their specific customer groups.

Already companies such as Xerox Corp. and Kawasaki Motors Corp. USA have started publishing such magazines.

Webb's ultimate goal is to have its publishing division contribute 50% of the company's over-all profit picture. It is currently at 40%, with the rest coming from a thriving printing operation.

In 1982, Webb saw total sales of $144 million, with printing contributing $96 million and publishing $48 million. In operating income, the printing division delivered $6.1 million, while publishing added $4.8 million.#

United's awareness hitting lofty heights

(Continued from Page 3)

first, launched Oct. 21 during the World Series, kicked off United's promotion of its Olympic Games sponsorship. Using past Olympic marathon gold medal winner Frank Shorter as spokesman, the "5-Million Mile Challenge" campaign announced that United would donate to the U.S. Olympic team one free mile of travel for every passenger flown between Nov. 1 and Dec. 15 (AA, Oct. 24).

Although United's business was up 15.4% during the 45-day period, the total of 4.8 million passengers fell slightly short of the goal. However, the airline announced last week it will donate the full 5 million free miles to the Olympic team.

For those not reached by patriotism, United also was promoting hedonism last month. The airline called its "United shines to Florida" campaign a more aggressive replacement for Al E. Gator, the animated alligator it had used in past years to advertise its winter vacation routes (AA, Sept. 12).

That aggressiveness appears to have generated increased awareness.

Eastern Air Lines, whose awareness slid 4.7 points (to a 15.4% share), also has been promoting winter vacation travel, but without using chairman Frank Borman as spokesman. Earlier commercials featuring Mr. Borman had given Eastern a 6.4 point jump in awareness in October. American Airlines retained the No. 3 spot with an unchanged 9.9% share of first mentions.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Advertising awareness is measured by asking a national random sample of consumers to name the first advertising that comes to mind (in 18 product categories) from all seen, heard or read in the preceding 30 days.

From Nov. 1 through 20, 1,250 adults were surveyed by phone. Under adWatch methodology, an increase or decrease from the previous month of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

Significant decreases were registered in three other categories. Interestingly, all were for advertisers that have had the highest awareness shares every month this year.

Birds Eye's share of first mentions in the **frozen foods** category slid 2.9 points to 12.6%. While still keeping its hold on the No. 1 spot, Birds Eye is getting an increasingly strong challenge from No. 2 Swanson as frozen meals begin to replace frozen side dishes in advertising recall for the category. Swanson, which had a 4.4% share in January, quietly has grown to an 8.3% share. Stouffer remained third with 5.4% of mentions in November.

Tylenol lost the ground it had gained last month in the **medicine & drugs** category, slipping 4.5 percentage points to 32.5% of mentions. In October, Tylenol had risen 4 points. Anacin, which dropped 4.5 points in October, regained one percentage point last month. Its 8.4% share still trailed No. 1 Tylenol, but was solidly ahead of No. 3 Bayer (4.6%).

The erosion of McDonald's once seemingly insurmountable lead over Burger King in **fast-food** advertising awareness continued to erode in November, dropping 3.6 percentage points. Although Burger King's awareness also slipped, the gap between the No. 2 chain (24% in November) and No. 1 McDonald's (39%) is more narrow than it has been since October, 1982, when the "battle of the burgers" began.

Both burger giants toned down their advertising presence last month, with McDonald's tapering off its "Leader of the pack" campaign for Big Macs and Burger King giving its comparative attack a brief rest.

Among noteworthy changes in other categories last month:

- To paraphrase jargon from the music industry, Miller Brewing Co.'s Meister Brau brand has entered the **beer category** chart with a bullet. With a heavy introductory campaign behind the comparative "Tastes as good as Budweiser at a better price" theme, Meister Brau last month made its first appearance among the beer advertising receiving first mentions. Although its advertising came to mind first for only 1.6% of the sample, putting it in the No. 9 position, Meister Brau's awareness still bested that of several established brands.

Anheuser-Busch needn't worry however. Awareness of Budweiser advertising rose 2.7 points last month. Its 17.7% share in November is the highest percentage of first mentions recorded to date in the highly fragmented beer category. Miller remained No. 2 with a steady 11.7% share; Coors remained No. 3 with 7.5%.

- One of the longest-running battles for advertising awareness superiority has been raging between Cheerios and Wheaties in the **breakfast foods** category. The winner isn't No. 1, of course, since the title has been held by Kellogg for several months. But Cheerios and Wheaties—both General Mills brands—continue to exchange the No. 2 and No. 3 positions and make this one of the most hotly contested categories. The November rankings: Kellogg's, No. 1 with 7% (down 2.2 points); Cheerios, No. 2 with 6.6% (up 1.3 points); Wheaties, No. 3 with 4.6% (down 1.1 points).#

Western puts its $20 million down at DDB

By JENNIFER PENDLETON

Los Angeles—Western Airlines' $20 million in billings has landed at Doyle Dane Bernbach/West. But, ironically, the carrier will start a new campaign created by its former agency, McCann-Erickson, in the first quarter.

The appointment follows a review involving Chiat/Day; Needham, Harper & Steers; Foote, Cone & Belding; Benton & Bowles, and incumbent McCann. FCB and B&B pulled out of the competition in the final weeks.

Western's senior director of advertising and sales promotion Mark Dennett cited DDB's fresh creative approach in its presentation and its long experience with American Airlines as key factors swaying the decision.

DDB, New York, handled American from 1961 to 1981 (the Los Angeles office handled outdoor and some special projects during that period). The agency resigned American to take on Pan American World Airways, a relationship that lasted only eight months (AA, Jan. 11, '82).

While Mr. Dennett declined to share specifics of possible new approaches, he did mention a major

'Living' campaign has powerful pull

By CRAIG REISS

New York—A tv and print ad blitz by the Arthur S. DeMoss Foundation ends today, and it not only tied up a good amount of airtime in recent weeks but telephone lines as well, its backers say.

The ad campaign promoted the "Power for Living" religious books and supported 1983 as the Year of the Bible. Ads, featuring such notables as Dallas Cowboys head coach Tom Landry, former White House aide Charles Colson and singer Pat Boone, among others, promised a free copy of "Power for Living" without obligation.

Jack Anderson, broadcast director at Frank Vos Co., which handled creative and media on the campaign, said the commercials were so successful in generating calls to the foundation's three 800 numbers that a spot running in New York would tie up American Telephone & Telegraph lines for 45 minutes.

"We've been off network tv for a week, and we're still getting 1,300 calls a day from those ads," Mr. Anderson said.

The DeMoss Foundation campaign came upon the media out of the blue, entering the tv market

Adman of the Year

Lee Iacocca of Chrysler: Crisis plans paying off

Photo by John C. Hillery

By RALPH GRAY

Lido Iacocca was completing his masters in mechanical engineering at Princeton when he began his automotive career as a student engineer at Ford Motor Co.

Less than four decades later, the 59-year-old Chrysler Corp. chairman has accomplished one of the most astonishing "engineering" feats in the history of American business.

Last year, Lee A. Iacocca saw his company settle firmly into the black, rebounding from the 1980 low point of a $1.7 billion loss and posting profits totaling $266 million for the first three quarters of 1983. On June 15, the company paid back $1.2 billion in government-guaranteed loans, just "two years, 11 months and 21 days" after its first draw, Mr. Iacocca noted in an interview. He then repeated his favorite explanation of the repayment: "We at Chrysler borrow money the old-fashioned way. We pay it back."

On the way to paying it back and to guiding the ailing auto maker to a position of fiscal health, Mr. Iacocca has succeeded in putting Chrysler on a strong growth track.

A company that was teetering on the brink of collapse less than five years ago is now a more-than-viable contender in its field, with an array of trend-setting new products, a significantly more efficient operation and a chief executive who broke new ground, albeit reluctantly, as a powerful advertising spokesman for his product—and, in fact, for American-made goods generally.

For these reasons, the editors of Advertising Age have named Lee Iacocca Adman of the Year for 1983.

"Product is king" for the veteran auto executive, who obviously is still very much guided by his engineering background. And his tenacity in making his credo a reality for Chrysler is at the core of his success.

He would deny that what has been accomplished at Chrysler smacks of marketing acumen of the first degree. As he explains it, "You say it was a marketing task, but I don't look at it that way. I looked at [the job of turning around the company] as a very difficult product task and a quality and productivity task.

"Marketing really means nothing if we didn't have the product that appeals to people. Not just convertibles, but across the board. Without that our [market] penetration wouldn't have gone up."

And once you have solid product? Mr. Iacocca makes it sound almost routine: "Then you back the product and give some assurance you stand behind

(Continued on Page 30)

King tv specials slow in lining up sponsors

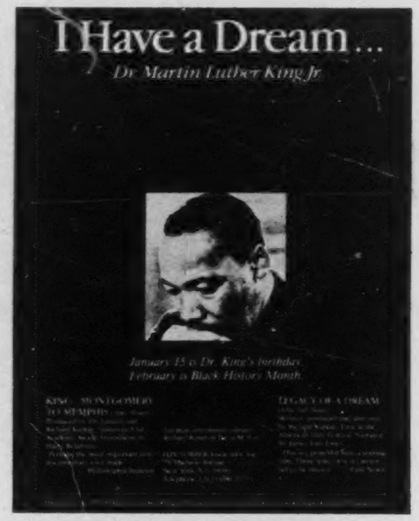
By JAMES P. FORKAN

NEW YORK—The late Martin Luther King Jr. will be saluted in at least three syndicated tv specials due in the first quarter. The most ambitious special is a two-hour, first-run show budgeted at more than $500,000.

In each case, the distributors, Bentley Entertainment Group and Fox/Lorber Associates, which has two syndication projects, are offering the King tributes for two runs, the first on or near the civil rights leader's Jan. 15 birthday and again in February during "Black History Month."

Bentley's project, "A Celebration of Life: A Tribute to Martin Luther King Jr.," is a two-hour original production. Fox/Lorber is clearing two annuals, the two-hour "King... Montgomery to Memphis" and the 30-minute "Legacy of a Dream."

Fox/Lorber, which was among syndicators with specials keyed to the 20th anniversary of President John F. Kennedy's assassination in November, also had its King shows on the market last spring and summer, suggesting them as tv tie-ins to the 20th anniversary last August of the march on Washington.



I Have a Dream...
Dr. Martin Luther King Jr.
January 15 is Dr. King's birthday
February is Black History Month
KING... MONTGOMERY TO MEMPHIS
LEGACY OF A DREAM

This Fox/Lorber Associates trade ad pitches two Martin Luther King Jr. specials.

"Celebration" has cleared more than 80 stations, including 37 of the top 50 markets—led by WPIX, New York; KCOP-TV, Los Angeles, and WBBM-TV, Chicago. Most of the outlets are giving the special prime time placement between Jan. 14 and 16, but a few are waiting until later in the month, according to Ray Bentley, president, Bentley Entertainment. Most stations are planning dual runs, he said. An ad in *TV Guide* will support.

Mr. Bentley and the special's Chicago-based producer, Cindy Walker of Teleavancers, said Coca-Cola USA, Atlanta (AA, Dec. 26), and Johnson Publishing Co., Chicago, are the first major sponsors signed. About five others have been labeled "strong prospects." The asking price for a 30-second spot is between $55,000 and $60,000, other sources indicated.

Lining up advertisers has proved more difficult than clearing stations. Mr. Bentley blamed the slow pace on advertisers and agencies seeing the show as "funereal" and on agencies not even informing their clients about the special's availability.

The show will have lively

(Continued on Page 32)

Playtex plan taking shape

By PAT SLOAN

Although Esmark Inc. remains characteristically reticent about plans for its Almay and Max Factor & Co. divisions, the word is out to retailers that the two cosmetics units will not be wearing the same faces in 1984.

Buyers at chain drugstores in central and eastern parts of the country are expecting major changes in the advertising budgets and product lines of both companies, which have been folded into Esmark's International Playtex division.

The way retailers tell it, Almay and Factor will be spending aggregately more on advertising, though perhaps on fewer products, some of which have been earmarked for growth while others have been slated for either divestiture or a phaseout.

This direction was indicated to retailers last September when they were told by Almay salesmen that advertising spending would be boosted to $9.5 million (AA, Sept. 5). At the time, they also were informed that the company's Colorplus cosmetics offshoot would be discontinued.

An Almay executive, who asked not to be identified and would not confirm advertising increases, insisted at the time the then-supposed fate of Colorplus was the result of confusion in the marketplace.

But Esmark since has owned up to Colorplus as a marketing mistake on Almay's part, and confirmed what the retail trade was saying as far back as August.

Now retailers say they have been told that Almay spending in the first half of 1984 will go as high as $12.5 million for new products, promotions and advertising. Measured media spending alone is expected to total $12 million for the year.

On tap is a new mascara, an acne preparation and a skincare extension, Almay is telling retailers.

To lure new and younger customers to the Almay label, five $1-off coupons will be distributed through Jhirmack products, the Playtex haircare line, starting in March.

International Playtex's family products group, of which Jhirmack is a part, also will become the sole marketing arm of several Almay toiletries products—Almay deodorant as well as repackaged and relaunched Almay haircare products, including hair sprays and shampoos.

The relaunch of Almay deodorant will be supported by an additional $5 million in ad spending; no figure has been set for haircare.

There also have been reports

- Off-price retailing
- Tylenol comeback
- USFL debut

Off-price, fitness led the parade of last year's trends

In addition to the people and products that made news in advertising and marketing last year, there were a number of events that made an impact as well. Here are the 10 selected by ADVERTISING AGE *as the most noteworthy:*

Off-price retailing, both a boon and a bane to the retailing industry in 1983, caught the consumer's fancy and pocketbook last year when off-price apparel sales accounted for an estimated $7 billion to $8 billion, with a compounded annual growth rate of 35%.

Sales from variety stores and catalog showrooms combined equaled another $22 billion.

The growth from off-price, however, was not greeted as good news by traditional department store retailers who see this segment of the retail industry, which frequently sells the same first-quality, designer and name goods department stores do but at lower prices, as endangering their business.

To combat the perceived threat, department stores became increasingly promotional in some instances, and in others put extensive private-label programs in place to guarantee exclusivity.

The off-price phenomenon also caused a stir in the judicial and legislative branches of the federal government.

Several off-price retailers, including Burlington Coat Factory and Kids "R" Us, a division of Toys "R" Us, filed suits against retailers such as Federated Department

'84 elections and Olympics top list of stories to come

No one knows where the big news of 1984 will come from. But some things already on tap, such as the presidential elections and the Olympics, are sure to take center stage when they occur, and certain trends seem destined to grow. Following are 10 areas the editors of ADVERTISING AGE *think will create major marketing news this year.*

Politics

Every quadrennium, millions of dollars are spent on political advertising by a gaggle of candidates who want to end up the year being elected President of the United States.

This year should be no different, except for one factor: Probably no other campaign in election history will be as expensive as this one.

Each of the presidential candidates can spend up to $24 million to get nominated in 1984—although it is expected that of all the candidates now in the race, only Walter Mondale, John Glenn and, of course, Ronald Reagan, will have the financial resources necessary to come close to that figure.

After the nominating process is over, the Democratic and Republican candidates each will receive about $40 million in federal funds for the general election, an inflation-boosted increase from the $29 million that Ronald Reagan and Jimmy Carter received in 1980. It is difficult to break down how much of this money will be spent

(Continued on Page 21)

order to bring about the efficiencies needed in using mass media advertising, cable operators are beginning to "cooperate among themselves" to make radio and tv buys, he says. "It's more or less like a clustering concept in marketing."

Some operators are setting up retail stores modeled on phone centers. This is opening up opportunities for those with backgrounds in "retail marketing, not cable marketing," says Jerry Maglio, executive vp-marketing with Denver-based Daniels & Associates. "We have to learn how to blend retail principles with cable product lines."

A trend that's even more significant than retailing, says Mr. Maglio, is the increasing need for package goods specialists as cable moves into the urban markets.

Currently, former executives of companies such as Coca-Cola Co., PepsiCo Inc. and Polaroid Corp. hold key marketing slots in cable.

Finally, an area of marketing that doesn't really exist now at the system level, but is taking shape, is on-air promotion. According to Bob Klein, president of the Los Angeles-based Klein & , a media creative and production company, operators have a critical responsibility to let their subscribers know who they are. Next, he says, "they have to educate [subscribers] as to what they're selling them." They need to cross-promote the various program offerings on a 30- or 40-channel cable system. "Until they do that, they're going to have those enormous churn rates," he says.

Oceanic Cablevision in Honolulu is setting up its own on-air promotion department—the first cable system to do so. Mr. Klein believes that eventually the field of broadcast promotion may "come close to doubling over the next 10 years with cable" as other systems follow Oceanic's lead.

There's already a "booming little business" in on-air promotion at many of the cable networks, says Mr. Klein, particularly the pay services such as Home Box Office and Showtime/The Movie Channel. ■

CAREER MANAGEMENT

The advertising and marketing professions tend to attract a very special group of people. They are quick learners and hard workers. They are both analytical and creative. They are impatient for success and highly competitive. And they are not good managers of their own careers.

For all the skills developed and used to successfully market goods and services, few are ever brought to bear on the successful self-marketing of an advertising or marketing professional.

As ironic as it may sound, our role is to help individuals successfully and honestly position themselves in the marketplace and to help companies successfully acquire the most appropriate candidates for their positions.

We believe that role is best accomplished by building solid, honest, long-term relationships with both individual professionals and companies. This kind of approach requires a greater investment of time and attention than a higher volume, less specialized approach would demand. But the depth of understanding and history of trust that results is well worth that investment for recruiter, employer and candidate alike.

If you would like to find out more about us, call or write:

pumps with the 20-gal. optional tank—for $43 I might add—and average 30 mpg," he notes enthusiastically, unable to resist just a little pitch.

"Build a good car and you're home free," he insists.

Much as he obviously enjoys talking about his company's products, the Chrysler head has always been a reluctant on-camera spokesman.

He seems to be annoyed by the fact that the spotlight has been on him, rather than what he feels is first priority—the product.

He once remarked, with some exasperation, "I tell people, 'I take credit for Chrysler's turnaround; the product and our dealers had nothing to do with it.' "

Cronkite first choice

Actually Lee Iacocca wasn't even K&E's first choice for the ad role. Retired tv newsman Walter Cronkite was the pick.

"They did a lot of research and Walter Cronkite came out much better than I did. But we couldn't get him," Mr. Iacocca explains.

The Chrysler chairman didn't much want the job because he felt the use of the top executive "probably means you're in trouble."

His first commercial work was actually limited to tag lines for existing spots. In those tags, he told the American public, "I'm not asking you to buy any car on faith. I'm asking you to compare." And, "If you buy any car without considering Chrysler that'll be too bad for both of us."

He was replaced briefly by Joe Garagiola's rebate pitch because, as a Chrysler marketing executive said at the time, "We gotta sell cars, not image."

Then came the controversial government loan guarantee, and Mr. Iacocca was back in a confidence-rebuilding ad campaign, touting "the new Chrysler Corp."

"We had to have a presence with the public and that's why I started," the reticent ad star explains.

Next came $50 test-drive offers, with Mr. Iacocca saying: "We're not foolish, we're confident."

It wasn't until about two years later that Mr. Iacocca would say in tv spots, "If you can find a better car, buy it.

"If I had said that a couple of years before and the guy did," he points out, "I would have been run out of town on a rail."

Hounded for autograph

He did avoid that fate, but his presenter role has brought unwelcome results of another sort—adulation. "Fans" even line up for his autograph.

"It destroyed his privacy and made him a celebrity, and that's a lot to give up," says John Morrissey, another Ford alumnus and, until recently, K&E chairman.

But despite any personal misgivings, Mr. Iacocca dutifully and effectively played his ad role while he felt his presence was needed.

Now, he says, the mini-van commercials "are about it. I've told [the agency] that unless there is some compelling news, I'm not going to be the product pitchman. We have great people we can use."

It's not the end of his ad-making career, however. He will be doing new tv commercials for a labor-of-love project—the Statue of Liberty-Ellis Island restoration campaign, of which he is chairman.

It's a subject close to his heart since Ellis Island was the port of entry for his father, who immigrated from Italy.

Limiting his ad role

Of his decision to limit his future role in Chrysler commercials, Mr. Iacocca further explains, "I've done a lot in four years, and I think I've run the gamut unless we have something revolutionary like the T or 5/50.

"If we have something like that, I'll *entertain* the *possibility* of one a year and that's enough. But no more three times a year. I'm done with that, definitely," Mr. Iacocca insists.

After a pause, he adds, "I said that before and here I am doing quality commercials."#

Robert Page takes over as publisher of the *Sun-Times*, a newspaper he says will prosper under Rupert Murdoch.

Chicago not N.Y. or Boston: Page

By ROBERT REED

CHICAGO—Rupert Murdoch's *Chicago Sun-Times* will be different, but it won't become a clone of the *New York Post* or *Boston Herald*, two of the Australian media baron's splashier big-city tabloids, says the newspaper's new publisher.

Robert Page said in an interview that for starters, the *Sun-Times* will undergo some editorial revamping and be promoted more aggressively within its own pages. The newspaper also will be supported with heavier marketing and advertising efforts, he said.

While many of these changes reflect similar strategies employed at Mr. Murdoch's other properties,

(Continued on Page 68)

Haagen-Dazs hits liqueur market, Cal.

By GAY JERVEY

It's a natural in self-indulgent synergy—gourmet ice cream and creamy rich liqueurs bottled in one. Hiram Walker Inc. has begun shipping a new Haagen-Dazs cream liqueur into California, with further rollouts slated for September.

Sources say the liqueur, a joint venture between Detroit-based Hiram Walker and Woodbridge, N.J.-based Haagen-Dazs, will be backed with about $4 million in marketing expenditures in California this year.

The entry symbolizes a new wave of competition in the premium cream liqueur category. Chicago-based James B. Beam Distilling recently completed full distribution of its Trenais Nouvelle liqueur, which is supported by print ads.

Baileys Irish Cream, which created the category several years ago, has reportedly altered its creative blueprint in soon-to-break ads from Backer & Spielvogel. Executives at Paddington Corp., Baileys' importer, could not be reached for comment

According to *Market Watch*, a leading industry publication, Haagen-Dazs cream liqueur is 34-proof, comes in 50ml., 200ml. and 750ml. sizes and will cost about as much as Baileys—$13 to $15 per 750ml. Like Trenais, the Hiram Walker entry uses cognac imported from France as its liqueur base.

Trade ads for Haagen-Dazs cream liqueur are breaking this month, with a consumer campaign scheduled for March. Print and outdoor advertising, created by McCaffrey & McCall, will carry the tag line, "Haagen-Dazs Cream Liqueur. A dream come true."

Special premotions, point-of-purchase and sale materials support.

Haagen-Dazs is believed to have final approval over Hiram Walker's advertising of the product. The agreement between Hiram Walker and Haagen-Dazs for use of the ice cream brand's name was made before Minneapolis-based Pillsbury Co. acquired Haagen-Dazs last summer, a Pillsbury spokesman said. But George McCarthy, former vp-general manager for entrees at Pillsbury, who last week was named exec vp of Haagen-Dazs, acknowledged that a liqueur using the Haagen-Dazs name "fits in with the image of the ice cream."

Despite an avalanche of cream liqueur entries, no one brand has come close to Baileys' market share. When

(Continued on Page 72)

Smokeless, but a cigaret

By TOM BAYER

Cigarets may not be looked upon with favor in some quarters, but a cigaret named Favor hopes to change that beginning later this year.

Developed by San Antonio-based Advanced Tobacco Products, the patented smokeless tobacco product is said to have the appearance, weight and feel of a cigaret and produce a similar sensation for the user, but at no time is it lighted.

Nicotine satisfaction is derived by inhalation of nicotine vapor and not from the burning of tobacco, the company says.

Favor will be positioned as a pleasurable nicotine product, and not as a product intended to discourage or reduce smoking or to have therapeutic benefits, the company said in a prospectus issued, coincidentally, on the 20th anniversary of the U.S. Surgeon General's first warning against smoking.

ATP plans to introduce Favor in some major Texas markets first, and then to expand throughout the country and into foreign countries on a region-by-region basis.

Favor includes cigaret filter rod segments overwrapped with a paper laminate and commonly used cork-like tipping paper, and includes a nicotine solution flavored to approximate the taste of "regular," "menthol" and "light" cigarets.

Packs of the smokeless cigarets will contain six cigarets to be sold at a price competitive with that of a 20-pack of regular cigarets. The company said that each pack of six Favor cigarets will have a nicotine delivery intended to satisfy the average smoker of conventional cigarets for an entire day.

Unless current regulatory definitions of cigarets and interpretations of regulations are changed to include such products that contain no "roll of tobacco," ATP figures it has two significant marketing advantages over conventional cigaret competitors: The availability of tv advertising and the novelty of Favor, which will generate publicity and curiosity that can, in turn, hold down advertising and promotional costs.

The initial advertising budget set for Favor is $4.5 million, being handled by the Richards Group, Dallas. Stan Richards, president of the

Financial centers at 3 K marts

By JESSE SNYDER

TROY, MICH.—One hundred ninety-two square feet of floor space doesn't seem like much of a base from which to launch a direct assault on the nation's largest retailer, Sears, Roebuck & Co.

But when No. 2 retailer K mart opens 8-ft.-square booths offering money market funds and certificates of deposit in three Florida stores today, the battle lines will be drawn.

As disclosed in ADVERTISING AGE earlier but officially announced last week, K mart plans to open in-store centers adding consumer financial services to its fledgling insurance operation. The move will take place over the next several years, according to Robert E. Brewer, exec vp-finance (AA, Dec. 12).

K mart already has 26 in-store insurance centers in Florida and Texas, offering life, health, property and casualty coverage. After a pilot program, the financial services will be included at these centers and 50 more in Texas and Florida that K mart plans for the rest of 1984.

Ultimately, financial and insurance centers will be in "more than

Special Report

Beer Marketing

Neal Vance Rumours Lounge at Hyatt Regency, Chicago

Satisfying a thirst for images

By Robert Reed

Let's begin with this premise: Advertising is as important to selling beer as the bottle opener is to drinking it.

Think not? Then consider the last time you, and millions of others, ambled up to the wood-railed bar of a local drinking establishment and ordered a brew.

Wasn't it the clumping hoofs of the majestic Clydesdales pounding in your brain that prompted the request for a Budweiser?

Wasn't it Rodney Dangerfield's quest for respect that brought to life the urge for a Miller Lite?

Wasn't it a need to get closer to "God's Country," horn fanfare and all, that prompted you to order Heileman's Old Style?

Okay, maybe not. But that's what many of the nation's beer marketers and their stable of advertising agencies would like to think happens.

For these days the advertising of beer is viewed as a necessary component for either making or breaking any brew on the market.

The proof is in the spending. An estimated $482 million was spent last year by the domestic brewers, much of that coming from the six major brewers making spot and national tv buys.

That total will be raised next year as regionals G. Heileman, Stroh Brewery, Adolph Coors Co. and Pabst Brewing continue to take their products national.

Nationwide beer sellers, Anheuser-Busch and Miller Brewing show no indications of cutting back on national ad spending.

A-B plans to introduce a number of new products next year, and those will need ad backing. Miller already has unleashed popular-price Meister Brau and has yet to roll with two other beers it has in test.

In addition, the ad monies backing import beers are also on the rise, as more foreign brews are making their way into the U.S. In 1982, import marketers spent an estimated $51 million to support their brands. And it will be more next year.

By anybody's standards that's a lot of cash, enough to make those of us in the check and passbook set ask: "What do you get for all this money?"

In a word—image. Perhaps not the one a brewer wants or expects but it's an image nevertheless.

Beer advertising is mainly an exercise in building images.

Its foundation rests upon the brewing industry's thinking that "beer is a badge." That means what you drink says something about you in the presence of peers and woe be to the poor shlump who runs against the grain.

In some parts of the country your barroom reputation is safe only if you order a Bud, while in others—let's say Chicago—you gain stature by slugging back an Old Style.

The imagery must appeal to men. The majority of the nation's beer swillers are males between the ages of 21 and 35, who naturally drink and, therefore, buy the most beer.

But these days beer companies are attempting to appeal to all different men of all different backgrounds with various incomes and life styles. Naturally, there is a set beer for every life style, income and taste.

At the risk of coining some new advertising jargon, they can be called the premium man, superpremium man and popular-price man.

The premium man, for instance, is the hard working fellow who likes to have a few cold ones after knocking off from work. More specifically, two good examples of that come from A-B and Miller.

A-B's Budweiser remains the "King of Beers" by continuing to link itself with blue collar men. Since the mid-1970s the St.

(Continued on Page M-10)

Robert Reed, a Chicago-based reporter for ADVERTISING AGE, covers the domestic beer market.

People's choice

In December, Magazine asked R.H. Bruskin Associates, New Brunswick, N.J., to survey beer drinkers across the country about their favorite brand of beer. In addition, consumers were queried about their main reasons for preferring one brand over another, as well as their knowledge of advertising slogans.

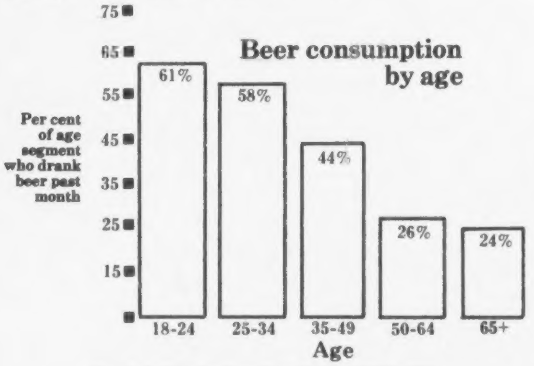
Using the weekly OmniTel service of Bruskin Associates, a nationally representative sample of 1,000 adults was contacted, allowing for equal representation of men and women. Fifty-nine per cent of men 18 years of age or older said they drank beer, either at home or away from home within the past month. The incidence of beer consumption among women was about half the level reported for men. An equal proportion (44%) of men and women drank wine (44%).

Selected alcoholic beverages drank in past month

	Adults	Men	Women
Total sample	100%	100%	100%
Beer	43	59	29
Wine	44	44	44
Vodka	17	19	16
Scotch	9	14	5

In order to achieve a reliable estimate of beer usage among the general population, several alcoholic beverages were included in the preliminary questioning.

Other findings showed that the younger the adult, the more likely he or she was to drink beer (61% among 18 to 24-year-olds vs. about 25% among adults 50 years of age or older).



According to Barbara Adago, vp-client services at Bruskin Associates, men and women differed in their beer preferences, particularly with regard to low-calorie and imported beers. For example, 27% of female beer drinkers preferred low-calorie beer, compared with 8% of male drinkers. On the other hand, twice as many men preferred imported beer (8% of male beer drinkers vs. 4% for females).

Types preferred

	Male	Female
Total beer drinkers	100%	100%
Domestic (regular)	68	59
Low calorie (domestic/imported)	8	27
Imported	8	4
No particular brand	7	5
Undetermined type	9	5

What is America's favorite beer? Seventeen per cent of all the adult beer drinkers chose Budweiser. Next in line were Miller High Life (10%), Miller Lite (9%), Michelob (8%) and Coors (7%).

Top five favorites

	Adults 18
Total beer drinkers	100%
Budweiser	17
Miller High Life	10
Miller Lite	9
Michelob	8
Coors	7

The primary reason people preferred their favorite brand of beer was taste (76%). Other reasons cited included low in calories (6%), price (5%) and conveniently available (5%).

Six slogans used in advertising of various brands of beer were tested within the study. The slogans and corresponding identification scores follow:

Slogan	Percentage of beer drinkers correctly identifying slogan
"Welcome To __________ Time" (Miller)	77%
"King of Beers" (Budweiser)	66
"When You're Out of __________ You're Out of Beer" (Schlitz)	36
"Come To Think of It, I'll Have A __________" (Heineken)	18
"Let It Be __________" (Lowenbrau)	14
"Bring Out Your Best" (Bud Light)	8

Questions regarding this study may be addressed to Barbara Adago, vp, R.H. Bruskin Associates, New Brunswick, N.J.

Change

(Continued from Page M-9)

Louis brewer has been offering "salutes" to that breed over the airwaves.

It has tipped its hat to the men who move heavy equipment, clean streets, prepare for the Olympics, walk the beat and put out fires. It even salutes those who produce newpapers.

A-B has built up enough equity in this approach to foster 1982 sales of 39 million bbls., making it the leader of the pack by selling 19 million bbls. more than its closest competitor, Miller Brewing Co.'s High Life brand, according to industry data.

Miller is also aiming at that audience, with a catchy campaign that shows men leaving work and unwinding in a bowling alley or tavern.

The theme is "Welcome to Miller Time" and the campaign has had good acceptance among wholesalers even though that brand dropped 3 million bbls. (to 20 million bbls.) in 1982 and is still having trouble. The brewer is confident this approach will help spark a turnaround.

Then there is superpremium man. He's upscale.

This fella has a good, high-paying job. That enables him to spend his leisure time, on his boat, in an out-of-the-way cottage or on the soccer field.

Sometimes he quits work. Commercials for Stroh's new Signature beer focus on men who left the corporate rat race, opting instead to let their spirits run free.

That means they end up owning a ship yard or piloting a small mail plane for a living.

Oddly enough, after these men leave their jobs the first thing they do is grow a beard—apparently Stroh's idea of what ultimate freedom is all about.

The idea here is to get these more affluent types to plunk down an extra $1.50 a six-pack as a sign of their individuality and stature.

Imports are another matter. You drink them with dinner or when trying to impress someone on your first date and don't want to run the risk of asking for the wine list and not understanding it.

Imports basically attempt to build on snob appeal. The thinking is: No American beer is as good. So you buy an import and then reminisce about your college days tramping through Europe.

Then there is popular-price

Barking up the right tree

By Jay McCormick

Sometimes a little exercise really gets the creative juices flowing.

In the case of Seth Werner and Gary Dennis, copywriter and art director respectively at Marschalk Co., the exercise is a game of basketball. In their Manhattan office.

During one of these games—best of 10 shots wins a dollar—the creative team was throwing ideas around and came up with the basis for what became the "Alex the dog" commercials for Stroh's beer.

The idea proved a winner, both for Marschalk, which used the spot to win the Stroh's account away from the creative hot house of Doyle Dane Bernbach, and for Detroit-based Stroh Brewery Co., which is gaining a lot of free advertising through newspaper stories and word of mouth about the Alex commercials.

Though the idea for the spot came during some seat-of-the-pants creative flying, the basic concept was laid down over a long period of time by the Stroh marketing staff.

Stroh managed to learn from and build on its mistakes from the past.

Until recently, the Stroh's account was the turf of Doyle Dane Bernbach. That agency turned out some of the most memorable and funny commercials of the 1970s for Stroh's beer.

One great DDB spot was a parody of the Steven Spielberg movie, "Close Encounters of the Third Kind." A bright light—obviously from an alien spaceship—surrounds a house. A beam shoots inside, briefly searching around before finding the refrigerator. The beam opens the fridge door and several bottles of Stroh's float out, apparently into the space ship. One character says, "All that way for a Stroh's." Another looks up at the unseen spaceship flying away and says, "Don't surprise me none."

Jay McCormick reported on Stroh Brewery Co. when he worked in the Detroit bureau of Advertising Age. *He is currently a reporter with* Crain's Chicago Business.

But it surprised plenty of people in the ad business when Stroh took the account away from DDB and gave it to Marschalk. Up to that time, winter, 1982-1983, Marschalk's contribution to Stroh had been only an uninspiring campaign for Stroh Light, "Looks like a Stroh Light night."

Most dogs fetch their master's slippers. Not Alex. He has a taste for a Stroh's.

But Stroh executives—in shaking up agency assignments after the acquisition of Jos. Schlitz Brewing Co. the previous spring—realized that DDB's ads brought smiles to the faces of millions of tv viewers but not enough Stroh's drinkers into the stores.

"In the past," says John Bissell, group vp-marketing at Stroh, "we strayed too far from the beer drinker's world in an attempt to get a lot of laughter."

Whether ads are humorous or fun or serious, beer drinkers generally like to see people like themselves in beer commercials. And Messrs. Dennis and Werner knew they were up against some stiff competition in going for the Stroh's account. "Before I worked for Marschalk, I worked in Atlanta and Washington," says Mr. Werner. "I saw Stroh's commercials and I loved them. Gary and I really respect some of the work—though not all—that DDB has done for Stroh's. When we saw that we were going after the account, we looked at it as a challenge."

The creative duo knew the limits their spots had to work within before they set about shooting basketballs around their office. A description of the "Alex the dog" spot sounds wild. On command, a dog runs into the kitchen, opens the refrigerator, pulls out some cans of Stroh's beer, opens them and starts drinking. And yet the entire time, the camera focuses on five typical guys sitting around a poker game.

Marschalk used the commercial in its opening campaign to win the Stroh's account. "When we got the account, we promised we would do the same beer lover campaign but make it real," says Mr. Werner. "Real beer drinkers sit around and have a good time, watching football games, playing poker. It's a real challenge to put yourself in a corner like that. You can't just pull ideas out of a hat. You have to use real situations."

The real situations were a given. Coming up with the humor was the problem.

"When someone tells you to be funny, it's no fun," says Mr. Werner. "People analyze your work, trying to decide whether it's funny or not. They'll look at you in a room and with a straight face, they'll say, 'That's funny.' Or they'll say, 'That's not funny,' which happens a lot." For the creative team that came up with "Alex," about 24 of every 25 ideas failed to pass muster with the straight-faced judges at the agency or client. But they knew they had a winner with "Alex."

Says Mr. Werner: "The first question we had was whether it was right to have a dog drinking the beer of a client. We submitted it to our immediate supervisors, Peter Murphy and Gary Geyer. We went in and told them we had a terrific idea for a Stroh's commercial. They said, 'You're right.' "

While coming up with the idea wasn't exactly a layup for Mr. Werner and Mr. Dennis, it wasn't the whole ball game either.

The commercial had to do more than show stereotypical beer drinkers and put a smile on the face of the viewer. It had to draw the beer consumer into the spot. "Alex" accomplishes that by leaving almost everything to the viewer's imagination.

Visually, nothing exciting happens in the commercial. All of Alex's unusual actions are off-screen, behind the wall between the dining room and kitchen. The running commentary of Alex's owner is undetailed.

"The spot lets each viewer use his or her own imagination," says Mr. Werner. "They imagine Alex in the kitchen opening the fridge, pushing the mayonnaise out of the way to reach the beers, opening a beer. Everyone has a different image. It's the closest thing to a radio spot on tv."

Attention to detail also helps keep consumers interested. In the original commercial, the dog jogs into the kitchen, flipping on the light (off-screen) before he opens the refrigerator.

"It's another device to make the commercial more interesting," says Mr. Bissell. "There are little touches the viewer looks for. The second time he sees it, he notices new things."

In the most recent spot—Alex II—which broke in late December, the dog's owner and his friends are camping. Again they're playing poker. One poker player notices that they're almost out of beer and Alex is sent off to buy more Stroh's.

The dog leaves the tent, a car door opens, a seat belt clicks, the car starts, headlights sweep across the side of the tent and the dog's owner shouts, "Alex,

(Continued on Page M-12)

By focusing on the poker game, not Alex, the spot sets minds in motion.

---

man. He's basically strapped for cash but funloving.

Old Milwaukee, a former Schlitz brand now held by Stroh, is the kingpin of this segment. The characters in those commercials are younger, vibrant types that go stone crab fishing in the Gulf of Mexico or bar-hopping in New Orleans, just the type of events that are capped off with Old Milwaukee.

Traditionally, popular-price beers are seen as a means of filling a beer maker's excess brewing capacity. It has high volume, is sold at a lower price and doesn't get much ad support.

At least on that last point, Miller is doing something drastically different. The Milwaukee brewer has rolled out Meister Brau with a hard-hitting comparative ad campaign. (*See story Page M-30*).

Finally, there is that not-so-distinct group of light beer drinkers. They are . . . hang on . . . a combination of blue collar, upscale, young, males who don't want to be thought of as drinking a "diet" beer.

The heavyweight here is Miller Lite. With its long-running ad campaign that uses former athletes and other well known personalities, it has given that segment of beer drinking legitimacy.

A-B unveiled a much heralded ad campaign for its Budweiser Light, featuring stories within the commercials about minor league athletes who excel in order to "Bring out the best."

Bud Light did well its first year, selling about 4 million bbls. But it isn't doing terrific now and some fine-tuning may be in order.

These are only a few of the campaigns running. Coors is hitting the road with new work for Coors Banquet and Coors Light. Pabst Brewing is attempting to revive its Pabst Blue Ribbon and Olympia brands.

Heileman continues to confine itself to regional buys, for the likes of Old Style, Blatz, Rainier and its burgeoning number of other smaller brands.

Most campaigns bear a common thread. None of these campaigns really addresses women as potential consumers. In beer commercials they are mainly seen as waitresses or girlfriends, hardly ever the main focal point of the presentation.

It's an odd positioning since more women then ever are drinking beer at bars and buying it at the supermarkets, say researchers. Yet, the case remains that advertising—especially tv advertising—is as imperative to a beer's success as its ingredients, taste, packaging and over-all hangover effect.

But that doesn't mean it will remain that way. There is a grassroots movement under way that is attempting to ban beer ads from tv.

Various community groups, including Mothers Against Drunken Driving (MADD), are taking aim at the brewers for allegedly glamorizing drinking. Bills have been introduced in the U.S. Senate asking for an embargo on tv ads.

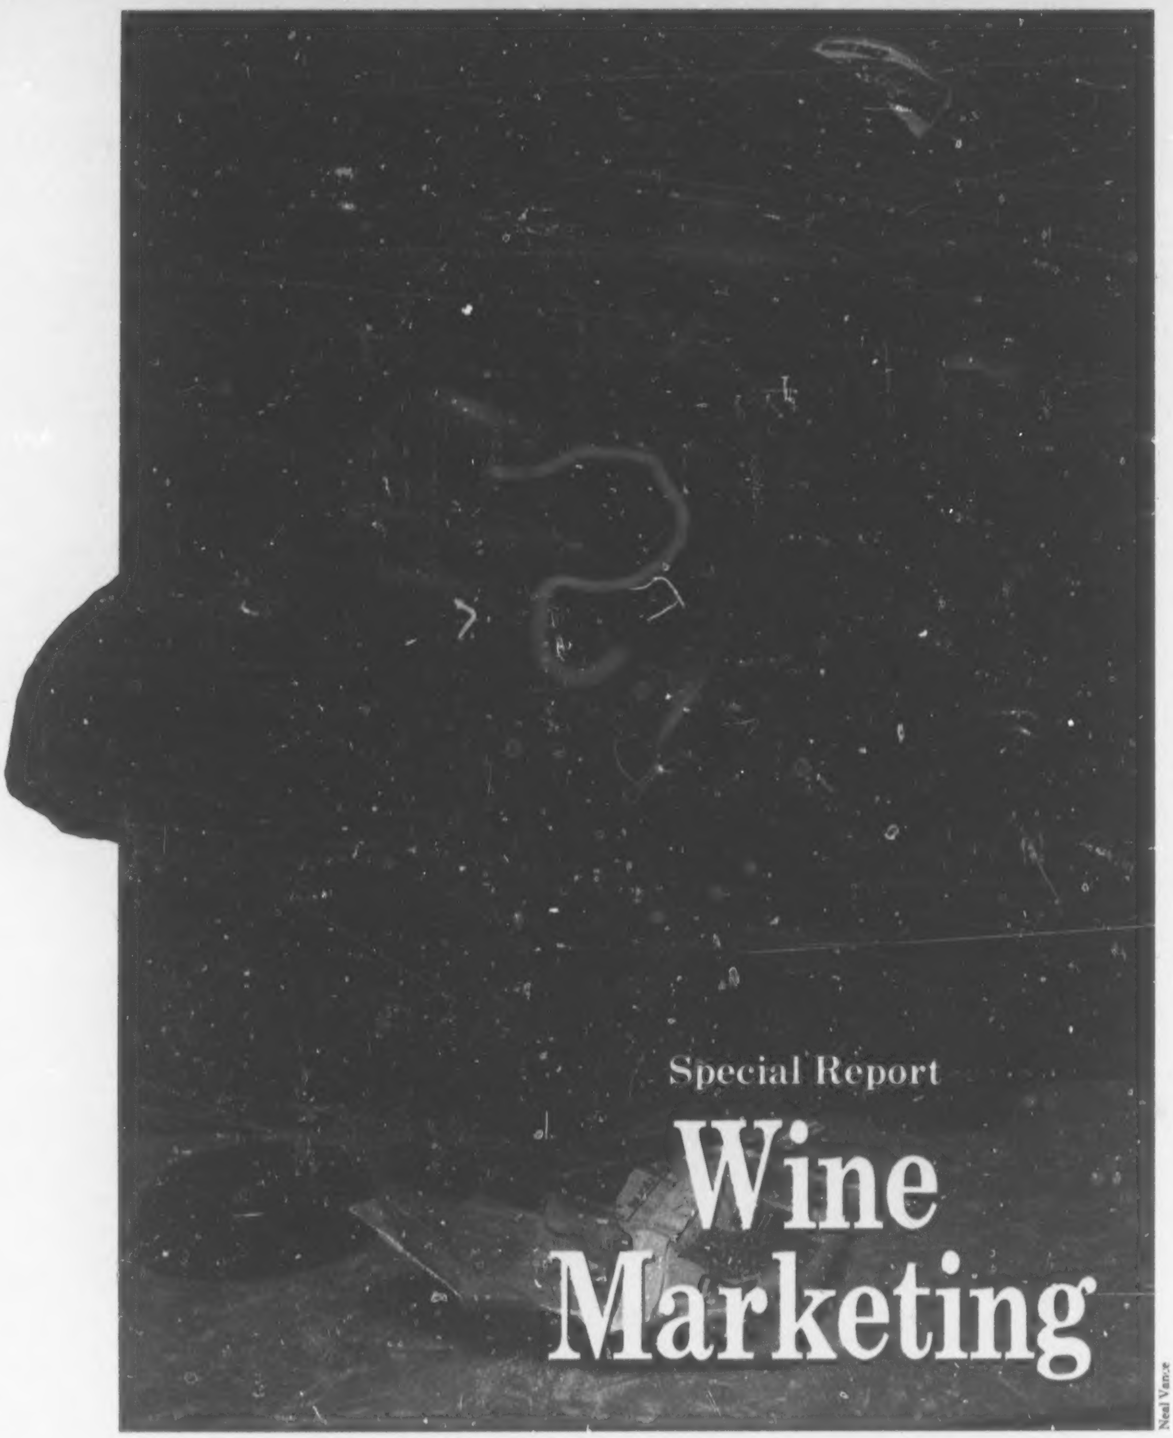
Many states are raising the drinking age from 19 to 21, and brewers are catching heat for setting up college representatives, whose main purpose is to sell beer through a series of rock concert and special events programs.

The beer makers are worried. At a recent beer wholesalers convention the breweries voiced concern that a prohibitionist movement was under way.

At that gathering, William Howell, president of Miller, told distributors that the industry should unite and lobby against such measures at the state and federal levels. In addition, the brewers should begin cooperating with responsible public-interest groups to develop guidelines for beer advertising, he added.

The major brewers believe this movement could eventually lead to a total beer commercial blackout, similar to the ban imposed in the 1970s on cigaret advertising.

And if that eventually happens then premium, popular-price and superpremium man will be off the tube and out on the range like another macho type—you know, the Marlboro man.



Special Report

Wine Marketing

Neal Vance

Is wine hanging up its tuxedo image?

By Richard Paul Hinkle

It is a most frustrating piece of logic. The major premise, broadly speaking, is this: Americans don't drink wine. The minor premise: Americans *would* drink wine if they weren't so intimidated by it. Conclusion: Americans will drink wine once they learn to understand it better.

Admittedly a crude syllogism, it paints a painfully clear picture. Fact: 85% of potential American wine drinkers rarely or never drink wine. Why? California (primarily) wine producers have been so intent upon selling the glamor of wine—the ermine-lined velvet robes, the candlelight dinners with champagne, caviar and squab—that the vast majority of would-be wine consumers have been put off.

"We've done a remarkable job of making wine 'fashionable,'" Darrell F. Corti, a wine retailer in Sacramento, Cal., says wearily. "But we've done nothing about making wine common. It's interesting, but beer is everyman's drink, notwithstanding the fact that its production is much more difficult to explain than wine's. Wine should be everyman's drink, as it is in Europe. The Europeans laugh at us. 'You *talk* about wine,' they say. 'We *drink* it.' Generic advertising, or promotion, of wine is what's needed. The difficulty, of course, is in agreeing on who should pay what and who should supervise the spending of that money."

When Mr. Corti says "generic," he's not talking about untitled red and white table wines (often labeled with European names like Burgundy, Claret or Chablis). What he's after is the promotion of wine as "wine," a nonbranded approach. The theory is simple: Because branded advertising serves primarily to fragment the small slice of the beverage pie that wine already has, the thinking (the hoping) is that nonbranded promotion might serve to bake a bigger pie.

Many point hastily to successful promotions put on by the likes of the California Table Grape Advisory Board. With the music of a hip little ditty in the background framing the change "Cool off, cool off with grapes," the theme of "Grapes, the natural snack" is established. The folks selling beef, milk, avocados and plums have had equal success. Yet it's not as simple as all that.

"The semantics of this are very important to grape growers," says Robert Hartzell, president of the California Assn. of Winegrape Growers. "They hate the term 'generic advertising,' preferring 'consumer education.' Growers don't feel that they have any business advertising, but do agree that it's necessary to do something to expand the consumer base. At the moment, we're spending some money on a professional study to determine how to best spend our educational dollars. As growers, we certainly do have a vested interest in making wine less intimidating."

"You have to be careful in trying to equate wine with grapes, kiwis, avocados and the like," stresses John DeLuca, president of the California Wine Institute. "Brands have been the major development in wine marketing. If you break down the tugs on a wine buyer's purse strings, you'll find brand first, followed either by appellation [geographic area] or varietal [variety of grape] designation. It's different with European wines, where region is the No. 1 selling point."

Mr. DeLuca sees the answer in a promotional-educational program "to augment what we're doing already. We [at Wine Institute] spend up to $1 million each year putting on tastings,

(Continued on Page M-32)

How four regional wineries boost appeal

Gaining new territory with pride, promotion and personality

By Mort Hochstein

Do you recognize this slogan: "That Arkansas Wine!" No? Well, it's hardly as familiar as "we will sell no wine before its time," but this theme is doing the same sort of job for Wiederkehr Wine Cellars of Altus, Ark., as that dramatic intonation by Orson Welles did for Paul Masson.

Regional wineries don't have the advertising dollars of a Paul Masson or an Almaden or a Heublein. But they've still got to compete with the giants of California, with the great names of Bordeaux and Burgundy and low-priced imports from all over the world for limited space on store shelves and restaurant wine lists. So they stretch their dollars and make the most of clever promotion, publicity, personality, boosterism and local appeal. They hitchhike on the appeal of more established brands and they look for the cracks the big boys have left open.

Wiederkehr Wine Cellars

Wiederkehr Wine Cellars is 103 years old, the biggest of a handful of wineries founded by Swiss-German homesteaders in the Arkansas River Valley community of Altus. With a product line of some 50 wines distributed in Arkansas, Louisiana, Mississippi, Oklahoma, Tennessee and Texas, it would be easy to call Wiederkehr "The Gallo of Arkansas."

But then Gallo can whip out 50 million cases a year, while production at Wiederkehr, a family-held company, is estimated at slightly more than 700,000 cases annually. Ernest and Julio Gallo are publicity-shy winemakers; Alcuin (Al) Wiederkehr is on the stump constantly and in his busiest promotional period—harvest time in October—he stages a blitz of tv and radio talk shows and newspaper interviews in his five-state marketing area. As "the little old Italian winemaker," Aldo Cella and Franco Bolla all rolled into one, he gets his attention via the publicity route.

Wiederkehr's advertising agency, Noble & Associates, Springfield, Mo., has a marketing strategy that embraces three separate Wiederkehr products: Wines, Wiederkehr Village—a tourist attraction—and the annual Oktober Weinfest.

After customers asked again and again for "that Arkansas wine," it became a logical tag for ads. It is one way, says Noble & Associates account executive Bill Bailey, to distinguish the wine from competitive brands and to combine product identity for consumers with a declaration of pride in the state.

Two other themes, the winery's record in competition and "a century of pride in today's fine wines" are featured in ads, primarily in tv spots. "Taste," a current tv commercial reminiscent of a Gallo spot, simulates a wine-judging as unlabeled bottles are presented gold medals and cards are turned over to reveal "Wiederkehr" as the winning wine. A voiceover notes that "since 1977 Wiederkehr wines have won more than 100 awards in national and international wine competitions." Thus, it is natural that "That Arkansas wine" tag is often embellished as "That award-winning Arkansas wine."

Another important message today is that the winery makes not only the native American and hybrid wines such as Catawba, Concord and Baco Noir, but is equally proud of its vinifera—Chardonnay, Riesling, Cabernet Sauvignon and Pinot Noir, grapes that Al Wiederkehr brought to Altus.

"The television spots in particular," Mr. Bailey notes, "position Wiederkehr, 'that Arkansas wine,' against California and New York wines by using a somewhat antisnob approach. In 'Party,' an attractive midwestern couple is seen enjoying the honest, quality taste of Wiederkehr in between a laid-back California couple at screen left and an ultrasophisticated-looking New York couple at screen right." Another spot emphasizes that Wiederkehr vineyards flourish in a climate nearly identical to the great grape-growing regions of Europe.

Wiederkehr
Wiederkehr
That Arkansas Wine!

Wiederkehr pushes three themes: Its winemaking, its awards and Arkansas.

Wiederkehr uses tv most frequently in the Thanksgiving-Christmas holiday period and supplements it with print advertising in upscale local magazines such as *Arkansas Times*.

Small wineries cultivate visitors and bus tours and do a good share of their business in their own tasting rooms. Wiederkehr takes that tactic one step further with Wiederkehr Village, a miniature Alpine village with wine cellar tours, Weinkellar Restaurant and Gift Shop, all promoted via local radio, travel publications and outdoor advertising.

Meier's Wine Cellars

When Anwar Sadat and Menachem Begin signed the Camp David peace accord in 1979, they toasted the event with Meier's sparkling grape juice. The nonalcoholic wine didn't get there through the efforts of any high-powered public relations person, nor did Meier's or its parent company, Paramount Distillers of Cleveland, milk the event for the kind of publicity it could have gotten. Because President Sadat's religion did not permit his drinking alcoholic beverages, the search for a celebratory nonalcoholic drink ended with Meier's sparkling grape juice.

Meier's Wine Cellars, based in Silverton, outside Cincinnati, is the oldest and largest winery in Ohio. It makes about 40 wines, but more than half of its advertising budget of approximately $600,000 goes to one product, Meier's No. 44 cream sherry.

Jay Beneman, vp with Elkman Advertising, Bala-Cynwyd, Pa., says the Meier's plan is to pit itself against the leading import. Ads show a bottle of "44" next to Harvey's Bristol Cream, calling itself "The other great cream sherry." The ad goes on: "There are two great cream sherries. Both have the same mellow flavor. The same nutty, subtle taste. Both taste imported. But Meier's No. 44 is American. And costs several dollars less."

"The market for cream sherry is growing," says Mr. Beneman, "and the strategy is to get a piece of the market that Harvey's is building with a quality product at a lower price."

Mr. Beneman aims his ads at a tight demographic group, seeing his buyers as largely upscale women. "Sherry," he says, "is enjoyed primarily by the buyer, as opposed to cordials and items like B&B, which are served to guests. If you can buy something for yourself at a lower price, you don't need the status of an imported label. And in the areas where it is distributed, if you order sherry in a bar without specifying brand, you've probably been drinking Meier's."

Meier's No. 44 advertises six to eight times a year in regional and city magazines in the Midwest, Central and South Atlantic areas, in regional editions of publications such as *Sports Illustrated*, *Time* and *Newsweek*, and national magazines such as *New Yorker*, *Bon Appetit*, *Smithsonian*, *Gourmet* and *Country Living*. "The theory," says Mr. Beneman, "is to take small space often."

The line of eight nonalcoholic juices, sold nationally, is advertised primarily in food and shelter publications.

The remainder of the ad budget goes to the wines that the company made in its earliest

seminars and festivals. And that doesn't count the volunteer time and money put into these events by all the wineries that participate in them. More and better promotions are necessary to overcome the subsidy and currency problems that put European wines on our shelves at half to a third of what they should cost."

Industry consultant Terrance Clancy, formerly president of San Martin Winery, doesn't believe that nonbranded advertising is the way to go. "California needs to do something!" asserts Mr. Clancy. "But generic advertising is a train wreck. It's like hunting ducks by climbing onto your roof and just firing away at the sky. You have to start with wholesalers, with point-of-purchase materials, and work with the trade and with writers to convince them of the great quality of California wines.

"And the attack should be twofold: First, to get present users to increase their consumption and, second, to take aim at malt and distilled beverages, to cut into those markets."

Ron Khachigian, who manages 3,000 acres of grapes in Kern County, Cal., isn't quite sure exactly how to approach the American consumer. "Advertising is *very* expensive," he says, "especially since most growers have been in a negative cash flow position for the last two or three years. But we should learn from the textile people that an industry united can be more effective. Working together we could open up our markets, remove all those state restrictions. Pennsylvania, with its state stores, has only one store for each 12,000 people; California has six times as many."

Money is the giant question. The State of Washington's Department of Agriculture has just funded a modest two-year promotional program with $300,000. "We'll start out going to trade shows nationwide," says author Lila Gault, who is coordinating the effort. "The wineries can handle instate promotion with branded ads. In the second year, we hope to start putting money into advertising, which will be somewhat conventional, going mostly to the print media. We just don't have enough for radio or tv."

Presenting California wines to the nation would cost much more. How much more? "I think it would take $10 million to $15 million just to make a dent—maybe," says John DeLuca. "The Italians spend about $11 million a year over-all, but that's almost entirely branded advertising. Only $250,000 of that is for generic advertising."

That may be, but what the Italians have done has been done most effectively. Who can forget clumsy, chubby Aldo Cella? Here's this pleasantly fat, unobtrusive little man getting all those girls, all the while imploring us to "Chill a Cella." And how about the swarthy Italian, bottle of Riunite in hand, chasing a woman on horseback down a sandy beach? "Do you know what it means when a man offers a woman Riunite?" he shouts. She looks back seductively, answering, "Do you know what it means when a woman accepts?" It's funny, unpretentious stuff, but it has been a breath of fresh air to an American public fed up with deadly serious, heavy-handed, elitist wine marketing.

"I feel very strongly that the California industry should deal in a 'California' presentation to the rest of the country," says Gary Topper, executive vp and co-owner of Vintage Wine Merchants (San Francisco), marketing arm for about a dozen top California producers. "Our small wineries cannot individually accomplish what is necessary, because it's going to take long-term dollars to create a consciousness for premium California wines. I think that upscale advertising, concentrating in the East and Midwest, would most effectively use the money available. The greatest difficulty lies in areas where French wines are being consumed now."

Mr. Topper realizes the magnitude of the task. "The amount of money needed to remove that basic intimidation factor will be enormous," he says. "You have to show people that it's okay to be in shirt sleeves and jeans and still drink wine. The current ad that Gallo is running, about their Sonoma wines, is very classy, very comfortable—and not intimidating. We also have to show that we have reasonably

Maxwell Advertising

Warner Vineyards makes good use of well-known Detroit radio personality J.P. McCarthy to push its Cask line.

years, native American wines such as Catawba and Concord, the more recent hybrids such as Aurore and DeChaunac and limited bottlings of the more traditional California and European wines. The table wines are sold almost entirely in the Midwest, and advertising has been primarily local radio. There may be some tv in Meier's future, but for the present, the emphasis stays with print.

Warner Vineyards

Warner Vineyards in Paw Paw, Mich., sells its line of 48 wines in its home state, Indiana, Illinois, Ohio, Wisconsin, Florida, West Virginia, Tennessee and Kentucky. It also sells cranberry wine, Cold Turkey (also based on cranberries) and Seyval Blanc, a white French-American hybrid, in California, where it is apparently viewed as an exotic import.

Family-held Warner doesn't divulge saies figures, but with a storage capacity of 3 million gals. and a bottling line able to handle 8,000 cases a day, it ranks in the upper third of the nation's top 100 wineries. Warner bottles 21 wines under its best-selling Cask label, as well as Pol Pereaux sparkling wines ("Taste a champagne great enough to cost much more") and Capriccio Spumante. The top-of-the-line Warner brand includes cork-finished, vintage-dated varietals, proprietary wines such as Liebestrauben, a *methode champenoise* sparkler, and dessert wines that include port and sherry produced by the solera method—in which new wines are mixed with old.

Then there is the line of wines called Waterworks Station, sold only at Warner tasting rooms in Paw Paw and Frankenmuth. Warner is also a major supplier of private label juices to supermarket chains.

Advertising and promotion are handled by Maxwell Advertising, Kalamazoo, Mich. The largest part of a budget estimated at somewhere under a half million dollars goes toward point-of-purchase and promotion, with 30% in print and broadcast. Most of that is spent on radio where J.P. McCarthy does commercials for the Cask line.

Agency chieftain Jess Maxwell says Mr. McCarthy, a Detroit institution during his 16 years as WJR's morning personality, is a name and voice familiar to most midwesterners and his affiliation gives Warner an even stronger identity in its key markets.

Newspaper advertising is spread through about 20 suburban newspapers in the Detroit area, Warner's largest market, and is heaviest in the holiday gift season and harvest period when a large percentage of the 100,000-plus annual visitors come to the main winemaking facility at Paw Paw.

A key attraction is the hospitality center in the Waterworks Station, a brick and stone building that was formerly the waterworks station for the village of Paw Paw. Warner bought the building in 1967 and restored it, putting in facilities for wine tastings and sales, tours and community meetings. In 1982, it was designated a state historical site.

It is a key element in Warner's public relations—one of the lines of wine is named after it—and what little money is spent in magazines goes into tourism publications designed to bring visitors to the site.

Promotions rank high with Warner. The agency prepares shelf strips, neck tags, in-aisle and case displays and collaborates on gift packages, usually pine boxes from Michigan furniture factories, restaurant wine lists, recipes from the kitchen of Lynne Warner, wife of president James J. Warner, and newsletters.

In 1982, the winery won a regional Addy p.o.p. award for its unique Liebestrauben cork promotion that linked a bottle opener and a wine in a polyurethane package, believed to be the first on-pack promotion in the wine industry.

Chateau Ste. Michelle

While most small wineries depend heavily on tastings, personal appearances by winemakers and heavy public relations and nurse their limited advertising dollars, Ste. Michelle in Woodinville, Wash., has a big daddy in the background and is spending big bucks as it muscles its way from regional status to national ranking.

A regional winery strong in its northwest market of Washington, Oregon and Idaho, Ste. Michelle was available in a few key wine markets for a long time.

It always had national aspirations, but it wasn't until 1973, when it was acquired by Greenwich, Conn.-based United States Tobacco Co. that it was able to start to build a sales force and cultivate the national market.

Its most recent campaign revolves around the concept of discovery and a brochure aimed at distributors is headlined "24,000,000 people will discover our secret this fall."

On a national basis, that fourth quarter campaign, the winery's biggest, included ads in *Architectural Digest, Atlantic Monthly, The New Yorker, Smithsonian, Town & Country, Sunset* and the western edition of *Time.*

The Secret of Chateau Ste. Michelle.

With United States Tobacco Co. behind it, Ste. Michelle is going national.

The campaign also included sponsorship of Dick Clark's national radio broadcast, "The Great Sounds."

In 1982, with gross sales of $10.5 million, the winery spent just under $50,000 for advertising. In 1983, with sales approaching $20 million, according to Alan Shoup, vp-marketing and corporate planning, the ad budget went to $250,000 and in 1984, the company expects it to exceed $1 million on sales estimated at $25 million. Advertising is handled by Cole & Weber, Seattle, a subsidiary of Ogilvy & Mather.

Chateau Ste. Michelle is a good example of regional pride. "With the huge concern for northwest food products here, it would be hard to find a restaurant without our wines," says Mr. Shoup.

There is, he says, a strong trend toward local boosterism for Washington wines—"the hometown boy makes good idea"—as well as a healthy competitive attitude toward the California industry.

Just as Wiederkehr can, without fear of aiding the competition, call itself "that Arkansas wine," Ste. Michelle, the undisputed leader in a rapidly growing wine region, can generously advise the public to "discover the wines of Washington State."

---

priced wines—like Chenin Blanc, French Colombard, Zinfandel and Petite Sirah—that are far better than European wines in the same price category. Maybe you could call them, California's 'other wines.'"

Napa Valley's beloved guru, Robert Mondavi, never shrinks from challenge. "Some kind of promotional, educational program is an absolute must," says the 70-year-old wonder. "Americans are interested in gracious living, they're interested in wine and they're interested in its use. They don't yet know its true value, that it's good for you, but they want to find out. It's our job to tell them."

Mr. Mondavi agrees that it would be expensive, but he figures that $5 million could set up a fine educational program. "There are many ways to go about it," he says. "Advertising, books, tastings and educating the writers are important. Many of the writers are not in direct contact with California wines, wineries and vineyards. Of course, this means that even the largest half dozen wineries, that account for 80% of the wines, will have to divert some of their advertising budgets into industrywide ads, but that's necessary to attract new wine drinkers."

To do that, domestic growers and winemakers would do well to take a page out of the Italian best seller and present wine to Americans by means of a lighthearted, somewhat humorous approach.

Consider Napa wine maker Hamilton Vose III, who is plugging his slightly sweet white Zinfandel through a print ad that places a bottle of the wine next to an elegant wine glass filled to overflowing with . . . popcorn! "We just like it with popcorn," explains Mr. Vose with the grin of a man who knows his wine is selling.

Choosing the right medium: It's no mean feat

Marketers scrutinize the alternatives for the perfect fit

By James Suckling

With most Americans still reaching for a glass of Coke, Bud or a cup of coffee during mealtime rather than a glass of wine, both domestic and imported wine producers are concentrating more on how to make advertising more effective.

James Suckling is senior editor of The Wine Spectator, *the San Francisco-based consumer wine newspaper.*

That means they are taking a good look at the various media available and which is best for a particular purpose.

"Wine comes in every size, shape and price, and you have to tailor the advertising medium to fit the product," says Charles Skoog, chairman of Hicks & Greist, New York, the agency for Villa Banfi wines, of which Riunite is the dominant brand. "For Riunite, network television is the strongest medium. It gives you the time-honored elements necessary in good advertising—sight, sound and motion. Television reaches a broad section of the public in a rapid fashion."

Riunite accounts for almost 25% of the total imported table wine market in the U.S. For the first half of 1983, Villa Banfi spent more than $7 million in advertising supporting Riunite, and it finished the year spending more than $13 million on the brand, according to *Impact*, the industry newsletter.

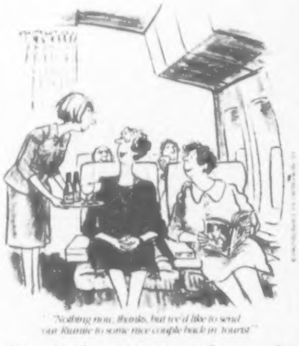
Charles Traynor, vp-management supervisor at Doyle Dane Bernbach, New York, the agency that handles Seagram Wine Co.'s Paul Masson, agrees with Mr. Skoog about the effectiveness of tv. "Wine is a pretty visual product and television offers the ability to use that attribute," he says. Also, tv is a strong medium for illustrating to wine distributors "that you are putting a lot of bucks behind your brands," he says.

Tv reaped close to $46 million in wine advertising for the first six months of last year, down 23.9% from six-month figures in 1982, according to *Impact*. Those wine advertisers who chose tv emphasized matching the right programs with the right advertisements—placing informative wine advertisements with informative programing. For example, Riunite tv ads, which reaffirm the 2,000-year-old Italian origins of the wine, are aired during newscasts.

"For Riunite, network tv is the strongest medium. It gives the elements necessary in good advertising, sight, sound and motion."

In addition, to make money spent on tv more effective, advertisers look for the key demographics: A high percentage of viewers with college educations, high levels of disposable income and—not surprisingly—medium to heavy wine consumption.

Other than network tv, Mr. Skoog finds spot tv efficient in promoting particular wine brands. For the holiday season, 10-second commercials for Villa Banfi's Asti Banfi, a sweet Italian sparkling wine, were run in the New York metropolitan tv marketplace. The ad showed closeups of the wine name and stressed Asti Banfi as a sparkling wine.



"Nothing now, thanks, but we'd like to send our Riunite to some nice couple back in 'tourist.'"

Riunite's cartoon ads ran in magazines to reach the upscale wine consumer.

But tv is not suited to every producer, says Nial Hadden, assistant vp-marketing with F. Korbel & Bros. in Guerneville, Cal., the largest producer of premium California sparkling wine.

"We used television in 1974 and 1975 and had great response," he says. "But it ran us out of our product."

As far as creativity, tv has fantastic potential, but so far, ac-

FOR BETTER
MARKETING
DECISIONS

The three-tiered distribution system for alcoholic beverages makes consumer purchase trends at the retail level vital in today's marketing oriented environment. A.C. Nielsen Company, the premier name in marketing research for over 50 years, provides this key information to brewers, distillers, importers and vintners through its Alcoholic Beverage Service.

Nielsen provides off-premise consumer sales and brand share information to allow clients to assess the sales and marketing strategies of their own brands, as well as those of their competitors, at the actual point of sale. Clients also receive the important "reason why" data such as distribution and out-of-stock; retail prices; retail inventory and share; retail stock turn; and local advertising and feature price activity.

For more information on how Nielsen data can help you make better marketing decisions and give you a competitive edge, contact the Nielsen Alcoholic Beverage Service.

The media

(Continued from Page M-34)

cording to advertising executives like Mr. Traynor, there have not been many innovations established in wine advertising.

"All of us have been using mostly stuff that has been around for the past 20 years," he says. "There are only five or six ways of doing it, such as comparisons, testimonials and others." Tv campaigns for wines may be "recycled stuff," but they seems to work.

For instance, Almaden recently concluded a "taste test" campaign pitting its varietal wines against Taylor California Cellars on both tv and radio.

Says Theo Williams Rigney of Dancer Fitzgerald Sample, the agency that handled the campaign, "That's the first time Almaden did anything close to head-to-head competition, and the campaign seems to have done well in creating awareness of the brand." Almaden recently changed agencies and now is with BBDO/West.

Radio expenditures come nowhere near expenditures for tv—in the first six months in 1982, for example, according to *Impact*, network radio expenditures were $671,000 while expenditures for tv were $60 million.

Nevertheless, radio—both network and spot—still remains a popular medium, and some of California's large to midsize wineries have had great success with it.

"Radio has been the correct medium for Beaulieu Vineyard," said Michael Silva, director-public relations with the premium, midsize California winery. (Beaulieu is part of Heublein Wines, a division of R.J. Reynolds Industries.) Beaulieu has been using spot radio ads in California, New York and Chicago featuring a testimonial by the winery's chairman, Legh Knowles Jr.

"Of all the advertising done by this company—Heublein and R.J. Reynolds—we get the most feedback on that particular radio ad," says Mr. Silva.

"His [Mr. Knowles'] voice on the radio is effective in getting the message out that wine is something to be enjoyed and not something to be intimidated by," he says.

One of the most talked about media for wine advertising is cable.

But in recent years, perhaps one of the most talked about media for wine advertising has been cable. "We have used cable to move into different markets," says DDB's Mr. Traynor. "We don't buy cable for the sake of buying cable. We feel it is a good medium to reach people who drink wine."

Hicks & Greist's Mr. Skoog concurs. "Cable is good if it is used properly," he says. "There are only three mass ways of using cable—ESPN, CNN and USA. They draw the best audiences."

Whether using all or one form of the broadcasting media, most wine advertisers still rely on print for part of their campaigns. However, print tends to be even more selective, especially in magazines and may be better suited for promoting particular products, say some advertisers.

What they spent

Wine advertising expenditures by medium first six months 1983 vs. 1982 (thousands of dollars)

	First six months		Change	
Medium	1982	1983	Dollars	Per cent
Network radio	$ 671.5	—	$ −671.5	—
Television	60,323.8	$45,890.7	−14,433.1	−23.9%
Magazines	4,737.2	5,743.9	1,006.7	21.3
Outdoor	568.7	323.5	−245.2	−43.1
Newspaper supplements	720.0	661.7	−58.3	−8.1
Total	$67,021.2	$52,619.8	$−14,401.4	−21.5%

Sources: LNA and Impact Databank

"It depends on what target you want to talk to," says Dancer Fitzgerald Sample's Ms. Rigney. "Print is more selective. We use upscale magazines for reaching that upscale public—wine, food and general editorial magazines that have good demographics."

DDB uses magazines for promoting the imported premium wine brands Seagram represents, says Mr. Traynor.

"With something like Mumm champagne at $35 or $40 a bottle, we are not going after the mass market," he says.

"We use magazines exclusively," says Korbel's Mr. Hadden. "We feel it is the best long-term image building medium."

Based on its new slogan, "Uncork the magic," Korbel has run its tony ads in such publications as *Newsweek*, *Bon Appetit*, *Playboy* and *Penthouse*.

Magazines also offer mass market wines opportunities not available in other media. In selected magazines, Villa Banfi ran "cartoon ads" depicting Riunite as a wine for the discerning consumer. "That was a small campaign to attract a person we wouldn't normally attract on television—the upscale wine consumer," Mr. Skoog says.

Although magazines are a popular medium for wine advertisers, expenditures for newspapers—in 1982—were higher. According to 1982 *Impact* figures, newspapers in 1982 attracted $14.8 million of advertising while magazines took in $12.5 million.

Even the big league wine advertisers continue to buy newspapers. Gallo began running ads in October in the San Francisco Bay area daily newspapers featuring its new 1978 vintage Cabernet Sauvignon—a change from Gallo's usual brand building campaigns.

Gallo spent the most on wine advertising during the first half of 1983, about $13.4 million, and *Impact* says it was one of the few wine advertisers to actually increase spending 12.4%.

In general, advertising executives and wine marketers say that the most effective medium for wine advertising depends on the product and, more important, the amount of money allocated for ad support, the latter of which may be the most dubious criterion.

"The jury is still out," says Marvin Shanken, editor and publisher of *Impact*. "If wine advertising expenditures are not reinstated to past years' high levels, there is no doubt that wine consumption in America will have difficulty in reaching its full potential."

Making a habit of radio

Some wine advertisers might find that Schieffelin & Co.'s using radio to promote Blue Nun is a laughing matter, especially since the company hired a husband-wife comedy team to help promote the label.

Schieffelin had its reasons, however, and believes they are good ones.

It was at the beginning of last year that the New York-based importing/marketing company dropped its multi-million-dollar network tv campaign and switched to radio, enlisting the help once again of the comedy team of Jerry Stiller and Anne Meara to push its popular German white wine.

"The reason to go back to radio was a media decision, not a creative one," says Ray Strong, vp-product group director at Schieffelin. "We felt Blue Nun's success was by being in a different media than the other brands. Everybody and his mother are in tv."

In 1982, Schieffelin spent more than $3.6 million in advertising on Blue Nun, the seventh largest selling imported wine brand, according to *Impact*, a national wine and spirits newsletter. Cunningham & Walsh, New York, is Schieffelin's ad agency.

Introduced in the U.S. in 1961, Blue Nun totaled a little more than 30,000 cases a year in sales until it started being advertised on radio in the early 1970s.

"We used radio for about 10 years," said Mr. Strong, "and Blue Nun had its tremendous explosion from about 34,000 cases up to 1 million cases in that period of time.

"The success of Blue Nun during that time was a combination of a number of things. It was Stiller and Meara radio. The use of radio in general and, also, the use of the phrase 'a wine correct with any dish,'" he says.

PRODUCE OF GERMANY

After trying tv, Schieffelin switched back to comic radio spots for Blue Nun.

After reaching the 1 million mark, Schieffelin decided to take Blue Nun to a larger market via network tv. "The problem with radio then was that even with network radio you were reaching only about 60% of the U.S. population," Mr. Strong says. "By going to network tv, we reached an additional 40% or 100% of the population.

"We used the symbol of a live nun and the slogan 'Blue Nun goes everywhere.' With this campaign, we expanded the position of the brand beyond mealtime to anytime."

Although considered successful, the tv campaign was dropped at the beginning of last year. "We switched from tv back to Stiller and Meara radio because you can concentrate better in markets where you are strongest, in addition to having a national presence," says Mr. Strong.

He says the new radio campaign still stresses Blue Nun as an "anytime wine" but also reinforces two other concepts. "It hammers home the taste of Blue Nun, and the fact that Blue Nun is now served [by the glass] in 8,000 bars and restaurants across the nation. It says, 'by the glass or by the bottle there is a lot of taste in Blue Nun.'"

Although many wine advertisers might question Schieffelin's relying primarily on radio for promoting Blue Nun, Mr. Strong does not appear too concerned: "We have the tendency to go against the grain, where our competitors are not as dominant. Besides, radio basically built Blue Nun." —J.S.

U.K. rock book tries Yank edition

New York—A $400,000 promotional blitz, keying on MTV: Music Television, broke last week to introduce *Star Hits*, sister publication to the U.K.'s biggest music magazine.

The new monthly (AA, Nov. 21) covers many of the acts championed by MTV, such as Duran Duran (who appear on the cover) and Culture Club, but there's also coverage of perennials like the Rolling Stones and heavy-metal bands like Quiet Riot.

Star Hits
CULTURE CLUB
THE ROLLING STONES
PAT BENATAR
STRAY CATS
THE DOORS

Such content, as well as *Star Hits'* splashy, colorful graphics, could fuel the kind of growth that Felix Dennis, who has arrived from England to oversee the launch, predicts will enable frequency to be increased within six months to every-other-weekly and propel circulation within a year from 200,000, the expected initial rate base, to 500,000.

Another reason for Mr. Dennis' optimism is the success enjoyed by *Smash Hits*, the English magazine that has licensed its format to Pilot Communications here.

Mr. Dennis is serving as a consultant to Pilot, which is owned by Peter Godfrey and Robert Bartner. In Great Britain, Mr. Dennis heads the Bunch Group, which numbers among its titles *Hi-Fi Choice* and *Which Bike?*

Star Hits faces a formidable field of rivals. But while *Rolling Stone* has grown up with its readership, Mr. Dennis said, *Star Hits* intends to target continually a 12-to-20-year-old audience.

Promotion for *Star Hits* began Jan. 12, the day the magazine made its debut, on MTV and radio stations. International Communications Group, Los Angeles, handles.

A b&w page is $2,000, a color page $3,000. The magazine, cover-priced at $1.50, will be sold only on newsstands at first, adding subscriptions later.

• **CMP Publications**, Manhasset, N.Y., will introduce *Communications Week*, an every-other-weekly tabloid, on Jan. 30, with initial circulation of 50,000 to 60,000. Tom Cooper is group publisher, Jack Dolce is associate publisher. A b&w page is $5,900, a four-color page is $6,750.

• **Cox Communications**, Atlanta, which has an equity interest in *On Cable*, now distributes the magazine via 28 of its catv systems, which account for 75% of Cox's basic subscribers. As of year's end, Cox said, the magazine's circulation approached 500,000 monthly.

• **The Black Collegian**, New Orleans, will publish its annual jobs issue in March/April. Ad closing date is Feb. 1.

• **ComputerFun**, Viare Publishing's new version of *Electronic Fun with Computers & Games* (AA, Dec. 19), will charge lower ad rates than its predecessor, though its rate base, at 150,000, is 20% higher. A b&w page will cost $3,300 (vs. $3,750 for its predecessor) and a four-color page will cost $3,960 (vs. $5,325).

• **Conservative Digest**, Washington, D.C., has named ESCO Media Group, Flushing, N.Y., as its ad sales rep.

• **Ultrasport**, a new every-other-monthly for hard-core sports enthusiasts (AA, Dec. 12), is being started with a stake of $2.5 million from a limited partnership of private investors. The first issue, dated January/February, runs 88 pages and carries advertisers such as Gore-Tex, Nike and Raleigh Cycle Co. Lyn Lemaire is publisher, Chris Bergonzi is editor, Karen Maloney is marketing/circulation director and Mel Weinberger is advertising manager, at 11 Beacon St., Boston 02108.

• **American Business Press** issued a brochure listing materials available from the association. Copies of "The ABP Library of Advertising and Marketing" are available free to members of the advertising community involved with the business press. Write Debbie Humphreys, registrar, ABP, 205 E. 42nd St., New York 10017.

• **Computer Advertising News** (AA, Oct. 10), is raising its rate base 50%, to 15,000, with its February issue. The publication has moved to 155 E. 23rd St., New York 10010.

• **Woman's World**, Englewood, N.J., expects to expand its distribution to the entire country by April, according to Select Magazines, New York, with which the magazine has renewed its contract. It is currently distributed in 70% of the country.

• **Gentlemen's Quarterly**, New York, has named W.E. Connor Co., Toyko, as its advertising sales rep for China, Hong Kong and Japan.

• **Ms.**, New York, will raise its newsstand cover price 16.7%, to $1.75, with the February issue. The basic subscription rate has risen by the same percentage, to $14 annually.

• **TVSM**, Horsham, Pa., has been selected by Tribune/United Cable Communications to publish a system-specific version of Cable Guide for subscribers of the company's new cable system in Royal Oak, Mich.

• **On Cable**, Norwalk, Conn., has been selected by Storer Cable to supply system-specific editions of the magazine to subscribers of the company's three systems in the Minneapolis market.

• **Better Homes & Gardens**, Des Moines, will again sponsor a home improvement contest for its readers. The contest will be announced in the magazine's January issue.

• **RKO Radio Networks**, New York, will from Jan. 16 through Jan. 20 air a total of 20 90-second "sportSpecials" leading up to the Jan. 22 Super Bowl.

• **CBS Radio Network**, New York, which recently renewed its Major League Baseball contract for a year (AA, Nov. 28), now has extended its agreement for five years, effective with the 1985 season.

• **Eastman Radio**, New York, has become the first national radio sales representative for the Atlanta Braves and Atlanta Hawks radio networks; those duties had been handled internally.

• **Radio Business Report** is a new monthly that plans to cover the business side of the radio industry. It starts with an initial controlled circulation of 6,500, and is also seeking paid subscriptions at $84 a year. A b&w page is $1,250 and a two-color page is $1,475. Jim Carnegie is editor-publisher at P.O. Box 13199, Philadelphia 19101.

• **Financial World**, New York, has named Branham International, New York, as its international advertising rep. Victor Webb, Branham's president, will become the magazine's international advertising director.

• **McCall Publishing Co.**, New York, is offering advertisers a "summer shape-up promotion" that involves advertising and merchandising in the May issues of three publications: *McCall's*, *Working Mother* and *McCall's Beauty, Health & Diet Guide*.

• **The Homeowner**, New York, is starting a program by which products that are staff-tested and ranked high in performance will be awarded "Approved Product" seals. The first recipient is Lennox Industries' G-14 pulse furnace.

• **Business Publications Audit of Circulation**, New York, has completed initial audits of eight publications: *Bus & Truck Transport*, Toronto; *CED*, Denver; *Digital Retailing*, Waltham, Mass.; *Food & Beverage Marketing*, New York; *New Homes Guide*, Dallas/Fort Worth and Houston editions, Santa Clara, Cal.; *Shooting Commercials*, Woodbury, N.Y.; *Vermont Business*, Bellows Falls, Vt., and *World Water*, London.

• **Marvel Comics Group**, New York, will publish "The Muppets Take Manhattan" as a tie-in to the Henson Associates film, due this summer via Tri-Star Pictures.

• **HCA Companion**, a quarterly from Hospital Media, Knoxville, Tenn. (AA, Feb. 21, *et seq.*), has debuted with a 60-page issue dated first quarter '84. The magazine, with a controlled circulation of 700,000, has reduced its ad rates, to $8,941 for a b&w page and $11,176 for a four-color page.#

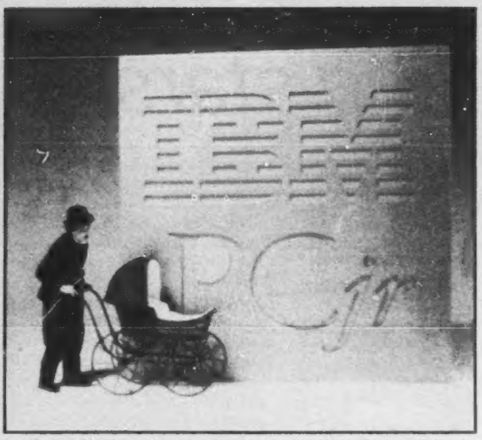
NEWSPAPER

New Eastern spots show grateful passengers ceremonially pinning wings on flight attendants.



In the initial spots for PCjr, the "Little Tramp" finds the new computer waiting for him in a baby carriage.

Employes star in $70 million Eastern flight

MIAMI—The employe as hero and an increased emphasis on spot tv form the backbone of Eastern Air Lines' new $70 million ad campaign.

The spots that broke on CBS' Super Bowl coverage yesterday featured a return to the "we earn our wings every day" theme, with a twist. Instead of using chairman Frank Borman, new commercials show passengers rewarding various Eastern employes with a set of wings in tongue-in-cheek award ceremony formats.

Three different versions—using businessmen, a couple that are frequent flyers and senior citizens—enable Eastern to pitch different products from convenient schedules and bonus programs to special pricing for seniors.

The media plan calls for a shift in emphasis from network toward spot tv in the carrier's 25 key markets.

The change from Eastern's previous "America's favorite way to fly" ad theme comes on the heels of airline industry figures showing that Eastern slipped from No. 1 to No. 3 in passengers carried during the past year. But the decision to drop that theme was made last

It's prime time for PCjr; spots all in the family

BOCA RATON, FLA.—The introductory tv commercial for IBM's PCjr, which broke on CBS' coverage of Super Bowl XVIII, will give way in a month to another campaign focusing on specific functions and uses of the product—the company's initial entry in the home computer market.

Created by Lord, Geller, Federico, Einstein, the ad campaign will shift into high gear at the third quarter's outset, according to Douglas LeGrande, vp-operations at IBM's entry systems division here.

"The series of ads will feature different places and the uses people can make of the PCjr in those places," Mr. LeGrande said.

Industry sources estimate IBM will spend about $40 million introducing the PCjr this year (AA, Oct. 17). Mr. LeGrande declined comment on the ad budget.

The campaign will mark IBM's first appearance with regularity on a variety of prime time shows. Ads also will appear on network news, sports and specials.

Although IBM initially is trying to build awareness for the product, company executives believe the demand will exceed supply. Mr. LeGrande said preliminary feed-

Burnett gets Velveeta slice

Beatrice, Kraft in cheese fight

By JANET NEIMAN

Beatrice Foods' quest to become a major factor in the retail cheese business nationally got a boost last week when a former Kraft marketing executive signed on as vp-marketing of the Beatrice Cheese Co. division.

Norman Ross, formerly a vp-marketing in Kraft's retail cheese group, was named vp-marketing for the New Berlin, Wis.-based cheese division of Beatrice.

His resignation from Kraft, on short notice, came two days before Leo Burnett USA was named the second agency for Kraft's cheese group, which had been consolidated at J. Walter Thompson USA.

Burnett will take over the estimated $15 million Velveeta processed cheese account Feb. 1. Kraft said Velveeta is the only product that will be reassigned.

The move means Kraft Inc. and Beatrice now share both agencies, although for noncompetitive products. Burnett has Beatrice's Samsonite division, Fisher Nut Co. and Peter Eckrich & Sons.

Mr. Ross becomes the third executive from Kraft's retail food group to move to Beatrice in the past year. Harold Handley, director of corporate marketing, and William Reidy, senior vp-corporate strategy, both joined Beatrice from Kraft's retail food group last year.

Mr. Ross will hold a new title at the cheese company; since Beatrice consolidated the three businesses, it has had no single marketing executive in charge of the over-all business.

With Beatrice's well-publicized interest in expanding the cheese business and the growing links be-

New food company set

By JENNIFER PENDLETON

The investment company that bought California's largest dairy products marketer last year has formed a new specialty foods group it predicts will become a $1 billion unit within one to three years.

Fullerton, Cal.-based Winn Enterprises, which bought Knudsen Corp. in June and is in the process of acquiring Kern Foods, City of Industry, Cal., has created a new company called Knudsen-Kern Foods and named a three-man executive team to manage it.

Winn co-chairman-chief operating officer Dee R. Bangerter is chairman-chief executive officer; Knudsen chairman and Winn co-chairman William G. Schmal is vice-chairman.

The move consolidates Winn's existing specialty food operations, which include Knudsen's dairy products division and its subsidiaries, National Fast Foods, Seattle, and Globe Extracts Co., Hauppauge, New York, a manufacturer of food flavorings, as well as Kern Foods.

Combined sales of the four companies were $633 million in 1983.

That's just the beginning, ac-

BBDO links with major Japan shop

By JACK BURTON and DENNIS CHASE

TOKYO—The stampede of U.S. advertising agencies into Japan is gathering force.

BBDO International will announce this week its first significant Japanese link, with Asatsu, Japan's seventh-largest agency and one of the few major Japanese agencies without a strong U.S. tie.

Details about the deal will be made public at a press conference on Jan. 27. Attending the conference will be BBDO International head Willi Schalk and independent marketing consultant Shu Ueyama, who has been retained by BBDO. He was previously deputy general manager of advertising at Sony.

Asatsu (until two years ago known as Asahi Tsushin) had estimated billings last year of $227.2 million, up 15% from 1982. Asatsu has had minor affiliations with BBDO and Chiat/Day in the past, but the new BBDO arrangement will be different, sources say.

Asatsu has offices in Los Angeles and London, and its major clients are Mitsubishi Motors, Pioneer Electronics and Kirin beer.

In other U.S./Japanese develop-

Avoiding collaborative poisons

By Nancy L. Salz

Ultimately, *you* are responsible for the advertising you get from your agency. Even though agency creative and account people bring many attitudes to the advertiser-agency collaboration that hinder its success, the most potentially destructive attitudes are brought into the relationship by the advertisers, because they control the purse strings.

The Six Advertiser Poisons:

1. *"I'm the boss here."* Although advertisers do judge the agency's work and must be responsible for it, flaunting that power—using position to get one's way even if it hurts the advertising results—poisons the agency's desire to generate great advertising.

2. *"My management will never buy it."* Few things cause more disrespect, lack of trust and frustration among agency people than a client's refusal to support and develop a good idea because he's afraid his superiors won't like it. Agency people believe that they are working together with you, collaborating, to create the best possible way to sell your product or service. If the idea is good, and you believe it, you cannot let such second-guessing kill it. If you are afraid to make a decision, you surely will defeat your agency's drive to create great advertising.

3. *"I'm a better person than you are."* For some reason, many, many advertisers embrace the notion that they are superior to the people they work with at the agency. It's a problem that can hurt the necessary mutual respect and trust.

4. *"What if their idea is better than mine?"* This is the poison of fear. It takes a secure individual to realize that another person's idea is better than his own, accept that idea and use it to further his goals and not view it as a professional threat.

5. *Withholding information.* One clever but nonetheless

(Continued on Page 18)

Ms. Salz, now head of her own New York-based consulting company, served as an agency copywriter, marketing researcher and account manager. She is the author of "How to Get the Best Advertising From Your Agency" (Prentice-Hall, Englewood Cliffs, N.J.), from which this article is adapted.

Rating the cities

A report titled "The Comparative Costs of Doing Business in Seven Cities" has been prepared by Julien J. Studley Inc., a New York-based national real estate brokerage, sales and consulting organization. Covering Boston, Chicago, Houston, Los Angeles, Miami, New York and Washington, D.C., the study evaluates life styles as well as business factors, including taxes, commercial rentals, utilities and wages. What follows is the conclusion of the 84-page booklet.

From our comparative survey, New York City and Los Angeles ranked the highest as major business centers while Chicago offered the most potential.

New York City continues to hold its position as one of the major business centers in the world. As the speed and extent of commerce grows, the convenience of having one's suppliers, clients and services in great proximity becomes more essential—and New York offers the greatest concentration and broadest range.

In the last few years, as the volume of U.S. trade across the Pacific has approached and finally surpassed that across the Atlantic, Los Angeles—capitalizing on its geographic position and its well-developed, diversified economic base—has emerged as the gateway to Asia. This city is also positioned on the crest of several other waves of economic progress: Its aerospace and electronics industries are the recipients of a rising defense budget; the city ranks first in the nation in its aggregation of advanced technology industries, and, as the financial capital of the West, Los Angeles is at the forefront of the tremendous nationwide increase in the financial services business.

Our report also points out that opportunities often lie in the older cities which have solid infrastructures and strong business bases. For example, cities like Boston and New York, which had severe financial problems in the early '70s, weathered the recession well because they had already made the transition from manufacturing to services or high-tech and had previously dealt with severe deficit budget problems.

A new boom city, like Houston, is only now making this transition. The recession has raised the consciousness of its citizens who are now striving toward a more diversified economic base and a more workable infrastucture. Miami, too, has had to readjust to changing economic conditions due to the turbulence in Latin America, but the city is emerging as a growing business center in the Southeast, particularly with a substantial proliferation of financial institutions and service firms.

One of the critical findings of the report is that Chicago has the potential for the greatest business opportunities. Because Chicago was hit hard by the recession, the consensus focused on Chicago's difficulties. But the city already has in place a strong infrastructure—both in terms of physical plant and economic base. It boasts a highly educated labor pool and good proximity to markets and services. Along with Houston, Chicago offers the bargain rentals of the nation, and, like many other cities, in its attempt to attract new growth industries, offers a host of incentives. In addition, Chicago's appreciation and support of the arts has been a longstanding tradition. It is in the context of Chicago's strong, already existing foundation that these features look unusually attractive. Because Chicago has yet to be "discovered," opportunities abound.

China profits from capitalism

By Milt Sutton

"The fastest way to realize our aim is to raise profits."

"Major reshuffle brings more profits."

"In the first eight months of the year, profits surpassed the yearly target by 8.9%."

These positive references to profit were clipped not from the *Wall Street Journal* or *Business Week*, but from *China Daily*, published in Beijing by an agency of the People's Republic of China.

On a recent visit to that vital nation, I was struck by repeated emphasis on the need for higher profits. It is a common theme in the official press as well as in speeches by leading political figures.

To an American advertising man concerned about the image of business in America, the current profit orientation of the world's biggest communist country is highly instructive. Here in the U.S., advertising is often condemned by critics because it is closely allied with the profit system or, as it is more familiarly referred to by certain vociferous critics, the "rotten profit system."

This anti-advertising, anti-profit sentiment is widely encountered in the youth sector, especially the academic community. Many college students and faculty members profess disillusion with our capitalist ways and look toward a more perfect society. The time is long past, of course, when any but the most myopic point to the Soviet Union as a model. Much more alluring to your young idealists is the People's Republic of China.

Yet we find this shining example of Marxism driving hard to improve the profit showing of its state enterprises. The leadership apparently scans the balance sheets as eagerly as any shareholder here.

Nor do you have to be a profound scholar to understand that this position is not a product of any Marxist textbook. It was adopted after bitter, costly experience with red "purists" who were brought on the debacles of the Cultural Revolution and other "anti-rightist" movements.

And who are the Chinese hierarchy relying on to carry the banner of profit? Same as we are: Professional, managerial types generally drawn from outside the senior age ranks. Listen to "Gongren Ribao" ("Worker's Daily") as it lauds a factory whose profits rose five times faster than output: "468 young and middle-aged professionals replaced the old, nonprofessional leadership."

Again and again, examples are cited of vigorous, profit-minded executives moving in on stagnant enterprises and achieving a quick turnaround. On the reverse side, it is publicly reported that "directors of enterprises which fail to reverse their business losses were dismissed at once." An even worse fate that befalls those who do not meet profit quotas: "A cut in bonus."

Does all this sound familiar to us practitioners of private enterprise who patiently endure the barbs of our anti-capitalist adversaries?

Even more startling to this China observer is a new policy proclaimed by the leaders in one northeastern city. They turned, with huge success, to former "capitalist businessmen or entrepreneurs" to run two deficit-ridden factories. So positive have been the results that the municipal government is now offering their managerial skills to other plants that are in the red—financially, not just politically.

Predictably, the Chinese profit system resorts to a number of tried and proven economic boosters used by its Western counterpart: Wages on an incentive basis, a one-year exemption from business income tax and a growing role for advertising. (Casting for tv commercials appears to favor well-groomed, middle-class representatives of the type we would call "upwardly mobile.")

Along with the progress stemming from capitalist techniques, of course, must come some of the penalties. In the push for profit, there, as here, the consumer is occasionally cheated. One restaurant chain was accused of raking in extra yuan by short-weighting customers on bread, prompting this reproof in the press: "We are doing business in a socialist country and must stress socialist morality."

Moral risks, apparently, are not exclusive to capitalist societies.

Next time we hear advertising put down for aiding and abetting the profit system, let us gently point to China's belated discovery of profit as the surest way to a better life for its billion or so people. The big difference is that, with a little help from advertising, we are light-years ahead.

Perhaps our detractors will now have to seek yet another Utopia.#

Viewpoint: Letters

The trouble with reviews. . .

The news that Young & Rubicam has resigned the *Fortune* account (AA, Jan. 9) when asked to participate in an agency review with six other agencies points up what is wrong with agency reviews.

Generally, an advertiser initiates an agency review for one of two reasons: (1) The advertiser is unhappy with his agency and wants a dramatic way to threaten the loss of the account unless the agency shapes up, or (2) the advertiser thinks it might be a good idea to compare his agency with some of the other agencies that are floating around out there.

Since many advertisers don't know how else to appraise an agency's work—particularly its creative work—the advertiser, more often than not, will ask his present agency and the other participants to prepare speculative creative work. I not only think this is poor practice, but I also am convinced that the whole agency-review approach is unprofessional and counterproductive. Moreover, agency reviews are unnecessary.

Instead, the advertiser should conduct an objective, confidential evaluation of the agency's performance to identify problems, obtain input from the agency and determine (1) whether the agency's weaknesses can be corrected, or (2) whether the problems are so fundamental that only a new agency can meet the advertiser's defined needs.

Where the problems are not fundamental, the advertiser and agency can work together to correct the problems. Thus, there is no reason to involve other agencies in the so-called review.

When the evaluation reveals fundamental weaknesses that cannot be corrected in a reasonable time, the only logical decision is to terminate the agency and select a replacement.

Accordingly, there is no reason to ask the incumbent agency to participate in any kind of competition for the account. Even if it made the best presentation, the agency would not be given the account because the objective evaluation had clearly shown that the agency could not meet the advertiser's needs properly.

A word of caution, however: A one-sided, opinionated evaluation will not suffice. The evaluation must be completely objective. And it must be a two-way evaluation designed to identify and correct problems on *both* sides. The agency must be encouraged to discuss the problems it encounters on the account and to suggest ways to improve the effectiveness of the advertising.

In my 25 years of experience in evaluating agency-client working relationships, I have found that usually the problems which lead to poor performance are shared about equally between the agency and the advertiser. Furthermore, I usually have found that most of the problems on each side are minor ones that can easily be resolved when the advertiser and agency work constructively together to correct them.

Admittedly, this kind of self-inspection by an advertiser requires specialized experience, as well as objectivity. It also requires a high degree of self-confidence and statesmanship on the part of the senior managers who authorize the evaluation. But it pays off handsomely.

Right to issues?

I question the suitability of Maurine Christopher's article, "Media help in creation of horror story," for an advertising magazine (AA, Nov. 14).

I am intelligent enough to understand what she is really trying to say even though she believes she has hung the idea on mass media influence. She is editorializing about euthanasia and, inconceivably, woman's right to her own body. ADVERTISING AGE is not the correct medium for this type of propaganda.

For many years, right-to-life people have been saying that abortion is the first step to selective population control through death of the already-born. Maurine Christopher would seem to prove them correct.

Let's keep the magazine out of the feminist political arena and out of involvement with related issues.

Kathleen Teillet
Edmonton, Alberta

Reader Teillet refers to a "Videotech Update" column in which Ms. Christopher dealt with the "unavoidable" role played by media and government in the "Baby Jane Doe" case.

Cabbage Patch's clinker

He thinks the "adoption papers" part of Coleco's Cabbage Patch hype *stinks!*

R.V. Adams
Morristown, N.J.

A 'Good Book' to quote

Being a Christian of the nonfanatical sect, I am always amazed at how people rush to the Bible to justify whatever they need to. Lately it's been AIDS, the disease that has struck mostly homosexual men.

Robert S. Nelson questions another reader's personal beliefs on the subject and that reader's right to formulate a religious opinion, and then proceeds to back up his rhetoric with an antihomosexual quotation from Romans 1:27-32 (AA, Nov. 21).

Frankly, if we're going to pick the Bible apart to justify every and all trauma, why not look further into it and come up with other Bible no-nos. Because if you do, you will discover, for example, that while Leviticus condemns sodomy, yes, it also condemns swearing, jealousy and even shaving. Need I say more?

And while everyone is busy condemning male homosexuals and giving almighty God credit for anguish, no one seems to remember that *female* homosexuals have not contracted AIDS—neither are they in the major leagues of the other sexual-related diseases, nor even in the same high-risk categories for the cancers that afflict the rest of the female population.

Does this imply that perhaps female homosexuals are God's chosen population? Heaven only knows, and only the Bible knows for sure—right?

Calling us on recall

I was a bit taken aback when I read your coverage of the speech I delivered at the Assn. of National Advertisers' Advertising Research Workshop (AA, Dec. 26, "Recall not communication: Coke").

In reading your reportage, I took away the impression that Coca-Cola USA had rejected day-after recall as a useful measure; yet I went to great pains to stress recall as an equal partner with an attribute-persuasion measure in achieving real communication. If an insufficient level of recall occurs, the attribute-persuasion qualities of a commercial never get a chance to operate.

We did not reject recall; we combined it with an attribute-persuasion measure and came to redefine communication as message "assimilation."

Basket 'borrowers'

How's this for plagiarism? Our client, Actmedia, the supermarket shopping-cart advertising company, has been running a campaign for almost two years in this publication. . .Some folks in Puerto Rico liked the idea so much they decided to "borrow" it. They must have also liked our ad, since they "borrowed" the layout, headline, copy, artwork (everything but the logo and address) in this ad that ran in the Dec. 14, 1983, edition of *Caribbean Business.* I wonder if there isn't some way they could "borrow" some business ethics.

Avoiding poisons

(Continued from Page 16)

self-defeating way advertisers make certain that the agency never comes up with a better idea than they do is to withhold information needed to create advertising or develop a point of view on a marketing problem. In this way, some advertisers maintain their power position, but it is most destructive.

6. *Fear of creative people.* Too many advertisers distance themselves from the creative people because they find it hard to relate to a style of dress or a style of life that is different from their own. (Interestingly, not all creative people wear "strange" clothing or follow bizarre life styles. Often, those that do are encouraged to look the part by agencies and advertisers. In fact, some creative people dress "creatively" to help sell their ideas.)

The Four Account Group Poisons

1. *Dishonesty.* It most often surfaces because the account person is trying to embrace differing points of view (the advertiser's or the agency's) and espouse them even if they differ from what one truly believes. It can take two forms. The first is agreeing with the advertiser's point of view simply to make the client happy. The account person may believe those ideas will not help build sales, but rather than present a convincing argument based on the agency's expertise, tells the client he is right. The point that is missed is that the client's happiness will fade when the advertising fails to produce results. A second form of dishonesty is trying to convince an advertiser to run advertising that focuses more on the agency's creativity than on selling the product or service. Here, the agency's goal is showcase advertising to attract new business, not the common goal of success in the marketplace.

2. *"I'm a better person than you are."* This poison also works on the agency side. Too many agency people believe they are superior because their job is creative and glamorous. In fact, some think people on the advertiser side are dull and boring and lead dull, boring lives.

3. *Failure to listen.* One reason agency people may not always listen well is their inclination to start solving the advertising problem before it has been completely defined. Once they feel they have reached a solution, they sometimes don't want to hear any more facts because they may have to discard that solution and go "back to the drawing board."

4. *"We create the advertising, not you."* Some agency people are reluctant to let their clients contribute to the creation of the advertising. This attitude is the antithesis of collaboration. Advertisers who present their ideas as suggestions, rather than dictate from their position of power, should expect fair consideration of their ideas.

Two Creative Poisons

1. *Creativity for its own sake.* Whenever art directors or copywriters create visuals or words that do not contribute to the over-all effectiveness of the advertising, they are poisoning the collaborative relationship. It sometimes happens because creative people want unusual, highly creative advertising in their portfolios, because they want to win awards and because their agency management may want unusual, highly creative advertising on its new-business reel.

2. *"I'm a better person than you are."* Here it is again. Some creative people are very bad at accepting criticism. They feel that they are the writers, the art directors, and therefore are the only people who know anything about creating advertising. They refuse to listen to ideas; they look down their creative noses at you, they act superior and even arrogant.

The Common Poisons

1. Placing a personal goal—power, appeasement, creativity for its own sake—ahead of the common goal.

2. Feeling superior to the other collaborators. (This is the "I'm-a-better-person-than-you-are" poison.)#

Rating the cities

(Continued from Page 16)

development in the suburbs. Washington and its suburbs provide one of the most beautiful and pleasant living and working environments in the country. Benefiting from its status as the nation's capital and the largesse of the federal treasury, Washington, D.C., has been and will be able to maintain its excellent infrastructure, including an extensive metro system, which is a model of efficient, clean service. Suburban Maryland and northern Virginia, a 15-minute ride from Washington by metro, have all of the advantages of the city without the disadvantages. Leasing has remained healthy, and northern Virginia is one of the few areas in the country to boast a tight office market. Costs of business and living are moderate to expensive.

Clearly, each city offers something special to distinguish it from all the others. What they have in common are competitive markets for office space and the new economic concerns of the '80s and how they will be met.#

Corporate identity begs a magic name

Design consultants respond to the plea

By Abbe Wichman

Have you recently tried buying office equipment from Haloid Xerox? Filling up your tank at Standard Oil of New Jersey? Or depositing your paycheck at the National Bank of Commerce of Seattle?

> **There are instances when a name change is demanded, as in the case of a merger.**

If you haven't yet, don't bother; you won't find them. But not too long ago you could have, if Xerox Corp., Exxon and Rainier Bank, respectively, had not changed their names. By doing so they and other companies that have displayed a new name, logo or signage are sending off various signals to a variety of interested observers.

A company's name can become synonymous with a product. It can also become an anachronism, no longer communicating the new directions a company is taking. And the name has to be flexible enough to absorb even more changes. One industry observer sums it up this way: "If you're too specific, you end up with the Atchison, Topeka & Santa Fe."

The search for a suitable corporate name heated up last year. According to an annual survey conducted by Anspach Grossman Portugal, a marketing communications and consulting company in New York, there were 1,055 name changes by U.S. companies—a record number in one year and a 30.4% increase over 1982.

The "right" name is that magic word that sends consumers to the store asking for a particular company's products, one that will make it the darling of Wall Street and enable it to tower above the competition. A company's name, much like a person's, is a highly personal thing. And like a newly married woman who is unsure about taking her husband's name, companies can justifiably be a bit wary about changing or adapting their names or logos. The original, after all, has history, tradition. It meant something to the founder; it means something to the customer.

Obviously there are instances where a name change is demanded, as in the case of a merger or when a local company goes national. But there are more subtle instances when a company realizes that the 100-year-old name should be laid to rest or at least spruced up. And as the name changes, so too, one hopes, will the company's identity.

Eleanor Selame, president of Newton, Mass.-based Selame Designs, a company that specializes in corporate image redesign, identified several key instances where corporate identity problems may arise:

- Rapid growth internally or externally, where the operating divisions may not reflect the parent company's direction.
- A new company going on a stock exchange or an established group whose stock is not performing well.
- The need to attract the best employes and a new generation of customers.
- New government regulations that may affect business.

Notes Ms. Selame, "There is usually a very simple reason and very specific needs behind a name or logo change." The changed symbol should have several things going for it, she says.

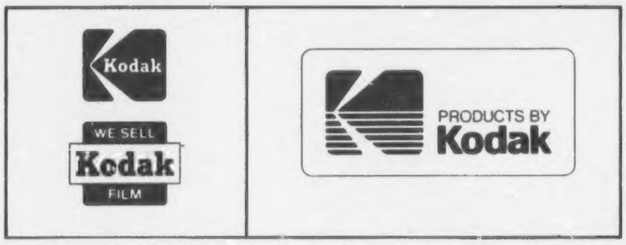
"All those employes involved with the change should feel comfortable with the outcome," she says. "They should feel, 'This is what we would have done ourselves.'" And the name should have staying power, allowing room for the company to grow.

Such was the case with United Aircraft, known today as United Technologies. The name change was made in 1975, simply because United Aircraft "was becoming a misnomer," says Jerry Nason, the company's advertising manager. The company was no longer involved with aircraft exclusively, having grown from four divisions to its present 205. Mr. Nason says the selection of the name United Technologies reflected "our firm belief that the industries we're interested in are ones where technology is at the core of their success."

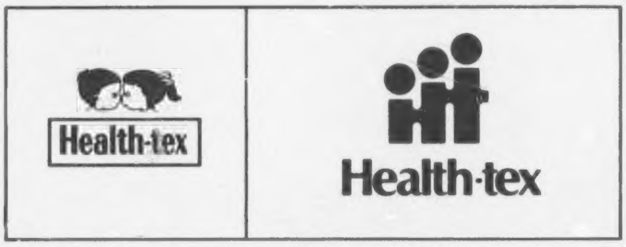
Mr. Nason says the time spent to select a new name for his and other companies lies somewhere between "some soul-searching and agonizing." He says the smarter organizations use the name change as a lever to promote the reasons behind the change.

Lippincott & Margulies, a New York-based marketing consultancy, was the company behind United Technologies' new name. Walter Margulies, company chairman, says organizations have to be aware of whom they are communicating with and how they are perceived.

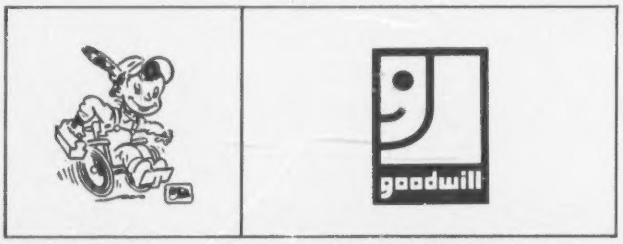
"Firms should investigate why they're called on, but more importantly, why they're not called on," Mr. Margulies says. A name change, he notes, is a tool that can be used to the advantage of an alert and intelligent manage-



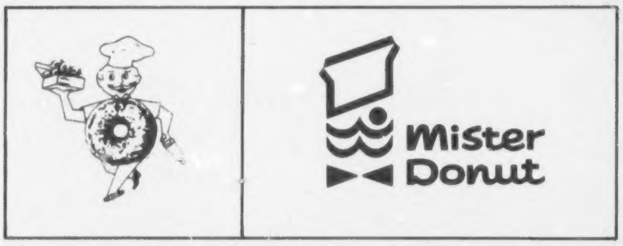
Kodak's packaging wasn't uniform, and its symbol was being used indiscriminately by dealers. Selame designed a new insignia used on signage, packaging and print.



Health-tex is a leader in children's clothing, but its merchandising was lackluster. The new logo serves to give the company a stronger product image.



Goodwill's old symbol was "tired," and it didn't enhance the look of its retail outlets. The new smiling "G" suggests the company's purpose and provides a contempory look.



Mister Donut's trademark was outmoded, and the company wanted to be attractive to more franchises worldwide. The new identity projects professionalism.

Abbe Wichman is a New York-based free lance writer.

Molting season for company logos

It is becoming apparent these days, you can't tell the company without a scorecard. At least, that's how it seems judging by the number of corporate names that bit the dust in 1983—only to resurface in new dressing.

New York marketing communications and design consulting company Anspach Grossman Portugal has been the creative force behind the name changes of such companies as AMF, Citibank, Esmark and Warner Communications.

The company conducts an annual survey of corporate name changes, and the results of the 1983 survey may come as little surprise: Last year, there were a record 1,055 switches. This is one corporate practice that has been on the upswing since 1978, which was also a record-setting year in terms of name changes—983 to be exact.

Anspach found a lot of action last year in all the industries covered by its survey: Manufacturing and industrial, communi-

Source: Anspach Grossman Portugal

ment. "It's the perfect opportunity to promote and market yourself, not only the name, but your positioning should coincide with your aims," he stresses.

Greg Kolligian, managing director of Selame Design, says that before his company embarks on the design process, it does what is called a "visual audit." This is an analysis of the client's current communications, which Mr. Kolligian terms "an essential road map." Selame's management and the client's participants review marketing objectives and past strategies.

The time spent selecting a new name lies between "soul-searching and agonizing."

"You can't assume everything the company has been doing is totally incorrect. Don't throw away the good with the bad," he cautions.

Mr. Kolligian says that when a company articulates its objectives to an outsider, new ideas come to both parties. When the review is complete, Mr. Kolligian says, Selame does a kind of "This is Your Life" for its client, taking it over both what has been consistent and inconsistent with its goals, asking for its observations on what works and what doesn't, and then focusing on the new designs.

Mr. Kolligian says a key point, which is often overlooked, is to examine carefully the company's principal competitors and how they present themselves.

Working with a good thing was precisely what Selame did with Amoco Oil Co. Abdul Azhari, Amoco's director-market research, says that in 1981 Amoco researched its 1,500 service stations and found some flaws. "There was no unified image presented to the public. They [the stations] were disjointed architecturally and graphically," Mr. Azhari says. Short of tearing the stations down, Amoco was looking for a way to link them together, both in customers' and dealers' minds.

Now when you drive into one of Amoco's stations, in addition to seeing the familiar torch and oval, there should be a "Certicare" sign with red, white and blue stripes leading into the first letter.

That sign, a "companion mark" to the company's hallmark, is either in front of the station or on its canopy.

Mr. Azhari says feedback from dealers indicates a "tremendous improvement in morale. This program showed them that their company is alive and interested." To keep that good feeling going, the company began an "All-Star Program," which recognizes and rewards those dealers who maintain their stations up to company standards.

One industry segment mentioned by both Ms. Selame and Mr. Margulies as a prime name changer is banking. This has come about because of mergers and government deregulation. Mr. Margulies notes that banks change their names because they begin to expand their services beyond their traditional borders, and their original name is geographically limiting. Or they branch into new financial services that are are not fully reflected by the sign over the door.

AMOCO
AUTO REPAIR

Amoco
Certicare

Amoco had trouble giving its optional automotive service program a clear identity. The new signage conveys a unifying, consistent, contemporary appearance.

Bruce Emry, manager of corporate communications with Rainier Bank (formerly National Bank of Commerce of Seattle), says his company addressed all questions head-on about its name change in 1974. Two publications, "Rainier" and "29 Most Asked Questions and Comments on Name Change," were specifically released to quell doubts, rumors and other talk among both employes and customers. Some of the comments addressed were, "When I hear the name Rainier, I think of beer" and "You must be hiding something if you're changing your name." (G. Heileman Brewing Co. brews Rainier beer, distributed in the Northwest.)

As justification for the move, the company pointed to its five units, which were then all operating under different names. It also noted that other banks had similar names, and it believed that by the year 1999, the new name would still be viable. There were a host of other convincing and reassuring reasons. If the "Rainier" brochure could have spoken, one would have heard a John Houseman-like spokesman extoll the name for "loftiness, solidity and a towering presence."

Both Selame Designs and Lippincott & Margulies agree that the success of any change is noted in the bottom line. An increased advertising and promotion budget can smooth the way for initial acceptance. As for the cost of corporate redesign, Ms. Selame provides a qualified estimate: Approximately $50,000 "for a medium-size company with medium-size problems."

TRAVEL
PROGRAM
FOR
FOREIGN
DIPLOMATS

InAmerica

"Travel Program for Foreign Diplomats" didn't say enough about the organization's goals. The new InAmerica emblem is designed to show diplomats the "heartland."

cations, energy, transportation, retail, technology and food companies. Current reports indicate that there's more to come this year as merger and acquisition fever continues to heat up American industry. What, for example, will be the outcome of a merger between Getty and Texaco? One very large oil company called Geto? Tetty? Deep Well Inc.? This is one to watch. And what permutation will occur if Warner Communications is swept into Rupert Murdoch's mighty vacuum . . . ?

As more companies seek to move in new directions, divesting themselves of outmoded operating units or shifting emphasis on acquired product lines, there are bound to be newly formed free agents ready to change someone else's corporate silhouette—and name. And, as the financial supermarkets continue to add aisles, this will more than likely affect corporate logos.

Mergers and acquisitions accounted for the largest group of name changes last year, according to Anspach Grossman Portugal. There were 552 in all—a figure that is 52.3% of the total and shows an increase of 35% over 1982. The financial institutions definitely lead the way with banks, thrifts, investment companies and their relatives constituting 47.6% of last year's total.

There's little doubt that, with all the change in the air, many rechristened companies will find it essential to conduct strong corporate identity programs, to let everyone know just who they were, who they are and what it is they're doing.

...a legend and
a leader

A recent survey* of managing editors at newspaper dailies nationwide showed that E&P tops the list. It is the "overwhelming leader among general interest publications" and 96% polled read us regularly.

We report regularly, every week, *all* the up-to-the-minute news business communicators want and need to know!

EDITOR & PUBLISHER, the *only* independent weekly journal of newspapering, has been serving the *total* newspaper market with *all* the facts for almost 100 years.

The issue of March 31st is our Centennial Edition and it's quite a story. Ten decades of fascinating newspaper history as seen in the pages of E&P during this century will be featured. Here's a unique opportunity to position your corporate message with guaranteed high visibility. Closing deadline is February 17th.

EDITOR & PUBLISHER...we're getting older and we're getting better.

*Survey by Jim Files, Northern Arizona University, distributed by Associated Press Readership & Research Committee at AP Managing Editors Conference, in Louisville, Kentucky, November, 1983.

Editor & Publisher, 575 Lexington Ave., New York, NY 10022 · 212-752-7050

Toys rising star in tv

(Continued from Page 66)

The NAB, backing the network, said the series was "neither a code problem nor, we believe, a subject for FCC concern."

In 1970, however, the FCC cautioned ABC and other broadcasters to be careful of such series links in the future. That warning chilled such tie-ins until lately.

While the tv networks are mum about their animated schedules for fall, 1985, to be announced to affiliates and ad agencies in the spring, indications are that the toy business will join the more usual resources—DC Comics and Marvel Comics Group's comics book heroes and syndicated newspaper comics strips.

NBC's first new commitment is to a "Snorks" series (AA, Jan. 9), featuring mythical underwater characters due in toy form from Wallace Berrie & Co. of "Smurfs" fame.

Columbia Pictures Merchandising executives have been talking with the tv networks about an animated series based on the Power Lords, introduced last year by Revell Inc. as its first toy action figures.

Coleco Industries, which had the most popular and most publicized toy product of Christmas, 1983, in the Cabbage Patch Kids (AA, Oct. 24, *et seq.*), is exploring the tv cartoon spinoff possibilities as one way of keeping the momentum going for its first doll line.

Meanwhile, some cable tv services have begun positioning themselves as a quality children's programing alternative to commercial tv, with the likes of Home Box Office's "Fraggle Rock," USA Cable Network's Calliope service, Warner Amex Satellite Communications' Nickelodeon channel and The Disney Channel (AA, Jan. 16).

In a strongly worded speech, Cy Schneider, Nickelodeon's vp-general manager, blasted the networks' fare as an "endless parade of animated cats chasing mice . . .superheroes indulging in orgies of muscularity. . .and saccharine stories about ultra-cute elfin creatures" (AA, Jan. 16).

Still, ACT has been quick to blast the cable industry as well; for instance, when USA Cable and then Nickelodeon opted to take advertising, again with little or no impact.#

Stars shine for New York

The new edition of the familiar "I Love New York" ad campaign brings together a group of celebrities that probably never will be seen together under one roof, let alone appear together again in a single commercial. Gregory Peck, Liza Minnelli, Mikhail Baryshnikov, Henry Kissinger, Cher and other celebrities—along with cast members from some of Broadway's hottest shows—are shown in different parts of the city as the campaign, created by Wells, Rich, Greene, expands the familiar "Broadway" theme that has been the centerpiece of the spot. It breaks in February but is seen in only 10 East Coast markets. The advertising is seen elsewhere through co-op efforts with major airlines.

Swift brands shift; FCB out

By JANET NEIMAN

CHICAGO—Esmark's dry grocery group named Dailey & Associates, Los Angeles, for its Peter Pan peanut butter account and Ketchum Advertising, San Francisco, for its Soup Starter and Stew Starter assignments.

All three lines have been at Foote, Cone & Belding since 1980. The agency has no more Esmark business.

The agency appointments for those three Swift & Co. brands are believed to be initial steps in a series of marketing changes that could continue this week, when marketing department management and a new name for the group are expected to be announced.

Swift & Co.'s dry grocery operations, including marketing groups for Peter Pan peanut butter, Soup Starter and Stew Starter, are being consolidated at the Fullerton, Cal., headquarters of Esmark's Hunt-Wesson unit (AA, Dec. 5).

Hunt-Wesson's Reddi Wip instant whipped cream business is moving to Swift's frozen desserts and cheese group, based in Oak Brook, Ill., where the Swift processed meats business also remains.

The small Reddi Wip advertising account, estimated at under $300,000, could be moved to another agency—possibly in the Midwest—as a result of the business' locational change. A spokesman for the dry grocery

Super Bowl, spillover give lift to CBS

By JAMES P. FORKAN

NEW YORK—Blockbuster sports dominated network tv last week in the form of CBS' Super Bowl ratings, ABC's scheduling of Winter Olympics events and ABC's acquisition of the 1988 Calgary winter rights. *(See related story, Page 88.)*

CBS hog-tied its rivals with the Super Bowl ratings the way the Raiders did the Redskins on the field. Until Super Sunday, ABC had the 17th week's highest-rated show with "American Music Awards." When that night was over, however, the game, postgame show and "60 Minutes" each had surpassed the award show.

While the one-sided Super Bowl XVIII was outscored by four previous bowl telecasts in ratings (although only two had more tv homes), its prime time spillover lifted CBS to a 19.8 Nielsen rating average for the week, 2.9 points ahead of runner-up ABC.

Averaging a 46 rating/67 share in prime time alone (down from NBC's 49.5 rating/68 share a year ago), the game was expected to rack up a 46.5/68, with an estimated 104 million viewers watching all or part of the coverage.

Confirming that millions tuned out in the third quarter as the Raiders scalped the Redskins, the prime time Nielsens showed the event slipping from a 47.6/70 between 7 p.m. and 7:30 p.m., to a 46/66 from 7:30 p.m. to 8 p.m. and to 43.4/62 from 8 p.m. to its 8:20 p.m. end.

Besides being a $4 million-plus focal point of Chevrolet's 1984 campaign, the opener for Eastern Air Lines' newest campaign and the launching pad for IBM's PCjr computer and Apple's Macintosh computer, Super Bowl XVIII also gave CBS' "Airwolf" midseason

UNESCO pullout threatens industry

By DENNIS CHASE

NEW YORK—A key U.S. delegate to the United Nations Educational, Scientific and Cultural Organization warned last week that the proposed pullout of the U.S. from the organization could mean new restrictions on the press and advertising, and new regulation of multinational marketers.

Edmund P. Hennelly, head of the U.S. delegation to the November, 1983, UNESCO general conference in Paris (AA, Oct. 24), said if the U.S. pulls out "you've got to assume the worst."

Speaking to the U.S. Council for International Business here, he said that "in a moment of pique" the Paris-based UNESCO could approve a "New World Information and Communications Order" that publishers worldwide have been opposing strongly.

Nestle infant-formula boycott ends. See Page 86.

NWICO is a concept from underdeveloped countries that imposes government censorship of the press and advertising in those countries. It also would require the licensing of journalists and impose an international code of journalistic ethics.

Mr. Hennelly, who is general manager of public affairs, Mobil Oil Corp., said if the measure passes, western journalists "won't be able to use a telephone" in those countries.

If the U.S. pulls out, which the Reagan administration says it will do unless UNESCO changes structurally and philosophically, then the U.S. business community will have to find ways to stop such damaging UNESCO moves, he said.

He said the most likely remedy for "the U.S. business community getting its views into those forums [is] through the western members [of UNESCO], because I'm assuming we're not going back."#

Sharp sets review for $20 million

By ROBERT RAISSMAN

Sharp Electronics, looking to link its two divisions through one central ad campaign, will conduct a review of its $20 million account.

The company's industrial equipment division now is at Rosenfeld, Sirowitz & Lawson, while the consumer electronics division is handled by Isidore Lefkowitz Elgort. Dan Infanti, manager of marketing communications, Sharp consumer electronics, said the incumbents will be included in the review.

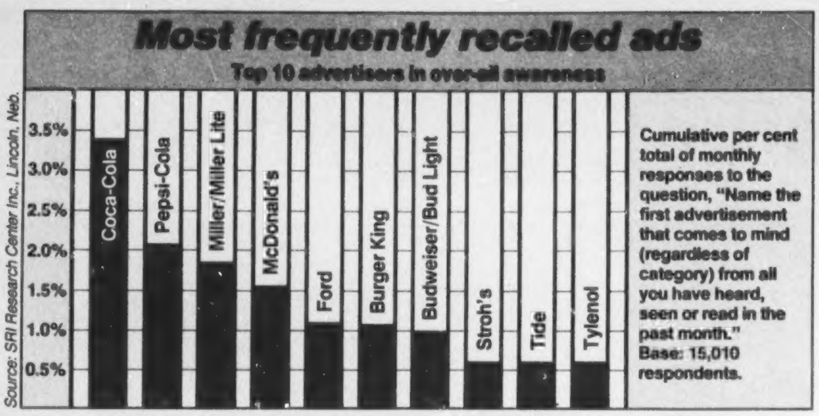
Mr. Infanti said the company was happy with both its current campaigns, but the growth in Sharp's product line has caused them to rethink strategy. "We need more of a corporate advertising thrust," he said. "We've made a lot of progress the past couple of years. But over the next four or five years we want our advertising to be as strong as it can be. That means tying everything together."

Mr. Infanti predicted that over the short term there would not be a dramatic change in advertising for Sharp's products, "but we will do what we must to continue to improve."

He said he expected the selection process to take two to three months.#

Most frequently recalled ads

Top 10 advertisers in over-all awareness



Cumulative per cent total of monthly responses to the question, "Name the first advertisement that comes to mind (regardless of category) from all you have heard, seen or read in the past month." Base: 15,010 respondents.

Source: SRI Research Center Inc., Lincoln, Neb.

Beverages, fast-food tops in ad awareness

By SCOTT HUME

adWatch

Asked to name the first advertisement that came to mind, consumers last year were most likely to name one for a soft drink, fast-food restaurant or beer.

Cumulative responses from last year for adWatch, ADVERTISING AGE's exclusive monthly measurement of consumer advertising awareness, show these three categories have the highest recall levels. Advertising recall is measured by asking a nationally projectable sample of adults to name the first advertisement they recall seeing, hearing or reading in each of 18 product categories during the preceding 30 days.

Relatively few of the 15,000 consumers polled during 1983 had trouble recalling advertising for a soft drink, fast-food restaurant or beer.

Asked to name the first advertisement that came to mind, regardless of product category, consumers most often named Coca-Cola, Pepsi-Cola, Lite beer from Miller, McDonald's, Ford, Burger King, Budweiser or Budweiser Light, Stroh's,

Commodore plugs in Anametrics shop

By ROBERT RAISSMAN

The cloudy advertising picture at Commodore International became clear as the company turned to Anametrics Services Inc., a subsidiary of Anametrics Inc., to be its agency of record for the U.S. portion of its account.

The worldwide budget will be in excess of $100 million in 1984, sources report; U.S. spending will be $70 million, with $60 million of that going to tv.

Steven Greenberg, president of Anametrics Services, said ASI was specifically set up to handle Commodore's U.S. advertising needs.

A few Commodore assignments have been made, he said, including the selection of Dick Rich Inc., New York, to handle creative for tv and Clifford Botway Inc. for media buying and placement. Another agency will be picked to handle print ads and other projects.

Sources close to the Wayne, Pa.-based company said Anametrics Inc. has been Commodore's investment and business advisor since 1977. Irving Gould, Commodore's chairman, brought Anametrics into the picture.

The sources said that since 1977, Mr. Greenberg has been "directly involved" with all agency selections made by the company. He was instrumental in selecting Kornhauser & Calene in 1981, and was responsible for bringing Ally & Gargano to Commodore in 1982. The account was taken away from A&G last summer (AA, Aug. 1). Al Paul Lefton Co., Philadelphia, had the account for about three months in 1980, turning it over to Levine, Huntley, Schmidt, Plapler & Beaver (now Levine, Huntley, Schmidt & Beaver) in October, 1980. Levine lost it to K&C in mid-'81.

In 1983, Mr. Greenberg said, Commodore spent $63.6 million in worldwide advertising, up from $23 million in 1982. He declined to give any breakdown of the 1984 budget. A number of agencies split the Commodore business outside the U.S.

He declined to specify why Commodore was taking this new approach, but sources said it was looking for "more flexibility" in advertising. "They can react to the market quicker by dealing with small organizations than a large, full-service agency," commented a source familiar with the situation.

The move to delegate full responsibility to ASI comes on the heels of the resignation of Jack Tramiel, Commodore's chief executive officer. He had been involved in the approval of all ad matters. Myrddin Jones, vp-marketing, also has left, apparently to take a position with Sperry Corp. Jim Dionne, vp-sales and marketing, assumes Mr. Jones' duties.

As for the selection of Rich, Mr. Greenberg pointed to Mr. Rich's success in creating memorable campaigns for Wendy's, Benson & Hedges cigarets and Alka-Seltzer. Mr. Rich was a founder of Wells, Rich, Greene.

"There is no doubt in my mind that this will be his fourth [memorable campaign]," said Mr. Greenberg. He expects a new Commodore tv campaign to break this spring.#

world news roundup

OTTAWA—A Canadian government ad campaign has come under fire from opposition members of Parliament, who say the $8.8 million campaign is thinly disguised propaganda for Prime Minister Pierre Trudeau's Liberal party. Agency is Vickers & Benson, Toronto.

PARIS—Coca-Cola Co.'s Sprite and Philip Morris Inc.'s 7UP are being launched simultaneously in France next month. Sprite's agency is McCann-Erickson, and Leo Burnett Co. handles 7UP. Budgets are about $700,000 each.

NEW YORK—Grey Advertising will launch its own European corporate ad campaign next month, touting the agency's ability to develop a "brand character" for marketers' products. Ads will run in the *Financial Times, Wall Street Journal/Europe* and other business publications abroad and eventually in the U.S.

SEOUL—The South Korean government is considering a 40% tax in the form of custom duties on advertising for soft drinks and cosmetics. The proposal calls for ad spending to be added on to the price of imports when they are declared at customs.

LONDON—Saatchi & Saatchi is merging three of its shops into one with billings of $60 million. Crawfords, London, is merging with Hall

Pertschuk blisters FTC on sweepstakes

Kids' ads inaction ripped

By RICHARD L. GORDON

WASHINGTON—Federal Trade Commission member Michael Pertschuk claims the commission's refusal to act against sweepstakes advertising to children is an example of how its new policy toward deception is resulting in less public protection.

His prime example in a memo circulated within FTC last week was the staff's handling of a Quaker Oats commercial for Cap'n Crunch cereal that offered Atari home video systems as prizes for kids who collected "Crunch money."

No action was recommended against Quaker in a staff memo written last year, although Quaker research reviewed by FTC staff lawyers indicated a "majority" of children aged six to 12 misunderstood a key disclosure meant to tell them they could enter the contest without buying the cereal. Among 6-to-8-year-olds, 80% tested thought they had to buy the product to have a chance of winning, the staff memo said.

The case was one of seven children's ad cases which Action for Children's Television brought to FTC, including two on sweepstakes. All were rejected by FTC's staff.

Commissioner Pertschuk's memo is the latest volley in an intramural fight wherein he and commissioner Pat Bailey contend that tougher case-selection standards recently disclosed by FTC's new, more conservative majority are screening out cases which the commission should be accepting.

The rationale for taking no action in the Quaker case, according to a staff memo, was that the Quaker research showed "an appreciable number" of children, more than a third tested, properly understood that no purchase was required to enter the contest. A voiceover disclosure at the close of the spot said, "for bills without purchase, write. . ."

The staff further argued that "potential economic injury" only would occur if parents bought the cereal solely for the contest. That could be avoided because the con-

'WSJ' not-so-quietly changing its ways

By STUART EMMRICH

NEW YORK—In a rapidly aging, nondescript building on a cramped street in downtown Manhattan, the editors of the *Wall Street Journal* are doing what many business people consider the unthinkable: Tinkering with success.

For years, the *Wall Street Journal* has represented unparalleled achievement in American journalism. It is the largest-selling paper in the country with 2 million circulation; it earned about $58 million in 1982, approximately two-thirds of the profits generated by parent Dow Jones & Co., and its 64 pages (soon to grow to 68) cannot contain all the advertisers that want to appear in the paper.

But despite that enviable record, the *Journal*—to the surprise of many outsiders—is now in the process of refining and redefining much of what it has traditionally done over the years. The person who is shaking things up at this 101-year-old institution is its new managing editor, Norman Pearlstine.

"Norm got a blank check when he came in and he's cashing it in," says one Dow Jones executive.

Since he took over that post Sept. 1, Mr. Pearlstine has hired approximately 40 new staffers, appointed three new assistant managing editors, reorganized the copy desk, developed a network of industry editors to coordinate coverage of related beats, moved forward plans to open additional bureaus around the country, added new areas of coverage to the paper's beat system, shifted many of the reporters' beat assignments and encouraged the use of larger graphics in the newspaper.

Those changes have not gone without criticism within the *Journal*, as some longtime

Benihana aims at Le Menu, Cuisine

By NANCY GIGES

NEW YORK—Benihana of Tokyo is aiming to give Campbell Soup's Le Menu and Stouffer's Lean Cuisine a run for their money in the premium frozen entree business.

The restaurant chain is introducing a line of eight Oriental entrees here and in Los Angeles, spending at least $1 million in each market. Tv spots break today.

Surveys suggest company officials have reason to be highly optimistic, according to Gad Romann, chairman of Romann & Tannenholz, the agency for Benihana. Mr. Romann claims that figures on purchase intent and repeat purchases are among the highest he has ever seen.

Three tv spots use the umbrella theme, "We were either going to make them great, or we weren't going to make them at all."

One spot shows eight Oriental chefs concocting the recipes. The second stars Benihana founder Rocky Aoki, noting that previously people had to come to him to eat his food. "Now I'll come to you," he says.

The third spot features comedian James Coco talking about how he likes a variety of Oriental foods but doesn't want to look like a pig in a restaurant. Now he has the option of eating at home.

The items retail for $2.59 and $2.79 and include entrees such as sweet and sour chicken, sirloin pepper steak and oriental vegetables with shrimp.

Mr. Romann said surveys reveal that most Benihana frozen foods business will come from consumers already familiar with high-quality frozen foods such as Campbell's Le Menu and Stouffer's Lean Cuisine.

The entrees are positioned as restaurant classics; the ad exec claimed that the line must deliver the quality consumers expect from the restaurant to protect the franchise the company has in that field. He noted that the premium frozen segment has no line of Oriental foods.

Plans call for expanding the line into two or three other markets by yearend and adding line extensions and new products quickly if the product is successful.#

Ward's sets test of specialty plan

By ROBERT REED

CHICAGO—Montgomery Ward & Co., which for the first time in five years has posted a profit, will continue its turnaround efforts by testing consumer response to Ward's as a specialty retailer, says president Stephen Pistner.

The Mobil Corp. subsidiary is evaluating a merchandising plan that Mr. Pistner calls "the seven worlds of Wards." Those include separate specialty stores set up within Ward's that concentrate on apparel, automotive, home electronics, home furnishings, appliances, recreation and leisure.

"These are specialty businesses [and] are to stand on their own within the confines of the fours walls of Ward's," he says. The plan now is being tested in a few of Ward's 327 units, and if results are favorable it will be integrated into more units.

Wards is just one of the major mass retailers that have recently revamped basic selling tactics through store redesign.

Sears, Roebuck & Co. is bringing on its "store of the future" where it is setting up "boutiques" for soft and hard-line goods within the major body of the Sears stores (AA, May 9). J.C. Penney Co. also has become more departmentalized.

But Ward's approach is "very different," says Mr. Pistner. "It does not compare in word or deed with the 'store of the future' or the 'store within a store' concepts."

To aid in this repositioning test, the company now has the cushion of profitability. For the first time since 1979 the retailer posted 1983 earnings of $40 million, a $133 million improvement over last year's loss of $93 million. Sales for the year reached a new high, surpassing $6 billion for the first time.

Like many retailers, Ward's had a strong fourth quarter because of holiday sales. It tallied sales of $2.08 billion and earnings of $53 million, making it the company's best fourth-quarter performance since 1978.

Mr. Pistner says his company's return to profitability can be attributed to a "progressive turnaround" strategy that has been under way since he came to Ward's in 1981 from Minneapolis-based Dayton-Hudson.

Mr. Pistner says the Ward's rebound results from a series of across-the-board changes, including shifts in merchandising, better quality control, revamping advertising and the rehabbing of some stores and the closing of others.#

corrections & clarifications

- The name of Meshulam Riklis, Pia Zadora's husband, was misspelled in the Magazine story on the promotion of the actress (Jan. 23, P. M-4)
- Rydelle Laboratories is the over-the-counter drug division of S.C. Johnson & Son, Racine. An earlier item misspelled the name (AA, Jan. 23, P. 8).
- Gary Ennis, an art director at Marschalk Co., works on Stroh's "Alex the dog" commercials. His name was misspelled earlier (AA, Jan. 16, P. M-11).
- Myers's Original Rum Cream is marketed by Seagram Distillers Co., a division of Jos. E. Seagram & Sons (AA, Jan. 16, P. 2).
- Tomy Corp. will sponsor "The Get Along Gang" tv special in June, not Kenner in April, as reported earlier (AA, Jan. 23, P. 66). Also, the property is represented by American Greetings and Those Characters From Cleveland. The same story should have listed Ed Libov Associates, New York, as the "Herself the Elf" syndicator.
- *California Farmer* incorrectly reported its year-to-date ad linage figure for 1982. It should be 809.6 (AA, Jan. 16, P. 50).
- *Elks* was reported as having a combined December/January issue, although its figures were omitted in error. The figures reflecting the combined issue should have been 34.9 for this January and 35.4 for January, 1983 (AA, Jan. 23, P. 67).#

Socialists to auction newspapers

By HARRY DEBELIUS

MADRID—The Socialist government of Spain next month will begin selling off 21 of 22 newspapers which supported and were propped up by the fascist government of the late General Franco.

Seven state-owned newspapers will be sold at auction here on Feb. 21 and 22, and 14 others will be put up for sale between now and the end of May.

The chain of newspapers belonged to the National Movement, the only political organization tolerated under the late dictator.

Nonetheless, there is hardly a stampede among publishers to purchase the newspapers.

Most of the papers lose money and embarrass the authorities because of their history as propaganda devices. Six of the National Movement newspapers closed down early last year because they lost money, and the rest are not in much better shape.

Only one of the newspapers is destined to survive beyond next May. That one is a Madrid evening paper, *Pueblo*, which—according to the government—is in a special category since it belonged to Franco's state-run labor unions.

***El Pais*, Spain's largest newspaper, dwarfs the newspapers that the government is planning to sell.**

As a rule, the ex-movement papers, now lumped together in a department called Social Communications Media of the State, suffer from dwindling circulation, low advertising revenue, overstaffing and technical obsolescence.

It is expected that a number of them will not find buyers and will be closed down.

The biggest of the bunch, in terms of circulation, is the national sports daily *Marca*, but—as is the case in Spain with most publications dedicated exclusively to sports—advertisers are few.

In 1982, *Marca* lost $509,000, despite its average daily circulation of nearly 100,000.

By contrast, the largest newspaper in Spain, *El Pais*, has a circulation of about 500,000.#

Del Monte, China set deal

SAN FRANCISCO—Del Monte Corp. and the People's Republic of China have reached an agreement in which 10 Del Monte brand canned goods will be sold in Shanghai area tourist shops, hotels and guest houses.

In those locations Del Monte's products will be purchased by U.S. and other tourists, rather than by the average Chinese consumer.

The dollar value of the contract is small, points out Del Monte international president Robert D. Kroll, but the agreement marks another step in the growing relationship between the two countries.

In 1982, Del Monte developed an experimental farm near Shanghai; the company now is deciding if mainland China might be a good base of operations to produce food for export to markets in the Far East.

McCann-Erickson-Jardine (China) Ltd. will develop point-of-purchase material, ads and illuminated Del Monte signs for the Shanghai retail outlets.#

U.K. government pulls plug on latest EEC political ad

By EUGENE BACOT

LONDON—A political storm is breaking in the U.K. over tv commercials for this year's elections to the Parliament of the European Economic Community.

Britain's Independent Broadcasting Authority, which examines commercials before they go on the air, is refusing to give clearance to a 30-second spot for the elections, which are held throughout the 10-nation EEC in June.

That commercial, stressing the achievements of the EEC, includes a multicolored, rainbow EEC logo and carries the slogan (translated into seven EEC-nation languages), "Europe. United in democracy."

Set to break in February, the $6 million campaign urges the EEC's 190 million voting adults to go to the polls to elect the EEC's European Parliament

The series of EEC election commercials was to be screened in mid-January by more than 200 international delegates attending the Pan-European Advertising & Marketing Conference earlier this month.

But Chris Woollams, deputy managing director of McCormick Intermarco-Farner in the U.K., part of the agency group that created the ads, told the conference that legal objections prevented them from being shown.

Mr. Woollams said legal advisers to the IBA claimed the ads infringed on its code, which prohibits any political advertising on commercial tv. There still is a significant groundswell of opposition in the U.K. to that country's membership in the EEC.

An IBA spokeswoman said later that the group had approved a 10-second spot that said the elections were taking place.

But, she said, "After taking legal advice, we are unable to accept a longer commercial."

The EEC campaign is the first time the EEC has tried to run identical commercials in all 10 countries, from Denmark to Greece. Previous commercials for the election have been created on a country-by-country basis.

Sources say that the agency creating the campaign, Publicis Intermarco-Farner, was sensitive to British restrictions on political advertising and tried hard to skirt any suggestion of bias.

One delegate to the Pan-Europe conference said the campaign was bound to offend Britain's Labour party, which is opposed to Britain's EEC membership.

"I suppose they could argue that even voting for the European Parliament is political," he added.

The argument seems bound to grow because, according to one source, the European Parliament considers itself a "supranational" body that takes precedence over national laws.

But if the EEC tried to assert that position, it would create a political furor in the U.K.#

EEC media experts push for new limits on pan-Europe ads

By GARY YERKEY

BRUSSELS—The European Economic Community Commission's staff in charge of media plans to recommend strict controls on tv advertising aired across national borders next month, according to EEC sources (AA, Jan.23).

The controls, if approved by EEC governments, would ban tv advertising on Sundays and public holidays, set limits on the volume of advertising permitted on tv, lay down guidelines for the maximum length of ads, limit advertising to blocks and ban ads for certain harmful products, possibly including cigarets and alcohol.

EEC officials emphasized that the proposals, if approved, would not become law for many months—probably years.

But they admit to being under growing pressure from consumer organizations and some governments to set pan-European standards on tv advertising before the coming cable and satellite boom engulfs this side of the Atlantic.

Earlier this month, the Brussels-based European Bureau of Consumers Unions (BEUC), which represents consumer organizations in the 10 EEC countries, published a 138-page report ("The Impact of Satellite and Cable Television on Advertising"), demanding that the EEC approve new legislation "harmonizing" tv advertising standards throughout the community.

The bureau said that the EEC should:

- Reach agreement on the allowable volume of tv advertising and make general the practice of advertising in blocks.
- Limit the volume of sponsored programs and provide for "clear" distinctions between ads and programs."
- Limit testimonials and comparative ads.
- Forbid the interruption of children's programs with ads.
- Ban ads for tobacco, alcohol and certain pharmaceutical products.

One proposal calls for a statutory European Control Authority to arbitrate disputes.#

Uruguay: Latin America's favorite test market

By MARINA SPECHT

MONTEVIDEO—At first glance, most multinational marketers should have little interest in Uruguay, a distant, tiny country with a small consumer market.

But instead, the Uruguayan market is turning into a bigger attraction for multinational marketers and new-product launches than the country's big Argentine and Brazilian neighbors.

"International marketers like to use Uruguay as a test market for products they are thinking of introducing in other Latin American countries," says Elbio Acuna, president of Ogilvy & Mather affiliate Punto Publicidad.

"In a small market, losses are small, too," he says.

Beatrice Foods Co., one of Punto's main clients, entered Uruguay last year, buying up Pernigotti, a leading chocolate manufacturer.

Last month, the Chicago-based food marketer launched a line of cheese, peanut and chocolate-flavored snacks that were nonexistent in Uruguay and are proving to be a huge success, according to industry sources.

Beatrice's move in Uruguay may be a sign of its increasing interest in the whole Latin America region, where markets such as Argentina and Brazil are untapped.

Uruguay's largest agencies

Agency	1983 billings ($ millions)
Impetu Organizacion Publicitaria	5.5
Corporacion Publicitaria Ltda. (Lintas affiliate)	3.0
Punto Publicidad (Ogilvy & Mather affiliate)	1.5
Grey Publicidad	1.2
Publicidad Oriental	NA

Source: ADVERTISING AGE *estimates*

"American Express and General Foods are two marketers planning to enter Uruguay this year," according to Mr. Acuna.

GF is expected to introduce Tang powdered drink mixes first, while American Express will operate through a local bank. Punto Publicidad—with 1983 billings of $1.5 million—is hoping to service both.

Further examples of adventurous test-marketing are Eastman Kodak's launch of its disc camera and film early last year via J. Walter Thompson Co. (a project that was called off in Argentina) and Ciba-Geigy Uruguayana's introduction of Zobel analgesic in 1982, with a $250,000 ad campaign via Grey Publicidad.

"Johnson & Johnson del Uruguay is expected to fight back with Tylenol this year," says Francisco Vernazza Munoz, president of Grey Uruguay.

J&J is one of the few lucky survivors of the big economic collapse of 1982, and, since it replaced imported feminine hygiene products with cheaper, locally produced brands, it has achieved a 65%-plus market share in that category.

The Uruguayan market is not an unmixed blessing, however. Although Uruguay is one of the few Latin American countries without import restrictions and a free currency exchange market—which earned it the nickname of "Latin American Switzerland" in business circles—a drastic currency devaluation in November, 1982, made imports expensive overnight.

At that time, the value of the peso dropped to 47 pesos to the dollar from 13 pesos. (It now is around 43.)

In 1983, total ad spending in Uruguay was down 60% from the record $113 million in 1981, while less than half of the 87 agencies that existed two years ago are still operating and real (adjusted for inflation) wages declined 30%.

Also, Uruguay's traditional No. 1 advertiser, Coca-Cola Co., made drastic cutbacks in ad spending last year, according to sources.

Half of Uruguay's top 10 agencies, however, have increased billings by 10% to 20% or are maintaining previous levels in local currency terms, mainly thanks to new accounts or additional assignments from multinational advertisers.

The biggest, Impetu Organizacion Publicitaria, with 1983 billings of $5.5 million, gained its lead over Lintas' affiliate, Corporacion Publicitaria, by buying Ferrero & Ricagna, a medium-size agency, in December, 1982.

Most Uruguayan ad executives this year are predicting an end to economic uncertainty.

The upcoming November elections are expected to end the decade-old Uruguayan military government.

Faced with growing opposition, it has come under pressure to return the country to civilian rule, following neighboring Argentina's return to democracy late last year.#

Liquor sales kept staggering through '83

By JOHN C. MAXWELL JR.

Distilled spirits continued their volume decline in 1983, for the fourth consecutive year.

We are estimating this year's slide around 1.6%, compared with the 3.2% decline of 1982. However, if sales—particularly on-premise—continue as strong as they have been recently, we suspect that we may be a bit too pessimistic and that actual shipments may be down less than 1.6%.

The only areas that exhibited 1983 increases were liqueurs/cordials, U.S.-bottled Canadian, rum and some specialty items. Domestic whisky showed a decline of 5.3%, while imported whisky was down 1.3%, resulting in a drop of 3.2% for all whisky areas combined. The total nonwhisky area showed a slight drop of 0.2%, buoyed by increases in rum, brandy and tequila.

If the economy continues at its current pace, we expect domestic sales eventually to flatten. Our current 1984 outlook is for a continued over-all decline in domestic liquor sales, particularly in the brown package goods group, although at a lesser rate than in 1983.

Key influences that had an adverse impact on 1983 sales were:

- Higher excise taxes at the state level (at least 16 states have approved tax increases on liquor).
- Laws that raised the drinking age in several states.
- The lag factor of the economic recovery's effect on the liquor industry, which has prevented this area from turning around as quickly as many other sectors.

Four factors that we believe will be of concern to the industry in the near future are:

- The possibility of more tax increases. A federal tax increase on liquor cannot be ruled out. At least five more states have proposed tax increases for 1984.
- Continued lobbying by various consumer groups in Washington to raise the drinking age to 21 on a national basis, and other activities by groups such as MADD (Mothers Against Drunk Driving).
- Labeling and advertising restriction.
- Increasing health consciousness and concern by consumers about what they put into their bodies, as well as how much.

To reiterate, we believe that the "health decade of the '80s" is seeing more and more people switching, if not entirely out of alcohol, then to lighter drinks such as white liquors mixed with fruit juices.

On the other side of the coin, as American tastes begin to emulate those of Europeans, we expect further increases in the brandy/cognac and cordial/liqueur categories. This may be evidenced by the continuing introductions of new products as well as the increasing ad dollars being spent on these areas, while over-all advertising expenditures by the liquor industry are declining.

Lightness in both taste and proof is what the consumer is moving toward. Based on this, we believe table and sparkling wines should also show upward movement in 1984.

On the list of top-performing brands in 1983, Bacardi maintained its No. 1 position even though its total sales were down about 1.6%. One of the reasons for the decline was that Bacardi could not match the extraordinary performance of October, 1982, in which there was stockpiling in anticipation of a price increase in November.

Smirnoff and 7 Crown retained their No. 2 and No. 3 positions, respectively. Jim Beam moved from No. 6 to No. 4, while Canadian Mist moved into fifth place ahead of Jack Daniel's and V.O. Brands with good gains were Canadian Mist, up 5.5%; Beefeater, up 5%; Ancient Age, up 5%, and Tanqueray, up 7%. Jose Cuervo passed the 1 million case mark for the first time, showing growth of 15%, which was the best growth of the more than 1 million case grouping.

As we indicated above, state and federal governments may pose the biggest hurdles for the liquor industry. The impact of doubling taxation at the federal level (which happened to cigarets) could hurt sales by some estimates by as much as 20% to 40% if enacted.

We expect tighter enforcement of existing drunken driving laws as well as implementation of additional programs to combat alcohol abuse. It is interesting to note that Alcoholics Anonymous is realizing its highest enrollment levels ever.

As far as labeling is concerned, the Federal Trade Commission has been urged to tighten liquor ad restrictions and to consider banning advertisements targeted at youths and heavy drinkers.

The New York City Council recently passed a bill requiring all New York liquor stores, bars and restaurants to post a warning sign to read as follows: "Warning: Drinking alcoholic beverages during pregnancy can cause birth defects."

Licensees have three months to comply with the law. Noncompliance will result in a fine of up to $100.

For the reasons outlined, the outlook for this industry appears uncertain. At best, we believe growth will be relatively flat for the near future.#

Mr. Maxwell is with Lehman Bros. Kuhn Loeb Research.

New product lack squeezes Ronco

By JAY McCORMICK
Crain News Service

The Ronco Inc. subsidiary of Elk Grove Village, Ill.-based Ronco Teleproducts is collapsing under a severe cash squeeze that began more than a year ago.

Three creditors last week took steps to force the company into involuntary Chapter 7 bankruptcy. The company has until Feb. 6 to respond.

A specialty retailer of such items as the Rat Away rodent repeller and the Smokeless Ashtray, Ronco's financial trouble fed on itself.

The company slipped deeper into trouble as symptoms of indebtedness appeared. The less money Ronco could spend on advertising, the fewer products it could sell.

Ronco failed to come up with enough popular new products in time to replace fading sales of former best sellers.

Ronco officials declined to elaborate on the bankruptcy petition, but Ronco reportedly owes $2.2 million to the suppliers involved in the lawsuit, and about $8 million to First National Bank of Chicago and Wells Fargo Bank. Moreover, piecing together financial figures from public sources, it's clear the money squeeze dates back to the 1982 Christmas season.

Retail sales at that time were weak, and for Ronco, which generates 80% of its revenues during the holidays, the weak sales cut deeply into the bottom line.

Ronco reported a loss of $1.8 million in the June 30 fiscal year as sales dropped 31% to $26.6 million.

The shortage of cash snowballed, hampering Ronco's chances of picking up the slack with a strong 1983 Christmas sales period.

For example, Ronco last paid El-mar Plastics, maker of Ronco's CleanAire Machine and food dehydrator—and one of the creditors that put Ronco in bankruptcy court—in September. Bills from advertising media began to go by the wayside soon afterwards.

In October, Ronco hired Los Angeles-based Admarketing Inc. to place commercials in New York and various West Coast markets Says Jack Roth, president of Admarketing, "They didn't pay the bills. Fortunately the orders we placed were only in the $600,000 range, and we were able to cut off [a number of spots bought] before going to that level. They owe us more than $270,000."

Ronco's advertising—generated in-house—"was down about 50% in the fourth quarter," says Bob Hoffman, local sales manager for WGN-TV. "They advertised 21 products during the fourth quarter in 1982 and only three products in 1983."

Without a hot product, Ronco's sales fell sharply even before it got a chance to cut ad spending.

One marketing executive who worked with Ronco said, "All of the things Ronco has been marketing are products whose time has passed."

Ronco chairman Ronald Popeil is the son of Samuel J. Popeil, who was chairman of Popeil Bros., marketer of the Veg-A-Matic and other gadgets.

Popeil Bros. sold out to a Florida turnaround specialist in 1979 after several years of declining sales and net losses.

Ronco is preparing to reply to involuntary bankruptcy proceedings started by Altra, El-mar and New York-based I.V. Hill Corp., a package marketer.#

Polaroid

(Continued from Page 4)

emergence of fast-processing photo labs, the easy-to-use 35mm newcomers and competition from other leisure-time distractions, including vcrs and home computers.

Indeed, according to Smith Barney analyst Peter Enderlin, over the last five years the entire instant photography business has dropped from a worldwide 1978 peak of 14.3 million cameras sold, 9.4 million of which were Polaroid. He estimates that during 1983 Polaroid shipped 4.1 million units worldwide, with the total market reaching 5.6 million.

Upturn expected

Mr. Enderlin and others predict an upturn, particularly for Polaroid, whose share versus Kodak has reached 75% and is gaining. Nonetheless—and of this Polaroid is most aware—the company *must* find innovative ways to communicate the intrinsic benefits of instant photography.

"The competition for instant cameras is not just other instants," explained Polaroid's Mr. McLaughlin. "We have to make instant photography seem as new and exciting as the day we introduced it. We have to restate ourselves to the consumer."

In the past, Polaroid has done so through award-winning advertising—ranging from the '60s "Meet the Swinger" to the much praised advertising featuring the sometimes sarcastic, sometimes affectionate and often droll banter between actors James Garner and Mariette Hartley.

That effort ran for six years and was so popular that Mariette Hartley was known to sport t-shirts declaring, "I am not James Garner's wife!"

Too much of a good thing can—and did—result, as Polaroid last month retired the Doyle Dane Bernbach-created classic. However, recent negotiations allow for six-month reruns of 1983-produced ads featuring Ms. Hartley.

Decisions postponed

Polaroid is not clear as to what will follow. According to Mr. Johnson, the company is reviewing several tacks, none of which will be decided upon until the warm-weather selling season nears.

One thing is certain: The campaign chosen will be the one most likely to achieve high recall test scores. Over the past several years, Polaroid has augmented the importance of market research and high test scores in evaluating advertising's merit and effectiveness.

The company has increased its marketing research staff in addition to its use of outside consultants in that area.

"Polaroid is now in a conventional package goods testing mode," explained one source close to the company. "Consequently, package goods testing techniques are being considered with great gravity."

Simultaneously, sources say, the company has leaned toward committee—rather than individual and often instinctual—advertising decisions, to the point where insiders joke that the only room now large enough to hold marketing meetings is the boardroom.

Marketing execs leave

There is a reason for this. Since the early '80s, Polaroid has lost a cadre of long-standing marketing executives—many of whom helped create the advertising that put Polaroid on the map. They left for a variety of reasons—ranging from frustration with instant's maturity, to the company's lucrative 1981 voluntary severance program, to the lure of headhunters.

In 1982 alone, the following top marketing executives turned in their Polaroid passes: Richard Young, who until he took early retirement as vp-worldwide marketing was considered a shoo-in to succeed William McCune as Polaroid's president. Mr. Young's successor was Theodore Voss, who left the company in '82 to join Atari where he eventually hired Peter Wensberg, a veteran Polaroid marketing executive. Both men since have left Atari.

"It's very simple to describe," said a source. "As people left, they were not replaced one-on-one. Consequently, there was a steady progression from a few highly authorized people making marketing judgments to a widening of authority."

The upshot? Infinitely longer review processes and a growing dependence upon research—a bane to ad agency DDB, which has undergone frustrating months of trial and error; most notably, no 1983 campaigns achieved satisfactory recall testing, something that might not have mattered so much in the old days (AA, Dec. 12).

"The importance of research, the amount of time involved, the number of people making suggestions, all of these things have compounded to make the advertising job much more difficult," agreed another source. "It's not distinctly a Polaroid problem," he added. "It's just that it came at a time when their business became so precarious that they needed more than ever to have strong central management."

This decision-making vacuum may have been remedied by Mr. Johnson's assumption of the new title, vp-worldwide advertising. "We needed one individual to look out for *all* the advertising, and that's where Carl comes in," Mr. McLaughlin agreed.

One of his earliest tasks at Polaroid was to choose an agency for the consumer introduction of the videotape line. At the time of the selection of Ogilvy & Mather in December, Polaroid management attributed the choice to the need for DDB to concentrate on the troubled instant camera and film business.

While sources have confirmed that Polaroid is being careful not to dilute DDB's talent and manpower with incremental business, they note that the selection resulted, to no small degree, from the known Ogilvy & Mather ability to conceive and implement creative ideas that are guided by certain objective parameters of market research.

Polaroid watchers point to this as an indication of the prevailing thinking in the company's Cambridge, Mass., headquarters that is not expected to change anytime soon.

Reaction mixed

Analysts are mixed in their sentiments: While applauding the company's marketing orientation and open-mindedness to acquisitions and partnerships—not to mention the superior quality of its instant system—some analysts worry that all the flash, fun and cutting edge innovation will leave Polaroid; that its creativity will flounder.

"The company is much more risk-averse than it used to be," said Morgan Stanley's Brenda Landry. "Polaroid is still a very creative company in the research and development sense, but in the marketing sense I think they've lost something, which is not to say they can't get it back."#

Dolls show dilly of a recall

Remember Cabbage Patch Dolls? Consumers last month certainly recalled advertising for them.

The 10 advertisements most frequently recalled (regardless of category) in December included two surprise, first-time entrants. Cabbage Patch Doll advertising ranked sixth, ahead of such familiar names as Burger King and Budweiser and tied with McDonald's.

Want ads/classified advertising ranked fifth, behind Coke, Miller, Pepsi and Stroh's. Consumers probably were looking through their newspapers hoping to find someone willing to part with a Cabbage Patch Doll.

There were additional significant changes in last month's survey results:

- Pepsi-Cola, which in November had almost pulled even with Coca-Cola, slipped back. Pepsi's share of first mentions in the **soft-drinks** category dipped 3.2 percentage points to 22.8%. Coke remained No. 1 with 29.4%.
- Tylenol continued to lose awareness in the **medicine & drugs** category. After dropping 4.5 points in November, the category leader lost another 5.2 points. Still its 27.2% share of first mentions in December was far ahead of No. 2 Anacin (7.4%) and No. 3 Bayer (4.6%).
- Another constant leader showing slippage was Tide. Awareness of its advertising dipped 4.8 points in December. But it still dominates its category, **laundry products**. No. 2 Cheer (5.3%) and No. 3 All (3.6%) also declined slightly.
- Del Monte dropped 3.1 points in the **canned foods** category, a group that had not seen a significant change since June, when Del Monte registered a like decline. Its 8.8% share of responses in December kept it second to Campbell's (15.6%).#

Tops in '83 ad awareness

(Continued from Page 3)

Tide and Tylenol.

Significantly, over-all advertising awareness rose during 1983. In 16 of the 18 product categories that are surveyed, the percentage of total responses represented by the top five advertisers was greater in December than it had been in January.

In part, this may reflect the increased attention paid to advertising for some products as Christmas approached. But in categories such as fast-food and beer, this rise no doubt reflects the sharper, often comparative, commercial strategies being used.

Nine of the 18 product categories last year had dominant advertisers that were the most frequently recalled in each of the 12 monthly surveys. Advertising for two of the nine was particularly well remembered.

McDonald's advertising had the greatest top-of-mind awareness of any product last year. On average, 43.3% of respondents named Big Mac when asked to recall advertising for a fast-food restaurant, more than double the average for runner-up Burger King (18.5%).

But even McDonald's doesn't dominate its product category as does Tylenol in the medicine and drugs group. Tylenol's advertising averaged 33.7% of first responses for the year, while its closest challenger, Anacin, could muster only 6.8%.

The other advertisers that led their categories wire to wire in 1983 were Atari (home electronics), Birds Eye (frozen foods), Campbell's (canned foods), Ford (cars and trucks), Kodak (cameras and equipment) and Tide (laundry products).

The most unpredictable category was cosmetics and fragrances. Over the year, the leadership position for recall changed hands seven times. Avon, Maybelline, Estee Lauder and Charlie were all No. 1 in the category at least once in 1983.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Each month 1,250 consumers are surveyed by phone and asked to name the first advertisement that comes to mind (over-all and in 18 product categories) from all seen, heard or read in the previous 30 days.#

Top 10 in Olympic sponsorship awareness
Bars represent percentage of total responses to question "What advertising mentioning Olympic sponsorship first comes to mind?"
Source: SRI Research Center Inc.

Marketers' tie-ins paying off already

By SCOTT HUME

Critics may deride this year's Olympics as the "corporate games," but consumer reaction to advertiser sponsorships and tie-ins is decidedly friendly.

According to an exclusive survey conducted for Advertising Age, the payback on businesses' corporate investments in the Olympics began before the Olympic torch entered the arena and before some sponsoring companies have begun running advertising capitalizing on the relationship.

For example, a third of the 1,253 adults polled by phone during December said they would be inclined to buy a specific brand or product simply because its marketer is an Olympics sponsor or supplier.

The strength of that support holds fairly steady across all demographic divisions, with slightly more female respondents (36%)

ALLSTATE
ShapeUp&Sav
SAVE UP TO 35%

Allstate's campaign tells America to shape up and save on insurance costs.

Allstate jumps at fitness

By TERESA H. BARKER

Northbrook, Ill.—Allstate Insurance Co. hopes to tap the aura of good feelings surrounding the 1984 Olympic Games with a new advertising campaign that tells America to "shape up and save" on Allstate insurance premiums.

The campaign, budgeted at nearly $30 million for the year, salutes athletes "going for the gold" at the Olympics.

Commercials urge everyone else to "go for the green" and save money on Allstate insurance by improving their physical fitness and home security, as well as by maintaining good driving records.

Allstate already offers discounts and preferred rates on home and auto insurance, and now will expand the discount up to 35% on term life insurance and bring all three insurance products under a common positioning theme.

"We're telling the people to do some things that are good for themselves and we're offering, in a way, a reward if they do," said John Flieder, assis-

(Continued on Page 60)

NH&S returns to Hollywood, eyes Embassy

By BOB MARICH

Hollywood—Needham, Harper & Steers has created an entertainment division here, and it is poised to take on Embassy Pictures as a client.

The new unit, called NH&S/Entertainment, will operate in Los Angeles and New York. Former Embassy and Universal Pictures marketing executive Neal Lemlein has been named vp-management director.

Embassy exec vp-marketing David Weitzner was unavailable for comment, but sources strongly suggest that the Norman Lear studio, which has been looking for an agency, will be the new unit's first client, given Mr. Lemlein's long ties with Mr. Weitzner.

Embassy is expected to announce its selection this week.

Mr. Lemlein was at Doyle Dane Bernbach when that agency handled 20th Century-Fox Pictures during Mr. Weitzner's tenure as a marketing head there. Mr. Weitzner subsequently moved to Universal, bringing Mr. Lemlein to that studio with him.

Most recently, Mr. Lemlein was vp-management director at Foote, Cone & Belding's entertainment unit, which resigned Embassy late last year. FCB quit the estimated $5 million Embassy account to jump to Orion Pictures, whose spending is estimated to be around $35 million.

NH&S/USA exec vp (and corporate director-media and programing) Richard C. Anderson also is involved in the management of NH&S/Entertainment. His background includes a stint at Kenyon

Coke pays big price for 'Dr. J' house call

By ROBERT RAISSMAN

Coca-Cola USA has signed Philadelphia 76ers forward Julius (Doctor J) Erving to one of the largest product endorsement contracts ever given an athlete for activities outside the sporting arena.

A spokesman for Coca-Cola USA declined to confirm or deny the deal, but sources close to Mr. Erving and his agent, Irwin Wiener, said "the Doctor" will receive $2.5 million in return for his services in both commercials and personal appearances through 1988.

Seven-Up Co. used athletes extensively for a number of years, with such endorsers as Sugar Ray Leonard, Jim Plunkett, Earvin (Magic) Johnson and Wayne Gretzky.

Sources said that most of the athletes who have done 7UP spots received from $12,000 to $25,000 per year. Sugar Ray Leonard, sources said, received between $50,000 and $75,000 per year for his 7UP work. Mr. Erving's $500,000

(Continued on Page 58)

last minute news

Miller doles out 'exploratory' work on High Life

Milwaukee—Miller Brewing Co., a unit of Philip Morris Inc., has given "exploratory creative assignments" on its more than $50 million Miller High Life beer account now at Backer & Spielvogel to a number of agencies it declined to identify. However, sources indicated that Leo Burnett USA, agency for Miller Special Reserve, and Doyle Dane Bernbach, a PMI cigaret agency presently without a beer brand on its roster, plus Ogilvy & Mather, New York, are involved. O&M's San Francisco office handles Blitz-Weinhard, a Pabst subsidiary. In addition, O&M Partners recently gained Guinness-Harp Corp.'s Harp, Guinness and Bass brews.

RJR stockpiles support for Sterling rollout

Winston-Salem, N.C.—R.J. Reynolds Tobacco Co. has budgeted heavily for the imminent national rollout of Sterling Special Blend luxury cigarets in a black box. Sterling has been testing in Florida (AA, Nov. 14); Ted Bates Advertising/New York, handles.

O'Grady
O'Gradys
AU GRATIN
THE MORE POTATO POTATO CHIP.

Frito lays it on thick for chips

By TOM BAYER

DALLAS—Frito-Lay will break a $25 million ad campaign on the network tv premiere of the movie "Arthur" tonight, launching O'Gradys brand extra-thick potato chips nationally after a one-year test in Omaha (AA, Jan. 30).

Hailed by the PepsiCo subsidiary as the largest new-product launch in its history, the effort will include on-air presence for 40 weeks this year as well as heavy couponing.

Three 30-second spots, created by Foote, Cone & Belding, New York, are intended to present a "heartland, hearty, wholesome, middle-America, hard-working image" with a theme that describes O'Gradys as the "more potato, potato chip." It comes in au gratin and regular flavors.

Flavor and crispness are the main selling points for O'Gradys, which Frito vp-marketing Leo Kiely said lends itself to line extensions for any other flavor that consumers might associate with potatoes.

While O'Gradys will be compared to Frito-Lay's Ruffles potato chips—the leading chip on the market today according to the company—it is said to be more

ATW picks up Wella account

By PAT SLOAN

Following an agency search that lasted for more than a year, Wella Corp. has chosen Advertising to Women, the agency that built its haircare reputation on Gillette Co.'s Silkience account.

The Englewood, N.J., marketer of Wella Balsam shampoo and conditioner claims to be the third-largest haircare company in the world with sales of over $700 million, but sales of its products in the U.S. have been under severe pressure from competition.

Peter Haberstock, Wella chairman, said: "We are joining forces with Advertising to Women because we have seen what they can do: They are the proven experts on women, and proven experts on the hair cosmetics market."

ATW estimates previous Wella billings in the U.S. to be between $6 million and $10 million, and says future billings and marketing plans have yet to be decided. Last year it was reported that spending on the Wella account had dropped from $6 million to $4 million.

Wella had been at Creamer Inc. but only briefly, after that agency acquired the former James Neal Harvey Inc.

ATW's gain of Wella comes on the heels of its loss of $20 million in Gillette billings last December (AA, Dec. 12). At that time, the Boston-based personal care marketer announced its decision to pull out "following a review of the tax proceedings in which Advertising to Women's former chairman [John Ernst] was involved in a fed-

The slogan is separate from the "These times demand the *Times*" theme used for the paper's regular edition. (*See story, Page 10.*)

New entrants crowd tv syndication

By DIANE MERMIGAS

If there is one clear note that emerges from the dissonance of issues facing the National Assn. of Television Program Executives international convention this week in San Francisco, it is that the syndicated-tv industry is in the throes of change.

While broadcasters and program suppliers hold their breath to see which way the wind from Washington blows on controversial issues such as changes in the financial interest and syndication rules, they are faced with a myriad of new developments that, throughout the 1980s, promise to reshape the way they do business.

For example, increased numbers of individual stations and major station groups are banding together to produce and exchange their own programing to sidestep what they believe has become overpriced and homogenous first-run and off-network syndicated fare.

No one is certain to what extent such activity will erode an already fluctuating syndication marketplace.

"Co-ops are being formed out of economic necessity," says Phil Corvo, NATPE executive director. "I think they are the way of the future. They represent the most efficient use of talent and resources."

Many major studios, production companies and broadcast groups also are joining forces to produce the kind of original programing they say fills the voids in the syndication arena.

Last year witnessed such new-business marriages as Metromedia and TelePictures, and another effort headed by Gaylord Broadcasting Co., Taft Broadcasting Co., Tribune Broadcasting Co. and Chris-Craft Industries.

British, Canadian, Australian and South American producers also are rushing to fill the program voids in the U.S. marketplace, as witnessed by the increase in foreign exhibitors this year.

Even domestic cable operators are beginning to view the dearth of diversified syndicated programing as a new revenue-generating opportunity. Viacom, for instance, this year is offering the first off-cable series, "Bizarre," which is 100 half hours of satire and comedy (AA, Jan. 30).

Home Box Office and Showtime are among the large cable outfits that have begun peddling their made-for-cable movies for commercial syndication.

"There is a general feeling this year that there is a shortage of good programing available and that the three notable categories represent too little creativity and too high a price," says Stan Marinoff, NATPE president and general manager of WISN-TV, Milwaukee. "It used to be that 10% cost increases were not out of line, but now they are 20% or more."

Game shows are enjoying a healthy renaissance due primarily to the huge ratings success of "Wheel of Fortune" (AA, Jan. 9). Music video is another new principal program category that takes its cue from the recording industry.

The third major group of new

No market shifts in EDB scare

By JANET NEIMAN

New guidelines for ethylene dibromide (EDB) content in food products are likely to have a negligible effect on marketing strategies for the affected products, despite consumer concern over the safety of grain-based products with traces of the pesticide.

The standards, revealed Feb. 3 by the Environmental Protection Agency, will mean most grain-based products can remain on store shelves, and most of the grain supply will not be affected, unless individual states decide to enforce more stringent limits.

The Florida Department of Agriculture, which set in motion a series of state bans against products containing EDB, immediately adopted the new EPA standards, which are far weaker than the state's earlier standards.

EPA is recommending that ready-to-serve products have no more than 30 parts per billion of EDB; that processed grain, including mixes, have no more than 150 parts per billion, and that raw grain have a maximum of 900 parts per billion.

The establishment of standards for EDB in foods comes after more

(Continued on Page 58)

Lucrative formula yields supply of success

Syndicators take different roads, but reach same plateau

By Mark Wolf

Henry Siegel took his daughter Leigh, then 6, to a rock concert at Madison Square Garden in 1976. During the performance of Sha Na Na, a band that recreated hits from the 1950s, Leigh turned to her dad and said, "Do you know what that is? It's 'Happy Days' to music."

> **"You don't see 200-episode shows going into syndication . . . networks aren't keeping them on the air that long."**

A light went on in dad's mind, a pilot was produced and "Sha Na Na," the syndicated tv show, eventually ran for six years first-run in more than 150 markets. It also put Lexington Broadcast Services and its chairman, Mr. Siegel, on the syndication map.

Lexington's route is but one way the industry's successful program suppliers have taken to syndication heights. Looking down the roster of suppliers, you get the suspicion there really is no formula for success. Syndication businesses have been built on disparate foundations.

Some of today's major players grew as offshoots of major motion picture studios. Others, like Lexington, found success in one or a handful of shows, giving them the wherewithal to expand their businesses. A few have specialized in certain program types —cartoons, for instance.

However syndicators establish themselves in the industry, there can be no denying that there is considerable lucre available. No one knows quite how much, but the National Assn. of Television Program Executives (NATPE) has undertaken a comprehensive survey to determine the gross and net figures for domestic and international syndication for 1983.

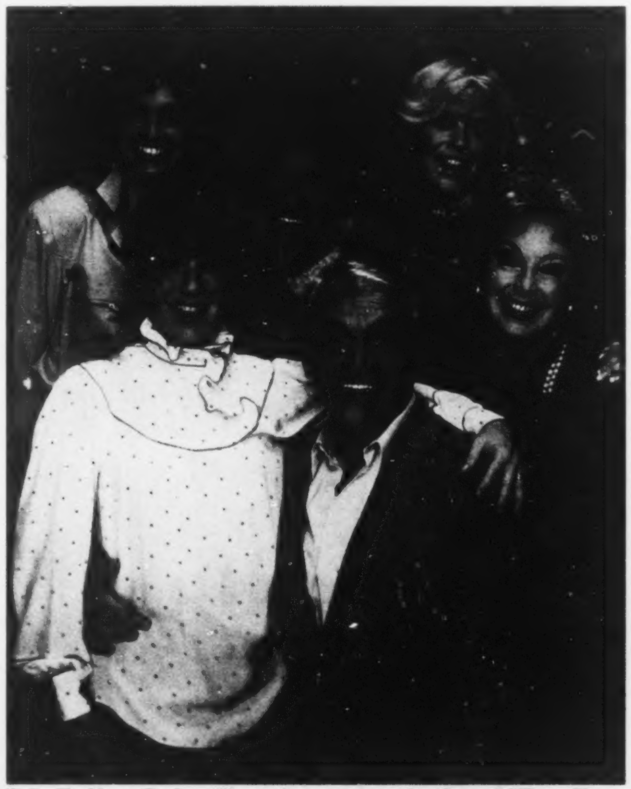
One indication of the money at stake is an unofficial, but generally accepted, figure that 247 companies sold $220 million worth of programing during 1983's five-day NATPE convention.

The upcoming NATPE survey, expected to cost less than $100,000, is scheduled to be released at the NATPE convention in San Francisco this week. "Everybody's very jealous of their own figures, and there's a question about whether they're inflated or not," says Bob Bernstein, president of March Five, public relations representative of NATPE. "The organization thinks it has come up with a way to get the figures and protect everyone's anonymity."

While the business can be lucrative, it also has its pitfalls, not the least of which is the high mortality rate of syndicated properties.

Each year syndicators hail their newest programing breakthrough or a "can't miss" network show available for syndication. Of the 70 first-run syndicated programs piloted in 1982 to 1983, only a handful remain. All of you who remember "Soap World," "Larry King," "Madame's Place" and "Lie Detector" should raise your hands. Fifteen major first-run shows made it to fall, 1983, premieres, but odds are that few will return for a second season.

The successful companies, however, do manage to build upon the success of their properties. The following is a look at how four syndicators built themselves up on different foundations—one of the oldest movie factories in Hollywood (MGM/UA), a group of 1950s musical imitators (Lexington), a low British comic with buxom playmates (D.L. Taffner/Ltd.) and a man who prowls a studio audience soliciting impolite questions of guests (Multimedia).



D.L. Taffner/Ltd. will produce new episodes of "Too Close For Comfort," the comedy series starring Ted Knight that was canceled by ABC last year.

MGM/UA

"Thicke of the Night," the comedy-variety late-night strip starring the Canadian comic/singer Alan Thicke, was the highest-profile syndication launch of 1983. A joint venture (with a $250,000 weekly budget) by Fred Silverman, Metromedia and MGM/UA, "Thicke" was aimed at a younger audience than is drawn by network late-night fare.

Even though its early ratings were disappointing, MGM/UA Entertainment president Larry Gershman retains "high hopes" for the program. The show itself has been renewed for a second season, albeit with a reduced staff.

"A show like that needs time to find itself and settle in," says Mr. Gershman. "Certain people in the repertory company we've used we'll concentrate more on, others less on. Some of them won't continue with the show. More recently the show has gotten closer to what we wanted it to be, it is finding an audience."

Regardless of the long-term success of "Thicke," Mr. Gershman says the "message is very clear to the network that they're going to have to develop something for late night or they're not going to have an audience."

The significance of first-run syndicated programing has increased in recent years because of the relative lack of long-running network series. That suits MGM/UA just fine.

"You just don't see those 200-episode shows going into syndication anymore because the networks aren't keeping them on the air that long," says Joe Tieranado, president of MGM/UA domestic syndication. "We saw that coming several years ago and it's very obvious in what we're doing with 'Fame' and 'Thicke of the Night.' It's easy to see the need for first-run syndication."

In addition to "Thicke" and "Fame," MGM/UA is active in every avenue of syndication. Such off-network shows as "CHiPs" and "Gilligan's Island" "are doing remarkably well," says Mr. Tierando.

Besides selling these and other shows to individual stations, MGM/UA also supplies programing to other syndicators. Lexington Broadcast Services, for instance, has acquired 12 MGM/UA releases for its "LBS Movie of the Month" series.

The company also has the largest cartoon library in the world (including "Tom and Jerry" and "The Pink Panther") and 4,000 to 6,000 feature films in active release at all times, plus 10,000 more in its library. MGM/UA's latest movie package, which includes "Rocky," "Rocky II" and "2001: A Space Odyssey," is "the highest-grossing first-run off-network package every released," says Mr. Tieranado.

Lexington Broadcast Services has made a success by using the barter system with shows such as "Family."

Lexington Broadcast Services

Referring to the syndicated series that made Lexington Broadcast Services a staple in the syndication community, Mr. Siegel says: " 'Sha Na Na' wasn't much different from the 'Muppets.' You had 10 characters doing music and comedy bits, plus guest stars with a very fast-paced look. Personally, I don't think it had anything to do with nostalgia for the '50s. It was the humor and the characters."

Mr. Siegel obviously has an eye for what makes programing successful. Since "Sha Na Na," LBS has added a number of popular shows to its stable of syndicated programing. Virtually all of Lexington's business has been in barter, in which stations receive programs free and the syndicator retains several minutes of commercial time for national sale.

LBS syndicates off-network shows, including "Family" and "LBS Movie of the Month," which has cleared 118 markets and 83% of the country, and a variety of children's specials, mainly merchandising tie-ins with toy manufacturers: Straw-

Profits that can't be seen

If no one is quite sure of the scope of the syndication business, there is uniform industry acceptance of one point—the business exploded when Paramount began using blind bids on a mass scale to sell "Happy Days" in 1976.

"Happy Days" followed "The Brady Bunch," "Mary Tyler Moore" and "M*A*S*H" into the syndication marketplace, but with a crucial difference. The late Dick Lawrence, then head of Paramount syndication, wired messages to stations in each market asking for blind bids on "Happy Days."

Because stations were competing with each other and not negotiating price with a salesman, the winning bids were much higher than had ever been paid before and the lid was blown off the top of the price structure.

"We are into about 175 markets with 'Happy Days' now and we [wired] the first 125 or 130 of them," said Bob Jacquemin, senior vp-sales at Paramount. "To me it's the fairest way to distribute a show because the highest bidder gets it, period."

Mass-market blind bids are common for every blockbuster off-network show, culminating in the record prices (a reported $120,000 per episode in Los Angeles) for "Magnum, P.I." reruns, which will be available in 1986.

Such off-network programs as "M*A*S*H" and "The Jeffersons" brought big audiences with them into syndication, but high network ratings and critical acclaim are no guarantee of syndication success.

"The Mary Tyler Moore Show," for example, did a syndication nosedive after years as one of television's most successful and acclaimed shows. A theory cited by several syndicators is that children tend to control the late-afternoon time periods in which "MTM" usually aired in syndication, and they aren't a receptive audience for such a "smart" comedy.

First-run syndication is the flip side of off-network product and such early television heroes as Broderick Crawford in "Highway Patrol" and Lloyd Bridges in "Sea Hunt" (whose shows were produced and distributed by syndicator Frederic Ziv in the mid-1950s), were the spiritual godfathers of such disparate 1980s syndication stars as Phil Donahue, Alan Thicke and Judge Wapner of "The People's Court." —*M.W.*

With a $250,000 weekly budget, "Thicke of the Night," the comedy-variety talk show starring Alan Thicke, is MGM/UA's answer to late night programing.

berry Shortcake, Care Bears and the Get Along Gang with Kenner and Poochie with Mattel.

"Inspector Gadget," a new $12 million first-run animated series of half-hour cartoons premiered in fall, 1983. "Rock Palace," a weekly rock 'n' roll show, had cleared 100 stations by its Jan. 15 debut. LBS will also have a first-run animated strip based on the comic strip character Heathcliff available for fall, 1984.

The recently formed LBS Sports division will again distribute the $400,000 Greater New Orleans PGA Golf Classic live March 25. LBS is handling advertising sales for "Fame," "Too Close For Comfort," "Hee Haw" and other first-run syndication shows.

"When I founded the company seven years ago I was at Grey [Advertising] and involved with network buying and even then the networks were arrogant," says Mr. Siegel. "Costs were skyrocketing and there was an opportunity to find some alternatives. I was working with Procter & Gamble on things like 'Andy Williams' and 'Sha Na Na' and thought that if someone like them [P&G] evaluates this [barter] as a good alternative to network television, so will everybody else. If we price a show right and get the right clearances, we can sell it at rates anywhere from 15% to 33% less than the networks.

"Some stations have some objections to barter but more and more are coming into it because of the need for first-run programs. Shows like 'Entertainment Tonight,' 'Fame' and 'Solid Gold' wouldn't have made it without advertiser support. They couldn't have gotten off the ground if they had been strictly on a cash basis."

D.L. Taffner/Ltd.

Don Taffner had built a nice business selling foreign programs such as "Skippy, the Bush Kangaroo" from Australia and "World At War" from England to American tv stations, when he had the idea to edit a group of hour-long comedy shows from Britain's Thames Television down to a series of half-hours for American syndication. Say hello to "Benny Hill."

"Yes, it amazes me," says Mr. Taffner, president of New York-based D.L. Taffner/Ltd., of the broad comic who titillates 130 markets with low comedy and necklines to match. "It took us a couple of years to get enough stations to pay the cost of editing it down to half-hours.

"People were reluctant at first because of the British humor but when you look at it he's very visual. It's almost like watching a silent movie," says Mr. Taffner. "I'm knocking wood and saying I hope it lasts another couple of years. They still make two or three hours a year, and every few years we put them together, edit them to half-hours and add them to the package."

D.L. Taffner, which has grown from a single three-person office 10 years ago to offices in four cities with more than 40 employes, has also sold such British products as "Rumpole of the Bailey," "Reilly: Master of Spies," "Edward and Mrs. Simpson" and "Voyage Around My Father" to PBS or to Mobil for its ad hoc specials network.

Furthermore, D.L. Taffner is going full circle on its British connection. "One thing we've tested and that is very interesting is that since 'Three's Company' has been such a success in syndication, we're in the marketplace with 'Man About the House,' the British show that it was based upon," says Mr. Taffner. "We call them the 'Thames Originals.' "

> **"... the network is going to have to develop something for late night or they're not going to have an audience."**

The company is also involved in the distribution of "Too Close For Comfort," the comedy series that was canceled by ABC. D.L. Taffner will produce the show for syndication.

Multimedia

Back in 1967, Don Dahlman and Phil Donahue were a couple of guys pounding out a living in Dayton, O.

Mr. Donahue was the host of a daily talk show on WLWD-TV that featured heavy audience involvement. Mr. Dahlman was station manager. While Mr. Donahue was blitzing his competition in Dayton, the show began a slow climb to syndication success.

"It was very difficult selling it at first," recalls Mr. Dahlman. "Every local program director said, 'I can do that show myself.' We said, 'Sure you can do that kind of show, but you don't have Donahue.' All we had to sell were the fabulous numbers and eventually it took off."

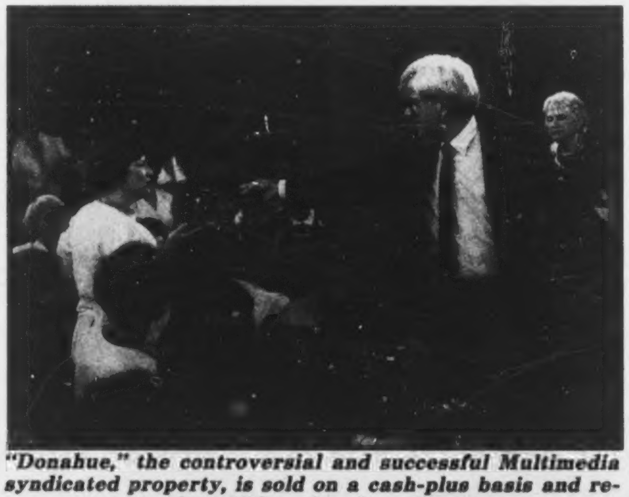
By 1974 "Donahue" was established and had moved to Chicago independent WGN, where it built to its present base of 98% national coverage by 1976. The show moved across town in 1982, to CBS-owned-and-operated WBBM-TV, because WGN, a superstation, was pumping the show live into 5 million cable homes, often competing with "Donahue" in syndication and with no revenue for those additional markets.

"Donahue" is sold on a cash-plus basis, with Multimedia getting cash in addition to withholding two minutes for national commercial sales. "After 16 years in television his ratings are higher this year than ever before and they continue to grow a little bit," says Mr. Dahlman.

Greenville, S.C.-based Multimedia bought WLWD and its syndicated properties ("Donahue," "The Bob Braun Show" and some "Young People's Specials"), and Mr. Dahlman moved to Multimedia as vp-sales and shortly became president of Multimedia Entertainment, the company's producing and syndication division.

For the past six years, Multimedia has produced and distributed three country music half-hours, "Pop Goes the Country," "Austin City Limits Encore" and "Music City USA," plus a bevy of one-hour and two-hour country music specials featuring the likes of the Statler Brothers, Ray Charles, Louise Mandrell and the "Music City News Country Awards Show."

Multimedia also clears about 90% of the country including the NBC o&o stations for its monthly half-hour "Young People's Specials" series. ■



"Donahue," the controversial and successful Multimedia syndicated property, is sold on a cash-plus basis and receives 98% national coverage.

Lucy's legend leaves lots of loot

By William Mahoney

There was a time in television history when turning on the tv set and seeing Lucille Ball was no more surprising than turning on the tap and getting water.

The zany redhead began charming audiences with her high jinks when "I Love Lucy" made its premiere on CBS on Oct. 15, 1951. It continued its success years later with two spinoffs, "The Lucy Show" and "Here's Lucy," as well as a number of "Lucy" specials. Many of the shows are available in various incarnations in syndication today.

"Lucy's" popularity seems never ending, already spanning three decades.

"I Love Lucy" was a ratings success from the start. During the show's first prime time season, it placed third in A.C. Nielsen Co.'s average prime time season ratings, scoring a 50.9.

It earned the honor of being Nielsen's top-rated show in four of the six seasons it was on the air. The furthest the show slipped from the No. 1 spot was to second place during the 1955-56 season, when it was bumped by "The $64,000 Question."

The last original "Lucy" show aired May 6, 1957, but the success of the series continued for many years to follow. Lucy and her television—and real life—husband, Desi Arnaz, decided to end the show to decrease their workload. However, it was apparent long before then that "Lucy" would live to become tv's first real rerun goldmine.

The phenomenal television success actually originated on radio. "I Love Lucy" developed from a 1950s radio show, "My Favorite Husband," starring Lucille Ball. When Lucy and Desi were making final negotiations with CBS to bring the radio show to tv, they were asked when they would be moving to New York from Los Angeles to begin shooting.

This posed a problem. Lucy and Desi enjoyed living in Los Angeles and weren't too fond of the idea of commuting to New York to shoot the show, as was customary at the time.

At this time, Desi made a suggestion to film the show on 35mm film—the way movies were filmed. Instead of producing inferior quality kinescopes (films from tv monitors), Desi's notion involved making prints and sending them to participating tv stations.

An industry trend was born.

The decision to film "Lucy" instead of shooting it live made it syndication's first valuable property. It became the first show with high-quality prints of each episode available for endless reruns, hence endless revenues.

In January, 1953, just over a year after the filming was implemented, *Newsweek* commented, "With it [film], sponsors can ignore the networks and their cable costs and slot their shows only in the towns where they want to sell their products." The statement proved prophetic for the tv industry.

"Lucy is one reason why 20% of all network shows are already on film," *Newsweek* said.

The journey down the lucrative syndication road began as early as 1954. Red-hot network ratings produced spectacular cost-per-thousand figures—$3.50 to $4.50 per household—for the show's original sponsor, Philip Morris Inc.

Because of this, CBS asked approximately $40,000 for reruns, about as much as Philip Morris was paying for originals.

After two years, Philip Morris dropped its network sponsorship of "Lucy" to concentrate on spot tv buying.

The show, nevertheless, continued to be a powerful advertising vehicle by scoring unprecedented audience figures. The episode that aired on Jan. 19, 1953, in which Lucy gave birth to Ricky, scored an astonishing 88.1 Nielsen rating and 92.2 share, attracting about twice as many viewers as the inauguration of President Dwight Eisenhower the next day. One estimate at the time placed "Lucy's" audience figure at about 44 million and Ike's at about 20 million.

More than 32 years later, there seems to be no end in sight for "Lucy's" syndication success.

According to Viacom Enterprises, which has held the syndication rights to all 179 episodes of "Lucy" since 1971, the show still commands an average weekly audience of 1.8 million.

Nielsen Station Index's Cassandra ranking of syndicated programs listed "I Love Lucy" as airing in 57 markets. It recorded 50% coverage of the U.S during the November sweeps last year, with an average 2.2 rating and a 10 share. The Cassandra report places it at the 39th spot among situation comedies.

Viacom says "Lucy" has been sold to stations in 94 markets with a potential coverage of 75% of the nation. The difference between this figure and Cassandra's represents the number of stations that have purchased "Lucy" but were resting the show to air it at another time of the year.

The series is also still airing in 27 foreign markets, including Australia, Bangladesh, Bermuda, Mexico, Greece, Arabia, Singapore and, most recently, London.

The worldwide success of "Lucy," more than three decades after its network debut, makes one think that the mischievous redhead and her bongo-playing husband were among the first to foresee the pile of gold at the end of the syndication rainbow.

William Mahoney is editorial assistant with Electronic Media, *a sister publication of* Advertising Age.

Redhead's red hot ratings

Independents

(Continued from Page M-14)

tions and enough of the large markets, it simply isn't viable."

Syndicated shows are sold on a station-by-station basis, usually by a distributor who puts together an "ad hoc" network consisting of both independents and network affiliates.

Ad hoc networks generally consist of only 50 to 60 stations, says John Doscher, vp-director of sales for SFM, a New York-based syndication company. This translates into an average clearance of about 70% of the markets. A network's average clearance is more than 90%, and networks offer the bonus of simultaneous showing, while stations participating in ad hoc networks air their wares at varying times.

Syndication, however, offers other features for advertisers. Greater versatility in programing and more flexible prices are two of the greatest enticements.

The competitive prices attract many to syndicated advertising, although the cost-effectiveness of barter syndication has recently come under attack. Bartered programs, unlike syndicated programs sold for cash, are given to stations, usually free of charge, in exchange for the airing of presold commercials; the station commonly retains some of the commercial time for itself.

Barter "plays some role in approximately two-thirds of the dollar volume of syndicated programing," says Henry Siegel, chairman of Lexington Broadcasting Services and co-founder of the Advertiser Syndicated Television Assn.

Blair Television, a company that sells national advertising for tv stations, issued a controversial report in November charging that advertisers pay between $3.03 and $26.74 per thousand households for barter programs, as opposed to $2.20 to $4.83 for network.

Mr. Siegel has said the Blair report "isn't worth the paper it's printed on." He maintains that "because syndication gets less coverage and sometimes lower ratings than network shows, we must make up the difference by price. Typically, an agency or advertiser negotiates a deal with us based on a cost of one-third to one-fourth lower than network."

As a syndicated show gains popularity, however, the price tag does indeed climb to near-network proportions. "Entertainment Tonight," for example, now in its third year and averaging a national rating of 15.4, reportedly raised its price $10,000 this season to $55,000 for a 30-second spot.

Nevertheless, advertisers appear to be sold on syndication, and price is invariably given part of the credit. "Both network and syndication reach the same audience, and syndication's cost per thousand is often lower," says Jack Wishard, vp of Procter & Gamble Productions in Los Angeles.

The nation's largest advertiser, Procter & Gamble, is one of syndication's most ardent admirers. The company made tv history in 1983 by buying a syndicated package of nearly $20 million, which included three 30-second spots per telecast of "Fame" and $5 million of time on Metromedia's "Thicke of the Night."

Another syndication lure is its willingness to aim at specific audiences, particularly female and younger viewers, while the networks concentrate on larger audiences. INTV claims that independents surpass affiliates in reaching the young adult audience (18 to 49 years of age) in all time periods except prime.

Insiders believe that syndication's continued success will depend, at least partly, on its ability to keep its programing fresh. As syndicators grow bigger, they might well be wary of becoming like the networks. And while no one seriously believes that independent television will ever put the networks out of operation, if it plans its attack wisely it should see more of the networks' audiences— and their advertising dollars—in the future. As it stands now, independents and syndicators alike are more than ready for prime time.

Exec exit stuns U.S. Tobacco

By GAY JERVEY

The abrupt resignation Jan. 27 of Barry Nova, the well-versed and widely respected president of U.S. Tobacco Co.'s tobacco division, stunned not only Wall Street and competitors but company insiders as well.

His departure also fueled speculation as to the status of Skoal Bandits, the company's newest—and to date successful—attempt to lure smokers into the world of smokeless tobacco (*see accompanying story*).

Mr. Nova's exit did not appear tied to 1983 earnings which, when reported last week, had jumped 27.7% to $70.6 million from $55.3 million for 1982. Sales climbed 19.5% last year to $382.7 million, compared with $320.4 million a year earlier.

In moves said to be unrelated to Mr. Nova's departure, two other tobacco division marketing executives, marketing director Per Lindvquist and marketing services director William Nelson, have departed.

Mr. Lindvquist was reassigned to U.S. Tobacco Co.'s international division and Mr. Nelson left the company abruptly Feb. 1. Successors have not been named. A company spokesman said he did not know the reason for Mr. Nelson's termination, but stressed it was not tied to Mr. Nova's leaving.

Sources close to U.S. Tobacco hinted that Mr. Nova was asked to resign as president of the tobacco division, as well as from the company's board, due to a rift between him and Louis F. Bantle, chairman and president of the parent company. One source said the two may have had disagreements as to who should take the credit for company achievements.

For the time being, Mr. Nova will be succeeded by Manuel Leitau, an 18-year company veteran, most recently was senior vp-finance, a title he will retain.

Mr. Nova, who had been with the Greenwich-based company for 10 years, the last two as the tobacco division president, left immediately after resigning Jan. 27. "It was a productive time both for me and the company, but in the end, Louis Bantle [U.S. Tobacco's chairman] did not have a sufficient confidence level in me," he said in a telephone interview.

Mr. Bantle could not be reached for comment. Sources say, however, that the chairman has indicated that he and Mr. Nova had some differences of opinion, some of which had been building over time.

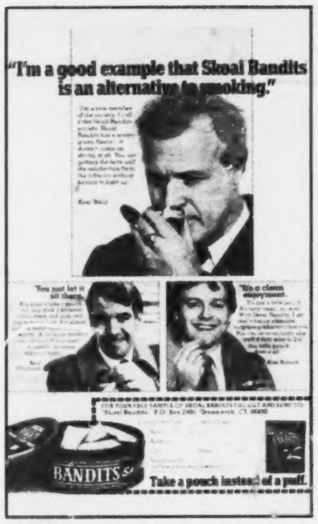
Indeed, Mr. Nova, who showed animosity toward neither Mr. Bantle nor U.S. Tobacco, stressed that his exit was a matter between him and Mr. Bantle. It did not, he said, signify sweeping corporate change, nor did it reflect disparate views concerning the Skoal Bandit, whose marketing blueprint for the next two years is solidly cast.

"It was a general feeling between myself and the chairman that it was not working out as it should be," Mr. Nova said. "It does not signify any further shakeup."

Despite that, analysts are nervous that too much turnover, however unrelated, comes at a critical time in the Skoal Bandits introduction. As such, they say they will feel more "comfortable" once they determine how—or if—the management changes will affect UST's corporate strategy.

"Under Barry Nova, the division created one of the strongest brand franchises I have ever seen with Skoal Bandits, whose brand name in less than a year is second only to Marlboro's," said Salomon Bros. analyst Diana Temple.

"But the company is on the brink of a major change, moving from a niche-marketing orientation to one involving a much broader consumer base," she continued. "What they do in terms of distribution, actually getting the product consistently out there, will be critical. Maybe that's what this is all about."#



"I'm a good example that Skoal Bandits is an alternative to smoking."
"You just let it sit there."
"It's a clean enjoyment."

Bandit adding testimonials

Greenwich, Conn.—U.S. Tobacco Co. will break a new marketing effort for Skoal Bandit chewing tobacco on ABC's telecast of the Winter Olympics.

The second phase of Skoal's introduction is budgeted at $30 million for the year with $13 million going for advertising alone. It will feature testimonials of converts from cigarets—culled from the agency's list of coupon respondents—who were won over to chewing tobacco by Skoal.

The campaign will run on all three networks and in a wide variety of general, mass-circulation publications.

Tv buys will be largely on sports shows and specials until the fall, when the company will buy prime time.

The campaign is designed to attract new users—predominantly urban, white-collar and male. But according to John Chervokas, vice-chairman and chief creative officer of Warwick Advertising, New York, women also have seemed willing to try a Bandit.

Other advertisers *(full list of sponsors on Page 1)* that will break new advertising on the Olympics include Beatrice Foods, with its new corporate campaign (AA, Jan. 9) and Roman Meal Co., with a new nutritional campaign for variety breads (AA, Dec. 26).#

Allstate campaign jumping at fitness

(Continued from Page 1)

tant vp-advertising.

The campaign of print advertisements and eight 30 and 60-second tv commercials hits its stride this month during televised coverage of the Winter Olympics in Yugoslavia.

Allstate has bought $9.3 million in commercial time during Summer and Winter Olympics programing.

The campaign continues at a slower but steady pace through spring and summer, picking up speed again in late summer with coverage of the Summer Olympics in Los Angeles.

A total of 50 spots will appear during the televised games broadcast exclusively by ABC.

The campaign also includes commercial time during early evening, early news, prime time, late news and late-night programing. Print ads are scheduled to appear in *Better Homes & Gardens, Country Living, Ebony, Money, Newsweek, People, Runner's World, Smithsonian, Sports Illustrated, Sporting News, Southern Living, Sunset, Time, TV Guide* and *U.S. News & World Report*.

Leo Burnett USA, Chicago, is the agency.

The campaign is a product of long-range planning, Mr. Flieder said. The financial commitment to purchase the Olympic network time had to be made in 1981, during a time of economic stress in the nation and the insurance industry. And it represented "not a gamble, but a calculated risk" by Allstate, Mr. Flieder said.

After extensive consideration of political, economic and industry factors, the decision was made to buy the Olympics package because "we thought there would be great feelings about [the Olympics] being back in America," he said. "We really had confidence that things would turn and we'd ride the wave with that."

The 1984 budget represents about a 20% increase over 1983, most of the increase due to higher costs of network tv time, Mr. Flieder said.

The upbeat commercials blend a sales message with humor and a hint of cheerleading as characters run through the paces that have put them in a special discount or low-rate category for their Allstate insurance.

In one commercial, produced in both 30 and 60-second versions, a paunchy over-30 man drags himself out of bed and into gear for a morning run with his ever-eager dog.

As the character huffs and puffs through neighborhood streets, a voiceover hails the fitness effort and reminds the viewer that such an endeavor can pay off in lower insurance costs for Allstate policies.

This marks the first time since 1976 that Allstate has used 60-second commercials in other than a test situation, said Bob Gorman, senior advertising manager.

"We decided that we needed 60 seconds to set the over-all mood and tempo of the campaign," Mr. Gorman said.

The longer commercials will appear primarily during the Olympics programing.

The Olympic year advertising campaign will be enhanced by a corporate pr campaign that will include sponsorship of activities or events in a variety of market areas, according to Allen Goldhamer, division manager-corporate relations.

States in which market areas have been targeted for heavier advertising and pr efforts include California, Illinois, Texas, Ohio, New York and Florida—states where the market and governmental regulations provide an especially attractive environment for sales growth.#

Marketers' Olympic link a hit already

(Continued from Page 1)

than male (31%) indicating such an inclination.

The most encouraging statistic for advertisers may be that support is strongest within the prime middle-income group.

Nearly 40% of respondents with annual incomes between $20,000 and $40,000 said a company's Olympics sponsorship might positively influence their buying decisions.

Sponsors' corporate images as well as sales will get a boost. Nearly 44% of the adults polled said Olympics sponsorship raises their opinion of a company. Half the sample (49%) said the sponsorship doesn't affect their opinions.

Consumers also proved themselves to be surprisingly aware of which companies have ties to the games.

Although some feared the large number of commercial sponsorships for this year's games would create its own brand of clutter, advertising by Olympics sponsors instead has broken through the clutter.

Better than 70% of the consumers polled said they were aware of having seen, heard or read advertising in which a marketer indicates it is a sponsor or supplier for the 1984 Olympics.

By comparison, only 59% of the adults in an earlier Advertising Age survey recalled seeing advertising that uses a celebrity presenter or spokesman (AA, Nov. 7).

Much of the Olympics-tied advertising already airing has appeared during sports broadcasts. This may explain why over-all awareness of such advertising is slightly higher among men (74% recall) than women (69%).

The highest recall is among persons aged 25 to 34 (83%); the lowest, among those aged 65 or older (55%). Awareness also is significantly higher among whites (74%) than among blacks (58%) or Hispanics (53%).

Of those who said they had seen, heard or read advertising tied to the Olympics, 57% were able to name specific product or service advertising mentioning sponsorship. Twenty-two products or advertisers received at least 1% of total mentions.

Dominating the list of advertisers named was Levi Strauss & Co., with 13.2% of first mentions. The company has made one of the heaviest investments in the games, supplying all U.S. participants with outfits (on which the Levi's logo is stitched) as well as a multi-million-dollar ad and promotion campaign.

Among the other most frequently named advertisers were Budweiser (4.1%); M&M's (3.8%) and Snickers (3.5%), both products of the official snack-foods company, M&M/Mars; Coca-Cola (2.9%); United Airlines (1.9%); Wonder bread (1.8%); Canon (1.8%); McDonald's (1.7%), and Fuji film (1.4%).

Several of these and other sponsors won't begin full-scale Olympics-tied advertising until this week. But consumer perception of sponsor "overkill" so far has been minimal. Less than 20% of the adults surveyed said they have seen too much advertising tied to this year's games.#

Mary Kay to increase incentives

Dallas—Because of softness in recruiting new consultants for its direct selling of cosmetics, Mary Kay Cosmetics is making some changes to put its marketing program back in the pink.

The company, based here, has seen a decline of its worldwide beauty consultants from 196,755 in 1982 to 194,586 in 1983. To increase incentives for both recruiting and sales, beginning March 1, the company plans to change its commission structures compensating recruiters, increase sales unit bonuses and introduce a new car program.

Mary Kay traditionally has awarded pink Cadillacs and pink Buick Regals to sales directors only. The new program will allow outstanding consultants to earn a nonpink car of undetermined model.

Effective April 9, more changes involving discount structures will be instituted, and next October, the company plans to upgrade requirements for sales directors.

Mary Kay's fourth-quarter sales and earnings fell 13% in 1983, to $72.1 million and $7.7 million, respectively. By improving its incentive plans, the company hopes to not only stimulate sales and recruiting efforts, but also continue its long-range plans for updating marketing strategies.

Advertising for Mary Kay, according to the spokesman, is under evaluation. The company has not bought any tv for the first quarter, and is using "minimal magazine advertising," he says.

Bozell & Jacobs/Southwest handles Mary Kay, which spent $5.7 million from January through September, 1983, according to Leading National Advertisers.#

Beecham to add light Jovan musk

Chicago—Beecham Cosmetics, a wholly owned subsidiary of Beecham Group, will introduce Jovan Whisper of Musk with a $4 million tv, radio and print advertising campaign via Zwiren & Wagner.

Jovan, acquired by the Beecham Group in 1979, originally built its business on Musk Oil, which was introduced in 1972.

Two years ago, musks appeared to be once again in vogue when Chesebrough-Pond's Prince Matchabelli division introduced Aviance Night Musk, targeting existing musks, including Musk Oil, among its competition.

At that time, Jovan Musk Oil had a 54% share of the estimated $100 million segment, Coty a 24% share and Houbigant had a 16% share.

Last year Chesebrough credited the 1982 introduction with contributing to improved fragrance sales in the Matchabelli division, although those sales were not broken out.

Like Aviance Night Musk, Jovan's Whisper of Musk is a light scent, an updated version of the heavier musks popular in the late 1960s.

Besides advertising, Jovan will support its newest fragrance with a 31 million-piece sampling program through magazines and stores.

Also, Max Factor & Co. is introducing Magical Musk by Toujours Moi. It will be lightly advertised, sources say. Wells, Rich, Greene handles.#

Midseason tv series show ratings promise

By JAMES P. FORKAN

NEW YORK—With the still-young midseason schedule and the February sweeps yielding a few surprises, the focus of network tv strategies already is changing to the spring-summer prime time season.

Ratings front-runner CBS-TV is the first to unveil major lineup fixes effective next month. Runner-up ABC is second.

Prime time's "second season" traditionally is a rather unexciting time, yielding few successes, but some agency veterans think this year will be a departure, with NBC's "TV's Bloopers & Practical Jokes" and "Riptide" plus ABC's "Foul-Ups, Bleeps & Blunders" and CBS' "Mickey Spillane's Mike Hammer" shaping up as hits in the early rounds.

"Bloopers" continued its winning streak into Feb. 6, with its 21.3 rating and 30 share beating ABC's movie "Arthur," which outdid CBS' "Scarecrow & Mrs. King." NBC went on to receive its best A.C. Nielsen Co. results on Monday since mid-November, as "Little House on the Prairie's" so-called "farewell" movie, at 22.0/32, easily swept runner-up ABC.

Since January, agency executives have noticed some possible upsets in the making. These include ABC's "Three's Company," whose slump may have led to the major cast overhaul set for this fall, and "Hart to Hart," hurt for several weeks by its sluggish lead-in series, strong CBS tv movies and gains by NBC's "Remington Steele."

The latter series had been expected to lose that Tuesday battle from the start since "Steele" and "Hart" appeal to similar upscale, young-adult demographics, admen said. Several buyers see that battle as worth watching.

ABC, collecting its fifth weekly victory as it headed into the Winter Olympics, noted that its 3.4-point margin over CBS' 16.2 Nielsen rating average for the week ended Feb. 5 was the second-big-

Mingo-Jones work waiting in wings

Jackson strong without ads

By SUSAN SPILLMAN

"Actions speak louder than advertising" could well be the slogan of Democratic presidential candidate Jesse Jackson.

Although the black civil rights leader recently secured Mingo-Jones Advertising, New York, for his campaign, he hasn't spent a nickel on ads thus far.

Yet, as the campaign heads toward the first crucial votes, the *Boston Globe's* most recent poll shows Mr. Jackson is threatening Sen. John Glenn (D., O.) for second place in New Hampshire's Feb. 28 primary race.

According to the Feb. 5 poll, former Vice-President Walter F. Mondale and Sen. Glenn ranked first and second with 37% and 16% of the vote, respectively, while Mr. Jackson pulled in 10.2% of the vote.

By contrast, in mid-December, the paper's poll showed Mr. Mondale with 46% of the potential vote, Mr. Glenn with 16% and Mr. Jackson lagging with 6%.

Unlike the Jackson camp, the Mondale and Glenn campaigns have been spending heavily on advertising since the beginning of the year in both Iowa and New Hampshire, two key states. Aides to Sen. Glenn have said they had budgeted $4 million to be spent in the first quarter. Mr. Mondale's forces were expected to spend as much.

The activity is likely to get even heavier as the campaigns head into the Iowa caucus Feb. 20 and the New Hampshire primary.

Mr. Jackson's rivals attribute his substantial boost in popularity to his single-handed role in gaining the release of Navy Lt. Robert O. Goodman Jr., whose reconnaissance plane was shot down in Lebanon.

Those same people believe public sentiment over Mr. Jackson's role in the early-January release of the officer will taper off.

"We weren't surprised by the poll. Mr. Jackson may

Beer makers try new tacks

By ROBERT REED

Brewing industry leader Anheuser-Busch is starting to play videogames while competitor Miller Brewing Co. plays a waiting game.

St. Louis-based A-B has entered into a licensing agreement that links the flagship Budweiser name to a videogame that will be unveiled this week by Bally Mfg. Corp., Chicago. The game, entitled "Tapper," will be available only in taverns, according to the agreement.

Meanwhile, Miller Brewing is waiting to see presentations from the three advertising agencies doing "exploratory work" for the ailing Miller High Life brand. Creative pitches will soon be presented from Leo Burnett USA, Doyle Dane Bernbach and Ogilvy & Mather, says a company spokesman. The brand is now with Backer & Spielvogel (AA, Feb. 6).

Both these moves come on the heels of mild 1983 selling gains for A-B, a drop for Miller and tepid over-all increases for the entire industry. As a result, brewers are in the throes of fine-tuning, changing and seeking new methods designed to wrestle away market share

Braniff has a reason for singing

By TOM BAYER

DALLAS—Braniff Inc., now owned by Hyatt Corp., will begin air service March 1 without gimmicks, but will herald its resurrection with a Lynn Anderson-Beach Boys concert and a joint promotion with the March of Dimes.

With new marketing strategy, look and style, Braniff begins its $10 million advertising campaign in 45 newspapers today, announcing that the new Braniff will be "up and running" March 1 with flights to 18 cities from the Dallas-Fort Worth hub.

After two weeks, Braniff will shift to the theme, "We're building the new Braniff around you."

Thomas Lagow, Braniff's senior vp-marketing, described the strategy as straightforward.

He said Braniff intends to give business travelers something for their money, in contrast to service offered to passengers with discount fares.

Mr. Lagow said Braniff will offer the same fares as its competition, both discount and coach, but, unlike the competition, will segregate discount and coach passengers, giving full-fare coach passengers a level of service Braniff

(Continued on Page 70)

Financiers trade kid gloves for boxing gloves

By Kurt C. Hoffman

A curious spectacle is underway as the nation's financial managers, catapulted into the 20th century marketing arena by various deregulatory measures, shed their pinstripes and learn how to mix it up in the trenches of competition.

"Our members felt it was time to take the gloves off and bareknuckle it a bit after losing millions of dollars to the money market mutual funds back East," explains Larry Solomon, public relations director of the Oklahoma Bankers Assn. and organizer of a hard-hitting, statewide campaign designed to elevate the image of OBA members. "There's only a limited number of consumer dollars out there, and everyone's going to fight tooth and nail to get their share."

Yes, these are bankers talking! And despite their traditional reputation for being stuffy and above it all, there's nothing namby-pamby in the energetic, aggressive approach they are incorporating into their marketing strategies.

"Banks no longer can sit back and do pretty picture, feel-good advertising," adds Tom Dynjan, general manager of Owens Associates, Phoenix. "It's become a much, much more competitive industry, and we have to seize the initiative in order to stay ahead."

While it is difficult to isolate a specific time at which financial institutions entered the competitive fray, Elizabeth Taller, director of advertising at Chemical Bank, New York, points to the arrival in late 1979 of double-digit interest rates on six-month certificates of deposit as the likely genesis of the new competitive era.

"The highly competitive advertising by banks in 1980 for CDs changed the thrust of bank marketing from simple image advertising to product-specific advertising," she says. "Previously, we were selling a parity product. All commercial banks offered the same regulated interest rate, so it basically was through the creativity of the advertising message that institutions differentiated themselves from each other."

The hunt was on for the next breakthrough move while protecting current market shares from scavenging competitors. As a result, the advertising wars have become quite heated.

"Do your banking at a bank—your local Oklahoma bank," stressed the opening salvo of the OBA campaign launched last February. Motivated to action by the constant drain of Oklahoma dollars to mutual funds "back East," the OBA collected a war chest in three-year pledges from its members to finance the pro-bank campaign.

The campaign—print, radio and tv ads designed by Yount-Moeller, Tulsa—was hard-hitting.

"Let's play hard ball . . . savings and loans, credit unions and brokerage firms just don't measure up. Only banks offer a complete list of financial services backed by professionals with years of experience," proclaims one of the first tv spots.

"Our initial campaign was pretty aggressive because that's the way our members wanted it," explains Mr. Solomon. "The one thing we kept hearing was, 'Let's get tough.' "

The OBA followed its initial eight-week spring campaign with a fall campaign stressing the strength, dedication and community orientation of banks. According to Mr. Solomon, the objective is to soften the bank's image and emphasize the importance of the banks' link to community and business development. Another multiweek campaign scheduled for this month focuses on "relationship banking—establishing a personal rapport with your community bank."

Association-based campaigns are a more conservative method of confronting rivals, although they may not be as effective in helping a specific institution improve its market share. "The company-sponsored campaign can be very specific in the call to action, where the association campaign generally is more of an umbrella campaign most effectively used to enhance a company effort," explains Allan Paro of the American Bankers Assn.

"No one can just sit back and rely upon an association campaign to bring new customers into their brokerage firm or bank—everyone has to make a strong marketing investment and personalize the products and services they offer. They need to create their own image, their own reason for being."

The association approach, however, may be the only marketing outlet for banks advertising on a shoestring budget. "Even though we have two large metropolitan areas—Tulsa and Oklahoma City—the majority of our members have assets in the neighborhood of $45 million," says Mr. Solomon. "They're small banks with advertising budgets of about $4,000 annually, and that usually goes toward matches. They were clamoring for a vehicle they could jump on that would give them statewide tv exposure—a campaign that was professionally done and carried a strong message they could be identified

Bankers bring home the bacon—electronically

By Cara S. Trager

Banks, with their frequently long lines and slow tellers, are gradually reshaping their image by offering their services in a most accommodating place: The depositor's home.

"Stay home and go to the bank," reads an ad for Pronto, the computerized home banking system offered by New York-based Chemical Bank. Its program introduced last fall, offers any owner of an Apple, IBM or Atari personal computer unlimited use of its banking services for $12 a month.

"Viewtron. The waiting is over," declares ads announcing Knight-Ridder Newspapers' videotex program.

In addition to home banking, Viewtron offers a full menu of services, including shopping, stock market closings, sport scores, restaurant and travel reservations and games. All this—and more—can be had for an initial investment of $600, which purchases an American Telephone & Telegraph Co. videotex scepter terminal, and a $12 monthly service charge.

Chemical Bank and Viewdata Corp. of America, a wholly owned subsidiary of Knight-Ridder, may be pioneers in going commercial with videotex, but they are not alone on the frontier. The list of financial institutions entering the arena grows daily.

Among the current major players is Video Financial Services, a jointly owned subsidiary of Banc One of Ohio, Southeast Banking Corp. of Florida, Security Pacific of Los Angeles and the Wachovia Bank of North Carolina. The group, which packages, sells and services home banking programs, is working with Viewdata and AT&T. There's a strong possibility, too, that Times Mirror Co. will enlist Video Financial for the communications giant's "Gateway" videotex program, due to go into commercial operation in Orange County, Cal., this year, according to Penny Welsh, manager of marketing communications, Times Mirror videotex services.

Meanwhile, late last year Bank of America launched its own commercial Home Banking videotex program, which can accommodate any personal computer for a monthly service charge of $8. Currently in operation in northern California, the system is scheduled to go statewide by midyear.

At the same time, Chemical is licensing Pronto to other banks, and about 17 banks nationwide are participating in a two-year home banking test program organized by ADP Telephone Computing Services of Seattle. Banks involved in ADP's "Home Banking Interchange" include the Continental Illinois National Bank & Trust Co., Marine Midland in New York, United National in New Jersey and Colonial Bank in Connecticut.

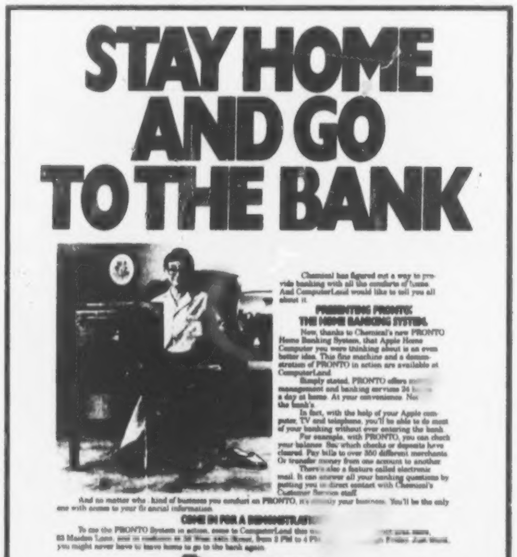
Considering all of this preliminary positioning by major financial corporations, it appears that transactions at a terminal rather than a teller may be in store for many financial customers. "Videotex is probably going to take off faster than a lot of people think," maintains Eileen Friars, senior vp of Management Analysis Center, Cambridge, Mass., which has conducted several proprietary studies in the videotex area.

The financial community seems especially eager to see computerized home banking get off the ground—and quickly. John Russell, vp-director of marketing at Banc One, believes home banking will give banks a competitive edge in the face of increasing competition from major retailers, such as Sears, Roebuck & Co., and insurance companies.

"It's a new kind of competition, and while it won't have a major impact on our current customer base, it will have great impact on the next generation of financial users," says Mr. Russell.

Additionally, such systems simultaneously should enable banks to streamline their operations and reduce costs. "Home banking is more cost-efficient and effective, requiring less of a dependency on brick and mortar outlets—real estate —and paper transactions," says John Tuohy, former vp-marketing at Chemical Bank's financial services division.

Computerized home banking also allows banks to continue generating a large percentage of their income through fees rather than interest. "Banks are relying more on fee income, and computerized banking fits into



Chemical has figured out a way to provide banking with all the comforts of home. And ComputerLand would like to tell you all about it.

PRESENTING PRONTO: THE HOME BANKING SYSTEM.

Now, thanks to Chemical's new PRONTO Home Banking System, that Apple Home Computer you were thinking about is an even better idea. This fine machine and a demonstration of PRONTO in action are available at ComputerLand.

In fact, with the help of your Apple computer, TV and telephone, you'll be able to do most of your banking without ever entering the bank.

For example, with PRONTO, you can check your balance. See which checks or deposits have cleared. Pay bills to over 350 different merchants. Or transfer money from one account to another.

No long lines, up-to-date statements—no human contact, no way to get cash: These are customers' choices as computers become bankers.

Cara S. Trager is a New York-based free lance writer.

with. By pooling our resources, we are accomplishing that objective."

Federal Trade Commission efforts to detect truth in advertising violations pale in comparison to the scrutiny afforded a competitor's promotional claims.

An eight-week, no-holds-barred media blitz conducted last spring against bank money market accounts by the Investment Company Institute (ICI), an association of mutual funds, constitutes a clear case in point.

Reginald Green, ICI vp, cites the initially misleading promotions by many banks for the newly authorized money market deposit accounts as the stimulus that triggered the ICI's aggressive campaign.

According to Mr. Green, the banks' sins were widespread. Simply by naming the new accounts money market deposit accounts, banks virtually invited consumers to confuse the new variable rate bank accounts with the fixed rate money market mutual funds offered by ICI members, he says.

"Many banks didn't attempt to differentiate their product," he says, "nor did they struggle to tell you what would happen to your interest rate if the circumstances of your account changed even slightly."

For example, if a customer's deposit account dropped below $2,500, the interest rate often would revert to the passbook savings level.

"The ads were marked by a disinclination to tell you all that," says Mr. Green. "Another misleading aspect was the advertising of very high rates of return, without emphasizing that these were promotional rates. We knew, as they did, that those initial rates would not last, because you can't pay 12% when the market is paying 8%," he points out.

"The banks were taking assets from the mutual funds in those early days, and although we expected the drain to stop when the promotional rates dropped off, which they did, we had to do something about it in the meantime."

The ICI unleashed a $5 million network tv and local newspaper campaign designed to guide consumers in evaluating deposit accounts and to promote mutual funds.

The campaign, created by Doyle Dane Bernbach, pulled no punches. "What to watch out for in bank money market advertising," warns one headline. The copy then differentiates deposit accounts from mutual funds and highlights "samples of the obscure" provisions in bank advertising.

Another featured the now infamous high interest carrot-on-a-string. "Did you bite?" asks the headline. "If you left a fund for the bank version, maybe you should consider coming back," reads the copy.

"One prefers to talk about one's strengths instead of the competition's weaknesses, but in this case, they left us no choice," notes Mr. Green. "And though we can't tar the whole banking industry with this brush, there were enough violators for us to be rightly concerned."

Righteous indignation describes many banks' reactions. Mr. Dynjan of Owens & Associates created a counteroffensive for United Bank of Phoenix. "In one way, the [ICI] ads were correct," he says. "We had a bank here in Phoenix offering 22% and there's no way they can make money at that rate. But that's like saying all businessmen are crooks because there happens to be three crooks in Rapid City."

All in all, the ICI campaign "was very creative," says Mr. Dynjan. "I can't fault them for doing a good execution. But running local ads and implying that all banks were engaging in misleading advertising was somewhat unfair.

United's campaign, featuring a "carrot stick" parody, was equally aggressive. "You're old fashioned, Smith Barney," "No one's listening, E.F. Hutton," and the "Bum steer" approach characterized United's effort to emphasize that it's not nice to stick people who are innocent of wrongdoing.

Engaging in competitive advertising carries some degree of risk, although one may question whether the greater risk lies in bypassing this highly effective marketing approach.

"Any competitive advertising has to have a foundation in a very good product," says Mr. Dynjan. "The real danger is if you don't have the product or the people to support an aggressive marketing stance. And it's important not to go too far. As a marketing official, you have to remember that the bottom line is, 'How will the consumer react?' There's always the danger of turning people off."

One also must be wary when naming specific competitors in ads, according to Chemical's Ms. Taller, an industry veteran of head-to-head assaults on competing firms such as Chase Manhatten, Manufacturers Hanover and Citibank. "When you cite the competition by name in an ad, you want to be sure that consumers come away knowing who the advertiser is."

Real-world competition is a whole new ballgame for most financial institutions, and many aggressive companies are supplementing their marketing forces with outside talent.

"A lot of banks have brought in package goods marketing people who really have the marketing discipline down," says Mr. Dynjan. "Other institutions are redirecting or reeducating their marketing departments and studying the marketing practices of other deregulated industries."

As in other deregulating industries, today's financial industry can be characterized best as one of unrest as institutions struggle to maintain traditional market strongholds while scrambling for new opportunities. The marketing arena reflects this activity, and it promises to be a good show for years to come.

that fee income strategy," notes Stuart MacIntire, director-videotex services at J.C. Penney Co., which, he says, is "investigating . . . videotex in detail."

In line with that strategy of producing income through services, computerized home banking is expected to result in not only a repositioning of teller services, but also a charge for it. Tellers will eventually assume the role of financial counselors —for a fee.

"We'll always have teller service in a bank because there will always be people who want personal service. But they will need to pay for it," says Banc One's Mr. Russell. "Just as first class costs you more . . . when you fly and you pay through the nose when you use a telephone operator instead of dialing yourself, people will have to pay for personal service."

Admittedly, with computerized home banking, financial institutions may not be known for their human touch, but bank executives believe they may offer something far more important: The ultimate in consumer convenience.

"The first three reasons for Pronto are convenience, convenience and convenience," says Mr. Tuohy.

As he sees it, computerized home banking users are the "new achievers"—career-oriented, financial activists in their mid-30s and 40s who regard time as money and believe waiting in line at the bank or doing paperwork at home is a waste of both.

Among the frequently cited benefits of Pronto are improved money management, bill paying and home budgeting. The only function the system can't perform is the deposit or withdrawal of cold cash, and that's positioned as a safeguard. "That still has to be done from an automatic teller machine," says Mr. Tuohy.

Despite such accommodating features, however, some videotex experts believe home banking is not enough of a drawing card to justify buying a home computer or paying a monthly service charge. "There has to be a great deal more than banking . . . to make it valuable," Mr. Russell maintains.

Chemical Bank disagrees—but to a point. "Chemical's research shows there is sufficient interest in Pronto and home banking as a stand-alone service," says Mr. Tuohy. "But down the road the Pronto concept will consolidate home shopping, portfolio management and logistical functions such as reservation information for travel and entertainment. It's logical that banking, as the payment function, is the nucleus of this system."

Viewdata, in contrast, regards home banking as just one of many financial services subscribers want in their homes. Viewtron offers investment information from E.F. Hutton and Merrill Lynch, insurance tips from Equitable and business news from the *New York Times* business section.

While such services are intended to attract a greater number of videotex subscribers, banking experts believe there's more to it than that. They must also educate the consumer.

To that end, Viewdata, which demonstrates Viewtron in hotels and motels, as well as in such stores as Burdine's, Video Concepts, ComputerLand and Phone Center stores, is pouring $1½ million into the south Florida market to get its system known and used. That budget includes direct mail pieces, three 30-second tv commercials, a newsletter published eight times a year and a four-color quarterly magazine resembling a menu of the system's offerings.

Chemical Bank is following a similar strategy in its attempt to create awareness of and interest in Pronto. It is holding demonstrations in branches as well as in such retail stores as Crazy Eddie's and Bloomingdale's. "Retailers love Pronto, because they're always looking to close the sale of a computer," Mr. Tuohy says. "Beyond the benefits of a computer for children, parents want to know what it will do for them as well, and Pronto gives them a real practical reason to buy."

Bank of America is also going the demonstration route, as well as providing personal computer owners with an 800 number that gives them the capabilities of home banking without actually signing up for it. Additionally, the California bank has launched an electronic mailbox through which subscribers can ask a home banking officer their questions through the computer and receive a displayed answer within 24 hours.

Although these support measures are designed to help potential customers overcome their fears of electronic transactions, industry authorities believe computer phobia is no longer a problem. Steve Yotter, vp-electronics product development at Bank of America's retail marketing area, for example, maintains that electronics are no longer steeped in mystery.

"We have a very active ATM system, with over 10,000 transactions a month," says Mr. Yotter. "Through that, the customer has gotten used to electronics and trusts it. Home banking is an extension of that."

Although computerized home banking today continues to be the exception rather than the rule, bank and videotex executives insist such systems are on the threshold of their future.

As Mort Goldstrom, director of marketing at Viewdata, notes: "I suspect that much like people got used to going to banks, then going to branches and talking on the phone, they will get used to the Viewtron concept. It will become the utility of the '80s."

Ole! Pinstripes play matador in a new fight

Bankers enter brokers' arena with discount operations

By Bob Mahlburg

A bank used to mean a plush, marbled building where you deposited your money in a 5¼% passbook account, joined the Christmas Club and took out a loan. But since the variety of banking services exploded, the bank that fits this description is most likely out of business.

The need to rely more on fee income and less on interest revenue prompted the plunge into the stock business.

New banking services, like discount brokerages, are "a matter of survival" for banks, says Randy Peyser, vp-marketing and product development at Springfield Marine Bank, Illinois'biggest bank outside of the Chicago area. "Banking had always been a very regulated industry," Mr. Peyser says. "Now you see brokerage houses getting into what has traditionally been banking-type services."

These new competitors not only shriveled many banks' profits, they forced a rethinking of basic concepts. "First you have to address the needs of the consumer and try to project what they need," says Mr. Peyser. "Then you have to look at what the competitors are doing. We're looking at the brokerage houses, the retailers, and saying, 'It's just starting. Let's look down the road five years and start getting on the path now.' "

That mindset, plus the need to rely more on fee income and less on interest revenue, prompted Marine's plunge into the then-fledgling bank stock brokerage business in July, 1982. When Marine officials investigated the idea, only two U.S. banks had tried anything even remotely similar.

Bank of America, San Francisco, started the trend by simply buying a brokerage. Because federal laws prohibit banks from advising customers on stock options, it purchased Charles Schwab & Co., a discount brokerage business, merely to execute customers' buy and sell orders. The customer must rely on his market knowledge, but receives a substantial discount on the commission fee in return.

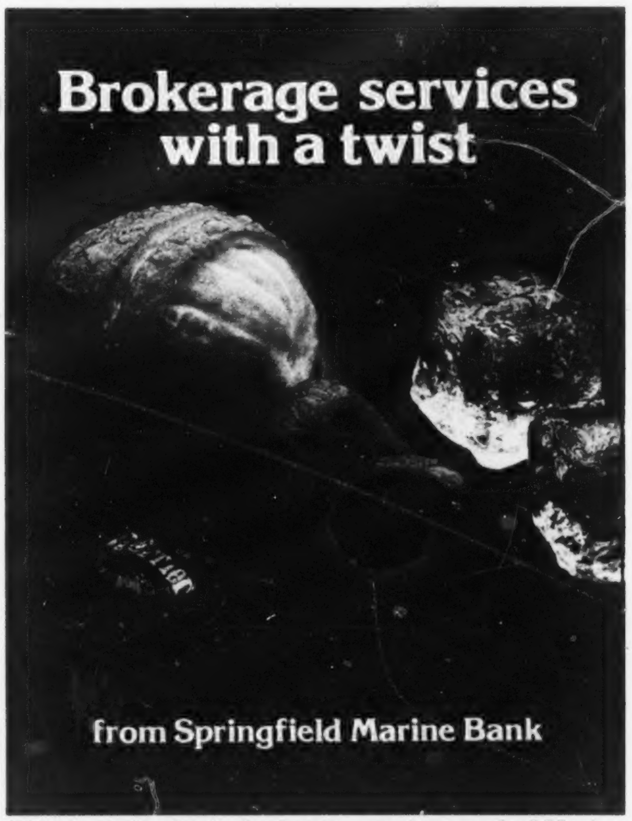
A short time later, Security Pacific Bank, Los Angeles, announced it was teaming up with Fidelity, another discount brokerage, under an agreement that allowed bank customers to transact stocks, while Fidelity continued to operate independently. Both the bank and the brokerage would get a cut from the commission.

Marine Bank officials studied both procedures, but adopted a different approach.

Marine's comparatively smaller size made buying a brokerage too expensive. It also considered a joint venture with Fidelity. But, Mr. Peyser says, Fidelity wouldn't back down from its requirement that each investor establish an account with Fidelity.

"We wanted to serve all the needs of our customers," he says. "We didn't want them opening accounts with someone else." Bank officials feared that they would be handing over their best customers to a powerful, potential competitor.

"We never felt we were endangering ourselves in our arrangement with Fidelity," says Tim Munroe, director of planning and development, Security Pacific Brokers. "Any time you enter into an arrangement with a potential competitor you must protect yourself." Security Pacific did this by adding some very specific anticompetitive clauses into its contract with Fidelity. "If they encroached on our customer list," he says, "we would not only have grounds for terminating the contract, but for taking them to court. It was never much of a problem for us."



Brokerage services with a twist
from Springfield Marine Bank

This campaign for its brokerage services marked Marine Bank's shift to a package goods ad approach.

Marine still felt that these types of safeguards weren't enough.

"What was really needed was a bank brokerage system designed *by* a bank, *for* a bank—and it didn't exist," Mr. Peyser says. "So we decided to design our own system."

To do it, they went to an old friend, Mesirow & Co., a regional brokerage in Chicago that handles Marine's trust investments. The deal that emerged gave Marine most of the advantages of the other approaches, plus some improvements, says Mr. Peyser. As in the Bank of America arrangement, Marine customers can trade stocks easily, at lower fees. As in the Fidelity setup, the brokerage executes the actual transactions. Mesirow also benefits from the deal by extending its coverage beyond its usual customers, Chicago trusts and institutions, Mr. Peyser says.

Mr. Peyser stresses that bank customers "only have an account at Marine Bank, everything they

Mergers

(Continued from Page M-20)

are company owned and the third is the franchised, independently owned First Interstate Bank of Golden.

First Interstate, which has franchised banks in Alaska, Colorado, Hawaii and Wyoming, is now doing interstate banking in virtually all but name, especially with its national network of automated teller machines. Even though branch banking is prohibited in Colorado, the bank gets around the no-branch banking rules by independently capitalizing each bank.

Financial institution franchising, which First Interstate has pioneered, vividly demonstrates the benefits believed to be associated with a big name. Franchised banks retain local ownership, but pay a fee to use First Interstate's name and its advertising and financial services. The advantage for the franchisor is that it is cheaper to franchise than to buy a bank.

Adopting the name of the larger institution flies in the face of the old dictum that a local identity should be preserved in small-town banking. Yet account activity at the First Interstate Bank of Golden has surged with its new name, according to Mr. Tabussi.

The Old Kent holding company, based in Grand Rapids, Mich., exemplified the changed thrust when it recently acquired 10 banks owned by the Pacesetter holding company.

Before the merger, the Pacesetter system was gradually changing its member bank names to derivatives of the Pacesetter name; now the change will be to Old Kent.

The process will be done gradually because the name is better known in some parts of the state, and certain banks stand to gain more from area-saturation advertising than others, according to Marty Allen, senior vp of the Old Kent system. "The farther removed from the headquarters and lead bank, the less [the name is] known," says Mr. Allen. Because of economies of scale, the name change can be easily, efficiently and profitably touted in areas where Old Kent banks are clustered.

Informing the public of the change may not be the most critical concern, however. Often, according to one executive from the Pacesetter system, the change is more traumatic for the bank employes than for the public.

"I think it's more in the bankers' minds than anybody else's," the executive says. "One of the banks changed its name four times in 15 years. I don't think it mattered to the customer one bit, so long as it offered the same quality service."

Reassuring employes that the name change is a positive step

see is in the name of Marine Brokerage Services and as far as they know they deal only with Marine Bank."

Customers can trade by telephone and have the cost or gain shown in their account for a fee based on the dollar amount of the trade. The bank charges a $40 minimum fee per transaction and a $20 signup fee. Advertising claims savings of "up to 70%" over traditional brokers, but Mr. Peyser concedes the minimum fee could make small transactions more expensive.

> **"Our philosophy was, if you can sell dog food you can sell a bank—but it doesn't necessarily work vice versa."**

Marine and Mesirow split the fees roughly 50-50. Mr. Peyser says that's four times the amount the bank would have received from Fidelity. And, of course, Marine avoided the initial costs and risks of buying a brokerage.

"Because we were one of the first in the game, people laughed initially," Mr. Peyser says. "As it turns out, we made money from day one." Marine also claims to have captured business from a number of main-line brokerage houses in central Illinois and even some national discount brokerage firms.

Another measure of the program's success is that Marine sold it to 15 other banks. Marine trains the banks in setting up a trading desk, recommends equipment and supplies camera-ready ads. Beside those banks, Mr. Peyser says, Marine remains "the first and only bank-designed" brokerage service in the U.S. "No one else does it like us. They generally sign up with someone like Fidelity."

Mr. Munroe at Security Pacific disagrees. "A year after we entered the arrangement with Fidelity, we cancelled it," he says. "That end of the business had grown to the point where it was less expensive for us to bring the operation inhouse."

The resulting system in many ways mirrors Springfield Marine's except for the fact that Security Pacific, by virtue of its size, made some substantial improvements. "We bought three brokerage houses to improve our market presence," says Mr. Munroe, "and established a clearing company in New York to carry the account names—a federal regulation. In effect, we are providing a totally self-contained brokerage service without *any* outside intervention." Security Pacific also has sold its program—but to 220 banks.

Mr. Peyser admits that until it spearheaded bank-designed brokerage operations Marine was very conservative in action, with promotion to match. When it started setting trends in financial services, however, the bank decided its ads needed a new look. The brokerage ad, a splashy four-color newspaper insert, featured the slogan, "Brokerage services with a twist." It pictured a ripe lemon, with the peel artfully carved into a swirl, ice cubes and a Perrier cap, all sprinkled with water.

The artwork was executed by Ross Advertising in Peoria, Ill. —then the bank's agency—but Mr. Peyser designed the ad and slogan himself, along with "refinements" from his staff, he says. His wife suggested the Perrier cap to appeal to the more "sophisticated" brokerage customers and to break the alcoholic connotation of the slogan. "You put a bottle of scotch in there and it's a liquor ad," Mr. Peyser laughs.

The campaign consisted mainly of newspaper inserts, although variations of the theme appeared in radio spots and direct mail pieces and on outdoor boards. Tv was not used because the bank wanted to target the audience more precisely, and Mr. Peyser says a spot that would stand up next to a Merrill Lynch commercial would have been too expensive.

The "twist" campaign was aimed at "rising professionals 35 to 40" and somewhat less to housewives. That appears to have been the right group, Mr. Peyser says, based on the response. However, the ad also reached a surprising number of elderly investors. The ad's drawing power is hard to peg because the recent stock market surge occurred simultaneously with the campaign's launch, which "obviously helped a lot," he says.

Many people were reluctant to try the campaign because it was so different, Mr. Peyser says. Most reservations were squashed, however, when the ad won National Bank Marketing Assn. awards for best print ad of 1983 and best campaign.

The series was particularly significant "because this started a whole new thing for the bank in terms of advertising and image . . . . Everything we do now is nontraditional," Mr. Peyser says.

When Marine switched agencies last May to Grey-North, Chicago, Mr. Peyser told Grey-North to treat the account as a new brand of dog food. He wasn't interested in the agency's financial services division.

"Our philosophy was, if you can sell dog food you can sell a bank—but it doesn't necessarily work vice versa," he says.

"So, we're handled out of the package goods division at Grey-North," he adds. "We wanted advertising that was unfettered by traditional bank thinking—it's worked very well."

The shift in advertising reflects the bank's drive to introduce new services and compete with national brokerages. "We wanted to put everyone on notice that in this changing financial environment Marine Bank's going to not only be a survivor, but we're going to respond to whatever needs come down the pike," Mr. Peyser says. It's a lesson more and more banks seem to have learned.

---

requires considerable internal communication. They must be assured that career opportunities are actually improved by the acquisition, says N.W. Pope, senior vp-marketing at the acquisition-minded Sun Banks of Florida. That requires "face to face communication and meetings," he says. Generally, expanded services and the new statewide identity convince the target bank's staff, according to Mr. Pope.

Older managers, who are attached to the old names and believe in the rock solid, never changing image of banks, may find the change more traumatic, says Mr. Pope. With the pace of mergers increasing, however, this reluctance is diminishing, he says.

Externally, the news must be communicated to suppliers and customers, although Mr. Pope says they seldom raise a fuss. "People do business with people, not with banks," he says. "If the bank at the corner of Main and Oak has done right by you all these years, there's no reason to believe that new signage is going to change anything."

Sun Banks usually informs these groups through newspaper advertising, "statement stuffers" and lobby displays—not tv, which, Mr. Pope says, involves too much waste. A three-week campaign is usually enough, he claims. "It's more of an information campaign than a sales campaign," he says.

With Sun Bank's recent acquisitions, the company told customers they were "tapping the power of the Sun," a campaign that works particularly well in Florida, Mr. Pope says. For smaller acquired banks, the power of expensive and skilled advertising expertise was also suddenly tapped; they found themselves deluged with advertising they might not have been able to afford on their own.

As the smaller franchised or subsidized banks are brought under the wings of their siblings, these larger banks and holding companies will boost ad budgets to cover promotional expenses for the whole family.

So instead of consolidation reducing business for the advertising community, it's likely that more ambitious and geographically expansive campaigns will result.

Acquiring banks and companies will need to establish their new banks' identities; those who hope to remain independent will have to market themselves as aggressively as their powerful rivals or be lost in the promotional shuffle.

Attracting new deposits is a gift!

And our gifts do it best!

● Let Select Awards help you develop your most successful premium incentive program to date. Our vast selection of quality brand merchandise lets you target any market (CDs, IRAs, direct mail, employee incentives, etc.). Plus we add advertising and marketing aid, collateral pieces, and complete service to you **and** your customers anywhere across the country.

Our total turnkey program benefits both you and your customers. You carry no inventory, so you pay only **after** deposits are in. Gifts are on their way to your depositors, usually within 48 hours, from our computerized expediting department.

Today's financial marketing is tough! But "gifted" financial marketers are more successful than ever.

Write for Select Awards' promotion packet and become a gifted marketer today!

Brokers: Bulldozing competitors or dozing bulls?

By Mark Liff

Financial services marketing has come to resemble a Middle Eastern bazaar. Competition for customers is fierce and discounts exist for the sophisticated shopper. In addition, new vendors offering new products are popping up almost daily. And, like their Middle Eastern counterparts, they want you to shop at only one stall.

Brokers' stalls are getting bigger and carrying more products, prompting competitors to position themselves against this industry segment. Shearson, Loeb, Rhoades now has the clout of the American Express Co.; 103-year-old Bache, Halsey, Stuart, Shields is backed by Prudential Insurance Co. of America, and Dean Witter Reynolds has the impressive reach of Sears, Roebuck & Co.

These multiproduct, multiservice megacorporations' entrance into the fray has triggered a reassessment of marketing strategies both from within and outside of the brokerage sector. "There seems to be a trend now toward packaging services, rather than unbundling," says James Settel, senior vp-director of product development and implementation at Prudential-Bache Securities, New York. "We are talking about total financial planning, as opposed to buying and selling specific securities."

Cathy Stuart, national advertising director at Shearson/American Express, New York, concurs: "We are now trying to talk to the consumer as if he were more sophisticated. We are trying to communicate that anything that has to do with a person's finances is a process rather than an event."

The brokerage industry realizes that total financial planning is the extra plus that makes a broker's service charge acceptable, Mr. Settel says. "The theory behind this is that one cannot plan for retirement by calling an 800 number." And, with banks leaping into the discount brokerage business, further segmenting their slice of the market, the brokers' strongest—and only—niche may lie in full-service investment counseling.

Robert L. Errico, a Prudential-Bache executive vp, says his company is retraining selected brokers "in the basics of financial planning." And in some cases, Prudential insurance agents are referring clients to the securities division so total financial planning can be accomplished under one roof, he says.

Prudential-Bache is relying on technological advancements to help "implement the basic fact-finding questions into our computer and come up with a boiler plate, if you will, a financial plan that we can present to our clients within 24 hours," Mr. Errico says.

To not only address a client's needs, but also to "limit his exposure to competition," Prudential-Bache is putting into place 'access window lockup,' a multiple-product delivery system, Mr. Settel says. When the brokerage house cannot provide a specific service, it enters into an agreement with a third party, thereby maintaining a relationship with the customer.

If this makes it sound as though brokers are paranoid about losing customers, it isn't necessarily so. Merrill Lynch's introduction of the Cash Management Account in 1977 put the rest of the financial services industry on notice that the brokerage houses were going to be a force to reckon with in the market. The patented account, which hit the industry where it counts—the lucrative affluent market—spurred competitors, including banks, to launch CMA clones. Citibank, for example, went head to head against the CMA with its Focus account.

And when banks started to step directly on brokers' market toes with discount stock and bond services, Prudential-Bache began a "brokerage alliance program" that put brokers in banks. The program uses the bank's client base and distribution, while the banks rely on Prudential-Bache's expertise. Both entities share commissions.

Relatively comfortable in their quadrant of the financial world, these brokers are not ignoring movements along their borders. Banks, concocting their versions of total financial planning and including discount brokerage services in the formula, may beat brokers to their market. Brokers' target audience—primarily men over 45, with incomes of $50,000 and up, according to Judy Gaviser, director of advertising, Dain Bosworth, Minneapolis—is much more upscale than most banks, although they are concentrating on the affluent market more extensively. If the banks can involve potential affluents in their programs before they are reached by brokers' marketing efforts, brokers may face a rapidly evaporating market.

To head off the effects of a depleted client base, Mr. Settel says, Prudential-Bache is going after "the near-affluent or the to-be-affluent." These, he says, are individuals earning around $35,000, either "early professionals" or "blue collar affluents."

Heightened competition also has required a change in planning strategies, says Mr. Settel. "Strategic planning has been shortened dramatically. A five-year plan is no longer acceptable. We are talking about tactics becoming a part of strategy."

And at Shearson/American Express, David Pottruck, senior vp-marketing, discusses more radical changes. "We really didn't have a marketing strategy until a few years ago," he says. Shearson essentially had relied on "a sales strategy because brokerage firms in general, and Shearson in particular, had been a selling-oriented company."

While selling is "a distribution-oriented activity in terms of promotion and strategy," the new effort is "a blend of consumer-oriented strategy combined with a distribution-oriented strategy," Mr. Pottruck says.

With all of the repositioning, new competitors and new products, this should be fertile ground for innovative advertising. But because brokers still consider their main competition to be other brokers and because everyone is essentially selling the same things, says Perrin Long Jr., an analyst with Lipper Analytical Distributors, advertising by securities companies "is primarily an effort to identify with the customer a particular firm, more than with a product." Those who've seen too many roving bovines or silenced sailors—at the mention of a particular company's name—couldn't agree more.

Brokers bank on advertising to protect market share

Jan.-June, 1983
$(000)

Sources: Leading National Advertisers,
Radio Advertising Bureau

Those at Shearson might not agree, however. Shearson significantly boosted its advertising budget and changed its concept, moving beyond name identification. Inhouse research analyzed changing consumer spending patterns and opinions, and ads reflected these changes, Mr. Pottruck says. Ad campaigns now discuss the consumer's financial goals, explaining that numerous products are available to help with one's over-all financial objectives.

Two-minute radio commercials review the week's financial news, focusing on a big story. But a major portion of the ad also includes Shearson's point of view on that story, Mr. Pottruck says. Shearson also runs informational ads in the *Wall Street Journal* that talk to the "educated financial services consumer," he says. The effort, handled by McCann-Erickson, stresses that the company "wants to work *with* you, not *for* you," Mr. Pottruck says.

Dain Bosworth also believed name identification was crucial at first. The company began a more than $1 million ad campaign to get its name recognized, according to Ms. Gaviser. "The name changes, mergers and acquisitions have been legion over the years," she says. "We needed to get our name out. We didn't really sell particular products."

The ads, which said, "Dain Bosworth delivers opportunity," promoted the company's experience and knowledge. "We emphasized information. It's much better to go out and sell your expertise as a resource."

Merrill Lynch, the generally acknowledged industry innovator, is taking its message a step further. A recent print campaign still has the name orientation, but using a question-answer format, it ties into a product Merrill Lynch offers. For example, one ad asks, "Who offers more than 50 kinds of IRA investments when most people tell you one is enough?" A secondary head answers, "Who else but Merrill Lynch." The body copy goes into greater detail on the product, mentioning the company's experience in over-all financial planning.

Whether the brokers will take an even more aggressive stance against their new competitors is yet to be seen. If anything, they still have room to move into the product-oriented advertising that has characterized the other institutions' campaigns. As Ms. Gaviser says, Dain Bosworth has not done any head-to-head advertising against banks. "We think more about competition from other brokers than banks."

Funds come out of the marketing closet

By Mary McCabe English

If the words "mutual fund" conjure up images of doleful widows and pathetic orphans, run—don't walk—to the nearest copy of *Money* or the *Wall Street Journal* and elevate your investment IQ into the '80s.

Yes, it's true that mutual funds were once the domain of investors who didn't know what to do with their money. However, spokesmen for several funds claim their investors are increasingly sophisticated, socking money into various vehicles, including mutual funds in the mix because of their stability, liquidity and flexibility. Their reputation for effective management doesn't hurt either, the fund executives maintain.

The funds' growth over the last few years have been phenomenal. Industrywide sales for 1983, excluding the high performance money market funds, were $40 billion, compared with $15.7 billion for 1982 and $5.8 billion for 1972, according to the Investment Company Institute (ICI). The growth is even more impressive in light of a 1974 dip to $3.3 billion in sales.

A number of factors are responsible for mutual funds' dramatic growth, not the least of them being an increasingly high marketing and advertising profile. For another thing, as the funds diversify their product, they automatically broaden their appeal. Between 1940 and 1965, most mutual fund assets were invested in common stock. Today, the industry offers a variety of products that attract an expanded, generally upscale customer pool.

The 1979-80 money market fund period brought a lot of newcomers into mutual funds. More recently, the advent of popular retirement savings plans, like Individual Retirement Accounts and Keogh accounts, have done the same thing.

Says Victor Kramer, director-retail product management with the Fidelity Group in Boston: "IRAs are an important bridge to the middle market, just as money market funds gave mutual funds entree to the upper market back in the '70s. The same is true of IRAs. We wrote about 300,000 of them last year, and among them were a lot for people considerably below our normal demographic patterns."

Rudolph D. Watz, vp-director of retirement plans with Value

Maxwell

(Continued from Page 3)

the High Point vacuum ground, which has been testing in Portland, Ore., and in Cincinnati and Dayton, O., since 1975.

A P&G spokesman declined comment on these reports.

The new Maxwell House entry, which is being shown to the trade, initially will come only in ground-roast form in 13-oz. and 26-oz. sizes for automatic and electric and range perculators. The cans carry the Maxwell House logo, with colors different from regular Maxwell House, and "decaffeinated" printed in large letters.

Advertising, predominantly tv and an array of such consumer promotions as direct mail, coupons and freestanding inserts, will break April 2 via Ogilvy & Mather. According to a GF spokesman, the campaign will hammer a "good taste" message to capitalize on the Maxwell House heritage.

The tv spots feature young adults sitting at sundown, having just finished dinner. GF says they are enjoying a cup of coffee, presumably Maxwell House decaffeinated, while eating dessert. Meanwhile, the voiceover will note, "Introducing the only decaffeinated coffee with the delicious taste of Maxwell House."

As such, the campaign clearly hopes to distinguish the brand from both Brim and Sanka, the latter of which has adopted a people approach.

GF says the new entry will build the decaffeinated market, rather than steal Sanka and Brim loyalists.

The company further maintains that the three brands command their own distinct, somewhat exclusive markets. GF contends that the Maxwell House entry will make a name for itself by wooing drinkers reluctant to drink a brand without a strong caffeinated taste credential.

A GF spokesman described the new product's audience as being slightly younger—say 30-plus—than Sanka and Brim drinkers, who tend to be 40-plus and 35-plus, respectively.

Nonetheless, analysts predict some cannibalization of existing brands, the fear of which may influence the introductory budget and the weighting of the tv buys.

GF, the nation's sixth-largest national advertiser, would not disclose budget figures, but sources close to the company believe it will be substantial, at the least matching the spending of other decaffeinated brands. Estimates are that GF backed both Sanka and Brim with more than $20 million during 1983, with P&G's High Point budget projected at $15 million.

And both companies' potential to spend is great: When P&G introduced High Point with a $30 million budget, GF quickly increased Sanka's spending to the same amount.

"A move like this is designed to make your competitors, in this case P&G, very, very nervous," said Jack Salzman, who follows both companies closely at Smith Barney Harris Upham, New York. "And believe me, this is the last thing P&G needs. They'd better do something quick."

Although its growth has slowed a bit in recent years, the decaffeinated market still represents the most enticing in the $4.5 billion coffee industry. Decaffeinated entries now boast some 30% of the instant coffees and 10% of vacuum ground, a figure that appears to be mounting.

According to figures compiled by John Maxwell of Lehman Bros. Kuhn Loeb, Sanka can claim 3.7% of the total ground-roast market; Sanka instant 10.5% of the total instant market, vs. Brim's 4.3%. Late last year, the company introduced a ground-roast version of Brim, but it is too early to tell how it is doing.#

Beer makers try new tacks

(Continued from Page 2)

from each other.

The A-B and Bally agreement is one example. It marks the first time a brewer has licensed one of its product names with a videogame.

The game's graphics will feature barroom settings that picture the Bud logo and Bud bottles. When a player scores, the game will play the brew's theme music.

"This is simply one more way of giving the product visibility and keeping it on the customer's mind," says Manny Goldman, beverage analyst with Montgomery Securities, San Francisco. "It's not monumentally significant."

Indeed, A-B is being rather low-keyed about the new venture.

"It's not a major marketing move for Budweiser," says a spokeswoman. "It is just one project where the Budweiser name is being licensed."

But the videogame is considered a pr gamble by some industry people. They contend the perception could surface that A-B is becoming involved in an area that appeals mostly to children and teen agers.

"It could end up being another Chelsea," says a competitor, referring to a soft drink A-B tested in the mid-'70s that contained a trace of alcohol. That beverage incurred the wrath of consumer groups charging A-B with selling "baby booze," and it was eventually discontinued.

Miller is also concerned about the image of its flagship brand. High Life suffered another bad year in 1983, dropping from 1982's 20.3 million bbls. to 17.5 million bbls., according to Mr. Goldman.

It also dropped an estimated 3 million bbls. in 1982. That decline sparked Miller's bringing on a new upbeat "Welcome to Miller time" campaign via Backer & Spielvogel.

Miller declined to give an official reason for asking the other agencies to do the "exploratory work" on the High Life brand. Apparently it had been in the works for more than a month.

There is a potential complication, at least for Ogilvy & Mather, New York, which is vying for High Life while its San Francisco office handles G. Heileman Brewing Co.'s Blitz-Weinhard business.

The agency contends the separation of offices diminishes any client conflict.

Ad spending for High Life is nearly $50 million, compared to Blitz-Weinhard's estimated $4 million.

These changes come at a time when the brewing industry is lurching.

Although most of the major brewers chalked up modest gains, the over-all industry remained flat at about 179 million bbls.#

Sports Time sets ads

By SUSAN SPILLMAN

Sports Time, the midwestern pay cable network owned by Anheuser-Busch, Multimedia Inc. and Tele-Communications Inc., is preparing for its April 3 launch with a $1 million affiliate and consumer advertising campaign.

Breaking in 15 cities in late March, the campaign will center on the theme, "Sports Time. We're playing the games you don't want to miss."

D'Arcy MacManus Masius, the major agency for A-B's beer brands, is in charge of Sports Time's consumer effort, while Cincinnati-based U.S. Communications is handling the affiliate co-op promotion. About $500,000 will be spent on each.

Sports Time will launch with a free 15-day trial offer to subscribers of affiliated cable systems in an 11-state region. The cable network will debut with the St. Louis Cardinals' opening game of the Major League Baseball season against the Los Angeles Dodgers.

Those who sign up for the service, which will cost between $9 and $12 a month, will receive a free subscription to one of several national sports magazines, said Tim Browne, director of marketing for Sports Time. Details have yet to be worked out, he said.

According to Mr. Browne, 45% of the consumer and affiliate co-op campaign will be spent on print, 30% on tv, with the rest divided among radio, outdoor and direct mail.

Sports Time expects to launch with 150 to 200 cable system affiliates and expects 30,000 subscribers by May 1, Mr. Browne said. By year's end, the network expects 150,000 subscribers. The service will be available in Arkansas, Colorado, Illinois, Iowa, Kansas, Kentucky, Missouri, Nebraska, Ohio, Oklahoma and Tennessee.#

'Marketing & Media's' Swan dies

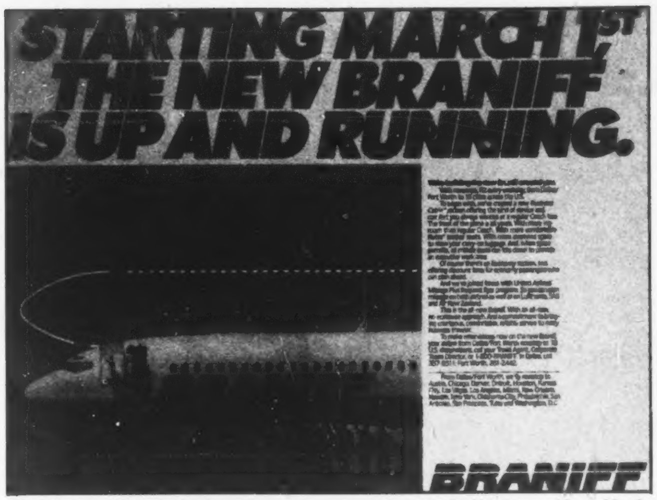
Norwalk, Conn.—Carroll J. Swan, editor emeritus of *Marketing & Media Decisions* and a 30-year veteran of the media trade press, died of cancer Feb. 5 at Norwalk Hospital here. A resident of Wilton, Conn., Mr. Swan was 69.

Mr. Swan received the title of editor emeritus last year after illness forced him to step down as editor of the advertising trade publication that he had been associated with since 1968.

During that tenure, Mr. Swan became known and respected by most leaders in the advertising and marketing industry for his vast knowledge of the field—the culmination of a lifetime of observing and recording its growth.

Mr. Swan left *Marketing & Media Decisions* in 1983, suffering from his illness. He was editor of the advertising trade publication.

Mr. Swan joined the former *Printer's Ink* soon after receiving a degree from Harvard University in 1937. He later served in the Army Signal Corps for 4½ years during World War II, serving in Europe. He returned to *Printer's Ink* after the war and later joined *Media Scope*, serving as the publication's managing editor for four years before being hired by *Media Decisions* in 1968.#



STARTING MARCH 1ST, THE NEW BRANIFF IS UP AND RUNNING.
BRANIFF

Braniff begins its $10 million ad campaign via N W Ayer, New York, today with this newspaper spread that positions the revived airline as the "all-new, no-nonsense airline."

Braniff is singing

(Continued from Page 2)

expects to appeal to executives.

Refurbished interiors of the airline's 30 727-200s include all-leather seats in an all-coach configuration with three seats on each side of the aisle. The middle seats on each side of the plane have backs that fold down to form a table-like surface with depressions for cups. But unlike other airlines, the backs of those middle seats remain in place to assure privacy.

The forward section aircraft is designated the Business Cabin, where full coach-fare passengers will be offered complimentary newspapers and meal service.

Passengers with special or discount-fare tickets will be seated in the aft cabin behind the partition but in the same seating arrangement.

Most of Braniff's ad budget will be allocated to print and radio, but tv spots will air in five markets, according to Mr. Lagow. N W Ayer, New York, is the agency.

In the joint promotion with the March of Dimes, Braniff will issue millions of rebate coupons through March of Dimes volunteers and supporters and through travel agencies.

When attached to a passenger's ticket, the coupon will trigger a 5% rebate and a matching 5% donation to the March of Dimes. The promotion will continue through June 15 with the theme, "Fly Braniff for the March of Dimes."

Braniff also plans an invitation-only "Stars Salute to March of Dimes," featuring country singer Lynn Anderson and the Beach Boys in concert March 3 in Dallas. Mike Love, lead singer for the Beach Boys, appeared with Braniff officials at a news conference here last week and described William Slattery, Braniff president, as the "Lee Iacocca of the air," comparing Mr. Slattery's efforts to revive Braniff to Mr. Iacocca's efforts to revive Chrysler Corp.

The airline has emerged successfully from Chapter 11 bankruptcy proceedings after an almost two-year battle.

Sources at American Airlines, one of Braniff's chief competitors, said Braniff will have an impact on American's business. The airline's return will stimulate keener competition, an American Airlines spokesman said, declining to be more specific.

The Civil Aeronautics Board last week granted a Certificate of Public Convenience and Necessity to Braniff, declaring the airline "fit, willing and able" to resume air travel, presuming the Federal Aviation Administration gives its final approval, which Braniff said it expects about Feb. 22.#

Iroquois Brands buys LaSauce from Armour

Phoenix—Armour & Co. has sold its LaSauce baking sauces to Iroquois Brands, as the latest move in a company drive to rid itself of lagging aspects of its business.

Sources within the Greyhound Corp. unit said it sold the cooking sauce line to the Greenwich, Conn.-based specialty foods marketer "because it was not meeting company objectives."

But those sources deny speculation the company plans to sell its remaining Armour-Dial food products, which include Armour Star shelf-stable canned meats and Appian Way pizza mix. Six months ago, Armour sold its Armour Food Co. division to Omaha-based ConAgra (AA, July 4).

The two flavors of LaSauce Chicken baking sauce and the single-item LaSauce beef baking sauce, marketed nationally, will become part of Iroquois Brands' Stamford, Conn.-based Iroquois Grocery Products subsidiary.

Sources within Armour admit LaSauce baking sauces did not live up to the company's expectations.

During 1982, Armour-Dial spent just more than $3 million on LaSauce via Foote, Cone & Belding/Honig, San Francisco, but measured media spending for the first nine months of '83 dropped to less than $100,000.

James P. McCaffrey, president and chief operating officer of Iroquois Brands Ltd., said that while the company will continue to seek acquisitions to complement its product groups, "the primary focus will continue to be on generating internal growth through increased market penetration and by introducing new products and product line extensions."#

WILLIAM B. CECIL

New York—William B. Cecil, a 30-year veteran of the magazine advertising sales field, died here of cancer Feb. 4. He was 60.

Mr. Cecil was vp-advertising sales for *Venture*, which in 1983 enjoyed the best year in its history. He joined the monthly from the Goldhirsh Group where he held various sales posts with *Inc.* and *High Technology*.#

Videogame cartridge sales

An estimated 80 million cartridges were sold in 1983 with perhaps a third heavily discounted. With a year of shakeout behind them, the survivors should return to profitability in 1984. *Source: Goldman, Sachs & Co.*

Company	Atari VCS system	Other systems	Total units (Millions)	Share (Per cent)
Atari	26	5	31	39
Mattel	4	8	12	15
Activision	9	2	11	14
Coleco	3	5	8	10
Imagic	5	1	6	7
Parker Bros.	4	—	4	5
Other	8	—	8	8
Total	59	21	80	100

Videogame rebound seen

New York—The loss-plagued videogame business has reason to be optimistic while the burgeoning home computer industry will have to stretch to maintain momentum, according to a report from Goldman, Sachs & Co. here.

The videogame industry, though shrinking and awash in red ink, is poised to return to profitability in late 1984 as the glut of game cartridges subsides and a shakeout leaves the field to fewer players, the report says.

The home computer market, whose growth has been predicated largely on low prices, needs other hooks to stimulate sales because the saturation point has been reached for selling on the basis of price alone. Still the report sees the software arena for home computers shaping up as the high-growth category in both fields.

The Goldman, Sachs report, compiled by analyst Richard P. Simon, predicts the present glut of videogame cartridges, or software, will ease by the fourth quarter.

"Of the estimated 80 million cartridges purchased by consumers in 1983, we estimated that. . .perhaps a third of the total purchased were distress sales, less than $8 a title," Mr. Simon said. "Atari, Imagic and Mattel were the major dumpers.

"In our judgment, perhaps more than 50% of annual sales of game cartridges occurs in the four-month period from November through February, and even a greater percentage of console sales," Mr. Simon said. "As a result of this, and the fact that we expect the flood of liquidation cartridges to abate by mid-1984, Christmas, 1984, could be a very healthy environment."

His projections are in line with those made within the industry, although Wall Street analysts have been pessimistic or noncommital about videogames.

Videogame hardware and software retail sales will be about $1.5 billion this year, down from $1.9 billion in 1983. The industry's peak year was 1982, with retail sales of $2.7 billion, Mr. Simon estimates.

The hottest segment shapes up as home computer software, which will reach $700 million in 1984, compared with $250 million a year before. This has pushed marketers to market their hit cartridges in leading home computer formats.#

TLK in line for all of Activision

By JENNIFER PENDLETON and RUTH STROUD

Activision and J. Walter Thompson USA have ended their more than three-year association, after the home videogame marketer called for a review in which JWT and co-agency Tatham-Laird & Kudner would compete.

Company vp-marketing Tom Restaino said it is likely Activision, Mountain View, Cal., will consolidate its business at Tatham, but that a final decision has not yet been made. While Tatham alone is preparing new advertising materials to present to Activision, Mr. Restaino described the current state of affairs as a "review." He said he will make a decision about the account in early March.

James K. Agnew, exec vp-JWT/West, San Francisco, said in a statement issued late last week: "Upon evaluation of the changing consideration of the industry, we believe that Activision's different and reduced advertising needs are better serviced at this point by another type of agency."

Noting that the electronics industry—and the videogames business in particular—is in the throes of change, Mr. Restaino said Activision hopes to develop a new strategy that will help it turn itself around. The company intends to concentrate a large part of its resources in developing and marketing videograme entertainment software for home computers.

In the first nine months of fiscal 1983, Activision had net sales of $49.6 million and a loss of $12 million, compared with net sales of $112.8 million and income of $13.5 million in the prior year.

While Mr. Restaino declined to specify Activision's past or current ad budget, sources say that over the last year it has dwindled from the $35 million to $40 million level to less than $10 million.

Tatham has been working on a tv campaign for Pitfall II, the sequel to Activision's worldwide best seller, Pitfall. JWT launched Pitfall 18 months ago.

Activision named Chicago-based Tatham as its second consumer agency in April last year.#

Unit reborn as Intellivision

Hawthorne, Cal.—Mattel Electronics division will be renamed Intellivision Inc., after the videogame system that is its primary product, when it is spun off from Mattel Inc. (AA, Feb. 6).

According to Terrence Valeski, Mattel Electronics senior vp-marketing and sales, who will head up the new company, the transfer of the Mattel unit is expected to be completed in about a month. The selling price is $20 million.

His partners in Intellivision Inc. are Ike Perlmutter and Bernard Marden, who own Odd Lot Trading, a New York retailer.

Mr. Valeski said ad plans call for continuing spot tv and print, with network tv during the Christmas season. Mattel spent $55 million in advertising in 1983. He said he hopes Ogilvy & Mather, New York, will continue on the account.

Intellivision acquired the right to use existing Mattel ads, minus the Mattel name, Mr. Valeski said. Advertising Age erroneously reported earlier that the agency had bought back rights to those ads.#

Olympics

(Continued from Page 1)

1988 Summer Olympics. Most observers said the 1984 Winter Games opening ratings were hurt by the delay in broadcasting the U.S. vs. Canada hockey game in prime time Tuesday, which allowed most people to learn the outcome before ABC could show the game. In Seoul, South Korea, where the '88 Summer Games will be held, the delay between event and broadcast will be even greater.

ABC's pregames promotion made much of the U.S. hockey team's "miracle" win over Russia in the 1980 Lake Placid games and its subsequent gold medal. That was dampened by this year's team's opening loss to Canada. ABC's hopes that interest in the hockey competition could rebound were dashed Thursday when Team USA lost its second straight match, this time to the Czechs.

Weather woes, too

As if time differences and the second hockey defeat weren't enough, ABC suffered delays of another sort when fog and heavy snow forced postponement of the first downhill skiing events on Feb. 9 and 10. ABC, which had planned 8 p.m.-to-11 p.m. (ET) coverage, instead wrapped up at 10 p.m. and inserted a "20/20," featuring all-rerun segments; Barbara Walters was brought in to handle live wraparounds.

ABC at press time said its Friday, Feb. 10, coverage hours (7:30 p.m. to 11 p.m.) would not be reduced by the second downhill delay.

Although its archrivals were quick to revel in ABC's poor showings to date, more objective observers cautioned against writing off the Olympics as a big event just yet. ABC isn't ready to drown its sorrows in slivovitz, Yugoslavia's strong plum brandy. Viewer interest levels could pick up as interesting competitions occur later in the games, involving U.S. skaters Scott Hamilton, Rosalynn Sumners and Elaine Zayak and skiers Phil and Steve Mahre and Tamara McKinney.

But ABC's seasonlong and February sweeps averages have been deflated by the first two nights' data. CBS statisticians estimated ABC would have to surpass CBS by two rating points a week for the remainder of the season to win. If ABC cannot generate that margin in the first Olympics week, it will be hard-pressed to do so later on.

ABC began its Sarajevo offerings on Feb. 7 by preempting prime time series fare for "The Gold & Beyond," a potpourri of pretaped U.S. vs. Canada hockey coverage blended with highlights from the 1980 Lake Placid games, previews of potential 1984 medalists plus some Olympics-themed songs sung by John Denver.

Time lag a killer

However, ABC appeared to have been done in by the fact that most viewers already knew Canada had won the hockey contest hours earlier, and by the special's surprisingly low-key pace.

With the Lake Placid coverage in 1980, ABC won the first three nights of Nielsens, with a 31 share the first night, a 36 the second evening and a 33 share the third.

CBS couldn't capitalize on ABC's dire straits—but NBC certainly did Tuesday: Its average for the night was a hefty 23.9/36.

National Nielsens for Feb. 8 showed ABC a close second to NBC for the night (16.2/25 to 16.9/26), as CBS lagged (15.7/24). ABC, whose opening ceremonies coverage had a 17.2 rating/27 share nationally, lost key momentum by opening with a first-run "20/20" at 8 p.m.; sponsored chiefly by Du Pont, it had a 21 share, compared to a 22 for CBS' Bugs Bunny special and a 27 share for NBC's "Real People."

Overnight Nielsens for Thursday, Feb. 9, showed ABC with a 14.6/21 average for the six metered markets, with NBC once again the main beneficiary of the Olympic tuneout. NBC won that night in New York, Chicago, San Francisco and Philadelphia; CBS narrowly won over NBC in Detroit but clearly over NBC in Los Angeles.

ABC's Olympic coverage that night had a 20 share in New York, Chicago, Los Angeles and Detroit, a 23 in San Francisco and hit a peak of 27 in Philadelphia. In each market, "20/20" lost points in ABC's closing hour.

The fact that the Feb. 7 hockey game and opening ceremonies, both pretaped, scored so poorly has led many tv and advertising execs to wonder just how attractive the 1988 Seoul Summer Olympics would be at any price. Virtually all Seoul coverage will be telecast in the U.S. 14 hours after the fact.

Even Barry Frank, senior vp, International Management Group, last fall painted a similar picture as a way of making the 1988 Winter Olympics in Calgary more attractive. At that point, IMG was handling tv brokering only for Calgary; earlier this year, IMG got those duties for Seoul as well. As for Calgary, ABC's announcement on the rights indicated only that "much" of the Calgary coverage would be live, as opposed to "most." But most delays would be "only" three or four hours.

ABC's coffers late last fall were swelled with nearly $190 million in Sarajevo Olympics ad revenues (AA, Nov. 14), and ABC execs have admitted to scoring a small profit. ABC is known to have spent $91.5 million on the tv rights and is believed to have allocated $90 million-plus to production and promotion costs.

Paul Schulman of Gardner Advertising's Paul Schulman Co. network tv buying subsidiary, New York, belongs in the camp that doubts ABC can repeat that feat or post a profit on its 1988 Calgary Winter Olympics investment ($309 million in rights alone). "In fact," he said days before the '84 games began, "I don't think the Winter '84 Olympics is going to be as big as people think," in large part because people will learn the winners of many events in advance.

A 'tough sell' expected

Snaring the Calgary rights "is great for the [ABC] affiliates and it's prestige for the network," he continued, "but it'll be tough to sell it all out." As for pricing of the commercial time, "I haven't the foggiest," except that it will be well beyond the $225,000 average 30-second spot for the summer '84 games. "It's great [for advertisers] if they merchandise it and tie in a lot of things," he cautioned, "but not as a straight media buy." His shop's major client, Ralston Purina, is not an Olympics backer.

There also are some cynics who believe that the Calgary rights were auctioned just before Sarajevo began, in case the '84 Nielsens couldn't match expectations and dragged down the rights fees.#

Not so Sterling idea?

By JOHN J. O'CONNOR

In an apparent attempt to outluxury Philip Morris Inc.'s Players, R.J. Reynolds Tobacco is boldly associating Sterling, its newest smoke, with such prestigious offerings as Porsche automobiles and Dom Perignon champagne.

On the face of it, the idea of cigaret advertising that achieves an instant luxury ruboff by featuring and naming products that have long been the trappings of the rich and famous, is nothing short of sterling, one might say.

But then, there's a little matter Winston-Salem, N.C.-based Reynolds apparently neglected to take care of before Sterling advertising broke recently in Florida, the lone state where the product was tested. RJR and its agency, Ted Bates Advertising/New York, did not obtain approval to feature those products in the ads.

A source at Schieffelin Inc., importer of Moet & Chandon's Dom Perignon champagne, confirmed that company lawyers have been alerted to the unauthorized use of the product. The same exec said while copy in the ad tries "to cash in on Dom Perignon" in a positive way ("It's only a cigaret like Dom Perignon is only champagne"), "there are a lot of negatives associated with cigaret smoking."

Porsche execs in Warren, Mich., also were surprised to learn that one of their legendary sports cars will be shown and identified in the first national advertising for Sterling starting in April (AA, Feb. 6). However, there was no immediate comment. But a company source said whenever "anyone wishes to use Porsche for ad purposes, they have to supply complete copy and layouts to us for approval."

With the controversy beginning to build—RJR now is saying that the products in the test ads may not be part of the national introduction and that replacements are being considered.#

CBS reports drug survey

By NANCY GIGES

New York—Traditional sources of medical information, the family physician and local pharmacist, still are considered the most useful sources of information about safety and effectiveness of prescription drugs, according to a CBS study relating to prescription drugs.

CBS noted that, in light of the controversy over direct-to-consumer advertising of prescription drugs and the Food & Drug Administration's call for more research, it has conducted this survey to document consumer attitudes and behavior toward prescription drugs (AA, Feb. 6).

The FDA currently has a moratorium on prescription drug broadcast advertising. The CBS report on attitudes was designed to provide documentation for the ensuing debate over whether prescription drug marketers should be allowed to advertise on tv.

The report indicated that consumers feel a lack of control and involvement in their medical situation, which additional information would overcome. They believe that society is overmedicated and overprescribed, and that the high patient-to-doctor ratio, the high cost and inconvenience of office visits, anxiety over illness and unfamiliarity with medical topics contribute to an anxious public.

In-home interviews were conducted with a nationally projectable sample of 1,233 consumers with prescription drug experience. The results are projectable only to the 77 million U.S. households with previous drug experience.

Currently, 95% of households found their physician useful as a source of information; 84% cited their pharmacist; 70%, the label; 63%, package inserts; 33%, mass media, and 25%, family and friends. More than one-third of all households use the *Physicians' Desk Reference* for information, and 18% own one.#

NBC ratings golden as ABC Olympics lag

By DIANE MERMIGAS

Rough-and-tumble action series helped give NBC strength against ABC's Olympics telecasts, boosting the third-ranked network to its first weekly victory of the season.

Those series also appeal to the male sports viewers ABC was counting on for its Olympics audience.

NBC's "The A Team," which was the top-rated show of the season's 20th week, ended Feb. 12, made one of the strongest series showings against Olympics fare Feb. 7, averaging a 26.8 rating and 38 share. Two of NBC's other action-oriented Tuesday series—"Riptide" and "Remington Steele"—also dominated the competition with 23.5/34 and 21.4/37, respectively.

By comparison, the opening night of ABC's estimated $200 million coverage of the XIV Winter Olympics Feb. 7 drew an 11.6/18.

CBS' male-appeal dramas Thursday—"Magnum, P.I." (24.3/36) and "Simon and Simon" (26.4/38)—also outperformed the Olympics, which averaged 13.7/20 Feb. 9.

However, at the beginning of the second week of the Olympic telecasts, the stiffest counterprograming challenge came from NBC's six-hour miniseries "Celebrity." On Feb. 12, the debut of "Celebrity," which had a strong female skew, averaged 21.2/33, and a preceding episode of "Knight Rider" averaged 20.7/30, beating both the Olympics on ABC and CBS' regular Sunday series lineup.

Fewer U.S. Olympians expected to get endorsement deals. See Page 70.

The second night of "Celebrity," on Feb. 13, garnered 21.4/33 over CBS' regular series (which tied NBC with a 21/31 average for the night) and ABC's Olympics coverage (20.8/31).

The Feb. 14 conclusion of "Celebrity" averaged 24.9/37 with an "A Team" lead-in of 22.7/33. The Olympics averaged 21.9/32 for the night. A Disney special and the first half of "Gone with the Wind" on CBS mustered only 13.1/18.7.

In the previous week, both NBC and CBS primarily

Playtex's Almay tries mass-Clinique image

By PAT SLOAN

International Playtex's family products division will introduce its new line of Almay hypo-allergenic antiperspirant/deodorants in April with an estimated $5 million advertising campaign. The move had been expected (AA, Jan. 2).

Packaged as solids, sprays and roll-ons, the new deodorants will replace the decade-old but low-volume roll-on and spray Almay Cheq line. The new effort marks the beginning of a complete Almay toiletries line that also will be developed and marketed by the family products division in Stamford, Conn. Almay's cosmetics and skincare products will continue to be handled through Almay's New York headquarters.

Next on deck for toiletries, retailers say, are new hair sprays and shampoos.

The high-visibility extension of the Almay hypo-allergenic image is being read by retailers as an effort on the part of Playtex to make Almay the "Clinique" of the mass market.

Clinique, an independent subsidiary of Estee Lauder Inc. formed long after the 50-year-old Almay, has become top-of-mind with both male and female consumers looking for gentle but effective fragrance-free cosmetics and toiletries in department stores.

The new Almay deodorants are 100% fragrance free and will be sold in drugstores only. They will be targeted at both men and women with sensitive skin with the theme, "Almay Hypo-Allergenic. . .because everyone can have sensitive skin."

Prime and daytime tv begins April 16, while print ads will break in the May issues of magazines. Geer, DuBois handles.

Refund coupons in magazines and newpspapers as well as cross-ruff coupons in packages of Almay mascaras and Jhirmack shampoos also will be used to promote the brand. All together, Almay plans to distribute 100 million coupons with the first—a 30¢-off offer—scheduled for May, reaching 36 million households. Two more drops are planned later in the year, in addition to 2 million cross-ruff coupons.

Like Revlon's Mitchum brand, the Almay line will

Surpass in tests

WAYNE, N.J.—Pleased with the results of its relatively new Lady's Choice deodorant, American Cyanamid's Shulton is now coming out with a another new entry—called Surpass—that is packaged in an innovative dispenser.

The men's product, which comes in a bottle with a hard-surface-yet-porous dome applicator, is undergoing controlled-store tests in California. The company also has been conducting tests of tv commercials for the brand in another market, Atlanta.

Tv spots in animatic form open with an announcer: "I'm using this hairy arm to show you a breakthrough in men's antiperspirant. New Surpass. With this unique dome applicator." The spot claims it goes on clean, not messy like a roll-on, not waxy like a solid and doesn't scatter like an aerosol—it "releases a clear fast-drying formula which leaves nothing behind but all-day protection. New Surpass, the dome antiperspirant for men."

The ad agency was not determined at press time.#

Business push on by AT&T

By ROBERT RAISSMAN

American Telephone & Telegraph Communications will break an estimated $40 million business-to-business campaign today in an effort to create a distinct brand image for its business long-distance services and other applications.

An AT&T spokesman declined to confirm or deny the budget figure, but the media schedule indicates the expenditure being put behind the new effort.

The campaign will involve roadblock buys on all three tv networks' early evening news. Two 60-second commercials will run through the third quarter on news, sports and prime time network tv. Thirty-second versions will run during the second quarter through the end of the year, augmented by a print campaign in newspapers and business magazines.

The budget is in stark contrast to past expenditures by the division that targets business with "800" numbers, Wats lines and teleconferencing. During the first nine months of 1983, AT&T Communications invested $212,600 in measured media, according to Leading National Advertisers.

LNA put the division's 1982 bud-

(Continued on Page 70)

Lab-to-rollout becoming more traveled test path

By Richard Edel

When product managers at Richardson-Vicks came up with an idea for a new beauty soap, they knew they had to move quickly. Concerned about the time, cost and openness of test marketing, they risked national launch of Olay Beauty Bar last July on the basis of simulated test marketing (STM).

Earlier in the year, Richardson-Vicks introduced Climacel, a protective moisture cream, into the Australian package goods market exclusively on the basis of favorable results from STM.

The fact, notwithstanding, that both products presumably performed well, most research specialists say it is a relatively new phenomenon that marketing managers have the confidence to launch new products or line extensions on the basis of STM.

For Richardson-Vicks, skipping the test market phase of new product development was less risky than one might think, according to Jim Figura, corporate director of market research.

"We are using STM in these cases to either accelerate the introduction of a product or to avoid test marketing," Mr. Figura explained. "Before we do any kind of STM, we would have to have a thorough understanding of the market and of the consumer. Because we have a very extensive background in skin care products, we can move rather quickly. It really is not the same as if we were trying to enter a totally new category."

Richardson-Vicks' Mr. Figura says an important reason for the increasing use of such techniques is the accuracy of market share predictions. Richardson-Vicks has conducted about 15 ASSESSOR pre-test models worldwide since 1978 and results have been highly accurate both in terms of substantiating research generated by Richardson-Vicks and in terms of making reliable market share predictions, he said.

Verification of the accuracy of STM models is the most significant advance Mr. Figura sees in the use of laboratory testing. STM has become a major go/no-go checkpoint for many companies in making new product national launch decisions. A major function continues to be reduction of risk by identifying products that may be big losers, he noted.

Research appears to confirm Mr. Figura's assessments. Competitive tracking by Richardson-Vicks on 22 categories of health and beauty aids produced by 108 companies shows a substantially higher probability of success in new product introductions

(Continued on Page M-40)

Richard Edel is a Chicago-based free lance writer.

Sometimes the way to sell more is to sell less.
Climacel.
Now. Clean Skin With The Touch Of Innocence.
New Olay Beauty Bar.

Climacel protective moisturiser is now nationally available in a 50g jar with a R.S.P of $6.75.

This follows a test market in South and Western Australia, where both the smaller 50g size and the regular 100g size were sold side by side. The results speak for themselves.

Overall, the two sizes achieved a 35% greater trial rate than the larger size on its own.

And in Western Australia the two sizes of Climacel showed a 6.4% value share of the pharmacy market, compared to a national average of 2.9% with one size.

Clearly, if you stock both sizes of Climacel, you'll sell even more than you do now.

Particularly with our ongoing television support in 1983.

Positive results from simulated tests prompted Richardson-Vicks to launch Climacel moisturizer in Australia and Olay Beauty Bar in the U.S.

But perhaps the biggest negative in using test marketing services to conduct lengthy and thorough research is the fear of being beaten to the punch by the competition.

"Time is always a problem," said Mr. Levine. "You worry that a competitor will see a new product and try to duplicate it before it's launched nationally, but we still test market about two-thirds of the time," he acknowledged.

> **"If there's not a lot of financial risk, we might just blast off with a new product," says John Blair, director-market research at Quaker Oats' food service division.**

"If there's not a lot of financial risk, we might just blast off with a new product," said John Blair, director-market research at Quaker Oats' food service division.

And when the Chicago marketer feels a test *is* needed?

"If the product is innovative, the competitive threat is high and the idea can be replicated, there are things a company can do to make it difficult for a competitor to read the performance," he said.

For example, Quaker might take a high-risk item it feels needs testing into a few stores in a limited area.

"That way," Mr. Blair explained, "we're not advertising to anyone that we have a new product. And we hope that the competition's sales force is asleep at the wheel."

S.C. Johnson & Son, Racine, Wis. sometimes uses its sales force as a vehicle for testing a product in grocery stores for six to nine months, said Richard F. Chay, director-marketing research. "We test market new brand names about 50% of the time, but it really depends on the product and whether or not it's a risky opportunity.

"If the idea is fragile and it's easy to copy, then we might forego test marketing altogether," he added.

Johnson, perhaps known best for its Johnson's Wax, will also test market established brands when it's concerned about reaction to a proposed price, packaging, or advertising change, Mr. Chay says.

But he is cautious about putting too much stock in test marketing results.

"There's no question in my mind that companies like BehaviorScan come up with accurate, sensitive results, but there might be a question about how projectible a small test market can be when it's compared to the entire U.S.," he pointed out.

"Some brands are highly regional so that a test market's results could be misleading, he warned. *—E.N.*

How it's done

Most simulated test marketing undertakings work similarly.

Consumers are intercepted in shopping centers (or sometimes at their homes) where they are interviewed for demographics and asked to rate various products on a point scale.

Next, they are shown commercials both for the test product and competitors' products and taken to a simulated store shelf environment where they are re-interviewed and given seed money or cents-off coupons to make a purchase. Those not purchasing the test product are given free samples.

After a use-up period, they are interviewed by telephone and asked to rate the test product against the competition on a series of attributes. They again are asked which product they would purchase. From their responses, anticipated market share is estimated.

Also known as pre-market (sales) volume forecasts, volumetric projection techniques and laboratory testing among other terms, STM is used by a variety of consulting companies and corporate research departments to estimate the potential success or failure of new products or concepts.

Based on complicated mathematical models, the techniques predict sales volumes that would result from variations on a host of business circumstances, such as product name, packaging, levels of advertising and promotion, distribution, pricing and quantity.

Use of STM and other laboratory research techniques is on the rise, according to a survey conducted last spring by Market Facts, a Chicago market research company, among research directors at 183 of the largest American consumer goods and services companies.

Between 1978 and 1983, the percentage of respondents saying the major share of research dollars is being spent on test market laboratories rose 4%. STM also jumped from fourth place to first as the market technique most used.

Also revealing is that 5% more companies in the same time frame now look to outside sources of STM, such as Management Decision Systems (ASSESSOR), Elrick & Lavidge (COMP), Burke Marketing Services (BASES) or Yankelovich, Skelly & White (Laboratory Test Market). *—R.E.*

European test patterns

Test marketing practices in European countries vary widely, depending on country size, population mix and regional media availability. This look at the testing habits in seven countries was adapted from the January, 1984, European Media & Marketing Guide, published by ADVERTISING AGE's *Focus* with material supplied by D'Arcy MacManus Masius.

West Germany

Test marketing is conducted in five major areas of Germany. All media are available in these areas; coverage is good. Marketers tend to avoid using magazines for test ads in Saar because of the lack of regional editions.

CINCINNATI
THE BIG TEST MARKET

Cincinnati is the largest city named to the Dancer Fitzgerald Sample honor roll of eight test cities. Cincinnati features a diversified economic base, has a large and stable population base and is relatively isolated from other major markets. Cincinnati is the fifteenth largest CMSA in the United States, one of only twenty-two markets in the United States to be defined as a Consolidated Metropolitan Statistical Area by the Office of Information and Regulatory Affairs.

CINCINNATI CONSOLIDATED METROPOLITAN STATISTICAL AREA
(8 Counties)

Effective Buying Income	$16,137,783,000
Total Retail Sales	$ 7,565,419,000
Population	1,674,000
Suburban Population	1,194,300
Households	608,500

Source: Sales and Marketing Management Survey of Buying Power 1983

Cincinnati newspapers deliver significant shares of most market segments. The Enquirer and The Post are particularly adept at reaching those market segments that can and do buy more of all types of goods and services.

Cincinnati is the big test market. The Enquirer and The Post deliver efficient, effective market coverage in the big test market. Put the market and the medium to work for your product. Test in Cincinnati and introduce your product or service with advertising in The Enquirer and The Post.

Japanese

(Continued from Page M-34)

an alien market. But they often find that although they have introduced the same control test conditions as in the U.S., the test results may have inaccuracies built into them.

There is a tremendous shortage of test market cities in Japan because it is hard to find areas where the media can be isolated, especially for tv advertising. Four cities are thus repeatedly used: Hiroshima, Fukuoka, Shizuoka and Sapporo.

"Hiroshima or Fukuoka must be the most test-marketed cities for foreign products in the world. That alone must be a bias

Despite socioeconomic profiles that are not truly typical of Spain, the Canary Islands are often used for test marketing because of the presence of regional tv. The total population there is just over 1 million; a typical campaign using tv, backed by radio and magazines, would cost approximately 4.5 million Pta. per month. Testing on the Spanish mainland is sometimes done in Madrid, Barcelona and Valencia.

"YOUR PRODUCT HERE"

Your product should play in Peoria

The next time you want an accurate product test, play it in Peoria . . . a test market where the cable/broadcast mix is similar to the majority of U.S. cities served by cable. For more information, contact us or our rep.

in test results," Mr. Fields pointed out.

And the fact remains that test marketing in the U.S. fashion, with test periods lasting from 12 to 18 months, may prove counterproductive by tipping off the Japanese competition.

To correct these problems, there are increasing suggestions that American subsidiaries in Japan should follow the lead of their parent organizations in the U.S., relying less on test marketing and more on pre-test market laboratories or home-use tests, or at least to modify American practices for the Japanese market.

"It would be wise for the Western companies to watch how the Japanese do things before imposing their classical test marketing methods," says Mr. Reed. "In other words, when in Rome . . . ."

> **Because they are confident they know the market, "the Japanese are a nation of hunch players" in an area such as test marketing.**

Many hesitate to simulate

Despite a growing number of marketers who wouldn't test without it, simulated test marketing is far from a universally accepted technique.

Several market researchers say they doubt STM's penetration is beyond 50%.

Companies do not employ simulated test marketing methods because they are not convinced that STM applies to their specific business situations, according to Thomas E. Hatch, vp-new business at Mattel Toys in Hawthorne, Cal.

"I'm amazed that many companies are not using these techniques because the cost of introducing a new product is phenomenal," Mr. Hatch says. Of course, STM techniques must be "customized" to fit indi-

Three facts that can save you research dollars

1. **LARGEST PRE-IDENTIFIED SAMPLE**
NFO's largest available pre-identified consumer sample (250,000 U.S. households) offers the people you want to survey — *without the cost of finding them.*

2. **LOW-COST SCREENING**
NFO's cost-shared screening vehicle, Multicard Survey, offers a universe of 150,000 nationally representative households when you require highly selective criteria — *for as little as 30¢ a contact.*

3. **HIGH RESPONSE LEVELS**
NFO's panelists are willing to answer your questions by mail or telephone, no matter how sensitive the subject or how busy they are. And they respond at levels from 70% to 90% — *saving the money you otherwise spend on refusals.*

For totally cost-effective survey research, put NFO to work for you!

(Continued from Page M-41)

to go faster to market and thus realize sales faster; the company in most cases avoids the cost of test marketing; the company has managed to stop spending on product opportunities that clearly do not meet minimum criteria.

That final point—eliminating potential dud products—may be the most important for corporate growth plans in the coming years, according to Thomas E. Hatch, vp-new business at Mattel Toys in Hawthorne, Cal. Mr. Hatch has 15 years experience in adapting STM models in the consumer products field at Gillette, Miles Laboratories and Mennen Co.

> **Simulated test marketing techniques costing about $60,000 found that a proposed Bristol-Myers product called Dissolve would achieve only about 1% of the market.**

He made the move to Mattel less than a year ago.

"The cost of launching package goods today is now so high that you have to have these [STM] systems to rigorously challenge the product idea and to determine what the financial impact will be," the Mattel executive said. "Even after that, you still don't know whether you have a success because competitive counter measures can be severe," he cautioned.

Mr. Hatch believes many package goods companies will place new (and riskier) emphasis on development of both established brands and new products—rather than on acquisition and corporate takeover—to achieve growth in the 1980s. To assist with this strategy, Mr. Hatch has developed a seven-step new product development process that involves no less than seven STM assessments prior to navidual business problems, but the potential for new applications is tremendous, the Mattel executive added.

In many cases, use of STM models depends on whether management thinks they work, says Boyd Sneddon, research director for the 'Big G' division at General Mills. "They're very gross tools and the aim in using them is to figure out whether this product has a chance of being successful given the volume criteria set for it. Or is it a bust?"

Mr. Sneddon says his division uses up to eight STM models a year primarily for pre-market volume estimations.

"Our primary reason for using these techniques is to weed out things that aren't worth going forward as contrasted with expecting very precise [market share] estimates from things that do get over the [volume] hurdle," the General Mills research executive explains.

According to Mr. Sneddon, the bottom line is whether product managers feel comfortable pushing products through each step in the development cycle based on assumptions used in the STM models.

Jim Figura, corporate director-market research at Richardson-Vicks, believes one reason for the slow acceptance by marketers of STM techniques is the hush-hush blanket that some companies throw over their research departments.

"There are no secret weapons in market research," Mr. Figura asserted.

"Everyone has access to the same tools and techniques. Some suppliers even sell the same data to direct competitors. The cutting edge is how a company uses what's available and the quality of the people running the show," he says. ∎

---

tional launch. Two separate STM models serve to screen product ideas in the "concept generation" phase, after which a go/no-go decision is made.

To illustrate, Mr. Hatch recalled an assignment to work on product development of a new analgesic product at Miles Laboratories. After conducting STM techniques, he concluded that the product would not achieve sufficient market share to warrant moving forward. Management agreed and the product was scrapped, he says. The cost of launching a similar product today would be between $30 million and $50 million.

While at Miles Labs, Mr. Hatch also used STM to evaluate the potential effects of a Bristol-Myers Co. test market product called Dissolve. Miles Laboratories, the manufacturer of Alka-Seltzer, was considering a multi-million-dollar defense strategy. Instead, Mr. Hatch conducted STM techniques on Dissolve for about $60,000 and found that it would achieve only a 1% share of the market. Bristol-Myers later went national with the product and, in fact, achieved a 1% share.

"They stopped promoting the product six months later and it died a horrible death," he added.

The STM models not only saved Miles Labs a bundle, Mr. Hatch noted, they gave a quick picture of Alka-Seltzer's positioning in the market.

If Dissolve would have appeared to be more successful, the next step would have been to determine the source of sales volume. If the product appeared to take heavily from Alka-Seltzer's market share, STM techniques could guide the development of an effective defensive strategy based on advertising, trade and consumer promotions, he explained.

STM models, at a cost of $50,000 to $100,000 each, are excellent tools both to determine which products will move into test marketing and to assess the effect of advertising, packaging and product name in establishing a new position in an existing market, he said. ∎

SEE HOW YOU'LL DO IN A REAL MARKET BEFORE YOU TEST MARKET.

ESP can show you how your new product will do. For real. *Before* you spend a fortune in test market. Because ESP tests your product among 1500 real shoppers in real supermarkets.

We recontact triers after they have used your product, and combine information with inputs obtained from our vast diary panel data bank. Given your planned spending and distribution levels, we then can forecast, with extraordinary accuracy, your new product's trial, repeat, and resulting volume potential — month-by-month, year-by-year.

ESP (Estimating Sales Potential) is a service of NPD Research, Inc., the nation's largest diary panel company. As such, the ESP model reflects the sum total of more experience in tracking new products — in different categories and different parts of the country — than anybody.

ESP is the only forecasting system geared to test line extensions. As a volume forecasting approach, ESP is applicable for innovative products. We can tell you how well your product performs vs. expectations, and whether or not your advertising motivates people. We can help you decide how much money to spend, and whether sampling would be effective. Since 1975, ESP has been a proven way of predicting a product's performance before test market. On average, our forecasts of year one volume have been within 9.9% of in-market results.

If testing in the real world to predict sales in the real world makes sense to you, call NPD at (516) 625-0700.

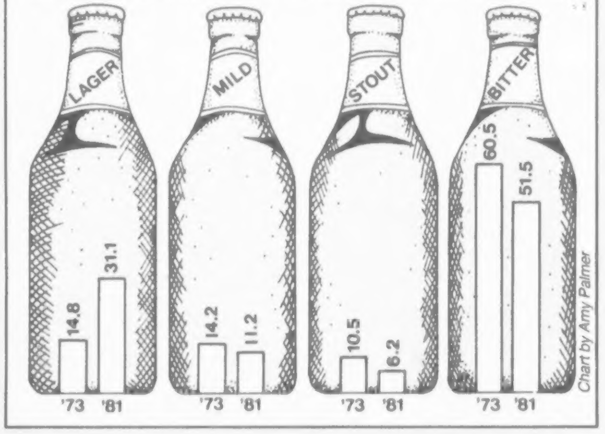
Brewers battle in Britain

Lager gains in Britain

The British thirst for imports has helped lagers double their share of the beer market. This growth has come while stout, such as Guinness, and bitter have lost nearly 10% of market share. Bars show per cent of market. *Source:* Advertising Age.



U.K. beer market changes its taste

By SEAN MILMO

London—The British beer market, one of the largest in the world next to Germany and the U.S., is undergoing major changes.

Vast numbers of British beer drinkers are asking for lighter, amber brews called lagers instead of the dark ales and stouts, like Guinness, for which the country is famous.

As a result, Guinness is looking outside the U.K. for market growth, and Anheuser-Busch is coming into the U.K. with Budweiser, a type of lager *(see related stories)*.

Foreign brands, which account for the largest variety of lagers in the U.K., are soaring in popularity. Carling Black Label from Canada is the U.K.'s No. 1-selling lager, followed by Skol and Heineken from the Netherlands and Foster's from Australia.

Most notable in this list is the absence of a U.K. lager, which, until recently, British brewers have shied away from producing, preferring to concentrate on ales and stouts.

In 15 years, the market share of lagers has grown to 35% in 1983 from 5%. Bitter and mild (both ales) make up the rest of the beer market, with stouts accounting for a small percentage.

In contrast to the ale market, where taste variations are an attribute, the distinguishing characteristic of lagers is their similarity. For the most part, the reason for this is that typical lager drinkers are

(Continued on Page 47)

Guinness may aim for world brand of beer

London—Guinness & Sons, well known for its dark, rich stout, is considering marketing its beer as a "world brand"—the first in the beer industry.

Sources say that is one of several possibilities under consideration by the marketer and its new worldwide agency, Ogilvy & Mather International, which handles the account in nearly every market outside the U.K. and Ireland.

"It is our real intention to be a significant force in the world beer market," says Peter Mitchell, who was named worldwide brand director for Guinness last summer. "We are now set to attack the world, but how quickly, into which markets and with what timing is still to be worked out."

The U.S. is considered critical. A Guinness spokesman said: "Our preliminary research [in the U.S.] reinforces our view that in Guinness we have a unique product which will appeal to people tired of bland beer and looking for flavor and character, and it is our job to market the product so it is exposed to more poeple."

Guinness' other main markets are in West Africa and the Far East. In the U.S. and Europe, Guinness' presence has been negligible, with little or no advertising support.

Meanwhile, other brewers and ad agencies are looking at the idea of creating at least a pan-Europe beer brand.

One reason is that Germany is under pressure from the European Economic Community to open up its beer market to foreign brews (AA, Jan. 23).

One U.S. ad agency has commissioned a study of the beer market worldwide, triggered by the potential in Germany, one of the world's largest beer markets.#

Why U.K. now looks good to A-B

By HOWARD SHARMAN

London—St. Louis-based Anheuser-Busch has a good chance of establishing a U.S. beer in the British market if it can overcome the poor reputation of U.S. beers here, sources say.

If Anheuser-Busch succeeds with Budweiser, other U.S. brewers are expected to tackle a market long considered too tough for U.S. beers.

It appears A-B is going ahead with plans to introduce Budweiser through the London-based Watney, Mann & Truman brewery.

Two ad agencies, J. Walter Thompson Co. and Abbot Mead Vickers/SMS, already are pitching the account.

A-B's original plan, to link with Allied Breweries, fell through last summer (AA, July 11).

A-B withdrew from the deal, apparently because the two partners could not agree on the level of marketing contribution each side would provide, sources said.

Two things A-B has in its favor is that lager is the fastest-growing segment in the beer market and the abundance of continental lagers available here.

Also important is A-B's linkup with Watney, which achieved great success in the early 1970s with the launch of Australia's Foster's lager, which Watney brews in the U.K. and sells on draft here.

However, the biggest obstacle is that U.S. beers do not have a good reputation with the British consumer.

"If you can say a beer comes from Germany, Denmark or even Australia, it works," says one adperson experienced in the beer market, "but people just don't believe that U.S. beer tastes good."

According to one observer close to the Allied-Anheuser negotiations: "The British public has very little experience of American beer. They do not expect it to be good because the U.S. has no brewing tradition. The British consumer expects it to be thin and watery."

All that most British beer drinkers know about U.S. beer is the limited experience they have had with malt liquors like Colt 45 (still sold here by Courage Ltd., a local brewer) and Schlitz malt liquor. But neither achieved any significant level of sales, and the taste was not popular with the consumer.

U.S.-brewed Budweiser has been available in the U.K. in bottles for some time and is sold in a small way in American-style bars and restaurants, but the company is keen on getting draft Budweiser to the mass market through the U.K. pubs.#

RJR's Camel Mild launch shakes up Japanese market

By JACK BURTON

Tokyo—R.J. Reynolds Tobacco International's $5 million campaign to introduce Camel Mild this month here is a major step by a U.S. advertiser to break down barriers to entering the Japanese market.

It is expected to raise a storm of protest among Japanese tobacco marketers, who have been left in the dark about concessions made to major U.S. tobacco companies by the state-run Japan Tobacco & Salt Monopoly (AA, Feb. 13).

The Japanese cigaret market—with $10 billion a year in sales—is the second-largest cigaret market in the world next to the U.S.

About 1,000 tv spots will air in Tokyo for Camel Mild, and print ads and outdoor boards will break in the rest of the country.

RJR estimates that ad spending for Camel Mild will account for more than 20% of all tobacco advertising in Japan this year. A total of $19 million was spent in 1983 on cigaret advertising in Japan, and this sum is expected to grow to $25 million this year.

The RJR launch represents one of the largest ad expenditures for any imported consumer product in Japanese history.

American tobacco companies, which account for 90% of foreign cigarets sold in Japan, estimate that sales of imported tobacco products could reach $2 billion annually, an almost eightfold increase, if restrictions, including high tariff duties, were eliminated.

Currently, foreign tobacco products account for only 1.5% of all tobacco sales in Japan.

RJR, Philip Morris Inc. and Brown & Williamson met last summer with JTS to discuss the government's restrictions on the marketing, advertising and distribution of imported cigarets.

When the tobacco monopoly made concessions in July, it asked that details of the agreement not be publicized in order to avoid any backlash from members of the Japanese Parliament who represent tobacco interests.

However, the size of the Camel Mild campaign, handled by McCann-Erickson/Hakuhodo, is expected to cause a backlash.

Under the JTS ad formula, only one-third of tobacco ad budgets can be used for tv, and tv advertising is permitted for a brand only during the first three years of its introduction in Japan.

In addition, the amount of ad spending permitted is linked to each company's sales volume for the previous year.

Last summer, JTS altered the sales formula, providing for an average 7% to 8% increase in ad spending, and including an inflation index for media costs.#

South Korea protests dbs Japan signal

Tokyo—The successful launch last month of Japan's first operational direct broadcast satellite, expected to begin service in May, has set off a diplomatic flap between Japan and South Korea.

South Korean officials said the dbs signal spillover represents Japanese "cultural aggression."

The officials said the government would ban the domestic production of frequency converters that could be used to pick up the satellite's frequency band.

They also said the government would stop imports of satellite antennas and other direct broadcast satellite receiving equipment from all countries until South Korea launches its own dbs in time for the 1988 Olympic Games in Seoul.

Finally, South Korea vowed to jam the new satellite's signals.

Japan exports more satellite equipment to Korea than any other country.

In anticipation of Japan's new satellite, Matsushita Electric and Toshiba plan to start selling dbs receiving equipment next month.#

world news roundup

(Continued from Page 3)

issue is compulsory licensing—which allows generic companies to copy name brand drugs in return for a 4% royalty to the proprietary company that developed the drug and holds the patent.

New York—Dow Jones & Co. international executives identified three problems with publishing a Latin American edition of the *Wall Street Journal* at a recent sales meeting. They are: Small advertising base, poor distribution and restrictions against foreigners publishing in Brazil.

Paris—Procter & Gamble Co. will launch Head & Shoulders shampoo here by next month. Agency: Dupuy-Compton.

Sao Paulo—Interpublic Proeme Publicidade won the $800,000 jeans account of Levi Strauss do Brasil, the second-largest jeans marketer here. The account was formerly with DPZ Propaganda.

ON THE MOVE: Howard Sharman to editor, *Marketing Week* magazine, London, replacing **Stephen Foster**. Mr. Sharman previously was London correspondent for Advertising Age. . .**Alfred Hirsch** to marketing director, Burger King Holding, Wiesbaden, from account exec, Ted Bates Werbeagentur, Frankfurt.

B&B moves to stop downward spiral in Germany

By DAGMAR MUSSEY

FRANKFURT—Benton & Bowles, faced with the fact that a key U.S. executive has been charged with embezzling $3 million from the agency (AA, Jan. 30), has another problem: A severe business hemorrhage in Germany.

In 1983 figures just released by *Horizont/Advertising Age Deutschland*, B&B showed the largest decline in billings of any major German agency—down 18.7% to $38.5 million, slipping from 17th to 21st place.

The situation for B&B may get worse before it gets better: Such key clients as Deutsche Texaco and St. Pauli Breweries' Jever beer are expected to leave the agency this year after the closing last December of B&B's Hamburg office. The two accounted for the lion's share of that office's $6 million in billings.

The biggest blow to B&B in Germany came last October when Procter & Gamble Co. reassigned about $8.5 million in accounts to Luerzer Conrad & Leo Burnett, and gave B&B only the $1.5 million Sanso wool detergent account. The reassignments occurred after Young & Rubicam resigned the P&G business to take on Colgate-Palmolive worldwide.

Then Ralph Schilling, the chief executive officer who was lured from McCann-Erickson two years ago, left B&B. Mr. Schilling was in charge when the agency lost Richardson-Vicks' denture fixative and cold remedy lines, Sunbeam Appliances' Rowenta and Reemtsma's $30 million cigaret media placement.

B&B execs are confident that the agency's new managing director—John Ferries—can turn the shop around. Mr. Ferries, who is presently in Frankfurt as acting chief executive, says, "In Europe we see Germany as the most important country, where we mean to invest heavily."

Mr. Ferries maintains that there are opportunities to come back with such clients as P&G, R-V and the Reemtsma group. He is also looking to buy another German shop.#

British TV-AM in reprieve by shareholders

LONDON—TV-AM, Britain's troubled commercial morning tv station, has come back from the brink of collapse.

Early this month shareholders agreed to pump $2.8 million into TV-AM, but only conditioned on cost reductions.

This could involve laying off up to 40 employes, which may trigger a strike by any one of several unions. Without the layoffs, the station would go under in three months, one source said.

TV-AM is usually beaten in the ratings by the British Broadcasting Corp.'s morning tv program, even though TV-AM's number of average peak viewers has doubled to 1.1 million since last summer.

Advertisers and agencies are not convinced that the station is delivering enough housewife viewers.

As a result, the station is able to charge only $4,200 a minute.

Last month, TV-AM execs appealed for advertising directly to major advertisers, bypassing the agencies.#

Australian ad execs attack salary survey

SYDNEY—The Advertising Federation of Australia, which represents advertising agency executives, is challenging results of a survey of the top 125 executive salaries in Australia.

These salaries, published this month by *Australian Business*, put Michael Ball, 47, vice-chairman of Ogilvy & Mather International, at the head of the list with a salary of $506,660. In all, 18 admen made the list—four of them in the top 13.

Chief executives from U.S.-controlled agencies dominate the list, including O&M; George Patterson Pty. (part of Ted Bates Worldwide); John Clemenger NSW (part of BBDO); DDB/Berry Currie; USP Needham; D'Arcy MacManus Masius Australia; Foote, Cone & Belding, and McCann-Erickson.

Bruce Cormack, AFA director, said, "This is a gross example of speculative bean-counting. It's irresponsible and unchecked writing."

Andrew Clark, *Australian Business* editor, said: "If we erred, it is on the side of conservatism."#

U.K. beer market changes

(Continued from Page 42)

young men who consume beer with their friends in pubs, and they prefer consistency to variety.

"Many lager drinkers do not like differences," says James Best, planning director at Boase Massimi Pollitt, advertising agency for Courage Ltd., a U.K. brewer. "They still want to be sure that if they go from pub to pub they can drink largely similar lagers."

Most of the U.K.'s successful lagers are linked to continental Europe, but Watney, Mann & Truman, one of the top British brewers, broke ranks two years ago when it introduced Australia's Foster's lager into the U.K.

"We came in just at the right time because there was a lot of skepticism about the numerous continental European lagers on the market with German names," says Dennis Miller, marketing director at Watney.

Australia has a reputation in Britain of being a nation of fun-loving beer drinkers with whom the U.K. drinker can identify. Foster's introduction was backed by a $3.5 million campaign, created by Hedger Mitchel Stark.

In London, where the beer was introduced, Foster's took 6% of the draft beer market.

Though it went national only recently, it has helped push Watney's share of the lager market up 3% to 15%.

In line with the trend away from continental lagers, U.K. brewers have developed more confidence about producing their own lagers.

Whitbread & Co. launched its Gold Label lager in northern England one year ago, and Courage just introduced John Smiths lager in the northern and western areas of England and Wales.

But imported premium beers, particularly those from the Continent, are now the fastest-growing sector in the market, even though they still account for only 3% of lager sales.

Holsten, the country's top-selling premium lager, marketed by Watney and brewed by Holsten-Brauerei of Hamburg, was backed by a $3.5 million tv and print advertising campaign last year.

Holsten now has a 70% share of the premium lager market, but it is meeting stiff competition from Allied Brewers' imported Lowenbrau and Whitbread's Kaltenberg.

To expand their market shares in the imported premium category, Grand Metropolitan, owner of Watney, and Allied Breweries recently have set up two separate divisions to sell quality lagers from around the world.#

If you want action now,
you want Arocom. Now.

Whatever your advertising and promotion plans for the coming year, we suspect you wouldn't mind a bigger or faster return on your marketing communications investment.

And that's just what Arocom can give you.

Creative, innovative sales promotion and merchandising programs that rev up the troops, wake up the trade, shake loose orders and generate plenty of immediate action.

What, exactly, is Arocom? A full-service sales promotion agency with a quarter century of hands-on experience.

Sales promotion is our only business. And we do it very well.

We have top-level teams of account managers, creative specialists, production people and merchandising experts thoroughly trained in the philosophy, techniques and professional thrust of sales promotion.

We know how to sell. And how you sell.

As a result, we work day in and day out, creating multi-piece, multi-level industrial, trade and consumer promotions for some of the biggest names in the Fortune 500.

And, while we can contribute to the impact of *your* marketing effort any step along the way, the most productive time to put us to work is in the beginning.

As a planning partner. Along with your advertising agency and your public relations counsel. Because we're quite capable of creating and executing programs that not only complement other programs, but accelerate their sales effectiveness as well.

After all, our areas of expertise encompass everything from completely managed contests and sweepstakes, incentive programs, premiums and couponing to dealer loaders, cents-off promotions and sales training.

Our services also include packaging and label design, direct mail, sales meeting support and an outstanding computerized audio-visual capability.

1984 holds a lot of promise. To make the most of it, to make sure you don't get stuck holding the bag for marketing plans that don't pan out, put Arocom on your calendar. Now.

If you'd like to know more about how we can help you make next year's plans and budgets more productive (and for a free copy of the booklet, "Creative Solutions To Marketing Problems"), contact Stephen Zweig, Senior Vice President, Arocom Inc., 2680 West Market, Fairlawn, Ohio 44313. (216) 867-7950.

New Fonda 'Workout' warms up

NEWPORT BEACH, CAL.—Jane Fonda is working up a sweat again.

Karl Video Corp. here, the company that two years ago introduced the now best-selling videocassette, "Jane Fonda's Workout," will offer a new tape in March designed to appeal to hard-core fitness freaks.

This time, the actress will lead the "Jane Fonda's Workout Challenge," a 90-minute program tailored for athletes, dancers and other serious devotees of aerobic exercise.

"Workout Challenge" is not meant to be a sequel to the earlier tape, a company spokesman said, but rather the latest in a series of tapes developed to appeal to specific market segments. The new tape, which will cost $59.95 at retail, also is available on RCA videodisc for $19.99.

"Workout Challenge" is the latest of several new titles planned by Karl Video. "Prime Time," an exercise tape for middle-age and older people, will be introduced this fall.

To accompany the debut, Simon & Schuster will publish a book of the same title, as it did with the original "Workout."

Next month, Ms. Fonda will begin promoting "Workout Challenge," appearing on tv shows and in department stores in major cities.

Although there will be no consumer campaign, Karl is offering a co-op ad plan for its retailers.

Videocassette sales also will get a boost from the apparel industry. Capri Beachwear, New York, in March will offer a new line of "Jane Fonda's Workout" activewear (AA, Nov. 21). Zimmerman, Galanty & Fiman, Santa Monica, is the agency.

"Jane Fonda's Workout," the book, videocassette and videodisc, were introduced in 1982.

In 1983, Karl Video came out with its second tape in the "Workout" series, "Jane Fonda's Workout for Pregnancy, Birth and Recovery."#

Braniff rivals fuel promotions

By TOM BAYER

Dallas—Airlines have continued to deny that they are concerned about the March 1 reentry of Braniff to the competitive skies.

Yet, route expansions, fare reductions and promotions are beginning to emerge and they coincide with Braniff's startup days.

Delta Air Lines is planning to increase the frequency of flights on six Dallas-Fort Worth routes scheduled for Braniff service. The increased frequencies beginning in May and June are to Austin, Tex.; Kansas City, Mo.; New York's LaGuardia; Oklahoma City; Ontario, Cal., and San Antonio.

With the increased schedule, Delta will have 136 daily departures from Dallas-Fort Worth, compared with Braniff's 82 and American Airlines' 275.

Continental Airlines on March 1 will add flights from existing markets, including Oklahoma City, Minneapolis-St. Paul, Kansas City, Washington, Tulsa, Los Angeles and Denver, and will start service from Detroit and Philadelphia.

Continental is expecting its two millionth passenger Feb. 21 and is planning to reward the person with a one-month pass for unlimited travel on Continental.

It also will lower fares Feb. 21 in 73 markets between the Midwest-Northeast and West Coast. Promotional unrestricted fares will end March 31 or April 30.

Some reduced fares will have no expiration, Continental said.

United Airlines on Feb. 17 said it would match in selected Midwest cities additional fare cuts announced by Continental. United had matched Continental's first wave of price reductions on western and midwestern flights announced earlier last week.

A United spokesman also said the carrier would not meet Continental's cuts to several eastern markets for fear "it would trigger a systemwide fare war."

Southwest Airlines last week began a 10-week "Puttin' on the Ritz" consumer sweepstakes with Avis, in which the grand prize is a 1984 Cadillac Eldorado Biarritz with a customized interior to match the new interiors of Southwest's aircraft.

More than 60 other prizes will include various trips on Southwest Airlines, and passengers who book their flights through travel agents will get free upgrades on their Avis rentals.

American Airlines has announced a series of discount fares offering 20% to 30% off normal coach fares for travel to and from California during the 1984 Olympic Games in Los Angeles.

One set of fares is in effect for tickets purchased through May 15, and a second group of fares will be available May 16 through the Olympic season, American said.#

Magazine acquisitions begin

By STUART J. ELLIOTT

New York—The anticipated boom in magazine acquisitions this year (AA, Jan. 30) got under way last week when:

- *Interior Design* and *Corporate Design* were sold by Whitney Communications here to Cahners Publishing Co., Boston.
- A joint-venture company was announced to publish *Success*.
- Gralla Publications here bought its first property since being acquired by Great Britain's United Newspapers (AA, Sept. 5).

The Whitney move was somewhat of a surprise, as the company was known to have solicited bids for all of its magazines in a package buy—not only the two design books but also *Art in America*, *50 Plus* and *Waterway Guide*, a quartet of annual regional publications.

Sources said the bids were in the range of $30 million to $40 million. Details were not disclosed.

Interior Design, a monthly with a circulation of 49,161, is the largest publication for the interior design trade. *Corporate Design*, an every-other-monthly with a controlled circulation of 25,000, is aimed at corporate design and building executives. Both will remain based in New York, under publisher Lester Dundes. Their place in the Cahners organization is yet to be determined.

The joint venture to publish *Success*, a monthly with a circulation of 233,417, is being established by Success Unlimited, Chicago (and its chairman, W. Clement Stone), and Hal Publications, New York (and its chairman, Dale Lang). Each purchased an interest in the other's company, though the extent of their new equity positions has not been revealed.

The joint company, of which Hal will be the "managing partner," according to Mr. Lang, will assume control of *Success* with the September issue. James Horton, president of Hal, which publishes *Working Woman*, will become publisher of *Success*. He succeeds Charles Colletti.

Mr. Colletti, who was on vacation last week and could not be reached for comment, recently denied that a sale of his magazine was pending. *Success'* editorial offices are to be moved to New York from Chicago, joining the business offices.

Mr. Lang last year engaged in fruitless negotiations with Time Inc. concerning a possible joint venture or buyout (AA, May 9).

Gralla announced it is buying *Sew Business*, the leading magazine for retailers and marketers in the home sewing, fabrics and crafts industry, from Sylvan Publishing, Fort Lee, N.J. Purchase price was not disclosed.#

Spot the similarities?

"Where's the beef?" has a commercial ancestor: "How's it taste?"

The popular Wendy's commercial was directed and produced by Chicago's Joe Sedelmaier, whose trademark is the use of unusual characters that he draws from the everyday world. Clara Peller, the 80-year-old former manicurist from Chicago whose current "Where's the beef?" line now is part of the vernacular, has starred in many Sedelmaier commercials, including one with rabbits for Jartran truck rentals and one for Rhodes frozen bread dough, a product of Dakota Bake-N-Serv.

The Rhodes spot was shot late in 1982 for Minneapolis agency Fallon McElligott Rice, and ran regionally in the Midwest. (FMR recently lost the account when the client relocated to another city.)

The commercial centers on five elderly matrons, a loaf of bread and a knife. It incorporates music from the same composer Mr. Sedelmaier always uses; a voiceover talent he uses in many spots, and has the "Sedelmaier look" that comes from the director's close involvement in the writing and designing of all commercials he produces for agencies (AA, Nov. 11, '82).

"Cut it, Edna," the first matron says in that spot. "No, you cut it," demures Edna, who is headed off by Ms. Peller's character who says, "Don't look at me, I'm too nervous."

"How's it taste?" her character asks.

"Buttery" is the response.

Patrick Fallon, president of the Minneapolis shop, says the agency has received phone calls from members of the local advertising community asking if FMR is disturbed by the similarities between the two spots. "It comes with the territory," Mr. Fallon says, referring to working with Mr. Sedelmaier.

Tom McElligott, vp-creative director of the agency, has produced more than a dozen spots with the Chicago director. Sources at FMR describe him as "disappointed with Mr. Sedelmaier" about the similarities in the two spots.

Mr. Sedelmaier, however, has his own "beef" with the Rhodes spot. After he had finished the commercial, he says, the agency deleted Ms. Peller's distinctive voice and dubbed in a "sweet little old lady" voice, Mr. Sedelmaier says.

Mr. Fallon confirms: "We didn't like her voice. It just was not understandable."

Wendy's "Where's the beef?" used Ms. Peller's own voice—rough-edged though it is. "Clara's voice is what made that thing," Mr. Sedelmaier says.#

Wendy's

(Continued from Page 3)

tle, Wendy's is reveling in a wave of free publicity worth many times the $8 million spent on the campaign.

Negative publicity has come from the Michigan Commission on Services to the Aging, which last month asked Wendy's to withdraw the ads. Gray Panther national president Margaret Kuhn said some members had voiced displeasure with the spots' depiction of the elderly.

A Wendy's spokesman expressed regret that offense was taken in some quarters, but said the company feels the spots portray the characters as "strong-minded enough to demand quality."

Meanwhile, Wendy's also is working the other end of the demographic spectrum. Last week it launched a new premium promotion for its Kids Meal with the first national consumer introduction of the "Moodies."

The little characters, which personify various emotions, will be offered through March as part of Wendy's efforts to improve its appeal to children (AA, Oct. 24).

Wendy's says 65 licensed Moodies products are being marketed and that the characters soon may be the subject of a children's book line and comics strip.

Kent Toys and Sisson Associates, New York, its licensing agent, report the Moodies products will reach 200; 20 company licensees are signed up thus far.

No advertising support for the Moodies is planned.#

Agency financial results

With most agencies reporting (JWT and DDB have not released results yet), 1983 will go on the books as a good year for revenues — all except for Mickelberry showed a double-digit increase. Source: *Advertising Age*.

	Income ($000)			Revenues ($000)		
Agency	1982	1983	(%)	1982	1983	(%)

**Ally & Gargano's results are for the second quarter and first half of fiscal year.*

Wall Street keeps up confidence in shops

By PAT SLOAN

Wall Street's new-found confidence in the advertising industry continues, backed by the latest round of agency yearend results.

Agency stocks generally have performed no worse than the overall stock market in its recent slide. "So far, so good," says Dean Witter Reynolds' Fred Anschel. "Ogilvy's fourth quarter was somewhat above my expectations and BBDO is on target."

He said results from both JWT Group and Doyle Dane Bernbach are due at the end of March. He expects both will be "okay."

At Foote, Cone & Belding Communications, Norman W. Brown, chairman, says, "Our fourth-quarter results were significantly better than we anticipated when we last reported earnings in November.

"Revenues exceeded budget in every region but one, with the largest increase occurring in our three U.S. regions and in the FCB Associated Communications Cos. FCB/Europe and FCB/Latin America-Pacific also showed important gains," he said.

In connection with the NCK Organization merger, Mr. Brown added that although merger activities added to 1983 costs, no revenues will be realized until 1984.

Among those agencies that have released their results, only Ally & Gargano showed a slip in the quarter ending Dec. 31, 1983 (the second quarter in Ally's fiscal year). While billings rose 12% to $50.7 million from $45.3 million a year earlier, net earnings dropped about 14% to $873,000 from $1 million.

Wall Street has not yet begun to follow closely Ally & Gargano, which went public in late 1983. The drop in earnings was presumably caused by the phaseout of the Commodore International account. Although the agency has picked up six new accounts (Union Carbide Corp., Pfizer, Franklin Computing, Comp-U-Card, WYNY [fm] and SFN Electronic Publishing) since the loss of Commodore last year, those account gains have not yet had an impact on earnings.

Last week, the agency also picked up Bryan Foods, the $400 million division of Consolidated Foods. Previously at Henderson Advertising, Bryan Foods billings are estimated at $2.5 million.

Mickelberry Corp.'s last fiscal quarter earnings were down, but Alan Gottesman, a vp with L.F. Rothschild, believes this has not been because of poor management but rather because "they have grown so fast." He is looking for earnings improvements in 1984 "as long as the agency's acquisitions pan out and advertisers do not pull back from spending."#

Almay deodorant line set

(Continued from Page 2)

be priced at the high-end of the market. The 2-oz. super dry solid will sell for about $2.51, the 4-oz. spray for $2.33 and the 1.5-oz. roll-on for $2.06, according to Almay.

The Playtex/Almay deodorant effort comes at a time when category dollar volume is on the rise, according to Towne-Oller. In 1982, the market grew only 10.5%, but in the first, second and third quarters of 1983 it grew by 11.3%, 11.2% and 17.5%, respectively.

Although the $1 billion market continues to be led by Procter & Gamble and Gillette Co., with total-brand shares of 23.3% and 20%, respectively, according to Salomon Bros.' Diana Temple, Gillette's $28 million restaging of Right Guard has not yet stopped market share erosion. In September, Right Guard had a 9.3% share in supermarkets, down from 9.9% in 1982. At that time, Dry Idea also was down, while Soft & Dri appeared to be holding.

Ms. Temple believes, however, that Gillette's Body Flowers deo-cologne could rack up sales of $25 million by the end of 1984.

Procter & Gamble's Sure and Secret brands also slipped in share. According to Salomon Bros. data, Sure has an 11.9% share, down from 13.6% in 1982, and Secret has 11.3%, down from 12.5%. P&G is now testing Oasis, a dual-layered deodorant/antiperspirant stick that Ms. Temple expects will soon be rolled out.

Industry estimates show Mitchum slightly up in market share to just under 3% in supermarkets. Mennen gained some momentum in the first nine months of 1983 with its Lady Speed Stick, a brand that earned a 1.2% share in the third quarter with $4 million in advertising support.

Carter-Wallace's Arrid also gained share, Ms. Temple said, moving up one percentage point to a 13.7 share by the end of the third quarter. Unilever's Impulse deo-cologne increased share by half a per cent to 3.2%.#

Schick to slash leaders

By ROBERT RAISSMAN

Warner-Lambert Co.'s Schick razor unit again will slash away at Gillette and Bic with a strong comparison tv spot on behalf of its disposable razor.

Both Warner-Lambert and its agency, William Esty Co., New York, declined comment on the upcoming commercial. Industry sources said, however, it will feature Schick sheriff Jennifer Wells and razor-toting San Francisco 49er quarterback Joe Montana.

The initial Schick comparison spot, which broke last March (AA, Jan. 3, '83), resurrected the battle of the blade. It sent Gillette complaining to the networks that the commercial contained "false claims." Gillette was miffed by Schick's claim that its razor was sharper than Gillette's Good News!

A Gillette spokesman said the Boston-based company would take a "wait-and-see" posture before commenting on the upcoming Schick commercial.

Sources said Gillette did not challenge Schick with litigation because the Schick disposable had "little impact" on Gillette sales. They said that despite Schick's estimated $12 million advertising expenditure in 1983, the Morris Plains, N.J.-based company, at the maximum, gained 2% of the disposable market.

Gillette, they said, has 60% of the

Y&R scores big at AT&T, Kraft, Harvester

New York—American Telephone & Telegraph Communications has moved its $20 million overseas calling programs (international long distance) account from N W Ayer to Young & Rubicam. Also, the company is moving to Ayer a number of "developmental" assignments Y&R handled, such as the equal access campaign. District manager Phil Shyposh said the total budgets for the developmental accounts had not been determined. However, he indicated they eventually could equal the overseas calling budget. Y&R also added Dart & Kraft's Kraft Dairy Group, Philadelphia, for its Breyers ice cream business, also from Ayer. Spending for '84 is between $7 million and $10 million. Ayer keeps Breyers yogurt, Sealtest and Polar B'ar ice cream squares. In Y&R's Chicago office, International Harvester has joined the roster—for corporate advertising. Budget is $5 million. Tatham-Laird & Kudner handled until last fall (AA, Oct. 3).

ISC to break 'pride' campaign for Colony wine

San Francisco—ISC Wines of California will pull the wraps off its first advertising for Colony wine since it purchased the brand and several

Breaks with tradition

New Pepsi ads turn to humor

By JOHN J. O'CONNOR

With music superstar Michael Jackson's involvement sending it to the zenith of hype, Pepsi-Cola USA's new blockbuster campaign for flagship Pepsi represents a dramatic departure from past advertising showing America living, loving and laughing.

In a concerted effort to present to "a new generation" of soft-drink lovers a brand image strikingly different from those slices of Americana that are a hallmark of archrival Coca-Cola commercials, Pepsi will augment the two 60-second Jackson Brothers commercials breaking nationally Feb. 28 with five others in which humor plays a key role.

Over-all spending is estimated to exceed $40 million.

Although Pepsi has attempted to keep a lid on their content, sources close to the Purchase, N.Y., company confirmed that one of the

GF ups coffee bid with Le Cafe entry

By GAY JERVEY

General Foods will usher in yet another new, and decidedly different, coffee on April 1: Le Cafe, a premium, flavored ground roast under the heretofore instant-only International Coffee banner.

Le Cafe, which comes in amaretto, cinammon and mocha flavors, will be launched initially only on the West Coast, where GF introduced a decaffeinated version of its Yuban brand last month.

The company also will roll out its Maxwell House decaffeinated brand to 85% of the country on April 1 (AA, Feb. 13).

Multimedia advertising for Le Cafe—which is currently being sold to the trade—will break April 2 with the tag line, "It's more than coffee, it's Le Cafe."

According to a GF spokesman, the product's flavors, distinct packaging and style will be featured in the initial advertising. "The first executions will be highly product-focused," he said. "They will explain the flavor, usage occasions—in general, create awareness of the brand's premium nature."

GF declined to reveal budget

Unions test marketing waters

By SCOTT HUME

After decades of believing the business of labor is labor, unions are belatedly, and sometimes reluctantly, entering a new age.

Like the companies it has faced across countless bargaining tables and picket lines, organized labor is entering the business of marketing.

From creating advertising to producing tv programing, organized labor is taking its case to the public more visibly and more professionally than ever before. The transition from adversary to advertiser has its critics, but most labor leaders say the real risk would be in holding back any longer.

Unions' raised voices signify more than a desire to be heard. In the wake of the U.S. Supreme Court's ruling last week that companies may unilaterally amend or abrogate existing union contracts when they file for bankruptcy, organized labor believes it is fighting for its survival.

Marketing may not provide solutions to all its problems, but it now seems labor's best option.

"Organized labor has a good product to sell, but it hasn't been taking advantage of the media available," says Susan Kellock, director of corporate campaigns for Kamber Group, a Washington consultancy. "Unions have been very shy about that."

That reticence is evaporating, she says, and the proof is increasingly evident:

- The public now is likely to see image advertising from the American Federation of State, County & Municipal Employees or the American Postal Workers Union sandwiched between spots for soft drinks and breakfast cereals.
- The AFL-CIO's Labor Institute for Public Af-

Canon seeks market snap

By GAY JERVEY

In its biggest launch since the AE-1 eight years ago, Canon USA this spring will try to strengthen its hold on the U.S. 35mm photography market—and put some new life into it—by introducing two new cameras.

The company will begin shipping in April the T70, a technologically elaborate single-lens reflex camera for advanced amateurs and beginners, and the MC, a lens-shutter model designed more for members of the "point-and-shoot" school of picture taking.

Ads for the MC will break in June, with the T70 kickoff slated for the Summer Olympics, around which Canon's entire 1984 multiproduct campaign will be focused. As an official sponsor, Canon reportedly has bought some 100 spots during ABC's two-week broadcast between July 27 and Aug. 13.

Although Canon declined to disclose the budgets for either the T70 or the MC, sources estimate that the company will spend as much as $20 million on the over-all launch.

Canon believes its latest offerings will stimulate the entire U.S. photographic market, which has turned sluggish because of the recession and competition from other forms of home entertainment.

As such, Canon said the new entries combined comprise perhaps the most significant—and expensive—introduction in corporate history. For the recent Snappy introduction, the company committed to backing it with some $40 million between break date and 1985.

The T70 sports such features as programed automatic exposure modes, automatic film loading and varied lens capability. It carries a suggested retail list of $450, versus $280 for the simpler MC. Both models, however, are expected to retail for as much as $100 less, given normal retailer discounting.

Creative has not been finalized, but the T70 likely will be marketed as a "new vision in photography," its initial promotional tag line. Grey Advertising handles Canon's tv and Dentsu has print.#

George McGovern hits New England primary states with ads discussing the military budget.

McGovern unleashing ad spending

By SUSAN SPILLMAN

Following a surprisingly strong third-place finish in the Iowa caucuses last week, Democratic presidential candidate George McGovern is now in the midst of his first major media campaign since declaring his candidacy last September.

Short on funds, the former South Dakota senator aired only one tv spot for a few days before the Iowa caucuses. But between Feb. 17 and "Super Tuesday" March 13, Mr. McGovern will spend about $65,000 on tv and radio spots and about $30,000 on print advertising in New Hampshire and Massachusetts.

"Super Tuesday" is the day primary elections are held in 12 states, including Massachusetts—the only state of those 12 in which Mr. McGovern has qualified for government matching campaign funds and the only one of the 12 states for which he has any media plans.

For tomorrow's New Hampshire primary, Mr. McGovern and his opponents have purchased time on tv stations in Boston and Portland, Me. New Hampshire has only one tv station of its own. The Boston stations reach about 75% of New Hampshire, while the Portland stations cover the northern third of the state.

Mr. McGovern's first "media blitz" consists of two 30-second and one 60-second tv spots, a 60-second radio spot and a page ad in the *Boston Globe* and New Hampshire papers. The advertising combines emotional appeal and issues.

Two of the tv commercials and the radio spot capitalize on Mr. McGovern's "vote your conscience" speech delivered at the Iowa debate. The spots feature portions of Mr. McGovern's address in which he urges: "Don't throw away your vote. . .You owe me that vote, even if you don't believe I'll be the eventual nominee. . .Don't throw away your conscience."

'84 Marketing the Candidates

This is a plea that opponent Sen. Gary Hart began piggybacking on in a new radio spot that will run in New Hampshire through tomorrow. The announcer in Sen. Hart's spots tells voters, "Don't just vote your conscience, but vote for someone who can get elected."

Mr. McGovern's third tv commercial, the 30-second

BK, Wendy's turn up heat

By SCOTT HUME
and JANET NEIMAN

While Wendy's capitalizes on the success of its "Where's the beef?" campaign, Burger King is breaking new advertising emphasizing salads as well as rethinking its pricing structure.

Burger King next week will launch a new network tv campaign for its salad bars that asks a question of its own: "Have you had your salad today?"

The spots give the No. 2 chain a chance to resupport a menu item consumers may be passing up during the 39¢ hamburger/49¢ cheeseburger promotion.

That promotion's success, Burger King chairman J. Jeffrey Campbell told securities analysts in St. Petersburg Beach last week, is causing the chain to undertake "an in-depth analysis of its pricing structures and those of our competitors." That could mean a permanent price reduction for Burger King's bottom-of-the-line menu items, but Mr. Campbell said Burger King "is not going to start a price war without a declaration."

Wendy's, meanwhile, last week shot a new "Where's the beef?" commercial in the Chicago studio of director Joe Sedelmaier *(see related story on Page 3).*

The spots could air as soon as next week, depending on how quickly the film can be edited and network buys can be made. Dancer Fitzgerald Sample, New York, is Wendy's agency.

The shoot had been delayed when Clara Peller, the diminutive "star" of the commercials and focus of recent media attention (AA, Feb. 20), acquired a lawyer/agent to renegotiate fees for her appearance. Acceptable terms were agreed upon and filming proceeded.

Wendy's is itself taking the commercial

Jerry set for Reagan re-election

New York—Ronald Reagan may soon have Jerry Della Femina, Madison Avenue's most celebrated shaved head, helping his bid to give his Democratic opponent a scalping to remember this fall.

Mr. Della Femina generally was ducking the press last week after it was learned Della Femina, Travisano & Partners was in line to create the advertising for the $25 million-to-$30 million Reagan re-election ad drive.

Mr. Della Femina said he also had been hearing his agency was a heavy favorite to win it, but he was extremely guarded with his comments, saying only that he had met with Reagan campaign aides last week essentially to show them his shop's work and credentials.

"It would be terrific to get it," Mr. Della Femina said, adding that one of the first things he would do is call Peter Dailey, the vice-chairman of Interpublic Group of Cos. He played a key role during Mr. Reagan's successful 1980 election campaign.

So did Philip Dusenberry, BBDO vice-chairman, and it was he who helped screen the Della Femina shop and other agencies here for the assignment. Messrs. Dailey and Dusenberry previously have turned

MIDNIGHT BLUES

(A True Hotel Story)

The plane was two hours late.
Then there weren't any cabs.
It rained and you got soaked.
You ate two meals in the air. No dinner.
You are beat.
Your kids are two thousand miles away
and your wife says they're coming down with something.
The clock strikes twelve and
you're standing at the hotel desk waiting for someone to notice you.
In "Charley's Showboat Lounge,"
on the other side of the lobby, lights are frantically flashing.
Someone puts on Greatest Disco Hits of All Time.
Your head throbs to the beat.
Finally, the desk clerk appears.
Does he say, "Mr. ______, we're glad you finally got here!
We kept the room. Anything we can do for you?
Room Service? Wake-up call?"
No.
Actually, he doesn't say much of anything.
It takes forever for him to give you
a registration card.
Then he wants to see "I.D."
There's only one thing to do.
Go to the hotel that knows
how to take care of business.

Hefner looks to direct mail, new publications, video

Playboy charts its growth

By ROBERT REED

CHICAGO—Playboy Enterprises soon will begin mapping a strategic plan aimed at furthering the growth of its existing publishing and entertainment properties, says company president Christie Hefner.

In an interview, Ms. Hefner said Playboy's goal is to position itself as a premier marketer of print information and video programing.

The plan will take shape over the next 12 months, as a restructured management team comes on line, she says. It is being formulated at the same time as Playboy nears completion on the sale of its 45.7% interest in the Atlantic City hotel and casino—a move that will add some cash to Playboy's coffers.

And it also comes in the wake of the $1.2 million profit the company reported for the fiscal second quarter—the first black ink seen in two years.

According to Ms. Hefner, Playboy's blueprint probably will call for:

- Starting more direct-mail properties designed around the publishing division's *Playboy* and *Games*.
- Making small publishing acquistions.
- Possible launches of new publications.
- Enlarging the programing scope of the fledgling video division.

In addition, it will continue to concentrate on attaining further product licenses for goods bearing the Playboy and Playmate signatures, while also going on with the franchising of the Playboy clubs.

The foray into direct mail would, at the outset, mean marketing newsletters, books or services that would bear either the *Playboy* or *Games* logos.

"Direct marketing is a growing business, and there are some real opportunities there," says Ms. Hefner. It is already sending insurance packages to subscribers.

Playboy is thinking about bringing a financial newsletter into the fold targeted at *Playboy's* reader list, says Ms. Hefner. There is also the possibility of starting up various onetime specialized books.

Also, it is a distinct possibility that the company will be more aggressive in its pursuit of smaller publishing acquisitions.

"We'll consider looking into other areas where there are good levels of reader and advertiser acceptance and where a larger company like Playboy could be helpful," says Ms. Hefner. She says, however, that her company is not in the market for any major acquisitions.

"I wouldn't want to cash-borrow and spend $40 million on something," she notes.

Yet, Playboy "wouldn't rule out" starting up some publications from scratch if they were based on good ideas.

The video division also is shifting its direction. At the outset, it confined programing to sex-oriented serials and magazines. Now Playboy is gradually getting back into producing original films.

Playboy is currently backing 18 feature

Acquisition aggressiveness crucial to food companies

By NANCY GIGES
and JANET NEIMAN

ST. PETERSBURG BEACH, FLA.—Growth through acquisition was the overriding theme here last week as food and beverage marketers told the Consumer Analysts Group of New York how they plan to survive in an increasingly competitive marketplace.

Executives from Campbell Soup Co. and R.J. Reynolds Industries, for example, talked of their progress in infusing marketing dollars into businesses that previously had been run as commodities.

Reynolds president-chief executive officer J. Tylee Wilson said the company's Del Monte division, acquired several years ago, is just beginning to realize substantial benefits from its restructuring into a "marketing-driven company."

Del Monte's plans for this year include expansion of branded fresh pineapple, the testing of other fresh fruits (including grapefruit and papaya) and a new frozen food line (*see story on Page 80*).

Mr. Wilson said Reynolds would not rule out large-scale acquisitions, but a more likely scenario would be smaller-scale add-ons or fill-ins for existing lines.

Campbell president R. Gordon McGovern said Campbell easily could digest about $200 million in acquisitions every two years.

Pillsbury Co. is looking for growth from both internal development and acquisitions, according to vice-chairman Winston Wallin. "Our acquisition efforts have been and will continue to be focused on consumer foods domestically and internationally," he said, adding that diversification involving more consumer product lines, more restaurant concepts and international expansion "appeals to us."

Campbell Soup plans packaged salads and Hispanic foods. See Page 66.

As for past acquisition success, ConAgra's John Phillips, president of the company's prepared foods unit, told the group that its recent addition of Armour's frozen foods to the company's line has put the company both in the "Chevrolet end" (with its Banquet label) and in the "Cadillac end" (with Armour Dinner Classics) of the business.

Executives from Reynolds, Consolidated Foods, Quaker Oats, ConAgra and Campbell expressed interest in mail-order businesses. RJR's recent purchase of Bear Creek includes Harry & David mail-order gifts and Jackson & Perkins' plants.

While many of the executives agreed they viewed acquisitions as a means to fill out their lines, IC Industries' chairman William B. Johnson said he is seeking a major base to replace the railroad subsidiary the company eventually intends to sell.

IC's success in the franchise business as both franchisor with Midas and franchisee with Pepsi-Cola General Bottlers has prompted a close look at this type of business; he said he currently is reviewing two companies as potential acquisition candidates.

General Foods president Philip L. Smith said his company is in the market for both self-standing acquisitions such as Oscar Mayer & Co., which GF acquired in 1981, as

Apple and 'beef' big hits on ad recall menu

By SCOTT HUME

Wendy's "Where's the beef?" campaign and Apple's "1984" spot for its Macintosh computer couldn't be more dissimilar in style. But in addition to being two of last month's most-discussed advertisements, they have another trait in common.

Both were among last month's best-remembered advertising.

Wendy's showed up among the 10 most frequently named advertisements regardless of category in the January adWatch, ADVERTISING AGE's monthly survey of consumer advertising awareness.

Apple made a surprisingly strong showing—28.2% of first mentions—in the computer category. Previously, computers had been lumped in the home electronics category, where in December Apple advertising had come to mind first for only 7.6% of the 1,250 adults polled.

That had been good enough only for the No. 2 spot behind category leader Atari (13.9% in December).

But the dramatic "1984" tv spot that aired for a week before the Super Bowl, as well as new spots for Apple's Lisa computer, last month put Apple in front.

Atari, meanwhile, placed fourth (5.6% of mentions) when last month's 1,251-person sample was asked to name the first computer advertising that came to mind. Placing second and third were IBM (11.5%) and Commodore (7.5%).

In order, January's 10 most frequently named advertisers were: (1) Miller/Miller Lite; (2) Coca-Cola; (3) McDonald's; (4) Burger King; (5) Ford; (6) Budweiser/Budweiser Light; (7, tie) Wendy's, Stroh's, Chevrolet; (10) Pepsi-Cola.

Wendy's appearance in last month's top 10 was its first since adWatch began in April, 1982. Still, it remained in the shadow of McDonald's and Burger King.

The same held true in the separate fast-food category. McDon-

New strategies revive the rose's fading bloom

By Bess Gallanis

Product duplication fueled the fragrance industry's steady growth during the 1970s, but eventually manufacturers suffocated in their own scents, as products overwhelmed the consumer of the 1980s.

The fragrance industry—estimated at $3 billion retail sales annually—is frantically searching for a sweet-scented tonic to revive itself.

New directions in advertising indicate the industry's search for the right imagery to bring the consumer back. But reflecting social trends is no longer enough to differentiate a fragrance in an overcrowded marketplace.

The Charlie fragrance is now evocative, rather than provocative as the Charlie Girl dances through the night.

Other elements in the marketplace have numbed the fragrance industry's pulse points as well. The most recent recession, consumer resistance to impulse buying and product diversion are merely the beginning.

Retail dollar sales of women's fragrances increased only 3% in 1982, according to Product Marketing, an industry trade publication, as unit sales volume took a dip—a decline that for a few years was obscured by steady price increases.

The rush to get new products to the marketplace all started with that *provocateur* of the 1970s, Charlie. Striding solo, confident and in control, attracting the attention of admirers, but choosing to gather none, Charlie, the upstart, spoke to the new woman of the 1970s. Charlie, backed by the seemingly bottomless coffers of Revlon, endured to become the best-selling fragrance in the world—

(Continued on Page M-10)

Bess Gallanis is a Chicago-based free lance writer and frequent contributor to Magazine. She wrote about L'erin cosmetics in last year's special report on Toiletries and Beauty Aids.

Men's fragrance ads: There's

By Hortense Leon

The smoke of marketing fire power is billowing from the men's fragrance segment. There is an escalating battle going on. The prize is the American male.

Sensuous and entertaining as these ads are, do they really sell the product?

The battle is being waged on two fronts. First, it is seen in the proliferation of ever glossier, glitzier and gushier tv, radio and print advertising promising everything to the consumer.

Then, there is the drama that is being played out in the board rooms and among the ad agencies. These are the folks who make the claims: Their product is up; the sky's the limit; the men's fragrance business is definitely taking off this time.

But if everyone is doing so well, what is all the sound and fury about? Why is the advertising war heating up? And where are all the figures?

In any case, one thing is certain. The consumer is the winner in this struggle. He or she is reaping the benefits in discounts, giveaways, and most of all in being able to see some very entertaining advertising.

Why would any videocassette recorder owner want to zap out such titillating commercials as the one for Paco Rabanne by Ogilivy & Mather, where we eavesdrop on sexy sweet nothings whispered over the phone by two lovers? (She stole away from his bed to get to the airport, leaving him asleep, looking like "a toppled Greek statue." She also swiped his Paco Rabanne cologne.)

But if Paco Rabanne has the over-25 crowd breathing heavy, other contenders vie for the attention of those in the post-pubescent years.

(There are, of course, some recent, and more sober fragrance introductions with names like CEO and Wall Street, designed to appeal to the executive male—but then, the aura of power has connotations all its own.)

John Paul Itta, president of the agency bearing his name in New York, speaks lovingly of his own creation, a commercial for Coty Wild Musk and Coty Musk cologne, the latter being for men: "It's a kind of fantasy creation of the first man and woman on earth or of the first encounter between two people who have never seen the opposite sex," he says.

"They eye each other. They're sparsely dressed. The man has a Michelangelo-like purity. The woman's body, which is equally beautiful, is the result of contact with a rugged, hostile environment, not [trips to] the Nautilus. They are supposed to be from early tribes, a noble new species on earth. We watch them stalk each other. It's like a ritual. She touches him. One touch bares a thousand quivers."

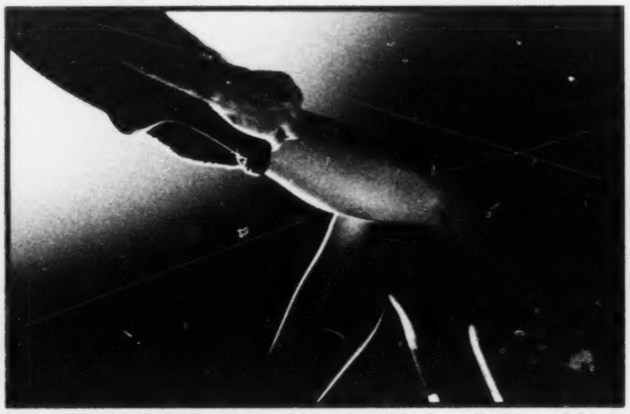
Sexual messages in perfume and cologne ads are not new. Yet, the kind of hard sell we have been seeing of late, with almost explicit sexual material, seems to be on the upswing. Fragrance companies are pulling out all the stops as the market begins to look a little crowded.

A trip to the men's cologne counter at a major department store tells the story. At a Marshall Field department store in suburban Chicago, the counter this past Christmas displayed perhaps 50 different bottles of the stuff, each more beautiful and suggestive than the next.

And if (potential) love is for sale at the fragrance counter, so are the popular notions promoted by the human potential movement, including the one that a man need no longer conform to the macho stereotype.

The print ad for Mem Co.'s English Leather Musk, for example, emphasizes youthful lust over mature passion. It features Greg Horner, a student at Washington State University. The ad is designed to warm the hearts of jittery adolescents about to embark on their first romantic adventure. The ad reads, "Wear Musk by English Leather when you're feeling bold. Or when you're feeling shy. Either way, Musk by English Leather will speak for you."

Another ad that speaks to the "New Age" man is one for Chanel's Antaeus, which shows a nude, Greek god draped just below the waist in red satin. He has his back to the camera and is turned at an angle, much like



Jovan's Musk brings out the animal in her (left) and him. The leggy scene (above) was deleted from a network tv Jovan spot—but it wasn't too risque for MTV.

Hortense Leon, a Chicago-based free lance writer, has, thus far, had no unprintable experiences while wearing musk cologne.

Pouring dollars into scents

a position Revlon executives claim it still holds.

But Charlie was not merely the workhorse in the Revlon corral. It blazed a trail for the entire fragrance industry. "What Charlie did was break new ground," says Sanford Buchsbaum, executive vp-advertising for Revlon. "The fragrance made a major statement that caused a proliferation of me-too products."

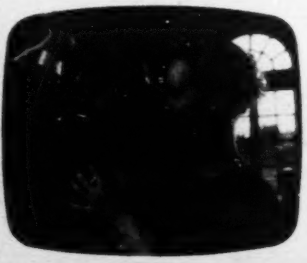
Until Charlie was launched in 1973, there were no major brands, according to Mr. Buchsbaum. The fragrance market was rather static and predictable. The enormous success of Charlie provided market impetus for a proliferation of

HOW TO BUILD
A FIRE
by Joan Collins

brands at both the popular price points and prestige price points.

And as the winds of social change wafted gently through the 1970s, so has fragrance advertising very subtly shifted its emphasis from life style positioning to one that's product-driven—you wear the fragrance, the fragrance doesn't wear you.

Says Annette Green, director of the Fragrance Foundation in New York: "We're seeing new



Charlie blazes a trail for the fragrance industry . . .

lust in their spots

the classic statue of Atlas holding up the world—only he's holding up a giant replica of Antaeus. The caption reads, "A reflection of strength and sensitivity."

But sensuous and entertaining as these ads are, do they really sell the product? Some say yes.

Sexual awakening at the dawn of fragrance advertising—that's what this commercial for Coty Wild Musk products is all about.

"The American male is starting to buy cologne," says Joseph Messina, senior vp-creative services at Halston Fragrances. "He is following the lead of his European counterpart who has always worn cologne." Halston itself is indicating its optimism by recently launching a new fragrance called Halston 101, the third in its line of men's cologne.

But this kind of optimism is not rampant among the ranks of financial analysts. Says Marie Davis of Smith Barney Harris Upham & Co., speaking as a consumer: "Men are still not buying cologne for themselves. I don't see this happening—and I live in New York, where people are supposed to be progressive. I buy it for my husband, but it sits on the shelf. So I use it around the Kitty Litter because it smells good."

Annette Green, executive director of the Fragrance Foundation in New York, tells this story: "We're going through a sensory revolution. It is the antithesis of the computer and technology revolution. People are involving themselves at one level with technology and at a personal level with products of the senses. Fragrances speak very specifically to this phenomenon."

Miss Green feels that "although there are threatening elements in the environment," consumers can "at least control their own personal environments. I think men have reacted very positively to this message."

Yet, it still seems to be more women than men who are actually making the purchases. According to a report by Business Trend Analysts in Commack, N.Y., more than 50% of men's fragrance purchases are still made by women.

Jack Salzman, analyst and first vp at Smith, Barney, believes that the fantasy in the men's fragrance business is carried beyond what appears on the tv screen and in the pages of slick magazines.

Says Mr. Salzman, "No one knows what the market is, who is buying and if the product is ever used. Few companies have done market research to determine this. Also, manufacturers don't report sales for specific product lines so cosmetics companies don't have a hard data-

Scoundrel
REVLON

Dynasty's Joan Collins helps Revlon create a personality for its Scoundrel perfume.

product attributes, and advertising reflects [the position] that the product does something for you." Charlie is now the evocative fragrance rather than the provocative fragrance, as the Charlie girl dons a sexy dress and dances through the night. And, at the market's high end, the sleek sophistication of Catherine Deneuve's pouting endorsement of Chanel No. 5 has given way to inspiring our New Wave fantasies.

The aggressive pursuit of a place in the consumer's heart has passionately taken the industry in a new direction—but it is shrouded behind soft-lensed shots and subtle headlines that whisper romance, romance everywhere. It started with Revlon's Jontue in the mid-1970s. According to Revlon's Mr. Buchsbaum, "Revlon recognized that women had made the equality point, which Charlie addressed. By 1975, women were hungering for an expression of femininity. They were ready to re-express themselves personally, and that was Jontue's position."

The marketplace reacted to Revlon's lead, and quickly followed with Cacharel's Anais, Anais, Max Factor's Le Jardin (with devastatingly romantic actress Jane Seymour as spokeswoman), Warner Cosmetics' Vanderbilt and the newest entry, Ruffles, an Oscar de la Renta perfume manufactured by Parfums Stern.

Vanderbilt was one of the most successful new product launches of 1982, going national on network tv, supported by print. Gloria Vanderbilt's signature swan motif is carried through from the bottle to the advertising, which portrays a fluttering swan in an inky-dark pool of water and a tagline that says: "Let it release the splendor of you."

Tapping the same romantic theme, but using a different approach, Oscar de la Renta's Ruffles, in limited distribution at a prestige price point, was introduced last fall with promotional events in six cities to establish it as an "important" fragrance. Two hot-pink hearts in a romantic *pas de deux* symbolize mutual sharing and the tagline spells it out: Ruffles is "the fragrance to love and be loved in."

But what will turn the head of today's consumer? "Advertising alone isn't the answer," says Ms. Green. "The marketplace is so volatile and changing so fast that the consumer is no longer loyal to the concept of a signature fragrance. The consumer has become accustomed to the free gift with purchase, which promotes the line more than the fragrance. Manufacturers have begun addressing the issue of bringing the consumer back to the fragrance."

Ms. Green applauds the efforts of manufacturers who are attaching personalities to the fragrance. Manufacturers claim opportunity motivated them. But undoubtedly the extra panache helps diminish the enormous risk of a new product launch. Charles of the Ritz Group recently announced a licensing agreement with 20th Century-Fox Licensing Corp. to

(Continued on Page M-44)

... and causes a proliferation of me-too products.

Lusty spots

(Continued from Page M-11)

base. Everyone says the market is growing, but no one knows how fast.

In the 1970s, when there was an estimated 4% to 6% unit growth per year for the industry as a whole, it was not necessary to keep track. But now things have slowed down.

"The fragrance business is sort of like the movie business in one respect. Most movies don't make money, but the ones that do, make a lot. It's the same in the fragrance business. Only a few products make it, but those which do, make it big."

Quorum cologne makes a man smell good. But it may also make him a regular hell-raiser.

As to the lack of hard data, Mr. Salzman's point is illustrated by his own estimates of the size of the men's fragrance sector.

Mr. Salzman believes $500 million in retail sales to be a good guess for 1983. Miss Green, on the other hand, believes that men's fragrances did about $850 million in retail sales this past year, which she says is about a 14% growth.

Says Mr. Salzman of the generally small sales that any one product can achieve in this market, "Even Old Spice probably doesn't do over $50 million a year. Polo, one of the biggest sellers, did exceedingly well at $30 million to $50 million in sales at the manufacturer's level in 1983.

"In comparison, [Revlon's] Charlie, one of the most popular women's fragrances, did $45 million to $50 million at its peak in 1980-81."

But whatever the sales figures happen to be, Smith Barney does have a handle on which fragrances are the most popular. Reports Mr. Salzman: "According to our current buyers survey of men's fragrances, which indicates the best selling—not necessarily those with the highest volume—Aramis and Polo are tied for No. 1 followed by Lagerfeld and Paco Rabanne."

No two analysts seem to think alike regarding this peculiar industry. While Mr. Salzman compares its volatility to that of the movie industry's, which implies perhaps that it is amusing, David Saks, vp-management director for A.G. Becker, Paribas, is at the other end of the spectrum: It leaves him cold. "The cosmetics industry never changes," he says. "The products are always the same. They're just wrapped in different bottles. That's why I stopped following the industry in the mid-1970s.

"I've never seen a well managed company. And of course the profits are volatile. That's because the industry has a problem. Management can't seriously ask people to invest because the tastes of the public are too fickle. Products are sold on the basis of whim, fad and hype. It's very much like the blue jean market. Furthermore, it's not a growth industry."

And there are other industry critics and naysaysers. William J. Fitzgerald, a consulting economist in Potomac Md., whose namesake company monitors the industry, says that his findings are not as rosy as the claims of the companies. Quite the contrary. Although at this writing the figures for December haven't been processed yet, Mr. Fitzgerald says that sales going into December were flat.

"The problems in the industry," says Mr. Fitzgerald, "have been disguised by price increases in recent years. But in fact, from our survey of usage rates, we have found that people are using fewer cosmetics in general. The industry peaked in the third quarter of 1981.

"Of the families in the $35,000-and-under classification, we found fewer people buying. In this income bracket, we found that women who make most of these purchases were not buying their husbands cologne for gifts. They were buying shirts or ties or other apparel if the money was tight. This phenomenon blew up the myth that the fragrance business is recession-proof. In fact, cars did better in late 1983 than cosmetics."

Added to the problem of attracting buyers to cosmetics shelves in general is the conflict within the industry between mass and prestige products. "There's a war shaping up in the cosmetics industry between the two categories," says Mr. Fitzgerald. Even during the recession people were buying upscale—and they continue to do so. The reason, of course, is that off-price selling is a growing phenomenon. More and more, we are seeing prestige products available in off-beat places.

At the same time, Mr. Fitzgerald believes that the problem of diversion of prestige products into unconventional channels isn't as great for men's fragrances as it is for women's. "Women who buy for themselves are concerned about getting the product at the lowest price, regardless of what kind of box it comes in. If they are buying a gift for a man, however, they will make sure it has a nice gift box, and so may buy regular price. And, if the man is buying for himself, he doesn't look for bargains in the way the woman usually does."

Despite the confusion, one thing is certain: Fragrance marketers, each carving out a specific market segment, trying to to put an end to the cologne-only-at-Father's Day buying pattern. After all, look what the Paco Rabanne man has to look forward to.

Taking a clue from the birds and bees

Men wear cologne to turn women on; women wear it to turn men on. An interesting thesis, considering that fragrance historically has been attributed with aphrodisiacal properties. But does it really work?

There are few fragrances that actually have any proof of their drawing powers, but Andron by Jovan (a division of Beecham Cosmetics in Chicago) may be one exception.

Launched in 1981, Andron, marketed in male and female versions, has become in the last year and a half an important product to watch. Its popularity is based on the claim that one of its ingredients, alpha androstenol, is a human pheromone. Pheromones are chemical substances that communicate sexual excitement to the opposite sex and trigger sexual attraction.

Pheromones, which until recently have only been identified in animals, are a topic of controversy: Not all scientists investigating the subject believe that there is proof they exist in humans.

> **"The scent went throughout my body. I wanted to let my animal instincts be free."**

However, John E. Amoore, a private consultant to Jovan, is a biochemist who does believe this. He is appearing as a spokesman for Jovan on the lecture circuit and talk shows, and while he does not claim absolute proof for the substance, he believes there is strong evidence in its favor.

Jovan representatives say that they have gotten testimonial letters from people who have come into contact with the product. For example, one letter from a 32-year-old woman says that she smelled Andron on a 70-year-old physician and became incredibly turned on.

She says, ". . . . The scent went throughout my body . . . . I wanted to let my animal instincts be free . . . . My eyes were lighted with lust . . . . My mouth started to fill with saliva . . . . "

The woman also says in her letter, "Please excuse the explicit description. I'm not at all a vulgar person . . . . To me, Andron is the first legal aphrodisiac." Of course, the company does not claim exactly to be marketing a legal aphrodisiac, but neither does it hesitate to share its fan mail with the public.

Strategies

(Continued from Page M-11)

manufacture a Dynasty (as in the hot prime time tv saga) line of prestige price point female and male fragrances and cosmetics—and a scent has yet to be developed. "It shows a trend toward concentrating on the product by giving it an identity," says Ms. Green, referring to the Dynasty collection.

Robert Miller, president-ceo of Charles of the Ritz Group, says: "We'll work closely with the stars of 'Dynasty' to develop a product consistent with the personality of the character." Mr. Miller hesitates to confirm trade rumors that the first fragrance to be developed will be Krystle, named for character Krystle Carrington. But he adds: "A Krystle fragrance would be warm and feminine—a reflection of her character."

It's difficult to discuss fragrance advertising without mentioning Chanel, cited by industry sources as one of the biggest advertising spenders and dramatic image makers. Through third-quarter 1983, Chanel spent approximately $1.3 million on spot tv commercials for Chanel No. 5, according to figures published in Leading National Advertisers. Last year, Chanel focused on promoting its latest campaign for the classic fragrance.

The theme "Share the Fantasy," was incorporated into two commercials. Directed by New Wave stylist Ridley Scott (of "Bladerunner" and "Alien" motion picture fame) for agency Doyle Dane Bernbach in New York, "Pool" and "Gardens" tap what Chanel presumes are the 1980s woman's fantasies. The commercials' critics charge the message is obscure and nobody understands it. But it gets attention, and says Philip Naquin, vp-advertising, ". . . very top-of-mind awareness is one of our goals.

"The objective in working with these images is to appeal to young people coming into the market by keeping Chanel's image fresh," says Mr. Naquin. "Other fragrances were copying the Deneuve approach—Cie, for example, by using [actress] Candice Bergen. We felt a change was necessary [illegible] were seeking a future direction.

"Awareness and attitude of Chanel is as a classic, quality product," he says. "We're proud of our classic history and want to use it as a springboard into the future."

That's all fine and well, according to an industry observer, who asks, "But does it make people buy it? You run the danger of speaking to an elitist audience, and frankly, I don't think anybody's really found the New Wave yet."

While marketers spend on advertising that promotes today's image, the danger to the industry's future lies in product diversion, which Mr. Miller feels looms as the industry's larger problem. "Because of the discount phenomenon and diversion of products there has been a blurring of classes of trade. Product diversion destroys the images of brands. Where the woman buys the product is as important as what she buys.

"It's a costly business to get into the department stores. The consumer and the department stores have come to expect promotional gifts with purchase, and that diminished the value of the product and adds an extra expense that benefits no one," exhorts Mr. Miller.

Sweet sales of success

Top five brands of women's fragrances distributed through department stores

1982* rank	Brand (company)
1.	Oscar de la Renta (Parfums Stern)
2.	Opium (Squibb Corp.)
3.	Lauren (Warner Cosmetics)

Coming

Next week Advertising Age Magazine's special report will focus on Personal Computers.

High-tech magazines still flying high

By STUART J. ELLIOTT

NEW YORK—The Audit Bureau of Circulations' latest magazine circulation figures (AA, Feb. 20) indicate recent readership trends remain basically unchanged.

The per-issue averages for the six months ending last Dec. 31 show continuing interest in books covering high technology, food, business, women's interests and the health and fitness boom. The men's sophisticates, and other titles that have been losing readers, for the most part still are doing so.

Mirroring the six-month results are the circulations of the top 10 magazines, as their rankings are the same as for the six months ending Dec. 31, 1982. The largest gain was 11.6%, while the largest loss was 2.8%.

High-tech titles again are flying high, as seen in these circulation gains: *Compute!* 247.1%; *Personal Computing*, 106%; *Popular Computing*, 67.4%; *Video*, 61.5%; *Infoworld*, 56.2%; *Video Review*, 55.1%, and *Electronic Games*, 53%.

All four members of the epicure category showed gains: *Food & Wine*, 42.5%; *Cuisine*, 5.7%; *Bon Appetit*, 2.8%, and *Gourmet*, 2.2%.

In the business field, circulation increases ranged from 1.4% for *Forbes* and 2.6% for *Fortune* to 25.5% for *Venture* and 47.8% for *Inc*. One, *Business Week*, showed a decline, and that was just 0.3%. *Nation's Business*, which was suffering serious circulation drops (AA, Nov. 29, '82, *et seq.*), rebounded, with a gain of 22.6%.

Women's magazines generally were strong. Among the Seven Sisters, four gained—*Redbook*, 4%; *Ladies' Home Journal*, 2.3%; *McCall's*, 1.4%, and *Woman's Day*, 1.3%—while three declined—*Family Circle*, 2.8%; *Good Housekeeping*, 1.8%, and *Better Homes & Gardens*, 0.6%;

The newer women's books fared even better, with all but a handful showing higher circulation. *Savvy* and *Working Mother* were each up 18.5%, and *Working Woman* was up 12.8%.

Health and fitness magazines are still healthy, as shown by these results: *Shape*, up 78.1%; *American Health*, up 45.4%; *Prevention*, up 8.4%, and *Health*, up 2.3%.

Somewhat less healthy was the science category, which showed mixed results. While *Omni* and *Discover* gained circulation, by 4.4% and 3%, respectively, both *Science Digest* and *Science 83* were down, by 2.4%.

Far less healthy was the men's sophisticates category, where the long-running story of losses went on. *Playboy* lost 292,000 copies (down 6.5%), to 4,209,324. *Penthouse* lost 274,741 copies (down 7.3%), to 3,500,275.

Again the pattern held of other magazines targeted to men gaining circulation while their racier competitors lost it: *Esquire*, up 11.8%, and *Gentlemen's Quarterly*, up 5.7%.

The supermarket tabloid field also suffered, as all but one title registered declines, ranging from 8% (*Star*) to 13.5% (*Globe*). The exception: *Weekly World News*, up 18.6%.

Magazines in sales declines that saw those declines steepen included *Pickup, Van & 4-Wheel-Drive*, which is to be renamed (AA, Feb. 13), down 24.7%, and *Psychology Today*, down 20.7%.

Among the newsweeklies, two out of three gained circulation: *Time*, up 3.4%, to 4,615,594, and *Newsweek*, up 0.5%, to 3,038,832. *U.S. News & World Report* showed a decline of 1.6%, to 2,122,619.

For those who keep score corporately, here's what happened to the three largest (by number of titles) publishing companies. Hearst, with 13 magazines, had gains in 10 and losses in three. The largest increases were *Connoisseur*, 59%; *Country Living*, 31.3%, and *Town & Country*, 13.3%. The three declines: *Colonial Homes*, 0.5%; *Good Housekeeping*, 1.8%, and *Science Digest*, 2.4%.

Conde Nast, with eight titles, split evenly. Ahead were *Gentlemen's Quarterly*, 5.7%; *Glamour*, 7.4%; *Gourmet*, 2.2% (it joined Conde Nast in October), and *Self*, 13.6%. Down were *Bride's*, 9.9%; *House & Garden*, 41.5% (as part of a planned rate-base slash when it changed formats); *Mademoiselle*, 1.4%, and *Vogue*, 5.3%.

At Time Inc., all seven titles showed circulation gains: *Discover*, 3%; *Fortune*, 2.6%; *Life*, 3.4%; *Money*, 23.2%; *People*, 4.1%; *Sports Illustrated*, 3.7%, and *Time*, 3.4%.#

Largest magazines by circulation

Modern Maturity's **gain of nearly 1 million readers far outdistanced the gains or losses of the other top ten magazines. The 2.3% jump by *Ladies' Home Journal* was second among increases while the top three managed less than 1% each. Figures represent the per-issue average for the six months ending December 31 of each year. *Source: Audit Bureau of Circulations***

"IT'S LIKE HAVING A STAT HOUSE IN THE HALLWAY."

–Alex Stefanishin, President
Anders Advertising, New York City

Anders Advertising used to spend a lot of money on photostats. From their own stat machine and from outside stat houses.

"Then I heard about Minolta's Beta 450Z copier," says Owner/President Alex Stefanishin.

The Beta zoom lens can reduce and enlarge originals to a virtually limitless range of copy sizes. From almost 50% larger than the original to 50% smaller.

"I wanted the 450Z for the time it would save us in preparing artwork for layouts and mechanicals," says Stefanishin.

"It was only later that I realized how much money we were saving.

"70% or so of our work is routine sizing. And that's where the 450Z's speed, convenience and cost savings beat the pants off a stat machine."

Your Minolta dealer can show you how the Beta 450Z can save you time and money. Look in the Yellow Pages under the Minolta trademark. Or call toll-free 800-526-5256. In New Jersey, 201-342-6707.

The Minolta Beta 450Z. Because life gets a lot easier when your copier can double as a stat machine.

adWatch

(Continued from Page 3)

ald's remained the undisputed leader in awareness in January, as it captured 41.8% of first mentions behind its "America's meat and potatoes" campaign. Burger King was No. 2 with a 21.5% share.

Wendy's remained No. 3 with 7.7% of first mentions, a gain of about 1 percentage point since December.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind in a variety of product-service categories from all they have seen, heard or read in the previous 30 days.

Last month, 1,251 adults were questioned by phone. Under adWatch methodology an increase or decrease between monthly samplings of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

In addition to separating computer advertising from the home electronics category last month, several new categories were added.

Nearly half the sample (46%) was unable to recall any **wearing apparel** advertising, but 10.6% named Levi Strauss, enough for the No. 1 rank. Jordache was No. 2 with 5.4% of first mentions. The smiling faces of Cheryl Tiegs and Arnold Palmer were memorable enough for Sears to take the No. 3 spot with 4%.

Merrill Lynch's advertising moved into an initial lead in the **financial institutions** category added last month. E.F. Hutton's 6.9% share was a close second to Merrill Lynch's 7.9%, indicating a tight race for awareness in future months. Dean Witter was third with 1.6%.

Six out of every 10 adults surveyed were unable to name a single advertisement for financial services.

In other categories last month:

- The Purina brand of **pet foods** was last month's largest single gainer in advertising awareness. Purina, with tv support last month behind the introduction of its Sea Dog brand, came to mind first for 16.5% of the sample, a 5.2 percentage point jump over its December awareness level.

Alpo remained in the No. 2 spot with a 7.9% share, while Purina's Meow Mix cat food was named by 3.8% to place it third.

- Some uncharacteristic changes took place in the normally quiet **breakfast foods** category last month. The Kellogg's umbrella brand name that had led the category in awareness for the previous six months tumbled to fourth place with a 3.5 percentage point drop to 4.2% of first mentions.

General Mills' Cheerios, meanwhile, rose 3.3 percentage points to 8.2% and the No. 1 spot. Two other GM brands, Total and Wheaties, tied for second with 5.6%.

- Polaroid may be feeling the absence of former celebrity spokesman James Garner. It registered the month's largest decline in awareness, falling 5.6 percentage points in the **cameras & photographic equipment** category. Polaroid's 10.1% share of first mentions dropped it to the No. 3 spot behind Kodak (30.5%) and Canon (16.4%).#

It's a go for national 'Washington Times'

By RICHARD L. GORDON

WASHINGTON—The upstart *Washington Times* is out to show that four can play the "national" newspaper game, with the launch of a national edition starting in northern California April 16.

The *Times*, created 22 months ago to be the newspaper voice for conservatives in the nation's capital, plans to leapfrog the country via satellite with a 24-page Monday-to-Friday paper that Ronald Reagan's personal pollster, Richard Wirthlin, has quietly tested among California readers.

The official announcement, due this week, confirms the first step—the April launch from a printing site in Hayward, Cal., outside San Francisco (AA, Feb. 20). On June 4, there will be a second step—when publishing starts at an undisclosed printing site to serve Southern California.

At least two other sites are likely to be in operation before this fall's election.

According to James Whelan, *Times* editor and publisher, the newspaper's owner, the News World Communications affiliate of the Unification Church, has already committed more than $3.7 million to equip 11 printing sites with the necessary satellite dishes and related gear needed to print the paper.

An eventual network of 20 plants, which he claimed could be in place by 1985, would "assure same-day mail delivery of the paper to 90% of the country."

These investments are moving ahead even though the *Times'* Washington metropolitan edition is still a long way from turning a profit in its battle with the entrenched *Washington Post* for advertising and circulation.

Mr. Whelan said his paper has only about 100,000 circulation and

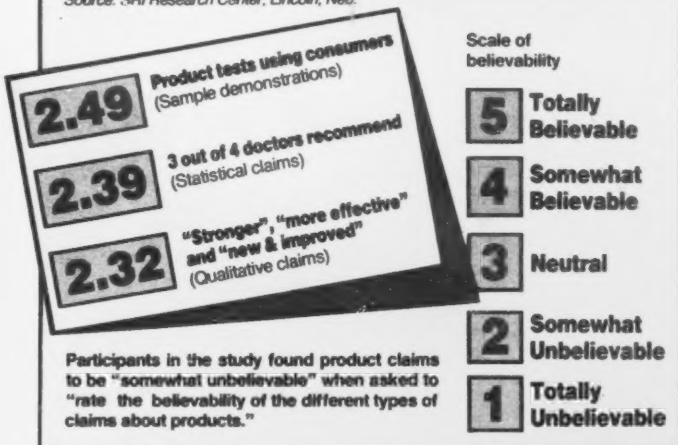
The image of advertising

Rating believability

Source: SRI Research Center, Lincoln, Neb.



Participants in the study found product claims to be "somewhat unbelievable" when asked to "rate the believability of the different types of claims about products."

Product claims not believable

By NANCY MILLMAN

Marketers that make specific product claims in their advertising have a credibility problem.

A recent study conducted for ADVERTISING AGE asked consumers to rate the believability of sample demonstrations, qualitative claims and statistical claims they see or hear in advertising. Sample demonstration is the only type of product claim that approached a "neutral" rating.

Qualitative claims and statistical claims were rated "somewhat unbelievable" over-all.

The study is the second in a series on the image of advertising conducted for AA by SRI Research Center, Lincoln, Neb. It was conducted in November, 1983.

A stratified random sample of 1,250 respondents was contacted, and all were called a minimum of three times. The sampling was

(Continued on Page 32)

Rating television advertising

More than 50% of the participants in the study answered either good or excellent when asked, "thinking specifically about television advertising, how would you rate its overall quality?"

Brewer considers regional brands

A-B readies Eagle beer

By ROBERT REED

Anheuser-Busch's brand explosion continues as it prepares to test Eagle, a new economy-price beer designed to give the No. 1 brewer entry into a segment gaining in consumer popularity and industry importance.

There is brewing-circle talk that Eagle—which adopts the name of Anheuser's salted-snacks line—will be just one of the beer marketer's new low-end beers. It is possible A-B will start up other brands in various regions that will bear names with local or parochial appeal, brewing sources say.

Also, A-B apparently is having second thoughts about tagging its soon-to-be-introduced malt liquor with the name King Cobra (AA, Feb. 20). It will test that name in tandem with the label Panther, according to sources.

A-B declined to comment on this information.

This influx of new products reflects a revamped marketing strategy on which A-B has recently embarked. The plan is designed to continue A-B's market-share growth within a sluggish beer-selling environment (AA, Nov. 14).

Industry sources are attributing Eagle's entry into the low-end segment to this positioning and to some other important factors.

One of A-B's primary goals is to go head-on against Stroh Brewery Co.'s expansion of its low-price Schaefer brand, which was rolled out last year into the beer-thirsty Sunbelt and has seen sales gains of 1 million bbls., giving a total of 3 million bbls. in 1983, according to industry data.

That brand, coupled with the growth of Stroh's popular-price Old Milwaukee, is making the Detroit-based brewer a dominant factor in those low-price-but-high-volume segments, prompting A-B to seek a presence, says Manny Goldman, beverage analyst with Montgomery Securities, San Francisco.

St. Louis-based A-B also is keeping a watchful eye on Miller Brewing Co., which is preparing another

Carnation gives FCB ad portion

By JENNIFER PENDLETON

LOS ANGELES—Carnation Co. has shifted 20% to 25% of its total $50 million-to-$60 million advertising business to Foote, Cone & Belding.

It represents the company's first major commitment to a second agency in almost 70 years.

The switch also marks the first time Carnation products have gone outside the Interpublic family, and represents a return to the West Coast of the business.

It is fueling further speculation that principal agency SSC&B is losing its hold on Carnation.

Sources close to the company

MCI ads looking to stars

By ROBERT RAISSMAN

MCI Communications will leave its upstart image behind today when it begins a campaign using establishment-type celebrities.

The new commercials are both to distinguish MCI from the nearly 200 long-distance carriers in the market today and to continue attacking AT&T.

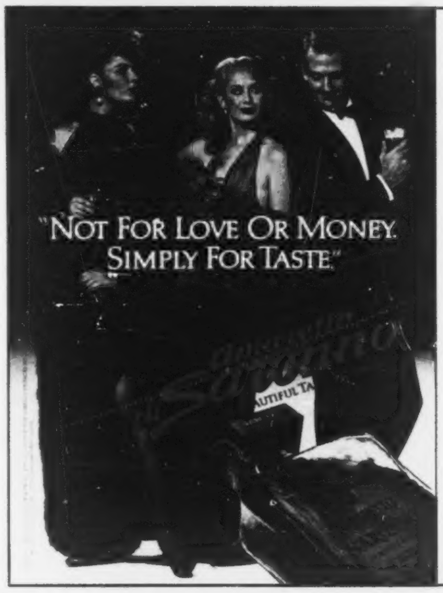
Merv Griffin, appearing in his first tv commercial, will lead off in a series of four commercials. Charles Feeney, senior vp-management supervisor at MCI agency Ally & Gargano, said the company would use two other celebrities between now and the fall. He declined to identify them.

Not only will MCI take a different tack in the campaign, but the company also will increase its advertising expenditures during fiscal 1985, which begins April 1. Ed Carter, MCI's senior vp-marketing, said the company would spend $45 million in fiscal '85, compared with $31 million in fiscal '84.

Mr. Feeney said the move to celebrities was not a response to AT&T, which uses Cliff Robertson and other "stars."

The fact that MCI is now a $1.5 billion company with 3 million customers led MCI to switch its advertising focus from the concept of discount long-distance to telling the public what the company actually is—a big corporation.

The consumer knows that MCI is a discount carrier, Mr. Carter said. "The consumer who doesn't buy from us now wants to know that we are big. They want to know that we are big enough to be established, credible and trusting. Many people don't have any idea how big we are."#



For taste, not love

Amaretto di Saronno is being repositioned by Glenmore Distilleries in the most aggressive marketing program in the brand's 95-year history. Ads tag lined "Not for love or money. Simply for taste" break in April issues of 20 consumer magazines. Louisville-based Glenmore will be spending at the rate of $7 million on an annualized basis, via Bloom Agency, New York.

Jerry declines Reagan ad job

By JOHN J. O'CONNOR

Unable to work out satisfactory arrangements concerning agency compensation and allocation of his time, adman Jerry Della Femina reluctantly has removed Della Femina, Travisano & Partners as the leading candidate to handle the Ronald Reagan/George Bush $25 million-to-$30 million re-election ad campaign.

Philip Dusenberry, vice-chairman of BBDO and the man who recommended Mr. Della Femina, has supplied the committee with names of additional agencies. A commission spokesman said, "Fortunately, we're in the position where we don't need to be making commercials right away."

"I really wanted to do it," Mr. Della Femina said in a telephone call from Chicago. "But they wanted to pay us well below a 15% commission and 10% for production. In a sense, they really want an agency to work on a volunteer basis."

The assignment also would have included media buying, he said, which would have necessitated hiring several additional media buyers to what he envisioned would be an 80-person staff, including some volunteers.

Another major snag involved

(Continued on Page 72)

Theatricals bomb at net box office

By DIANE MERMIGAS

The three commercial networks will be paying less for fewer theatrical films in the future after the beating box-office blockbusters have taken at the hands of made-for-tv product this season.

The most dramatic example came Sunday, Feb. 26, when the network tv debut of "Star Wars," which attracted a 25.1 rating, 35 share on CBS, was blunted by the premiere of the five-hour ABC made-for-tv movie "Lace," the first night of which averaged 28.2/39.

It was a profound upset, considering that Hollywood in recent years has not turned out a box-office hit with more mass appeal than "Star Wars" and that many in the industry considered "Lace" a steamy custom-made tv drama with no particular redeeming values. NBC's Feb. 26 rebroadcast of "Urban Cowboy" mustered only 10.5/15.

To compound matters for CBS, indications are the network will have to provide make-goods to advertisers.

The situation underscored a dilemma with which the networks have wrestled for some time—that high-price theatrical films no longer are potent counterprograming forces because of their advanced exposure on pay cable tv and home videocassette players. About 40% of America's tv households are wired for cable and about 10% use vcrs.

Made-for-tv movies and miniseries, which generally cost half the price paid for theatrical film rights by network tv, have emerged as the prime time events which generate the most excitement, revenues and ratings. They frequently employ such sure-fire elements for success as being based on well-hyped best sellers, focusing on provocative topical story lines and showcasing popular tv stars.

ABC and CBS are locked in a photo finish for February sweeps. See Page 70.

The networks now more than ever will be sinking their programing dollars into original product over which they have more control.

" 'Star Wars' did well despite the fact that it didn't win the night. But who would have guessed that the top grossing movie of all time would be beaten by a tv miniseries? What happened Sunday is a decisive blow against using theatrical films the way we have in the past," said Harvey Shephard, senior vp-programing, CBS Entertainment.

"We aren't going to stop buying theatrical films altogether, but we're going to come pretty close to it, and we're going to divert all that money to made-for-tv product instead. We're already doing it," Mr. Shephard said.

For the next season, the top-ranked network is planning a record 39 hours of miniseries (costing about $2 million per hour to produce) and 45 different made-for-tv movies (costing about $1 million per hour to produce), compared with only 10 network tv theatrical releases.

"It will get to the point, and very quickly, where the prices of theatrical films for network tv are going to drop dramatically because they don't have the value they once did for the networks, or the distributors will come up with an alternative for showing some films first on network tv before they go to pay cable. But things won't be the same anymore," Mr. Shephard said.

Lew Erlicht, president, ABC Entertainment, was quoted last week before leaving on a trip out of the country as having the same sentiments. "Unless there is a change in their selling

7UP fizzes at Mac's counters

By ROBERT REED and SCOTT HUME

Seven-Up Co. has been dealt a significant blow by McDonald's Corp.'s decision to bypass 7UP as its lemon-lime drink for competitor Coca-Cola's Sprite.

The fast-food company said last week that after testing both 7UP and Sprite, "management's choice for a lemon-lime drink is Sprite." Now, Sprite will be placed on the company's list of approved products, meaning it is the sole lemon-lime option that can be used in all of McDonald's 6,200 U.S. units.

Also, while Diet 7UP remains an approved option, it is likely that operators will choose the other approved diet drink, say industry analysts—Diet Coke.

McDonald's requires that two of its standard four soft-drink offerings be Coca-Cola and a carbonated orange-flavored drink. Operators may pick one of two approved diet drinks, either Diet Coke or Diet 7UP, and another flavor which now can be either Sprite, Dr Pepper or a root beer. A Seven-Up spokesman said it was not officially told of McDonald's action and declined to comment further.

The Sprite decision means sev-

(Continued on Page 73)

Lotion case chafes judge

By NANCY GIGES

New York—Both Procter & Gamble and Chesebrough-Pond's called a string of scientists to testify on clinical methodology as the two companies began fighting the battle over skin lotion advertising in federal district court here.

Judge Gerard Goettel is hearing testimony to decide whether a temporary restraining order should be issued against either Wondra (P&G) or Vaseline Intensive Care (Chesebrough-Pond's) lotion advertising until the court hears the case.

The two companies are countersuing and asking for temporary and permanent restraining orders regarding each others' advertising (AA, Jan. 9).

Both make superiority claims in tv commercials, and the key issue was summed up by the judge at the start of the hearing: "I have skimmed the factual portion [of the trial memorandums], which can be summarized as saying the other side's tests stink and ours are great, and you should enjoin them and not us."

In the complaint, P&G said Vaseline Intensive Care's claim that it is unsurpassed in relieving dry skin is false and deceptive because improved Wondra has been proven superior in independent clinical studies. For its part, C-P has said improved Wondra has never been tested against regular VIC lotion.

The hearing is scheduled to continue this week.#

FTC 'deception' language hit

Washington—Two dissenting Federal Trade Commission members have told Congress that the new ad case selection policies supported by Reagan administration appointees "create an entirely new definition of deception" which "has virtually no legal precedent."

The 63-page legal brief, signed by commissioners Michael Pertschuk and Patricia Bailey, is expected to play an influential role later this month when the House commerce and energy committee calls FTC chairman James C. Miller III to justify changes in the commission's policing of advertising.

The two Carter administration holdovers claim the definition of deception outlined by FTC's new majority in a letter to the committee "is rife with inconsistencies, presents confusing and sometimes contradictory standards" and "ignores important legal precedent."

Chairman Miller issued a statement contending the dissenters "have once again mischaracterized the statement," and commissioner George W. Douglas termed the issues raised by their brief "a tempest in a teapot."

The intramural battling is expected to come into focus March 26 when Rep. John Dingell (D., Mich.), will confront chairman Miller with the two conflicting opinions of what the law means.

Rep. Dingell already has recorded his annoyance with the FTC majority by returning its October submission to Mr. Miller with a sharply worded note contending it is not responsive to the committee's request for an analysis of the present state of the law.

Chairman Miller says the purpose of the new language is to give the industry and the staff clear guidance on the limit the commission applies to its own powers. The definition is virtually identical with proposals that he has urged Congress unsuccessfully to adopt as part of the Federal Trade Commission Act.

Documents released by FTC illustrate how its senior staff sees the new language as a safeguard against unreasonable cases. Under the standards advocated by the majority, the staff document said, FTC would have avoided cases such as Firestone Tire & Rubber Co., California Milk Producers Advisory Board, Quaker Oats and Westinghouse Electric Corp.

(In the Firestone case, according to the staff summary, FTC challenged ads for a tire called Safety Champion, on the ground that they implied these tires are safer than all others. The milk board case charged that the phrase "everybody needs milk" is false because some people are allergic to milk. The Westinghouse case challenged use of the word "new" for tv tubes made from recycled glass, and the Quaker case attacked the phrase "hickory-kissed flavor" on the ground that the charcoal briquets were made from corncobs rather than wood.)

The majority policy defines deceptive ads as those "that are likely to mislead consumers acting reasonably in the circumstances to their detriment."

The dissenters claim this introduces new language that will confuse the courts, and they contend that deception has traditionally been defined as "acts or practices which have a tendency or capacity to mislead a substantial number of consumers in a material way."

The dissenters claim that introduction of the term "acting reasonably" opens up a possibility that consumers who do not exercise caution would not be protected.

The majority contended that the meaning was twisted, that acting reasonably meant it was a reasonable interpretation of what the ad actually intended to do.#

Gen. Mills makes 'toast'

Minneapolis—General Mills will introduce new Cinnamon Toast Crunch children's cereal nationally in April.

The whole wheat-based cereal is said to resemble Big G's Golden Grahams, with cinnamon coating.

Support includes tv spots running on children's programs, 25¢ newspaper insert coupon in June, 25¢ direct-mail coupon, in-pack coupons and 25¢ cross-ruff coupon on the company's Nature Valley Granola Bars.

A "toastally awesome" t-shirt being offered on packages could signal the campaign theme. Campbell-Mithun has the assignment.#

corrections & clarifications

- *People's* rate base (AA, Feb. 27, P. 78) is to increase to 2.75 million in July.
- The Columbia Data Products assignment to Kenyon & Eckhardt (AA, Feb. 27, P. 8) is being handled by the New York office, while the J.H. Filbert business goes to the Boston office. Also, the $3 million Holiday Inns account in Europe has been assigned to K&E affiliate Butler Dennis Garland.
- The December ad linage figures for *New York News* were reported erroneously. They should be: 1983-37.7, 1982-54.8, year-to-date, 1983-678.6, and year-to-date, 1982-667.1 (AA, Jan. 23, P. 68).#

stratified and broken out by region based on the four Census Bureau regions of the continental U.S.

This is the first time respondents were asked particular questions about product claims.

The Federal Trade Commission also is conducting research on ad substantiation to determine whether consumers expect ad claims to be consistent with available research (AA, Oct. 3).

When asked to rate the believability of sample demonstrations in advertising, 30% of all respondents said they were "not at all believable"; 25% said "somewhat believable"; 18% were neutral; 19% said "somewhat believable," and 8% found this claim totally believable.

The mean score was 2.49 on a scale of one to five, five being totally believable.

Females were more positive than males in their responses: 9% found demonstrations "totally believable" and 28% "not at all believable," while 5% of the men interviewed said "totally believable" and 33% said "not at all believable."

The highest income bracket measured—$40,000 and up—was toughest on product claims: 5% of that group found demonstrations totally believable and 36% said they were not at all believable.

Of respondents in the less-than-$10,000 bracket, 11% found demonstrations totally believable and 22% said not at all believable.

Consumers also were asked to rate the believability of "statistical claims" such as "three out of four doctors recommend."

The mean score was lower on this question: 2.3. Only 4% of males and 5% of females said such claims were totally believable; 14% of males and 18% of females said somewhat believable; 18% of males and 20% of females were neutral; 27% of males and 24% of females found them somewhat unbelievable, and 36% of males and 32% of females said not at all believable.

In the demographic breakdown, the $40,000-and-up income group gave this question a mean score of only 2.04—only 3% found this type of claim totally believable while 46% found it totally unbelievable.

The $10,000-to-$20,000 income group rated this type of claim the highest: 5% said such claims were totally believable; 27% said totally unbelievable.

The third type of product claim consumers were asked to rate was a qualitative claim such as "stronger," "new and improved" or "more effective." Again the mean score of 2.39 indicates a perception that such claims are somewhat unbelievable.

Females again rated such advertising slightly higher with a 2.51 mean score compared with 2.24 for men. Again, the $40,000-and-up income group strongly disbelieved such advertising claims—39% said totally unbelievable while only 3% said totally believable.

Respondents in the western region of the U.S. consistently rate believability of each type of advertising claim much lower than respondents in the other regions.

Respondents upheld the findings of the first study (AA, Oct. 24) regarding the over-all quality of advertising, with 63% giving a rating of excellent or good.

In this study, consumers were asked to comment specifically on tv advertising, an area that is being addressed by American Assn. of Advertising Agencies' research into the image of advertising.

The over-all quality of tv advertising was rated lower than was the over-all quality of all advertising. Of the total respondents, 12% said the quality of tv advertising is excellent; 45% said it is good; 27% said fair; 12% said poor, and 3% did not respond.

As income levels go up, the rating of tv advertising goes down. On a scale of one to four—one being poor and four being excellent—the mean scores were as follows: In the less-than-$10,000 bracket, 2.7; to $20,000, 2.64; to $30,000, 2.57, and $40,000 and up, 2.46.

As in the earlier study (AA, Oct. 24), respondents were asked to agree or disagree with the following statement: "Advertising is generally trustworthy and honest." Of the total number surveyed, 5% strongly agreed; 39% agreed; 6% were neutral; 35% disagreed, and 12% strongly disagreed (4% didn't respond).

In addition, consumers were asked what media they rely on most when making day-to-day purchases and major purchases.

As in the first study, newspaper ads scored highest for day-to-day purchases, followed by in-store materials and then tv commercials.

In-store advertising beat newspapers in the scores for major purchases, a change from the first study, but the change in numbers is not statistically significant.#

Winging it

Computer marketing: No longer fun and games

By Daniel Burstein

Shakeout. Shakeup. Shakedown. The volatile world of home and personal computers is spinning like never before, and where it stops will say a great deal about the future of technology products and businesses in the American home and the American economy.

In the five years since Apples and Radio Shacks first began creeping into the lives of ordinary people, the microcomputer business has gyrated through product cycles that took the automobile and the tv set, the only consumer goods comparable in their historical influence on home life, a decade or a generation to experience.

Today, the vast majority of hobbyists, techno-enthusiasts and other early pioneers already have computers. By the end of 1984, so too will the vast majority of people for whom a computer has become a necessity: People who have a regular need to manipulate words and numbers or to access data banks.

The significance of this fact is not lost on computer hardware manufacturers—at least not the ones who hope to survive the increasingly cutthroat tactics of the industry.

The order of the day is to create a truly mass market for home computers—a market that goes far beyond those who already have a perceived need for such a machine. Realizing that most Americans do not routinely spend much time reading, writing or crunching numbers—and that computers for home entertainment are transitory products by definition—the challenges are powerful indeed for marketers who hope to penetrate beyond the 20% of Americans who now own computers or plan to buy one in 1984.

The challenges are powerful to penetrate beyond the 20% of Americans who own a home computer.

Atari's senior vp-marketing, Ted Voss, puts the situation succinctly when he says, "The people who pioneered this field were technology-oriented. But now the essence of the business is consumer marketing." Or as Bob Lively, editor of the "Sizzle Sheet," a publication devoted to marketing trends in computers says, "We used to have a technology-driven industry, and now, for all intents and purposes, we have a market-driven one."

Marketing. Marketing. Marketing. Go anywhere in Silicon Valley and that's the word you hear over and over again, with good reason. The inner workings of most small computers are the same, with the key ingredients provided by the same handful of suppliers. Much of the software to make the machines do useful tasks is also the same. Although manufacturers have tried to distinguish themselves by providing innovative features, these too are replicated by competitors almost as fast as they appear. The result is that no computer on the market today technologically stands head and shoulders above the competition in its niche.

The real differences are found in price, service, compatibility, distributor networks and, perhaps most importantly, image and corporate identity. In other words, the first generation of home computer buyers bought on the basis of a careful study of the machine's power, storage and internal architecture; today's buyer is more concerned with ease of use and the manu-

(Continued on Page M-12)

Dan Burstein is a New York-based free lance writer and frequent contributor to Magazine.

Games

(Continued from Page M-11)

facturer's reliability. Consequently, today's computer buyer is more likely to be influenced by advertising than ever before.

"Much of the technology is now in the public domain," says Atari's vp-corporate communications, Bruce Entin. "The industry has done a great job of putting machines on store shelves, and proving how much power can be packed into a beige box. But it has been less good at explaining what you can do with these boxes."

The new emphasis on marketing is also a direct consequence of IBM's entrance into the personal computer field in late 1981, and its current plunge into home computers with its much-discussed PC*jr.*, which is just now being shipped after months of speculation. When IBM arrived on the personal computer scene two years ago and gobbled around 30% of new unit sales in its product category, other manufacturers confronted the problem of a shrinking market for the first time in the history of this Wild West growth business.

> **"The industry has done a great job of proving how much power can be packed into a box. It has been less good at explaining what you can do with these boxes."**

The IBM PC is considered to be among the greatest marketing success stories of all time. From the Charlie Chaplin advertising campaign to the reassurance Big Blue could provide confused and frightened customers with quality service, everything about it clicked. The result is that IBM has gotten away with selling its PC at a premium price that is 25% to 40% above other manufacturer's products—and the public has thus far been willing to pay.

Competition with the IBM PC is a life-and-death issue for manufacturers with products that fall into a similar category of power, functions and use like Apple's Macintosh, Compaq's IBM-compatible portable, TeleVideo, Kaypro and Hewlett-Packard's 150. All these machines must distinguish themselves from IBM's PC in some concrete way to win consumer loyalty.

Apple has its "mouse," H-P its "touch-screen," TeleVideo its high quality monitor and "ergonomic" design, Compaq its portability and Kaypro its bundled package of hardware and software. But spokesmen for the advertising and marketing departments of all those companies agree that they must get two messages across to consumers: An image of their company as one the consumer can identify with and the benefit to the consumer of their product over IBM's.

The fear of IBM's great marketing strength has now descended into the ranks of the lower price computers that are designed for lighter home use like Atari and Commodore. With the rumor spreading that IBM plans to spend as much as $40 million this year advertising its PC*jr.*, everyone is nervous, even though the price tag on the *jr.* is far higher than comparable home machines, and is in fact on a par with the more powerful competitors of the IBM PC like Apple and Kaypro.

Apple talks of spending $50 million to advertise its new products this year, and figures for H-P run nearly as high. At TeleVideo the figure is $20 million, including the first plunge into tv advertising, up from $7 million last year. Those companies taken together with IBM will spend as much on advertising as was spent by the whole computer industry in 1982.

Add the advertising expenses of the estimated 100 or more other viable computer hardware manufacturers, including the first serious Japanese entrants into the field, plus software vendors and computer retailers, and the consumer will be deluged with advertising messages related to computer products in 1984 that may cost manufacturers close to a billion dollars.

"Advertising is far more important than before," says Esther Dyson, a well known industry analyst and publisher of the "Release 1.0" newsletter on market trends. "You have to bombard the consumer to be known in the market, but you also have to bombard with a clear message."

Adds Harold Kinne of Future Computing, a market research company: "Advertising is growing in importance because the market that manufacturers are trying to reach is broadening. Of course it is very expensive. So we may see companies trying to use more public relations and other, cheaper tools. But with so many clones and so many lookalike products, to be successful, the bottom line is that you've got to get exposure through advertising."

The costs, especially for smaller companies, can be overwhelming Kaypro, the Solana Beach, Cal., manufacturer, tried tv advertising for the first time in the last quarter of 1983. Running only in the Los Angeles and New York markets, the spots, created by Della Femina, Travisano's Los Angeles office, won high marks for the way they positioned Kaypro's "one low price complete" against other marketers' add-on approach.

Largely through the expense of the nearly $3 million campaign, however, Kaypro's marketing costs zoomed from less than 5% of sales to close to 18%. That was just too much for a company that has based itself on trying to sell the lowest price machine in each product category it enters.

Observes vp-marketing David Kay: "Tv certainly provides terrific exposure and we may use it again. But we're not going to play an IBM-style game where $100 of every PC purchase goes to pay for Charlie Chaplin's services. That's almost as much as the cost of the most important parts inside a computer. We are targeting consumers who are more individualistic than the IBM buyer and are willing to look a little harder to find good

Lesson 1: Remember they're human

Sometime last year, Apple Computer's advertising and marketing people sat down with their agency, Chiat/Day, and looked at a reel of every computer tv spot they could find.

"It was the funniest clutter reel in the history of advertising," recalls Chiat/Day's Paul Cohune.

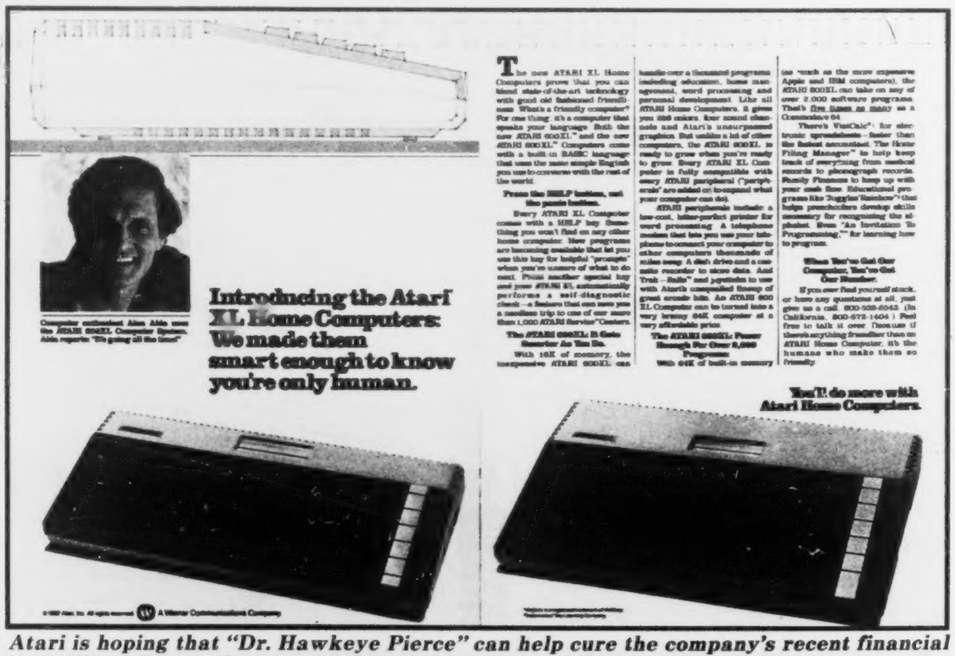
"You had bits and bytes, RAMs and ROMs; everyone yelling conflicting messages about features and price. There was very little there that was relevant to the individual," he says.

Concurs Apple's advertising director Henry Whitfield: "Looking at that reel, we realized that most manufacturers were not communicating at all. Many were flying by the seat of their pants."

Apple chose to find its way out of the clutter by focusing on life styles of individuality and achievement as the backdrop against which Apples are used—such as the now-classic spot opening with a female basketball player working out at the gym, and then returning to her office and her Apple.

Later, these were supplemented by austere, futuristic spots designed to stress Apple's excellence in technology through evocative images rather than machine specifications.

"We can't compete with IBM in selling safety and security," says Apple's Mr. Whitfield. "Our focus groups . . . perceive Apple as young, innovative and risk-taking, while they view IBM as safe, conservative, well managed, but not as exciting. We definite-



Introducing the Atari XL Home Computers: We made them smart enough to know you're only human.
You'll do more with Atari Home Computers.

Atari is hoping that "Dr. Hawkeye Pierce" can help cure the company's recent financial illness by convincing ordinary consumers that they need and want a computer.

value in a machine like ours."

Mr. Kay believes alternate means of establishing identity are more cost effective. As an example, he cites Kaypro's grants program, which has donated more computers to the California schools than any company besides Apple and is now involved in supporting humanitarian causes in the third world. "These kinds of activities communicate our corporate commitment to make technology accessible to people more effectively than expensive corporate image advertising," says Mr. Kay.

Apple, while one of the heaviest ad spenders, is also a strong believer in alternative forms of communicating information about the product and the company. Says advertising manager Henry Whitfield: "To play the game, you've got to be on tv. But if you had no competition on tv, you could do a much more effective job of communicating through print advertising. And good public relations is essential.

"Because computer products are so sophisticated, people look for more information about them than what they get through advertising. The influence of a Peter McWilliams (the author of several best-selling computer books) or other important writers and reviewers is overwhelming," says Mr. Whitfield. "I'd take a big story about Apple in *Newsweek* any day over a tv ad in terms of its credibility and influence on consumers."

> **"There is no shakeout. What's happening is a shakeup. More companies made more money this year than last, and the market is nowhere near saturation."**

Which companies are taking the biggest byte of the pie?

While recognizing the great power of the press—acknowledging that Apple tries to use the press as much as possible, saying that the controversial "1984" Super Bowl spot was designed to "hype the press and create an event around the introduction of the Macintosh" as much as anything else—Mr. Whitfield is also critical of "pack journalism" and a lot of uninformed copy about the computer industry.

"The press swings like a pendulum. First, Apple was the bloom on the rose. Then the press decided IBM could do no wrong and helped create a myth that IBM was synonymous with the whole personal computer industry. Now that we're back with Macintosh and IBM looks like they've messed up with the PC*jr.*, we're getting better coverage again," Mr. Whitfield says.

"But the fact is, in all these articles there is little original reporting. Everybody just seems to read everybody else's articles until certain 'facts' become accepted truths. I get surprisingly few phone calls from people who are writing about Apple all the time."

Like many others inside the computer industry, Mr. Whitfield perceives the so-called "shakeout" differently than the media image of it as a ruthless Darwinian process that will leave only a handful of companies intact. "Look," he says enthusiastically, "this is the biggest growth business there is. Look at stereos, which are somewhat comparable. There's an awful lot of profitable companies around in that field, and they've managed to stay in successful competition for quite a while."

That view is shared by Future Computing's Mr. Kinne. "There is no shakeout. What's happening is a shakeup. More companies made more money this year than last, and the market is nowhere near saturation. People talk about 'computers' as if it were all one industry. Really, it's like the 'transportation industry' where you have everything from skateboards to bicycles, cars, Jeeps, buses and 18-wheel trucks," he says. "Of course there will be a major manufacturer eventually in each product category, but what his name will be is by no means clear. Furthermore, you're not likely to see lots of Chapter 11s and other disasters. Polite mergers and acquisitions will be much more the rule."

Gary Baughn, former marketing director at TeleVideo, doesn't think it's going to be all that polite, however. "There's a lot of companies around surviving on 30% gross margins. You just can't do that. You've got to have 50%, because otherwise, when IBM starts price cutting—and they will before long—you won't be able to turn that corner with them." To Mr. Baughn and others in Silicon Valley, IBM is a piranha that hasn't really started to bite yet.

He expects IBM will either drop its price drastically below the level of the competition, whose chief selling point up to now has been lower price products, or come out with a new technical standard that will render the previous "IBM-compatible" market obsolete.

"IBM will do something to try to drop the others out of the chase. They want to own the whole market. So our strategy has to be to impress TeleVideo on the public mind as one of the major players that isn't going to be shaken out and will stay right there with IBM," says Mr. Baughn.

A "Get in on the Boom" campaign, created by Grey Advertising, is now in motion depicting a growing TeleVideo growing with growing businesses and a growing economy. The signature of the campaign is a memorable electric green line rising off a business chart to impress the reader/viewer with TeleVideo's growth atmosphere as well as one of its product's major technical attributes—screen resolution.

Advertising, in TeleVideo's estimate, is the key tool for establishing awareness. But Mr. Baughn also cautions that advertising—particularly national tv advertising—is almost useless without an effective distribution network. In the beginning TeleVideo made the mistake of doing splashy advertising without a strong dealer system in place. Now that ComputerLand stores are stocking the product, how-

(Continued on Page M-16)

beings

ly want to appeal to the risk-takers and the innovators."

Atari is another company that has recognized that technology is "both the great attraction and the great fear" in selling computers, according to senior vp-marketing Ted Voss. "Technological innovation drove this field before; now people need innovations explained to them."

Alan Alda became the vehicle to communicate what the innovations are about and what to do with all that power. "After our name and our product, Mr. Alda is our most important asset," says Mr. Voss.

Mr. Alda, Atari executives believe, is a personality who combines seriousness with accessibility, and whose easy manner symbolizes Atari's ease of use. He "seems to radiate the idea of learning being fun and having fun learning," observes Mr. Voss.

Atari expects that the consumer-friendly strategy symbolized by the Alda campaign can halt the recent flow of financial red ink by convincing a growing number of ordinary consumers that they need and want an Atari. —*D.B.*

Lesson 2: Hire marketers

In line with the growi[illegible] emphasis on mass marketing, computer manufacturers are reaching out to the wizards of package goods and brand management not only to staff their marketing departments, but even to fill top executive slots.

The most prominent example of this trend is John Sculley, who took over as president of Apple Computer last April.

He was lured away from the presidency of PepsiCo Inc. not only by a $2 million financial package, but by the challenge of bringing the skills to the "Apple Generation" that made the "Pepsi Generation" come alive.

Thus far, Mr. Sculley has won high marks by industry analysts. Observes Esther Dyson, publisher of the authoritative "Release 1.0" newsletter: "Sculley knows marketing, but his main asset at Apple is that he is an all-around good manager." Apple insiders say his greatest value has been in focusing corporate strategy and product development.

"A lot of people identify the 'Apple Generation' spots we did last year with Sculley," says Apple advertising manager, Henry Whitfield.

"But actually, those were well on their way to development before. Where he has really helped the company has been in developing a cohesive product strategy," he says.

Mr. Sculley was not the first big name from consumer goods to make the leap to the executive suite at a computer company. That distinction belongs to Robert Jaunich II, the former president of Consolidated Foods, who took over as president of Osborne Computer Corp., Hayward, Cal., in January, 1983, only to see the company file for bankruptcy a few months later.

Today, Mr. Jaunich remains on the board and Adam Osborne makes periodic noises about reviving the company that was the first to make a portable computer and the first to provide a full function system for less than $2,000.

But nasty recriminations have flown back and forth between innovator Mr. Osborne and professional manager/marketer Mr. Jaunich.

Mr. Osborne says he made a mistake by bringing in a "smokestack" manager who was unaccustomed to the freewheeling innovative style of Silicon Valley.

Mr. Jaunich retorts that the company had so many concealed financial and managerial problems that it was a lost cause long before arrived.

The debate will doubtless continue over whether marketing computers is significantly different from any other consumer product.

But for some, the answer is already clear.

"It's obvious now in Silicon Valley that the home computer business is fundamentally a market-driven, consumer-oriented business," observes Bruce Entin, vp-corporate communications at Atari. "Technology will always be important, but you've got to have corporate leadership that understands brand name identity and that knows how to create consumer motivation."

Practicing that philosophy in choosing a new ceo last July, Atari filled the position with James J. Morgan, formerly executive vp-marketing at Philip

(Continued on Page M-16)

Games

(Continued from Page M-13)

ever, he believes the company can advertise more intensively with better results.

"This industry is maturing very fast," Mr. Baughn philosophizes. "The whiz kids and the technological gurus just don't have the consumer marketing experience that's needed now. A lot of us feel we understand the market, but we don't have the understanding that the consumer marketing specialists have of the end user."

Big changes in the home computer marketplace may well come as more professional marketers do more consumer research before developing their products and their advertising campaigns. H-P, for example, developed the touch-screen machine on the basis of their first full-scale, end user research.

"Many home computer manufacturers are quite vague about who the home user is," says Randy Goldfield, president of the Omni Group, a New York consulting firm that offers a unique audit of technology companies' media-related activities including advertising, public relations and other corporate communications. "We recently found a major company that did no research at all on response to advertising. But marketing of computers is professionalizing fast. That same company today has a whole department for that purpose."

Hire

(Continued from Page M-13)

Morris.

Like Apple's Mr. Sculley, Mr. Morgan's influence has been felt most strongly in bringing the company's general business practices up to state-of-the-art. Arthur Gemmell, vp, was quoted recently as saying, "A lot of what Mr. Morgan has done is just fairly standard business basics. We just somehow became a $2 billion company without any of them."

Other consumer marketing-oriented professionals at Atari include David Ruckert, senior vp-entertainment software marketing, who was formerly vp-marketing at the Clairol division of Bristol Myers, and Theodore Voss, senior vp-marketing, advertising and marketing services, who came to Atari after 17 years at Polaroid.

Criticizing the tendency to exaggerate differences between businesses designated as high-tech and others, Atari's Mr. Entin says, "The technology Jim Morgan was involved with at Philip Morris, turning out 6,000 cigarets a minute without error, is every bit as good as the technology at a computer manufacturer.

"People like Jim, while they aren't scientists, certainly have an awareness of and an appreciation for technology."

Among the other players in the home computer game who have brought the more traditional marketing and managerial outlook into the top corporate echelons are Mattel Inc., whose new president, William Mack Morris, was a veteran of Combe Inc. (health and beauty products) and Squibb Corp.'s Life Saver division, and Commodore International, which recently replaced founder, president and ceo Jack Tramiel with Marshall F. Smith, former president and ceo at Thyssen-Bornemisza, a diversified industrial group.

Software companies also have recognized the impact of marketing, and a few of the leading ones searched for experienced marketers to facilitate their efforts.

Jay Mixter, director-marketing at Spinnaker Software, arrived on the scene a little over a year ago having worked in brand management and new products at Frito-Lay and Richardson-Vicks.

Focusing on quality packaging, developing a memorable logo, catchy print advertising and store displays, Mr. Mixter says: "We were probably the first software company to devote most of an $800,000 venture capital infusion to aggressive marketing. It's paid off handsomely. We have created a strong brand-name identity for Spinnaker products."

Mr. Mixter says that he's looking for more people with consumer goods experience to take up the challenge of marketing software at Spinnaker. So, although many analysts are saying times are tough for those trying to make it big in the marketing arena these days, at least one sector is looking for a few good marketers. —*D.B.*

Survival

(Continued from Page M-14)

frequently reported. The truth is that Apple Computer Corp. is running a very distant second.

Volume sales numbers published in the press are generally inaccurate and uninformed, because they are based on computer store sales statistics. The bulk of IBM sales are made directly to large customers, so they never get counted.

Right now IBM is manufacturing and selling approximately 10,000 personal computers per day, which gives it a sales volume that is four to five times Apple's. The flip side of this coin, however, is that for innumerable reasons, IBM is never likely to capture more than approximately 75% of the personal computer market. A combination of people who buy on price or object to IBM will guarantee roughly 25% of the market for the also-rans. That amounts to a lot of microcomputers that compete with IBM.

As for the low-end market—machines selling for less than a thousand dollars—IBM has no presence there yet, and the PC*jr.* is still out of the low-end price range. The current leader, Commodore, may have a long reign over this market segment because of its manufacturing and marketing expertise.

IN THE WORLD OF HIGH TECHNOLOGY THEY MAKE A WORLD OF DIFFERENCE.

They're an integral part of our reader network of over 360,000 highly skilled, well-educated scientific and engineering professionals whose insight, contributions and knowledge are helping to create tomorrow, today. Thought-leaders who can be found in key positions of responsibility throughout the Fortune 500 companies. More than 80,000 of them in the field of computing sciences and technology alone.

In ever-increasing numbers, these scientific/engineering professionals are becoming the outspoken advocates on issues affecting technology, industry and public opinion. For over two decades, Spectrum's incisive editorial content has captured the imagination and attention of this vital segment. Their need for knowledge is as insatiable as their future in science is limitless. Their prime information source—Spectrum.

Timing troubles chip into sales

By Richard Edel

It is strange that personal computer manufacturers extol the element of time as a critical reason for owning their products and yet misuse it so in their marketing execution.

The simple fact is that the industry is plagued by glitches that result from poor timing of product introductions, miscalculation of production capability or, perhaps worst of all, stimulation of product demand before it is tested and ready.

Timing errors, although definitely a nightmare for marketing managers, represent a serious threat to profitability and ultimately survival of the product line itself. And in the computer industry, when a product line fails, the company may go under with it.

There's an old saying that there are no bad management decisions, only bad timing, says Bill Meserve, an electronics industry strategist for Arthur D. Little & Co. In attempting to establish themselves firmly in the marketplace via carefully orchestrated product introductions, he adds, some manufacturers shoot themselves in the microchips because of their timing troubles.

Coleco Industries, for example, timed the market entrance of its Adam computer with great care. However, engineering and production problems continually pushed back the reported spring, 1983, delivery dates. While the company predicted 500,000 units would be shipped in 1983, only 95,000 entered the market by year's end, a spokesman says. The company suffered a substantial fourth quarter 1983 loss because of this.

"The timing [of Adam's introduction] was perfect. They would absolutely have cleaned up in the fourth quarter," says Mr. Meserve. "As it happened, late shipments brought about negative rumors about the company that it must remedy before it can get back on track."

Another company victimized by timing problems last year was Osborne Computer Corp. Osborne collapsed in September, filing for Chapter 11 protection following a series of devastating marketing and management mistakes.

A key problem was that Osborne undercut the market for its Osborne I by introducing its Executive model shortly afterward. Subsequent delays in shipping the Executive brought the company's cash flow to a near halt, analysts say. Compounding the mistake, Osborne announced the Executive II—an IBM compatible product—at the same time it was about to begin shipping the Executive, again undercutting its market.

Alexander Stein, senior industry analyst for Dataquest Inc., says such timing gaffes are symptoms of buckling under the forces of a rapidly changing market.

"Potentially, a great many changes in the market could affect vendors and each one could be catastrophic," he says. "In this market, I think you're expected to make mistakes. The difference is that a Digital Equipment Corp. could make several and survive where a Coleco or an Osborne is allowed only one."

The result is a marketing climate where attempts to gain footholds or simply to maintain market shares in various segments result in sometimes disjointed marketing efforts that, if unsuccessful, easily could put smaller companies on the ropes.

The impact of IBM alone on the market has forced many manufacturers to re-orient marketing plans, says Mr. Stein. Some hurried the timing of product introductions, stressing IBM compatibility, and others quickly examined strategies for confronting IBM on its own turf, analysts say. Apple, they claim, is positioning its Macintosh-Lisa products for business users and appears ready to fight.

But it's not just the entrance of large, strongly financed companies that will cause an uproar in the personal computer market. Mr. Stein says vendors are in for a strain as the trend toward marketing specifically for an industrial market and a separate consumer market develops.

"Currently we have an *ad hoc*

Timing

(Continued from Page M-18)

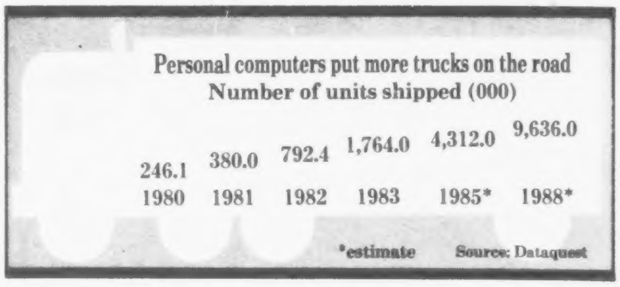
marketing approach," he says. Some analysts believe that assessment applies even to the meticulously laid plans of IBM. They are debating whether IBM's timing of the PC*jr.* introduction was off target. Although IBM announced the product in November and provided display models soon after, it was not able to ship until mid-January. In effect, IBM created demand for a product that was not available, which may have hurt sales and left IBM dealers taking heat from customers during the peak Christmas sales period.

Announcing a product before it is ready to be shipped is a "classic mistake" with these kinds of products, says Matthew M. Meehan, technology analyst with Salomon Bros. "People may say you should never announce a product until you ship, but your company may get to a point where you need the marketing momentum. You've got to always be blowing the smoke and keeping focus on your name. IBM did it with the Peanut (PC*jr.*), but did it for a reason."

The reason, suspects Mr. Meehan, serve was to blunt demand for lower price personal computers intended for the home market. "If that assumption is true, I think IBM made a mistake [in timing]," he says. "That strategy works very effectively in the business world, but does not work well in the consumer world, and the Peanut is a consumer-oriented product."

In other words, a business will hold off purchasing a computer

(Continued on Page M-22)



Retailers given a lump of coal for Christmas

While it is impossible to sell future models of personal computers from the retail shelf, many manufacturers try just that approach when pitching products to consumers. And that strategy—among others—perturbs Roger Lewis, vp-marketing at ComputerLand corporate headquarters, Hayward, Cal. ComputerLand, which in 1984 is expected to reach the billion dollar mark in sales, is the largest independent retailer of computer products with 600 outlets in 26 countries.

"There should be a company down here called 'Future Features' because there seems to be a tendency to use a lot of publicity to announce products that aren't available just to let people know what you're working on," he quips. "In some cases, though, it tends to knife the products you're already selling."

A case in point is IBM's PC*jr.*, also known as the Peanut, which was unveiled—but not shipped—in November at the very time Christmas sales were beginning to boom at ComputerLand stores. The Peanut drew a great deal of interest without generating any sales. Many unhappy consumers either bought other machines to place under their Christmas trees or waited until mid-January when shipping began.

"When IBM says it has a new product in this price range, there are a lot of people who will want it," Mr. Lewis says. "We had a lot of stores where consumers would walk in and ask for the PC*jr.* and, of course, it wasn't there, just a display model. Consumers were told, 'We don't know when we're going to be getting them, but here is your rank in the pecking order.' "

Some analysts say IBM's timing was intended to defer purchases of competitive products, others say media attention forced the company to announce early. An IBM spokesman says simply that there is a traditional lag between announcement and shipping dates for a product.

"It was beginning to sound like God's gift to the office," says Warren Waldbrand, senior consultant for Omni Group Ltd., a research and consulting firm. "I'm guessing that a possible reason for the November announcement was that they feared if they didn't announce and describe the product, they faced disappointment in the marketplace."

IBM, however, was not alone in causing discomfiture for retailers over the Christmas buying season. Texas Instruments picked Oct. 31 to announce it was exiting the home computer market. This bewildered many potential buyers, who confused the company's Home Computer division with its Data Systems Group, which continued to produce business computers.

"A lot of the publicity generated from Texas Instruments getting out of the home com-

until it's sure that it's making the correct decision; a consumer is more likely to buy impulsively.

Mr. Meserve compares a consumer with $500 to a shark in a feeding frenzy. That consumer will gobble up merchandise until satisfied, he says.

Douglas R. LeGrande, vp-marketing operations for IBM, acknowledges that the computer giant was roundly criticized by dealers over its timing strategy, but says the problem was unavoidable.

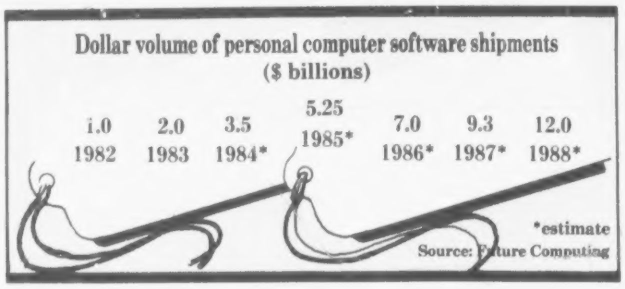
Traditionally, there is a lag between product introduction and shipping, he says. "Our dealers have said, 'We wish you would have had the product available over Christmas.' But they understand our position."

IBM was the target of much pre-introductory media speculation over the capabilities of the PC*jr.*, Mr. LeGrande says. That interest stimulated demand before the first Peanut ad ran. Some analysts believe it may even have forced IBM's hand to introduce the product early rather than risk market disappointment from inflated claims about the product.

In spite of IBM's announcement of the Peanut's impending arrival, manufacturers that had the necessary inventory during the holidays were rewarded with spectacular sales. "Apple just absolutely had a bonanza in December, recording the highest sales of any month in its history," says Mr. Meserve.

Even after announcing its

(Continued on Page M-24)



Coal

(Continued from Page M-20)

puter business did not reinforce the fact that the company was not getting out of the market for business computers," Mr. Lewis says. "Consumers were thinking Texas Instruments was getting out of the personal computer business entirely."

ComputerLand sales representatives, who only sell business computers, endlessly explained the situation, realizing that "nobody wants to buy from a company that is getting out of the business," Mr. Lewis says. Once the situation was clarified, products from the Data Systems Group moved well, he adds.

A TI spokesman admits there was a communications problem with end users, and that consumers did perceive that TI was out of the computer business entirely. After a flurry of meetings with marketing managers and advertising agency executives, however, the company decided how to handle the situation: Do nothing.

"We decided the best strategy was to continue advertising the TI Professional model on its own merits and not comment on the Home Computer division's exit from the market," the spokesman says.

TI also continued advertising its discontinued home computers, compounding the misunderstanding, says ComputerLand's Mr. Lewis. "It confused me that they continued to run that nifty ad with the 3-year-old kid pushing the buttons even after the announcement.

But the real clincher for a product introduction was Osborne Computer Corp.'s announcement of the Executive model last spring. At the time, sales of the Osborne I were brisk, Mr. Lewis says, and subsequent delays in product availability virtually halted sales of that model.

"Put yourself in the shoes of the consumer. For the price, the Osborne I was a pretty nice piece of equipment. It had a screen, keyboard, hardware and bundled software," he says. "But when you read that the company is coming out with another machine, you just sit back and wait." Consumers sat back and waited long enough to help put Osborne on the ropes for good.

Such delays in purchasing personal computers often are brought on by marketing strategies that rely on improved technology as the reason for buying a particular model, says Joseph L. Levy, vp, International Data Corp. "People ask, 'Why should I buy a computer today when tomorrow it will be twice as fast and half as expensive?' "

Focusing on technology also presents the double threat of frightening away potential buyers and of not being able to follow through on promises. Mr. Levy cites frequent examples of product announcements followed by delays in development, manufacture and shipping. The big losers in this situation are the retailers and manufacturers —consumers can always find somewhere else to spend their money. —*R.E.*

WHO REACHES THE NATION'S BUSINESS MORE THAN INC. & VENTURE COMBINED?

It's *Nation's Business* with a circulation base of 850,000 versus *Inc.* and *Venture* with a combined circulation of 775,000.* If that surprises you, it's time you found out more about *Nation's Business*, and more about the *Nation's Business* reader.

For example, 559,000 *Nation's Business* subscribers are in top management running small to mid-sized businesses. That's more top management subscribers than *Inc.* has total circulation. And the average income of the *Nation's Business* reader is $76,000.

You'll pay a CPM that's less than half the cost of any other business magazine to reach this influential market. So, to reach them, reach for the phone and call your *Nation's Business* representative, or Brett Perrine, Advertising Director, at (212) 370-1440.

NOBODY REACHES THE NATION'S BUSINESS LIKE NATION'S BUSINESS.

Timing

(Continued from Page M-22)

withdrawal from the home computer market, Texas Instruments sold its entire stock of 99/4a computers in the fourth quarter, says Jon Campbell, a company spokesman. The 99/4a had moved poorly through the beginning and middle of 1983, he says. Commodore was allocating shipments of its popular Commodore 64, analysts say, because it couldn't produce the machine fast enough to satisfy demand.

Once the Peanut was ready to be shipped, IBM was poised to catch up with the companies that were prepared for Christmas season sales via a huge media campaign. Estimates place IBM's media budget for the PC*jr.* at $40 million, although Mr. LeGrande declines to comment.

IBM, however, is not the only company on the receiving end of pot-shots from retailers over the timing of product introductions. Gene O'Donnell, vp-hardlines merchandising with Hills Department Stores, a 117-store chain based in Canton, Mass., criticizes the personal computer industry as a whole on timing.

"Timing has been a big problem all along the way for retailers," Mr. O'Donnell says. "We've had to cancel some ads at the last minute because of problems with shipping, and we've not always had the quantities available [from manufacturers] to support a particular ad."

Mr. O'Donnell blames the problem on manufacturers attempting to grab an unreasonable share of the market. "I think that's a major problem in this industry," he says.

"Everybody is trying to increase their market share and get the retailers hyped on their products. As a result, they try to get you to give initial commitments that they cannot live up to."

Big guys mean business

Runaway growth and the entrance of large manufacturers into the personal computer market are causing it to evolve unusually fast, says Alexander Stein, senior industry analyst for Dataquest. Dataquest estimates compound annual growth rates for personal computers of 60.5% between 1982 and 1987.

In dollar terms, the industry has grown from annual sales of $495 million in 1980 to $4.7 billion in 1983. By 1985, it is expected to reach $11.9 billion and almost $28 billion by 1988. Units shipped also grew from 246,000 in 1980 to nearly 1.8 million in 1983. By 1985, units shipped are expected to top 4.3 million and to exceed 9.6 million by 1988. At the same time, sales of higher-priced units are rising faster than sales of lower-priced models, which are marketed for home users.

"The days when products like the Apple II can dominate the market are passing," Mr. Stein says. "People are asking for higher performance machines."

Indeed, with the entrance of IBM, Digital Equipment, NCR, Data General Corp., Hewlett-Packard, Sperry Univac and other corporate giants into the fray, Mr. Stein sees an important shift taking place. The market for business users—by far the largest segment with 55 million white collar workers—is being cordoned off by manufacturers of mainframes and minicomputers.

The reason for IBM's success is product preference among large companies, says Warren Waldbrand, a senior consultant with Omni Group, a New York-based computer research organization. Compatibility with IBM's operating system, widely recognized as a *de facto* industry standard, is crucial in dealing with large companies, many of which have IBM mainframes and minis.

Out in the cold are the entrepreneurial companies that pioneered the personal computer market. "Being left out of one segment of a very lucrative and high volume market that they helped to create," Mr. Stein says, "are companies such as Apple and Tandy Corp. These companies are now to go to smaller business users, educational users, professionals and the home computer market."

This may be where the other companies find their niche. For the small business and home user, IBM still ends up grappling with its poorer cousins.

"Our research measuring business demand for IBM compatability is very strong in the largest companies, but demand falls off significantly once outside that [arena]," Mr. Waldbrand says. "IBM is not a standard embraced by 100% of the marketplace." *—R.E.*

Peter Drucker has learned the Inc. Market is the source of job creation in America.

In the January 24, 1984 issue of The Wall Street Journal, Peter Drucker states, "nearly all job creation has been in small and medium-sized businesses, and practically all of it in entrepreneurial and innovative businesses."

Only one major business magazine is written for the decision-makers who run these companies. Inc. magazine. If you agree that when companies add new jobs they need new equipment, new services, new everything, please show this page to your advertising agency or client.

Magazines face terminal illness

By Craig Endicott

In the Zork III computer game by Infocom the object is to meet and destroy the ruthless Dungeon Master. This ruler of the Great Underground Empire gives Adventurers three chances to do him in: Twice he will resurrect those he destroys before delivering the *coup de grace* that puts the Adventurer under for good.

Zork III in the down-to-earth context of computer magazines has a fearsome twin—Success Quotient. This behemoth is elusive and defies any magazine from tapping its secrets to reach the Throne of Success.

Word has it that Success Quotient is setting up for the kill of any number of magazines. Analysts say this pending shakeout will occur for many reasons:

- Advertising dollars are growing, but they are being concentrated among the very top magazines. Because of this thin ad distribution in the lower echelons of the magazine sector, financial tremors can turn into major quakes when hardware companies run into hard times, as they seem to be doing.
- The number of magazines covering microcomputers has burgeoned, making it increasingly difficult for publishers to approach advertisers, especially considering many of them lack sophistication. Some don't know what a media director is, comments a publisher's representative.
- The growth in the market is in machine-specific magazines, a direction some believe is a tactical mistake. The rub is that a host of magazines may cover the same machine and thus fight for the same ad dollars, squeezing out the less competitive.
- Many give newsstand operators a larger than standard cut off the cover price just to join the hundreds of other computer magazine titles on the selling block. This practice led to the so-called "black summer" of 1983 for computer magazines.
- Now that major magazine publishers have entered the fray, largely through acquisition, the lesser-knowns will require greater financial staying power.
- Editorial coverage is turning more toward application—what can be done on a computer rather than what computer to do it on—as consumers turn more toward software as their purchase criteria.

Advertising dollars have grown with the industry *(see table on Page M-62)*, but are they enough to keep the flurry of new computer titles in business?

> **"We estimate that the top 10 magazines get 80% of the ad dollars, leaving most of the market to fight for leftovers."**

In 1980 there were fewer than 30 computer magazines, founded largely by technically-proficient operators who served up highly jargoned prose largely to the trade and hobbyists. Earlier this year that number had grown to 150 titles that cover only microcomputing. In all, some 530 devote at least 50% of their editorial to microcomputers.

Such a prolific rate means greater competition for the ad dollar. "We estimate that the top 10 magazines get 80% of the ad dollars today, leaving most of the market to fight for leftovers," says Sheila Clarke, vp-marketing, Adscope, a Goldendale, Wash.-based research company.

In addition, ad pages are expected to drop this year, according to John Klingel, a magazine consultant. "The momentum in the market cannot just keep going the way it is. There will be a shakeout. A lot of the magazines have even built their forecast around the spurt, and will pay for it."

The magazine shakeout will merely mirror the fireworks in the microcomputer industry. "Five years ago, among our leading advertisers were MITS, Processor Technology, Polymorphic Systems, Southwest Technical Products and IMSAI. None are around today," says David Ahl, publisher of Creative Computing. Many of today's pacesetters—Osborne, Mattel, Atari and Texas Instruments—have fared no better.

Each failure of a hardware producer sends shockwaves through the magazines that have sprung up to glean the advertising budgets of the giants.

Consolidation is now beginning to occur on the software side, which will take more advertisers out of the market just as hardware deaths and mergers have done. "Already there is a shakeout among software producers," admits John Williams, director-marketing of Sierra On-Line, which spends $1.8 million on advertising, largely in computer magazines. "We cut back on our advertising in the fourth quarter last year to reassess the effectiveness of our spending, and the comment we got from the magazines was 'oh, no, not you, too.' "

Many of those who advertise can't survive unless each ad quickly turns into sales. "Some 70% of the ads we place bear some form of promotional tie-in either through direct response or through dealer sale," says Jay Eisenberg, president of JE Publishers Representatives in Los Angeles. "They [the ads] must generate instant sales or the advertiser dies."

When Texas Instruments announced it was stopping the production of its TI 99/4a computer last fall, the bootstrap vendors among the advertisers in the magazine serving the 99/4a user, *99er Home Computer*, breathed

---

Craig Endicott, an Evanston, Ill.-based free lance writer and frequent contributor to Magazine, is attempting to read every computer-oriented publication. He anticipates a completion date of January, 1999.

Machine specific: Perilous publishing at best

Down but never out is the motto *99er Home Computer* is trying to make good. Knocked down once, the magazine's demise and subsequent revival illustrate the dangers confronting a growing sector of computer magazines—the machine-specific.

Things hit rock bottom for *99er* on Oct. 31, 1983, when Texas Instruments announced it would pull the $49.95, TI 99/4a home computer—the magazine's bread and butter—off the market. The December issue was ready to roll at Emerald Valley Publishing Co. in Eugene, Ore., but the company literally stopped the presses.

Two months elapsed before the magazine, with *99er* conspicuous only in terms of its absence from the title, re-entered the fray as *Home Computer*, a more general sort of name one must admit.

It had a new format, too, aimed at a more general sort of audience: Four computer-specific systems are now being covered—Commodore's 64 and VIC-20, Apple II (II-plus and IIe), IBM's PC*jr.* and the defunct 99/4a, which still has 1.5 million users, second only to the 2 million in the Commodore camp, according to Future Computing, a Dallas-based information service that monitors the personal computer industry.

"Four systems bound under one skin," is how Gary M. Kaplan, magazine publisher and Emerald Valley president, describes the revival. The magazine intends to publish at least six programs per computer in each issue.

"The synergy between the four systems will strengthen the magazine and provide adhesion," says Mr. Kaplan, who is banking heavily on TI 99/4a users trading up to more sophisticated systems like the others covered in the magazine.

Emerald Valley plans to distribute the magazine into as many of the 3,500 computer stores that carry computer magazines as possible. This gives the magazine a broader reach than it had as a single machine-specific publication when the TI 99/4a was carried only in major department stores. The rate base also will jump from 185,000 to 250,000.

"We're totally in the dark about how successful we will be," says Mr. Kaplan. Some industry participants aren't holding their breath. "If I did not make 99/4a products I would not advertise," says one software marketer, "because 80% of the mailing list is to TI users." That's a limited audience.

Computer system hardware makers seldom turn over warranty lists to machine-specific magazines, cutting a publication off from its potential reader base. Even if they supplied names, the list would represent only 15% to 25% of the user base because that is the rate of return for product registration.

In addition to the fact that they deal with a limited circulation, the advertiser base can also be minimized depending on the featured component's manufacturer's policies. TI essentially inhibited the *99er's* advertising universe from the start by keeping the 99/4a's technical specs under tight patent control, licensing only a handful of software manufacturers to publish games and programs.

This proprietary stance also limited the adaptation of machine peripherals (modems, keyboards, printers, etc.) to the 99/4a, wiping out more potential ad dollars. The potential of the peripheral market is further reduced because it is largely generic, with implements like modems and printers hooking up to most systems with ease. This makes general computer publications a more attractive medium for these manufacturers' ads than machine-specific magazines.

When TI left the market it gave production rights back to companies like Sierra On-Line, another software producer, which published TI software under license. John Williams, Sierra marketing director, says Sierra probably will continue producing the software for a while. "But we are a special case," he says, without elaborating. "If I had a TI 99er program to market right now I would shelve it."

He questions whether there is any real money in TI software now. Because of production expenses ($5 a game), games are produced in large lots of 5,000, which means a $25,000 investment without a mass retailer. "Sears won't want to stock 99/4a software once it's out of the computers," he says. The other marketing alternative is mail order, which is not strong in this industry, although that is

***Hoping that there's strength in numbers, 99er expanded its editorial coverage to four manufacturers when it returned from its hiatus as* Home Computer.**

easier when the magazine immediately stopped production. Why? Their ads were rendered useless due to fire sale prices that swept through the marketplace following the announcement.

"In such circumstances, it is best to lay low for a while and hope the market rejuvenates," says Gary M. Kaplan, publisher of *99er*, which has been revived as *Home Computer. (See story below.)* He says the financial condition of many of his advertisers was poor to critical to begin with: "Many were running up heavy credit in advertising; some asked if they could pay off in installments."

99er illustrates the danger of machine-specific magazines: When the machine goes, so goes the magazine. This sector, besides being the most vulnerable, is the fastest growing.

Reaching the advertiser has become increasingly difficult for the magazines now that so many are competing for the same dollars and their level of sophistication in reporting computer happenings far exceeds their understanding of publishing matters.

For example, circulation claims in the market have become laughable to the big advertisers who get preferential treatment somewhere between half the rate-base claim and financing for their first mortgage.

Few computer magazines are audited, although new publications coming out of the major publishing houses are being audited, which should put them in better stead with the more sophisticated advertisers.

Salesmen pushing unaudited titles often leave Mr. Williams of Sierra On-Line incredulous with their unsubstantiated banter. "Few salesmen tell the truth," he notes. A salesman for one of the new magazines for the PC*jr.* recently outlined the readership demographics of the as yet unpublished magazine. Another salesman claimed a paid circulation of 350,000 for a magazine that had been on the market only seven months and conducted one minor promotion of only 100,000 direct mail pieces.

"To get my money, [some of these outfits will] have to give me a very special deal, like free advertising, or they are going to get thrown out of my office," Mr. Williams says only half in jest. "To be honest, there are a lot of suckers (advertisers) in the industry," he adds. Consultant Mr. Klingel agrees: "There are a lot of unsavvy advertisers with a lot of money, but they're going to have to get a lot smarter where they spend it."

Advertisers, like Sierra On-Line, that are thirsting for publications with verifiable data, are helping magazines develop readerships in which these advertisers can have faith. For example, when an Apple product registration card comes in to Sierra On-Line, it is forwarded to *Softalk*, an Apple-specific publication. This provides Sierra with a circulation list it can trust. In exchange, it is given first stab at preferred ad placement.

Many magazines have gone to publishers reps for more than ad procurement—comprehensive front-office assistance and utter survival. JE Publishers not only sells ads, but prepares marketing strategies, educates publishers and even works with them on distribution and ad collection. Without such assistance, many publications would have fallen prey to Success Quotient, and may yet now that greater financial power is a requirement.

The need to secure substantial financial backing is attributed largely to the entrance of the big publishing houses. Ziff-Davis, for example, now has 13 computer magazines. The drive to be competitive also has influenced editorial/advertising ratios, and Mr. Klingel estimates that most titles average 60% advertising per issue. He also notes that little money is made in circulation and newsstand sales.

Distribution skirmishes erupted in the rush to get new titles on newsstands. Ziff-Davis last summer pulled magazines out of newsstands where operators demanded publishers provide a higher cut than the indus-

(Continued on Page M-62)

---

one of the routes software producer Infocom of Cambridge, Mass., will go with its 99/4a computer games.

But the *99er's* move toward becoming less machine specific may not spell the end of its troubles.

An industry consultant believes *Home Computer* is going to find stiff competition, particularly from the plethora of new IBM PC*jr.*-specific publications—currently numbering five—entering the market.

The problems of Emerald Valley don't necessarily reflect an industrywide plight among machine-specific magazines, but they come close.

"Machine-specific magazines are a long-term tactical mistake," believes John Klingel, a magazine circulation consultant based in San Francisco. "These magazines will disappear with standardization—which is just around the corner."

Despite all of these problems, a handful of software manufacturers are excited about the big TI residual market, static as it may be. Software gameking, Infocom, is translating 10 games for the *99er*.

The company already markets games for 18 other systems so its reliance on 99/4a-related sales is not critical.

So, despite cancellation of the components they feature, machine specific magazines may be invincible, possessing an advertising base and reader/user universe that live on past the components themselves.

Perhaps the strongest segment of the computer industry will be the one that writes about it.

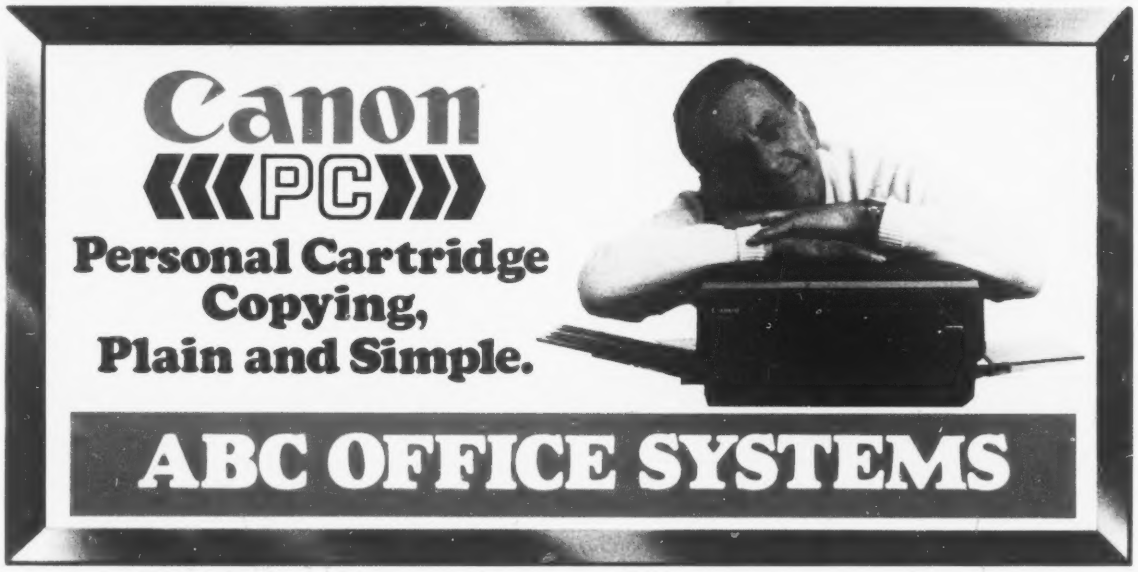
PLAIN AND SIMPLE: OUTDOOR ADVERTISING MADE CANON'S TV ADVERTISING WORK HARDER.



Canon
PC
Personal Cartridge Copying, Plain and Simple.
ABC OFFICE SYSTEMS

When the Copier Division of Canon U.S.A. needs to reach a broad target audience of business people and professionals right before the point-of-sale, nothing can duplicate the effectiveness of Outdoor Advertising.

Canon's Paul Schwartz explains it this way: "National advertising, primarily television, had already established Canon's reputation as the front-runner in office machines. In addition, our famous spokesperson, Jack Klugman, had generated a large amount of initial consumer awareness and long-term recognition for our PC Copier advertising. What we needed next was to tell potential customers where they could buy the copiers Jack Klugman sold so well."

The solution was plain and simple. And effective. Translate television's Jack Klugman into Outdoor's Jack Klugman. The visually strong design, with its quick message, well-known face, and sizable space for retailer identification tells prospects where they can locate the Canon PC Copier.

By continually triggering recall of their TV sales message in Outdoor, Canon extends the benefits and the costs of their TV advertising program.

In other words, Outdoor makes Canon's TV advertising work harder. And vice versa.

To find out how Outdoor can improve every TV buy you make, call the Institute of Outdoor Advertising at (212) 986-5920. Or write: IOA, 342 Madison Avenue, NY, NY 10173.

® Canon and Canon PC are registered trademarks of Canon U.S.A., Inc.

Illness

(Continued from Page M-61)

try standard of 10% of the cover price. Some monthlies were even dropped on the sly by newsstand operators after only two weeks on the shelves in order to make room for more publications, laments Mr. Ahl at Creative Computing. "We dubbed the season our black summer," he says, referring to the fact that generally only 60% of all copies that hit the newsstands were sold.

With most observers predicting that editorial coverage will increase in importance, most computer magazines, especially the catalog lookalikes, will have to boost their slim editorial ratios or get zapped by Success Quotient.

Editorial content is turning more toward application as the magazines cultivate a larger user base. Magazines stressing application will have to devote greater editorial space to display comprehensive programs and risk incurring the wrath of software manufacturers that do not want their programs printed.

Run-ins already are occurring, particularly between manufacturers and machine-specific magazines, most of which are editorially independent of the manufacturer covered. In late 1983, the Wayne Green publishing division of CW Communications reached an agreement with Tandy that Mr. Green, who publishes two Tandy-oriented publications, would stop writing his often critical column. Since then, Tandy increased its advertising in the magazines and made available its warranty card list to solicit subscriptions—rare in this industry. While good for business, all of this would seem to cast a shadow on editorial independence in the minds of purists.

Several magazines are part of larger corporate groups that also market software. That software can receive glowing reviews, raising an issue of credibility. Or, just the opposite can happen. At Scholastic, its Family Computing magazine recently drew salvos from the company's Wizware software division for planting a "not enough value for the money" tag in its review of Wizware's Square Pairs game.

The shift toward application also is caused by the growth in computer literacy, a direct result of the expanding user base. "These users, for example, won't want to tinker as much, repair or modify their machines, or know how it works or care for that matter—the kind of stuff readers and advertisers have wanted," says Peter Abrahamson, consultant with Publishers Consultants Management Group. "In an on-going basis this market will be served by as little as two publications," he predicts. From 150 titles, that represents a real shakeout

This fickle industry seems programed by some fecund Dungeon Master to procreate magazines with abandon. But now it is getting ready to eat its own. The question is not so much who will die, but who will survive?

Kids teach their parents a thing or two

Remember when Superman was in diapers and he lifted a car off his earthly father? At that point his adopted parents knew he had that *je ne sais quoi.*

In the eyes of today's computer industry, Superman holds no monopoly on "that special something."

It's sort of an all-in-the-family publication whose common denominator is the dumb parent, or to be kind, less computer literate moms and dads.

Rather, a host of computer literate youngsters have become its kryptonite kids.

This youth market is the target of Scholastic Inc.'s latest magazine entry—*K-Power*—and the description of this audience by publisher Shirrel Rhoades leaves even the less-jaded among us to say: "It's come to that."

"Our target is savvy teens and pre-teens. These kids know more about computers than their parents.

"It is more technical and sophisticated than *Family Computing* [another Scholastic title]. It's for kids who have discretionary income." Or, in other words, for parents who are willing to dole out the subscription fee.

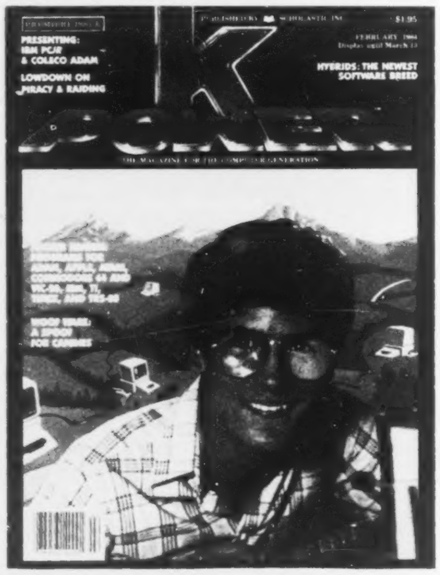
K-Power, which hit the market in late January with a 200,000 rate base, followed the successful entry last fall of *Family Computing,* sort of a general all-in-the-family publication whose common denominator is the dumb parent, or to be kind, less computer-literate moms and dads.

As might be expected, *K-Power* has an editorial problem: It must write "down to" and "up to" its audience at the same time. This has led to development of the K-Net, a panel of top-flight computer kids hooked up by modem to whom Scholastic editors can pose tough questions and from whom they can get readable copy, software reviews and credible answers.

K-Net diminishes the risk of developing a patronizing tone and thus turning off the audience, and cues editors to the level of computer sophistication in this market.

If the level of that sophistication among the K-Net panel is any indication, the editors at *K-Power* may have to go back to school.

Panelist Stephanie Kaufman, a 17-year-old senior at George Washington High School in Denver, is computer literate in several languages—she knows BASIC like the back of her hand—transcribes manuals and tutorials into computer language in an advanced computer class at school, works out calculus problems on the computer and instructs her parents in setting up the family budget on their Apple IIe. In her spare time she reviews computer games for magazines, edits the school paper and competes in weekend debate contests.



K-POWER

HYBRIDS: THE NEWEST SOFTWARE BREED
$1.95
FEBRUARY 1984
THE MAGAZINE FOR THE COMPUTER GENERATION

K-Power's *K-Net, a panel of top-flight computer kids, answers tough questions in a credible and readable manner.*

Her father is learning BASIC and her 8-year-old kid brother is not far behind.

"Kids have just gotten into computers faster than fathers," she proffers.

Panelist Eric Fisch, a 14-year-old from St. Paul, Minn., became known to Scholastic because of a first place in regional competition for programing. A freshman at Highland Park Senior High School, he is on the school math team and in a senior-level computer class. He knows BASIC and is preparing to learn Pascal.

At home, Eric signs on to the Apple II-plus with his 17-year-old brother "who learned the computer from other kids," and his father, a chemist with 3M.

Lest one think these kids a bit too cerebral for even their computer literate *K-Power* contemporaries, it is comforting to note that they do have more traditional interests:

"I joined Nautilus yesterday," says an excited Stephanie.

And "I play the bass clarinet in the school band," beams Eric, who also loves to play baseball and is no doubt torn between playing a pickup game after school and "practicing" his computer.

Four A's tackles ad image with ads

THIS AD IS FULL OF LIES.

LIE #1: ADVERTISING MAKES YOU BUY THINGS YOU DON'T WANT. Advertising is often accused of inducing people to buy things against their will.

But when was the last time you returned home from the local shopping mall with a bag full of things you had absolutely no use for? The truth is, nothing short of a pointed gun can get *anybody* to spend money on something he or she doesn't want.

No matter how effective an ad is, you and millions of other American consumers make your own decisions. If you don't believe it, ask someone who knows firsthand about the limits of advertising. Like your local Edsel dealer.

LIE #2: ADVERTISING MAKES THINGS COST MORE. Since advertising costs money, it's natural to assume it costs *you* money. But the truth is that advertising often brings prices down.

Consider the electronic calculator, for example. In the late 1960s, advertising created a mass market for calculators. That meant more of them needed to be produced, which brought the price of producing each calculator down. Competition spurred by advertising brought the price down still further.

As a result, the same product that used to cost hundreds of dollars now costs as little as five dollars.

LIE #3: ADVERTISING HELPS BAD PRODUCTS SELL. Some people worry that good advertising sometimes covers up for bad products.

But nothing can make you like a bad product. So, while advertising can help convince you to try something once, it can't make you buy it twice. If you don't like what you've bought, you won't buy it again. And if enough people feel the same way, the product dies on the shelf.

In other words, the only thing advertising can do for a bad product is help you find out it's a bad product. And you take it from there.

LIE #4: ADVERTISING IS A WASTE OF MONEY. Some people wonder why we don't just put all the money spent on advertising directly into our national economy.

The answer is, we already do.

Advertising helps products sell, which holds down prices, which helps sales even more. It creates jobs. It informs you about all the products available and helps you compare them. And it stimulates the competition that produces new and better products at reasonable prices.

If all that doesn't convince you that advertising is important to our economy, you might as well stop reading.

Because on top of everything else, advertising has paid for a large part of the magazine you're now holding.

And that's the truth.

ADVERTISING.
ANOTHER WORD FOR FREEDOM OF CHOICE.
American Association of Advertising Agencies

By NANCY MILLMAN

PALM SPRINGS, CAL.—Taking an aggressive and confrontational approach, the American Assn. of Advertising Agencies is launching an ad campaign for its members' product—advertising.

The newspaper and magazine campaign is the culmination of nine months of work on the part of the organization's committee on the image of advertising.

Former Four A's chairman John Bowen (1982-83) made improving the image of advertising the organization's No. 2 priority—behind activities in Washington—during his term. Outgoing chairman Paul Harper (1983-84) has continued the mission.

Black-and-white ads have been created by Fallon McElligott Rice, Minneapolis. Agency vp-creative director Tom McElligott is a member of the committee.

The strategy is to change consumer perceptions that "advertising makes people buy things they don't want, increases the cost of goods and helps sell inferior products," according to the Four A's.

In addition, said Foote, Cone & Belding's John O'Toole, chairman of the committee since last May, the campaign is designed to "provide some answers and some ammunition to those in the general public who are positively or neutrally disposed to advertising, but are constantly exposed to critical, sometimes hostile, opinions about it."

The ads use dominant bold headlines to grab attention. "No amount of advertising can make you buy a product you don't want," says one headline over illustrations of Billy beer, an Edsel and French's Doggie Donuts.

Another, shown at left and headlined "This ad is full of lies," proceeds to pick apart four frequently heard myths about advertising, including "Advertising makes things cost more."

It signs off with the words, "Advertising. Another word for freedom of choice."

Media organizations, including Time Inc., Hearst Publications, *U.S. News & World Report*, the *New York Times* and *New York Daily News*, have committed to run the campaign without charge.

More print ads, as well as radio, tv and poster executions, are being prepared, Mr. O'Toole said.

Mr. O'Toole's committee also includes Rena Bartos, senior vp, J. Walter Thompson Co.; Keith Reinhard, chairman, Needham, Harper & Steers/USA; Harold

'Dirty dozen' pol ads may be cited

PALM SPRINGS, CAL.—Political advertising is in for tough scrutiny from the Four A's.

As part of its effort to improve the image of advertising, the industry organization is asking its 600 member agencies to watch for violations of the Four A's code of ethics in political campaign advertising during this election year.

The leadership of the group believes that political advertising is a factor that contributes to negative perceptions of advertising in general.

After the election, according to Charles F. Adams, exec vp and director of the Washington

ABC works out formula for Olympics make-goods

By DIANE MERMIGAS

ABC-TV has begun approaching Winter Olympics advertisers with a proposal for make-goods that would be based on the difference between the estimated and the actual ratings delivered by each sponsor's schedule of buys during the events.

Such a formula would assure nearly all of ABC's 45 Winter Olympics advertisers some kind of compensation for ratings that declined across the board from the previous winter games.

A source at ABC said the formula would be applied uniformly to all advertisers.

However, ABC's uniform shortfall ratio for advertisers probably will be less than the 30% that overall Olympics ratings fell short of ABC's projections.

Some major advertisers said ABC's proposed formula for make-goods would translate into compensation of 10% to 15% of the total amount they spent on commercial airtime during the games. However, a source at ABC said the network's make-goods formula would have nothing to do with how much money advertisers spent.

It is believed that ABC would attempt to place much of the compensated time during its broadcast of the Summer Olympics, which begins July 28, although some of the time probably will be placed in other sports events, such as baseball, Olympic trials and possibly National Collegiate Athletic Assn. football games.

ABC has slightly more than $20 million in available time left to sell for the Summer Olympics, which is expected to generate $430 million in revenues. The Winter Olympics, which ran for fewer days and fewer tv hours, generated

last minute news

McCann lands $30 million more from Goodyear

AKRON—Goodyear Tire & Rubber Co. awarded its $30 million international account to McCann-Erickson, New York. McCann handles most of the overseas Goodyear business, and beat out J. Walter Thompson USA, which has the $40 million domestic account. McCann will replace the Troost branch of SSC&B and Campbell-Ewald units in the new assignment. C-E last November lost the domestic side to JWT (AA, Nov. 14).

Beiersdorf to take After Sun lotion national

NORWALK, CONN.—Beiersdorf Inc. will introduce Nivea After Sun lotion nationally next month, with an ad and promotion budget estimated at more than $3.5 million. National ads, including network tv and print, start in May; regional tv and print ads in Florida, Arizona and the West Coast kick off April 16. Agency is Posey, Parry & Quest, Greenwich, Conn.

Rorer denied motion for injunction against AHP

NEW YORK—A U.S. district court judge here denied William H. Rorer Inc.'s motion for a preliminary injunction against American Home Products' ad claims for its Riopan Plus antacid (AA, Nov. 14). Rorer, which markets Maalox, had argued that the lab tests supporting the AHP comparative claims were inadequate.

Renfield moves $5 million account to McCann

NEW YORK--Renfield Importers, in a move to consolidate its international advertising efforts, has awarded worldwide business for Asti Spu-

Levi puts gold into 501 jeans

San Francisco—The jeans worn by California gold miners 134 years ago soon will get a $36 million national promotional push from parent Levi Strauss & Co.

Consumer advertising, including tv, radio and print, will break in May for Levi's 501 jeans for men, women and children. The jeans, designed by company founder Levi Strauss, are the original shrink-to-fit, button-fly variety with the trademark metal button, a leatherlike patch and a red cloth tab on the back pocket.

Levi's 501 jeans have been growing in popularity in recent years, but "the vast majority of 501 jeans volume comes from a core of loyal users in the western U.S.," said Linda Aletto, the company's consumer marketing director.

The company, the world's largest branded clothing marketer, hopes to expand its consumer base in the West and introduce 501s to the rest of the country by spending what it claims is the largest amount of money in apparel history to promote a single product.

Levi Strauss, the official outfitter of the U.S. Olympic team, will mount a separate advertising effort tied to the Olympics during the summer games in Los Angeles. It is not clear whether ads for 501s will tie in, though spots will air during that 18-day period.

Foote, Cone & Belding, Levi's agency, still is exploring creative strategies, with definite plans to emerge in the next few weeks.#

General Foods sees growth in drink mixes

By NANCY GIGES

Few would have thought a couple of years ago that the mature powdered-beverage business would soon pace the sales growth of food giant General Foods.

But this year, a two-year revitalization program began to bear fruit, and powdered beverages—led by old-timer Kool-Aid and newcomer Crystal Light—will grow 19% over the previous year for the company's fiscal year that ends late this month, executives say.

The company is so pleased with its progress that it is pouring $225 million into advertising and promotion for the Kool-Aid, Crystal Light, Country Time and Tang drink-mix lines for its upcoming fiscal year be-

Ketchum goes after Reagan ad account

By JOHN J. O'CONNOR and RICHARD L. GORDON

A top White House aide has confirmed that he plans to meet with Donald G. Sullivan, president of Ketchum Advertising, Pittsburgh, who is seeking to gain the $25 million-to-$30 million Reagan reelection campaign.

In a candid telephone interview Friday, Reagan aide Michael McManus said that he would also meet next week with two undisclosed New York shops that are considering making presentations.

"I didn't know the agency business eats its young," he said, in reflecting on the frustration he and others have experienced now that the selection process has been steeped in gossip and controversy.

He admitted that a 1982 *Oui* interview of Jerry Della Femina, whose agency has dropped out of the race, was a "negative," but not overriding, reason why a deal could not be reached (AA, March 5).

"It was a combination of things," he continued, among them the "financial package" and amount of time the Della Femina, Travisano & Partners chairman was willing to make available to the campaign.

Ketchum's Mr. Sullivan, who contacted Advertising Age for help

Super-day ads get tough

By SUSAN SPILLMAN

The long-awaited "Super Tuesday" tomorrow should go a long way toward shaping the advertising strategies of the Democratic presidential candidates left in a thinned-out field.

But the ups and downs of the primary campaigns so far have already produced altered, more confrontational messages from candidates as they head into this day of six primaries and five caucuses:

- Sen. Gary Hart, on a high since his three successive victories in New England, is enjoying the fruits of winning. Campaign donations are flowing in, and new commercials are introducing the candidate to the crucial South, as well as taking some shots at Walter Mondale.
- Mr. Mondale, no longer the undisputed front-runner, is plowing forward with a commercial message taking direct aim at Mr. Hart. Though Mr. Mondale continues to run ads spinning a down-home, leadership image of himself, this latest commercial represents a twist in his campaign advertising.
- Sen. John Glenn, quickly running out of funds and time, is running commercials that are using the phrase his campaign has assiduously avoided so far: "The right stuff."
- The Rev. Jesse Jackson still has not bought any commercial time, even though the South, where three primaries take place Tuesday, is considered important to his fortunes. He continues his brand of personal campaigning and gathering media attention.
- George McGovern is placing his resources into the primary in Massachusetts, the only state he won as the Democratic candidate for President in 1972.

Mark gets top spot at Colgate

New York—Reuben Mark, 45, president, Colgate-Palmolive, will succeed Keith Crane as chief executive officer at the conclusion of the annual meeting May 3.

Mr. Crane, 63, who has been the company's chief executive for the past five years, will remain chairman. Mr. Mark continues as president.

Also at that time, William S. Shanahan and J. Dale Sherratt, exec vps, will be named to the new posts of senior exec vps-chiefs of operations. Mr. Shanahan will be responsible for worldwide Colgate and related businesses, while Mr. Sherratt will head Kendall and related hospital, industrial and fiber businesses.

Mr. Mark joined Colgate in 1963 and served in various product management posts. He became marketing manager for the Western Hemisphere in 1967 and director of marketing-European division in 1969.

He has headed subsidiaries in Canada and Venezuela and also served in the Far East.

He became vp-general manager, household products division, in 1975 and group vp-U.S. operations in 1979. He was elected exec vp in 1981 and president-chief operating officer a year ago.#

Soft-drink marketing: It's all showmanship

By NANCY GIGES

New York—It was a day of one-upmanship as the three leading soft-drink companies—Coca-Cola Co., Pepsi-Cola Co. and Seven-Up Co.—invited the media to separate press conferences March 7.

In the morning, Seven-Up disputed Coca-Cola's claim, to be made later in the day, that Diet Coke had become the third-largest brand.

Later, in the lobby of Radio City Music Hall, Coca-Cola USA president Brian G. Dyson did make that claim, noting that 7UP was the No. 3 brand in 1983 for the full year, but that Diet Coke was now selling at a much greater rate than 7UP.

Mr. Dyson then outlined a new wide-ranging advertising and promotion program the company has planned to support the rapidly growing brand.

Pepsi-Cola's news was to confirm that it had signed pop singer Lionel Richie to a two-year contract estimated at more than $5 million (AA, Feb. 20). For those dollars, the singer will appear in Pepsi commercials beginning in 1985 and he will compose and perform a Pepsi theme song. Also, Pepsi will be the sole sponsor of his concert tours through next year.

These news conferences came 10 days after the celebrated debut of a new BBDO-created Pepsi ad campaign, starring rock superstar Michael Jackson.

Not to be outdone, Coca-Cola has its own star-studded commercials in new executions for Diet Coke. Called "Premiere II," the spots, like earlier versions, feature cameo appearances by well-known figures from the business, sports and entertainment worlds. The new list includes entertainers Paul Anka, Shari Belafonte, Bill Cosby, Robert Klein, Jayne Kennedy and Lorenzo Lamas; sports stars Julius Erving and Marcus Allen; Ted Turner from business; Miss America Vanessa Williams, and the Cabbage Patch Kids in a class of their own.

SSC&B, using the same music, has added new versions to the key line, "Just for the taste of it," to fit the celebrity's personality, such as "just for the thrill of it" and "just for the fun of it."

When the spot made its debut last week on "The CBS Evening News," it was preceded by another 30-second spot featuring Mr. Dyson saluting the bottlers, wholesalers and retailers who enabled Diet Coke to achieve the No. 3 position. He also mentioned that the company wanted to thank consumers by giving everyone in America a free Diet Coke.

The offer, available last weekend, was made through massive couponing in 1,300 newspapers. A coupon enabled consumers to get a bottle or can of Diet Coke free or was worth 60¢ off on a six-pack in a supermarket, or consumers could obtain a refund for a fountain Diet Coke with proof of purchase. The

Australian looking at U.S. News

By DENNIS CHASE

Palm Springs, Cal.—Australian Consolidated Press, one of the biggest media companies in Australia, is considering bidding for U.S. News and World Report Inc.

But "it may be too expensive for us," said Trevor John Kennedy, editor-in-chief of ACP, Sydney.

Mr. Kennedy is in New York this week to meet with Morgan Stanley & Co., the New York investment banker that was asked by U.S. News to shop around for buyers (AA, Feb. 20).

U.S. News has acknowledged that one potential buyer—which it would not identify—has been in pursuit since December. The company has an appraised value of $39 million, but the unidentified suitor's offer is said to have been considerably higher than that.

Outside of Australian media

Flat sales force winery changes

By RUTH STROUD

The five largest California wine makers, faced with a new pecking order brought on by changes in winery and brand ownership, are jockeying to settle into their own marketing positions.

Four of the top five wine companies are breaking the post-holiday lull with new advertising efforts, product introductions and hints of new marketing directions.

This activity follows a year that saw one winery—Wine Spectrum, including Taylor California Cellars—change hands, as another, ISC Wines of California, came into being when its owners purchased brands from Heublein Wines.

The one constant has been the dominance of E.&J. Gallo Winery, which continues to be the largest of the California wine companies by far.

The concentrated marketing efforts are coming at a time when growth in the California wine industry, which accounts for 68% of all wine sold in the U.S., has been flat.

Case shipments in 1983, according to figures from *Impact*, the wine and spirits newsletter, increased by 1.4% to 149 million in 1983 from the year before. This increase comes on top of a 0.7% gain from 1981 to 1982; the previous year-to-year increase was 4.6%.

The recent shifting of brands and wineries has resulted in the following ranking of the top companies: E.&J. Gallo, Jos. E. Seagram

(Continued on Page 66)

شفروليه كورفيت . جهاز التعليق المتطور المكون من ذراع تحكم
GM

The headline for this ad translates to "Chevrolet Corvette. Its advanced five-link control arm suspension is just one indication of its sophistication." Though written here in Arabic, it's suitable to appear in Spanish, Dutch, German or French versions as well. McCann-Erickson, Troy, Mich., developed the ad for General Motors Overseas Distribution Corp.

GM mapping future on truly global scale

By RALPH GRAY and JESSE SNYDER

Detroit—General Motors is fast becoming Global Motors. It's starting to market Japanese Chevrolets in Puerto Rico, and it is due to bring German-Korean cars to the U.S.

That's in addition to jointly producing a car in the U.S. with Toyota that can be sold here and overseas. GM also is eyeing Mexico for production of low-volume U.S.-designed vehicles to be sold in the U.S.

Its newly organized domestic car divisions now are free to buy overseas from GM subsidiaries or others. GM has high hopes for its new line of front-wheel-drive luxury cars in overseas markets.

The marketing vehicle for much of this is the new GM Overseas Distribution Corp. and its agency, McCann-Erickson, Troy, Mich. GMODC was formed from GM's old North American Vehicles Overseas operation, which was limited to selling U.S. or Canadian-built vehicles overseas.

Sales of North American vehicles have been flagging, mostly because of the strong dollar, which makes U.S. exports expensive.

As more non-North American vehicles get pumped into the overseas pipelines, the decline—to 68,200 cars in 1983 from 91,000 in 1982—should halt, said William G. Zeising, McCann-Erickson senior vp-management rep on the GMODC account.

Beyond 1985, he expects cars built in foreign countries to eventually outnumber North American vehicles in the GMODC lineup.

GM's goal is to start selling a "full spectrum"—in size and price—of vehicles through its overseas network. The plan calls for the sales effort to begin in the Middle East, where volume is the highest.

"We've got these overseas sources, and we're not taking full advantage of them,"

research beat / BY JACK HONOMICHL

Election year puts pollsters in spotlight

March 13 has been dubbed Super Tuesday by political mavens because there are 11 primaries or caucuses.

These heavily publicized events, following the caucuses in Iowa and Maine and primary in New Hampshire, focus attention on those survey researchers—*i.e.*, political pollsters—who work for those hundreds of candidates and incumbents contending for the 33 U.S. Senate seats, 435 U.S. House seats and 13 gubernatorial seats that are up for grabs in November. That's not to mention the numerous presidential aspirants.

Like crocuses in the spring, this bevy of political researchers pops up every two years. Through newspaper and magazine articles and tv and radio interviews, the public gets a glimpse of people such as Peter D. Hart, Arthur J. Finkelstein, William R. Hamilton, V. Lance Tarrance, Dorothy J. Lynch, Robert M. Teeter, Michael Rowan and Richard B. Wirthlin.

Mr. Wirthlin has become a media personality because of his role as President Reagan's research guru and personal friend.

The following is a who's who of political pollsters, people you'll hear a lot from during the next eight months.

Democratic candidates

The researcher working for former Vice-President Walter F. Mondale, seeking the Democratic presidential nomination, is Peter D. Hart, 42, president of Peter D. Hart Research Associates, Washington, the largest research company specializing in Democratic party candidates.

Mr. Hart started his research career working for Louis Harris and Oliver Quayle, both Democratic pollsters. Since starting his own company in 1971, he has been involved in campaign efforts for, among others, Morris Udall, Edward Kennedy, Ernest (Fritz) Hollings and the late Hubert H. Humphrey.

In the 1984 campaign, the Hart organization is involved with the following senatorial candidates: Howell T. Heflin in Alabama; Thomas Harkin in Iowa; Max Baucus in Montana; Norman E. D'Amours in New Hampshire; James B. Hunt in North Carolina; John D. Rockefeller IV in West Virginia, and Lloyd Doggett, one of many contending for the Senate seat being given up by Republican John Tower in Texas.

Sen. Gary Hart, the prominent Democratic hopeful from Colorado, is getting research counsel from Dorothy J. Lynch, 36, a relative newcomer to the field—and the first woman pollster to be so involved in a presidential race. (Among other things, she is considered an expert on the so-called gender gap.)

Ms. Lynch started her research career at NBC and later worked for Patrick H. Caddell, who is best known as the research counsel to former President Jimmy Carter. She set up her own shop, Lynch Research, in the Georgetown section of Washington a little more than one year ago.

The making of presidential image-makers, 1984. How important are they? See Page M-4.

Former astronaut John H. Glenn Jr. has his research ties with William R. Hamilton, 44, president of Hamilton & Staff, Chevy Chase, Md., a company prominent in polling and consulting to Democratic candidates since it was founded in 1963. Through the years, Mr. Hamilton has been involved with such notables as Thomas P. (Tip) O'Neill, Edmund Muskie, Claude Pepper, Adlai E. Stevenson III and Birch E. Bayh Jr.

In the current go-round, the Hamilton company is associated with the following senatorial aspirants, among others: Walter Huddleston in Kentucky; Bennett Johnson Jr. in Louisiana, J.J. Exon in Nebraska and Joan Growe in Minnesota.

Sen. Alan M. Cranston, the California senator who dropped out of the race after the New Hamphshire primary, got his research counsel from Michael Rowan, 42, who heads the Rowan Group, New York, which was founded in 1970. Mr. Rowan got his political start in Alaska working on the campaign of former Sen. Maurice (Mike) Gravel. Currently, about half of Mr. Rowan's work is in political campaigns outside the U.S., most notably in Venezuela and Puerto Rico.

As far as I can determine, the other Democratic hopefuls—Jesse L. Jackson and George McGovern—do not have research backup.

Another research company active in Democratic politics is Penn & Schoen Associates, which has offices in New York and Washington. Founded in 1975 by two young students at Harvard University—Mark J. Penn and Douglas E. Schoen—this company has been associated with former Gov. Hugh Carey in New York and Brendan Byrne, former governor of New Jersey, as well as with the colorful mayor of New York, Edward I. Koch.

In 1984, Mr. Schoen says, his company will be involved in 15 congressional races and the Missouri gubernatorial campaign of Norman Merrell.

The Republican side

There are four research companies "recommended" by the Republican National Commi —Arthur J. Finkelstein & A ciates in Irvington, N.Y.; Lance Tarrance & Associate Houston; Market Opinion search in Detroit, and D sion/Making/Information Santa Ana, Cal., and Washing They pretty much have a lock high-level Republican work.

The president of Market O ion Research, Robert M. Tee 45, got his start in politics in mid-1960s working for Geo W. Romney, the onetime pr dent of American Motors C who became governor of Mi gan. In the interim, Mr. Tee has been associated with num ous Republican biggies, includ former presidents Richard Nixon and Gerald R. Ford, the current Vice-Preside George Bush.

In 1984, MOR is working several incumbent Republic senators, including Charles Percy in Illinois, Nancy Land Kasselbaum in Kansas, Willi Armstrong in Colorado, Willi S. Cohen in Maine, Strom Th mond in South Carolina a Thad Cochran in Mississippi—well as for newcomers Ja Lousma, the former astronaut

No Nonsense profiles history's leading ladies

Whose poetry made a strong president weep?

Who was the first woman to run for president?

Who was the mother of the environmental protection movement?

Who was hanged without a trial for her purported role in the assassination of Abraham Lincoln?

What reporter covered every president from Coolidge to LBJ and gave John F. Kennedy some of his happiest times on tv?

Who was the first American woman to own and publish a newspaper?

If you're a woman who needs stimulus and cheer in this long, cold winter and superstation WTBS in Atlanta is within reach of your tv set, try to catch the 90-second historical vignettes about famous femmes, past and present. Placed by Grey Advertising, "A Glimpse of History. . .In The Company of Women" can be seen three times weekly during the movie breaks.

The answer to the first question is Julia Ward Howe, a prolific poet who wrote the lyrics to "The Battle Hymn of the Republic." Her moving words brought tears to the eyes of President Lincoln. She's the leadoff woman in this fascinating new cable tv series from No Nonsense Fashions.

Each vignette opens with a well-known present day man or woman giving a clue as to who is being profiled. Then comes a 30-second commercial for one of three No Nonsense pantyhose brands, followed by sequences about the mystery woman and her accomplishments.

These capsule profiles are fun. More significantly, they should provide inspiration for women who are looking for powerful enough role models to spur them on, whatever happens.

Victoria Woodhull, an early feminist, was the first woman to run for president, in 1872, if the researchers for World Communications, which created and produced this charming series, are to be believed. This attractive eccentric, who at one point managed to live with her ex and current husband simultaneously, also split the women's movement.

The next three questions are easier; you probably already have the answers.

Rachel Carson in her best seller "Silent Spring" put civilization on notice that the world, as we know it, was in danger of extinction if industrial and chemical pollution was not halted.

Mary Surratt, a Washington landlady, went to the gallows, without a trial, for her alleged role in the murder of Lincoln, one of America's greatest Presidents.

May Craig, a New England newspaper woman and a panelist on "Meet the Press," gave another charismatic head of state, JFK, some of his most relaxing moments with her probing, unorthodox questions at White House press conferences. "I'd rather be remembered as grim than giggly," she said, when criticized for her bird-dog, relentless approach to the high and mighty.

Amelia Jenks Bloomer is singled out as the newspaper publisher-owner who has been remembered most for promoting bloomers as a fashion. However, she also fought for women's rights and, according to this too-brief glimpse, she clashed with Tennessee authorities over women as property holders. The all-male legislature declared that women couldn't own property because they had no souls, according to World Commuications' research.

Women chosen for this 52-week series come in all sizes, shapes and colors. One thing they have in common: They are distinctive, memorable types and often persons of accomplishment and influence.

Eleanor (Mrs. Franklin D.) Roosevelt reminds us that "No one else can make you feel inferior without your consent." A quote from the brilliant British suffrage leader Emmeline Pankhurst sounds eerily appropriate for today: "Let the women stand shoulder to shoulder with the men to win the common victory which we all desire."

Dixon Johnston, president of No Nonsense Fashions, Greensboro, N.C., said the women selected achieved notability because of their "no nonsense" approach to life. One might say that's ideal sponsor-program compatability. The commercial inserts focus on active, pretty legs going about work and play.

Jay Kholos, president of World Communications, looked for interesting, dynamic women who made an impact but who were not necessarily perfect. Few contemporaries are profiled. Exceptions include Wilma Rudolph, a 1960s Olympics star, and Muriel Siebert, the first woman to sit on the New York Stock Exchange. "We were looking for people who had been famous long enough to be viewed with historical perspective," Mr. Kholos said. "We didn't consider women who have been famous for about five minutes."

Highly positive fan mail has been coming in at an encouraging rate, reports Roger Beahm, No Nonsense director of marketing. The main adverse criticism, and I concur, is that the capsules are frustratingly brief.

How about pulling out some of the more substantial figures for longer treatment in a series of half-hour specials?

I suggested this, as did many fans who wrote to the sponsor.

Now, we'll have to wait to see whether the idea catches fire. It just might if enough women (and men) endorse the suggestion and particularly if this campaign seems to be having a favorable impact at the cash register.#

Cable 'adolescent,' exec says

NEW YORK—There was bad news for the cable tv industry at the Assn. of National Advertisers media-day gathering here recently, and good news on the tv syndication front.

Asked whether the cable medium was dead or alive, Dawn Sibley, senior vp, MCA Advertising, stated it was "definitely alive" but that "at this time most advertiser-supported cable networks have barely reached an adolescent stage."

She added that most of these networks "have not yet begun to achieve the strength they need to compete for viewers in order to become strong selling mediums.

"As someone responsible for investing dollars," she continued, "I am extremely concerned with the selling strength of the media I invest in. The reality of this business is that, as much as they might like to, most advertisers really don't have funds to experiment with or the dollars to invest in learning about the future media world."

As for cable's eroding of broadcast network shares, Ms. Sibley said, "Achieving a share of viewing has never been an objective in network buying. In this business, share has traditionally been used to measure a program's success." The basic goal in using network tv is generally mass reach or coverage of the target audience.

So even though network share erosion is a reality, thus far there has been no evidence that the networks are suffering a loss in reach potential, she said.

With most lost network tv shares going to pay tv services without commercials, she maintained, all advertisers are losing the same share of voice.

However, Ms. Sibley said cable "has the potential of achieving significant viewing levels" and that the ratings of several cable networks demonstrate that viewers "know how to find them when they want it."

■ Dick Robertson, senior vp-sales and marketing, Telepictures Corp., called syndication "the not-so-silent fourth network" at the workshop, and stated that while syndicators are "not attempting to kill Goliath [the networks]," they are "giving him some pretty severe headaches."

Since tv syndication won't "materially diminish network's ability to compete," he positioned it as an "additive" to network buys.

The availability of not only "pure" barter shows but also "cash plus barter" series, he said, has given advertisers "an additional place to go with network money, a place that delivers a solid alternative to a network-only national tv buy."#

Top-rated movies on tv

Theatricals are bombing at the network tv box office this 1983-84 season (AA, March 5). Here is a list of all movies that have aired on the three commercial tv networks Sept. 26, 1983, through Monday, Feb. 27, 1984. The chart includes the title of the film, rating and share, whether it's a made-for-tv movie (M-f-tv) or theatrical (Thea.) and the network that aired it. Only four theatricals made the list. *Source: A.C. Nielsen Co.*

Wineries

(Continued from Page 3)

& Sons (Taylor California and Paul Masson), National Distillers & Chemical Corp. (Almaden), R.J. Reynolds Industries (Heublein Wine's Inglenook) and ISC Wines (Colony).

As part of this effort to create different and competitive corners in the market, Almaden Vineyards is introducing Golden Chablis, a fruitier and more upscale alternative to its Mountain Wine Chablis (AA, March 5).

Almaden, which had about a 6% drop in shipments in 1983 from 1982, has been under a mandate from National Distillers to implement a more "firebrand" style of marketing to halt its dwindling market share. That share has slipped from 9.4% of the California wine market in 1980 to about 7.5% in 1983, according to *Impact*.

Effect of Taylor cited

Industry analysts date the beginning of Almaden's decline to Coca-Cola Co.'s dramatic launch of Taylor California Cellars in 1978. Coca-Cola launched a comparative ad campaign in which paid experts judged Taylor California superior to various California wines, including Almaden, Inglenook and Sebastiani.

At the same time, the Atlanta company won a suit against the federal Bureau of Alcohol, Tobacco & Firearms over BATF rules barring taste tests in wine advertising.

Taylor California subsequently siphoned share from several top California wineries, but Almaden probably took 50% of the beating, according to one industry estimate. The winery waited until last fall to fight back with its own comparative ad campaign, which insiders called "too little, too late."

Now, under new leadership and a new agency, BBDO/West, which succeeded Dancer Fitzgerald Sample late last year (AA, Nov. 21), Almaden is trying to make a comeback with Golden Chablis. It is being supported by a $6 million ad campaign, the largest ad spending the 132-year-old winery has thrown behind a single brand, a spokeswoman said.

Network tv and radio spots, using the theme "If you've got a taste for white, Almaden's got the taste for you," will break March 19.

Almaden is dropping the words "Almaden Vineyards" from the Golden Chablis label in favor of the simpler "Almaden." Spots aim to make Almaden's somewhat flagging image more contemporary.

The new-product introduction and modernized packaging may put Almaden back on the right track, said industry analyst Ed Everett.

"Their lack of packaging changes over a number of years kind of left them in the dust," Mr. Everett said. "They began to be perceived as old hat. But I think they have a good shot with this product."

At ISC Wines of California, the newly formed fifth-largest U.S. winery, the emphasis appears to be on producing quality wines through "pride of ownership." The message should come through in a spot tv campaign for Colony wine breaking next week in about 25 markets (AA, Feb. 27).

Colony tale related

The spots, shot in the original Italian Swiss Colony winery in Sonoma Valley, feature a forthright, fortyish gentleman-farmer recounting the story of how the Colony people got tired of being owned by a corporation on the other side of the country, so "we at Colony scraped together everything we had to buy our winery back."

Allied Grape Growers, an agricultural cooperative and a major shareholder in the San Francisco-based ISC Wines, purchased Colony, Italian Swiss Colony, Jacques Bonet and a host of other brands from R.J. Reynolds Industries' Heublein Wines last year.

First FCB campaign

The ad campaign, part of a $5 million to $6 million annual budget, is the first from ISC's agency, Foote, Cone & Belding, San Francisco. It is also the first significant advertising for the brand since Allied Grape Growers' acquisition.

The message of the campaign is one no other winery of comparable size can use, observed ISC vp-marketing Richard Moyer.

"Most of our competitors—with one exception—don't look at the wine business for their sole source of support," he points out. "When Heublein owned us, if Kentucky Fried Chicken returned 6% and wine 4% [profit], then wine got less attention."

Aside from ISC Wines and privately owned E.&J. Gallo, the other wine concerns in the top five are owned by big corporations with other interests.

Under ISC Wines, Colony's ad support is increasing markedly. During the first nine months of 1983, when Heublein still owned Colony, the company laid out $720,000 in spot tv for the brand, compared with $5.6 million for Inglenook, which is still part of the Heublein stable.

Many analysts give ISC Wines high marks for trying something new, but question its new owners' commitment to promoting its brands.

"I think the odds are skewed against them," said one observer. "I don't think they have a good, deep well of money to spend on marketing and advertising."

While ISC brings a new look to Colony, Seagram is maintaining the hard-hitting image for Taylor California Cellars, the brand it acquired along with other Wine Spectrum brands from Coca-Cola. In tv and radio spots that broke late last month—the first under Seagram—Taylor returns to the controversial comparative campaign that introduced the brand five years ago. But although it uses the opinions of taste experts, the campaign backs away from the original ads' direct-confrontation approach.

With this campaign, Seagram is moving to beef up ad spending almost to 1982 levels, when Coke spent more than $13 million to promote the brand. The company spent about $1.9 million during the first nine months, according to Leading National Advertisers figures, but let Taylor California languish after selling it to Seagram.

Market Watch, an industry trade pubication, estimates that Taylor California depletions rose by only 5% last year over 1982, compared with 45% in 1982 over 1981.

In the new tv spots, the camera pans left to right over an array of Taylor California and competitive brands—Almaden, Inglenook and Sebastiani. Announcer Frank Langella refers to wine experts who recognized Taylor California's quality and tells consumers that "millions of people who drink Inglenook, Almaden and other California wines are drinking Taylor California Cellars. Are they better wines? Judge for yourself."

Kenyon & Eckhardt, New York, is the agency.

By purchasing the Wine Spectrum for $200 million-plus, Seagram catapulted into second place in the California wine market. The acquisition nearly doubled the company's share of the market in 1983 to 11.7%, still leagues behind Gallo's estimated 41.3% share. The purchase also raised questions about how Seagram would reposition Taylor California, a brand competitive with its own Paul Masson.

Officially Seagram has said little about its plans for Taylor California. But the Seagram source said the current campaign should squelch reports that the New York wine and spirits company plans to let the brand die and put all its efforts behind Masson.

Industry speculation that Taylor California will become Seagram's "fighting brand," while Paul Masson assumes a more upscale positioning, is essentially correct, the source said.

No Masson changes seen

Meanwhile, Seagram has no plans to alter its Masson ads. It will continue to use Sir John Gielgud's dry wit and the familiar "We will serve no wine before its time" theme in various "life-style situations." But it has added a new phrase, "taste of time," in a new print campaign for its Classic Varietal wines, scheduled to break in April (AA, Feb. 13).

STRIKE GOLD.
ALMADEN INTRODUCES A WHITE WINE SO DIFFERENT, IT'S A GOLDEN OPPORTUNITY
Almaden

A trade ad for Almaden's new Golden Chablis underscores an attempt to give the wine an upscale image.

The two remaining wineries have less ambitious plans in the works. Heublein Wines, which came to RJR as part of the $1.39 billion acquisition of Heublein Inc. in 1982, is focusing all of its attention on Inglenook and the brand's new campaign.

The theme, "The wine that celebrates you," is an evolution of its earlier "Wine that celebrates food" message, with a more emotional, personal tone. Heublein Wines, now the country's fourth-largest wine marketer, is aiming to present wine as a more social, less elitist, beverage, said director of marketing John Martini.

In 1983, Heublein's shipments declined by 20% from the previous year; part of the decline came from the brands it sold to ISC Wines.

Gallo, alone among the top five U.S. wine marketers, doesn't appear to be hatching any changes in its Ogilvy & Mather-created "All the best" theme—yet.

The Modesto-based wine giant is the least threatened by the shifts in market share and ownership that occurred last year. Its share of the California market jumped from 38.3% in 1982 to 41.3% in 1983, and it has less to worry about with Seagram, a predictable competitor, than Coca-Cola, which delighted in causing a row.

"[Owner Ernest Gallo] has so much momentum he's like a victorious army mopping up," noted one analyst. "He feels pretty sure he can handle Seagram with one hand tied behind his back. His one danger will be slipping into complacency."#

Amaretto forgoes 'love' for 'taste'

By GAY JERVEY

Amaretto di Saronno always has been known as the liqueur of love, romance and the rose.

But next month, Glenmore Distilleries will reposition its almond-flavored concoction via the most aggressive marketing program in the brand's 95-year history, featuring ads themed: "Not for love or money. Simply for taste" (AA, March 5).

Ads break in April issues of 20 consumer magazines, including *Cosmopolitan*, *Life* and *Playboy*.

Over the next three months, Louisville-based Glenmore will be spending at the rate of $7 million on an annualized basis supporting the campaign.

Running in both page and spread executions, ads jettison the product-shot approach in favor of one featuring beautiful people.

The spread shows two men and four women in formal black evening attire, standing in various postures and slants against a plain black-and-white backdrop. Each carries a cocktail—presumably Amaretto di Saronno—with one lady dangling the traditional Amaretto long-stemmed rose.

The Amaretto bottle does appear, but not as the centerpiece. It floats at an angle in the lower right-hand corner of the ad, accompanied by the gold script treatment of the words "Amaretto di Saronno" with another new tag line, "The most beautiful taste in the world."

Yet-to-be finalized ads will strike similar debonair poses, said Jim Lynch, vp-marketing director for Foreign Vintages, the Glenmore unit that distributes and markets Amaretto in the U.S.

He describes this strategy as integral to reaching the type of audience that Amaretto wants to build.

"Initially, the approach with Amaretto di Saronno was more traditional," he said. "Now we want to broaden our appeal by making the ads more trendy, more life-style-oriented, but still talking to quality and versatility in a subtle way."

Glenmore this summer also plans to run a more tactical campaign that will highlight Amaretto's versatility as a mixed drink. Libations such as Amaretto and orange juice, Amaretto and coffee, or Amaretto and club soda will be promoted individually in a series to run in consumer magazines.

In addition to outdoor ads and point-of-sale material, Glenmore and Bloom Agency, whose New York office created the campaign, are planning a promotion geared to the up-and-coming or affluent.

Glenmore and Bloom clearly hope to enliven the brand's image —and thereby sales—by infusing some sophistication into Amaretto's sweet taste and look. One of the hottest brands in the mid-1970s, it has suffered in recent years at the hands of other relatively new liqueurs, particularly Baileys Irish Cream.

As such, Amaretto's compounded annual growth rate, which peaked between 1975 and 1982 at 20.8%, has been flat for almost three years, according to *Market Watch*, published by M. Shanken Communications, New York. That publication also notes that Amaretto di Saronno annual sales have lingered at 675,000 case depletions since 1981.#

JAMES W. PARTNER

WESTFIELD, N.J.—James W. Partner, 64, senior vp-corporate development, Selling Areas-Marketing Inc., the marketing research subsidiary of Time Inc., New York, died here Feb. 29 after an extended battle with cancer.

Mr. Partner, a native of Spokane, received his MBA degree from the University of Washington at Seattle in 1943 and then taught statistics and marketing at the University of Washington, Northwestern University and Cornell University before joining Dun & Bradstreet, in 1952.

Subsequently, he held posts at Audits & Surveys and Marketing Research Corp. of America before joining SAMI as a vp in 1970. Since 1973, he has also served as an associate professor in the graduate school of business, Pace College.

Prominent because of numerous presentations to marketing research and grocery trade groups, Mr. Partner was well recognized as an authority on the measurement of product movement through retail grocery outlets.

MAX BROWN

POMPANO BEACH, FLA.—Max Brown, a longtime figure in marketing and publishing, died here Feb. 14 at age 77.

After serving as exec vp of Fels & Co., the detergent and soap manufacturer, Mr. Brown joined Hearst Magazines' *Good Housekeeping* in 1965, as director of industrial relations. He held a variety of posts at the monthly, retiring in 1975 as vp-associate publisher.#

GOP ads aim at Hart's 'new ideas'

Mondale, Hart at O.K. Corral

'84 Marketing the Candidates

By SCOTT HUME

CHICAGO—Sen. Gary Hart, riding on the momentum of mounting campaign financing, will have spent more in tomorrow's Illinois primary than in any of the elections held on the ballyhooed Super Tuesday.

According to Eleanor Tillinghast, a Hart media aide, the Democratic senator is spending $340,000 on tv and radio in Illinois. That compares with $310,000 spent on media in Florida, $144,000 in Georgia, $69,000 in Alabama and $164,000 in Massachusetts, all of which had Democratic presidential primaries on March 13.

It's only fitting that Mr. Hart's campaign is spending so heavily in Illinois. Former Vice-President Walter Mondale last week called tomorrow's Illinois presidential primary the "shootout at the O.K. Corral" and, as he and Mr. Hart rolled their increasingly combative campaigns into this mid-western state, the firearms analogy appeared apt.

Both Democratic candidates arrived in Illinois with their media guns loaded and aimed at each other.

Mr. Hart's advertising continued to portray the election as a choice between "old ideas that have failed and a new generation of ideas." Mr. Mondale's worked hard to position him as experienced while decrying the "fuzziness" of Mr. Hart's positions.

Mr. Mondale's staff last week was mum on how much media weight they expected to put behind their candidate's charge. But political analysts suggested Illinois represents too crucial a test for the Mondale campaign for it not to pull out the stops and probably exceed Mr. Hart's spending total.

With Sen. John Glenn's withdrawal, the Democratic media shootout was reduced to a duel, al-

(Continued on Page 82)

By RICHARD L. GORDON

WASHINGTON—Republicans, unwilling to let Democrats have the political stage to themselves, break tv commercials in 84 markets today, challenging the "new ideas" theme song played by Democrat Gary Hart.

In this first campaign round for 1984, the Republican National Committee is using three 30-second spots and is spending $1.2 million over a 10-day period.

All three spots dismiss Democratic "new ideas" talk as little more than "the empty promises of the past" and end with the tag line: "The Republicans. The Future."

Anti-Hart themes are strongest in a GOP spot dubbed "Diet." In it, a young woman on a bicycle compares Democratic "new idea" talk to the "all new wonder diet" that doesn't require exercise or watching what you eat.

"And if you believe that," she says, "you'll believe that the 'all new' Democrat ideas and leadership are new. They're the same old empty promises."

Although the "new ideas" theme is the centerpiece of Mr. Hart's surging campaign, the GOP hasn't written off the possibility that it might have to deal with Walter Mondale.

The former Minnesota senator, who has encountered roadblock after roadblock in his campaign, gets a once-over in two other GOP spots. In them, a factory worker and a young woman dressed as a college graduate talk about how times have improved since the 1980 election. "People in Washington overpromised," they complain, and the commercial dissolves to a picture of President Jimmy Carter and Vice-President Mondale.

Hal Larsen Etc., San Francisco, is the Republican National Committee agency. SFM Media Services handled the buy.#

Canada Dry puts RJR in soft drinks

By JENNIFER PENDLETON

Del Monte Corp.'s proposed acquisition of Canada Dry will put the San Francisco-based subsidiary of R.J. Reynolds Industries into the multi-billion carbonated soft-drink industry for the first time. And it may put another ad agency in the business as well.

The agreement in principle, under which Del Monte will buy the New York-based soft-drink company from Dr Pepper Co., Dallas, will be completed in a month, pending approval. Terms of the

last minute news

Beatrice, Esmark officials hold discussions

CHICAGO—High-level officials of Beatrice Foods and Esmark met last week to discuss a merger of the two companies, according to *Crain's Chicago Business*. While the companies refused to comment, sources say the meeting was held March 14 to discuss "a possible combination of the two." No further details could be learned. A Beatrice-Esmark merger would form a company with estimated combined 1984 revenues of more than $16 billion. The merger rumor has been heard frequently since a securities analyst meeting in Florida (AA, Feb. 27).

Johnson taking sugar-free Fiberall national

RACINE, WIS.—Rydelle Laboratories is rolling sugar-free Fiberall bulk laxative national with advertising and promotion designed to spur quick awareness and trial. Fiberall has been in test, via FCB, in the West (AA, Feb. 13), where Metamucil recently introduced its sugar-free variety.

Warner Amex unit mulls public offer

By SUSAN SPILLMAN

NEW YORK—Executives at Warner Amex Satellite Entertainment Co. are eyeing the possibility of taking their popular but not-yet-profitable MTV: Music Television public.

MTV's parent is a unit of Warner Amex Cable Communications, which is owned jointly by Warner Communications and American Express. At press time, WASEC president Jack Schneider could not be reached for comment, and spokespersons at both Warner Communications and AmEx refused to discuss the matter.

But other sources close to the company confirmed that WASEC is exploring the option of going public, although no prospectus has been filed with the Securities & Exchange Commission.

Such a move would supply troubled Warner Communications with a much-needed infusion of cash. Late last week, Warner reportedly agreed to buy back its stock held by Rupert Murdoch for an estimated $180 million, ending a takeover threat.

For American Express, it would enable at least a partial escape from the cable tv industry—a business American Express is said to have lost patience with several

Hardee's jumps into net tv fray

By SCOTT HUME

Hardee's Food Systems is undertaking major shifts in its marketing strategies that should speed its transition from a regional to a national fast-food power.

The keystone to that transition will be Hardee's first foray into network tv advertising. Company officials say only that it is planned for "this summer," but sources indicate Hardee's and agency Benton & Bowles, New York, are finishing a new network campaign that will debut during the week of Memorial Day.

Executives of the 2,000-unit chain, headquartered in Rocky Mount, N.C., are tight-lipped about the campaign's content, but Hardee's already is making some moves in anticipation of going head-to-head with the "Big 3" national burger chains, McDonald's, Burger King and Wendy's.

One strength that new advertising is expected to hit hard is menu variety. Earlier this month Hardee's added a Turkey Club sandwich to a menu that already included roast beef, ham and cheese, chicken and fish offerings in addition to a variety of hamburgers (including three different ¼-lb. choices) and a separate, biscuit-based breakfast menu.

That's a lineup none of the other burger chains can match.

In the South, Hardee's strongest market, its made-from-scratch bis-

(Continued on Page 78)

Fast-food chains' tv spending

McDonald's in 1983 remained the largest restaurant-chain tv advertiser, outspending the next three closest advertisers combined, even though it increased expenditures less than did chief rivals Burger King and Wendy's. Significantly, McDonald's was the only major chain to increase network spending (up 35%) more than local spending (up 13%). BK upped its spot buying 63% over 1982, while Wendy's local tv expenditures increased 74%. *Source: Television Bureau of Advertising from Broadcast Advertisers Reports data.*

Hoge seen setting new tone for 'News'

By STUART J. ELLIOTT
and ROBERT REED

New York—James Hoge's expertise in running a big-city daily is what persuaded Tribune Co. to hire him last week to run its *New York Daily News*.

What he does once he gets there April 23 is a subject he isn't discussing much now.

That hasn't stopped many in the industry, however, from speculating whether the former *Chicago Sun-Times* publisher will attempt to make the *Daily News* more upscale and give it a new "tone."

Mr. Hoge, who went head-to-head for a quarter-century against his new parent company's *Chicago Tribune*, both at the *Sun-Times* and the *Chicago Daily News*, was appointed last week as publisher and chairman-chief executive officer of New York News Inc.

Two months ago, he quit as publisher of the *Sun-Times* after his group of investors was outbid by Rupert Murdoch, who owns the *New York Post*, in its attempt to purchase the paper from Field Enterprises.

"I love competitive journalism," Mr. Hoge, 48, said on a one-day visit here March 14, during which his appointment was announced. "I think it's the most fun. The *Daily News* is in the most media-rich environment in the country, and we have to keep a very broad view of who and what it's competing against to have the right strategy and execution."

Along with Mr. Hoge's appointment, Tribune Co. named Arthur Wible Jr. president-chief operating officer of New York News Inc. He had been exec vp-director of sales. There were indications from company insiders that more major personnel changes would be announced soon.

Messrs. Wible and Hoge are succeeding Robert Hunt, who was publisher and president-ceo of New York News Inc. Mr. Hunt, who came to New York in 1979 from Chicago, returns there to become president-ceo

Norwich ads break, new product tests

P&G's sights on analgesics

By NANCY GIGES

Procter & Gamble has set its sights on becoming a major factor in the $1.2 billion analgesic category.

The Cincinnati company has broken its first national advertising campaign for Norwich aspirin, a heretofore unadvertised brand picked up when P&G acquired Norwich-Eaton Pharmaceuticals, and has started test-marketing new Encaprin aspirin capsules, directed at arthritics.

In targeting this category as a corporate growth opportunity, P&G goes up against Sterling Drug, Bristol-Myers, American Home Products and Johnson & Johnson, all well-entrenched and experienced marketers of analgesics.

P&G is testing Encaprin in Tucson, backed by tv spots. The company describes the product as a "capsule that contains hundreds of individually coated micrograins of aspirin."

The product is formulated to pass through the stomach before dissolving, which helps to relieve some of the digestive discomfort and side effects often suffered by arthritics who must take large doses of aspirin for relief.

Encaprin comes in regular (325mgs) and extra-strength (500mgs) formulations and in bottle sizes ranging from 50 to 200 capsules.

In tv commercials created by Dancer Fitzgerald Sample, an announcer says, "If you have arthritis pain, here's some good news." Showing the package, he says, "It's a better way to treat arthritis than plain aspirin." Viewers then are shown "hundreds of coated aspirin micrograins" that bring "unsurpassed relief to painful stiffness." It closes: "It's better. . .safer for your stomach than ordinary aspirin."

P&G said the product is being marketed by the company's health and personal-care division in Cincinnati, although it carries the Norwich-Eaton name on the package and is manufactured at Norwich facilities.

P&G acquired Norwich-Eaton in 1982 and has reviewed every drug

(Continued on Page 86)

Continental testing victim coverage plans

By ROBERT RAISSMAN

Continental Insurance is testing victim-assistance insurance plans designed to aid families of missing children, crime victims and victims of fraud.

Arthur Domingo, a Continental spokesman, said the policies are new to the insurance industry. "They are totally unique. . .Nobody has had experience insuring crime victims," he said.

The plans are being tested in California, Colorado, Minnesota, Kentucky, Wisconsin and Indiana. Tv and print ads by Dancer Fitzgerald Sample are being used in each market.

Kurt Graetzer, account supervisor, DFS, said that since the concept was so revolutionary and sensitive, it presented the agency with an unusual creative task. The agency took a positive direction, Mr. Graetzer said, giving a human portrayal of the benefits the insurance offers. The spots avoid scare tactics, he said.

"It's not creative meant to hype people's fear of things they already

Stroh's targeting Hispanics

By BOB MARICH

Los Angeles—The West Coast introduction of the Stroh's and Stroh Light beers not only signals the near completion of national distribution for the brand but the first major effort to court the Hispanic market.

Stroh Brewery Co. shortly will announce that Bermudez & Associates, Beverly Hills, has been hired to handle the company's advertising to the Hispanic market.

The nation's third-largest brewer also appointed Hector Elizalde as national manager of Hispanic market development. That development was announced at a Beverly Hills luncheon kicking off the California introduction of the two Stroh brands. He had held a similar post at Anheuser-Busch.

Acceptance by Hispanic consumers is key to the Detroit-based brewer's expansion moves into Hispanic-market strongholds in the West and Southwest. It intends to be national with both brands in June, according to the company.

"In addition to our general market media, we will also be heavily involved in both black and the ethnic market in radio, outdoor and newspaper," John H. Bissell,

Radio-tv group leads ad gains

New York—Advertising spending in newspapers in December rose in seven measured categories and fell in nine, according to a Media Records survey for Advertising Age.

The largest percentage increase came in the category of radio-tv-phonographs-records, up 36% to $21,853,135, followed by alcoholic beverages, up 32.1% to $4,414,580, and department stores, up 31.5% to $97,933,744.

The largest percentage decrease was to be found in the category of headache remedies and sedatives, down 100% to 0, followed by sporting and leisure-time equipment, down 89% to $248,529, and beverages (coffee and tea), down 78.7% to $52,714.#

'Times': Newspaper or trade paper?

(Continued from Page 38)

ington, we see the consequences. Robots, marching in circles in front of the White House and Congress, brandishing their signs and chanting self-righteous slogans. A mockery of the informed citizen who has reached decisions by exposing ideas to rational discussion.

* * *

People who are intellectually isolated can mistake their assumptions as fact. Assertions repeated often enough achieve a degree of credibility. The most fundamental constitutional principles are treated casually.

As we near the 200th anniversary of our Constitution, that Constitution suddenly is perceived as needing a lot of adjustments. A Constitution written by conservative landowners that preserved freedom so well for so long does not suit the present generation of conservatives.

What the courts will not change, they are ready to rewrite. On all fronts, through their control of all branches of government, they pursue their ends.

Journalists are experiencing this firsthand. There has been a consistent series of efforts to raise walls between reporters and sources. In Grenada, the military was allowed to operate without a watchdog—something Lincoln would not allow in the most dire hour of the Republic and Eisenhower did not expect even in the crucial period before the invasion of Europe.

The ability of the watchdog to do its job is under heavy assault, and the press is not getting the support it believes it has a right to expect, partly because so many people—including people who are not conservatives—have been sold strange ideas about who we are and what we do.

Is there an "ever-leftward drift" in the press, as Mr. Whelan believes? When a reporter asked executives of the *Washington Times* why they don't offer balanced op-ed pages like other newspapers, he was told: The more literate liberal columnists had already been snatched up.

Leftward drift, but shortage of available liberal columnists?

Is it the reporters and editors who are poisoning the news? Consider this account of events in Iowa. Walter Mondale, the candidate endorsed by the AFL-CIO, had ignored Gary Hart's challenge that he explain where he differs from organized labor. Mary McGrory describes the consequences:

"The question came up at every stop he made in Iowa. He was not in the habit of talking about his differences with his friends, he said stubbornly. But the press would not quit and, making his rounds, Mondale was like a mailman trying to shake off a terrier with a grip on his ankle.

"An exasperated political counselor riding in a press van asked a reporter when it would stop. It wouldn't, he was told."

Eric Sevareid, formerly of CBS News, sees complaints about the press as a two-way street. "You, the public, feel the press is full of biased and inaccurate writing and speaking. . .But what you don't seem to realize is that there is also a lot of inaccurate and biased listening and reading."

I don't believe this plea for public support for the press is self-serving. We journalists will fill our papers and sell just as many. You simply won't get the information that helps you know how power and money are used and what really goes on in Washington, Beirut and El Salvador.#

Postum marks 90th year

White Plains, N.Y.—General Foods' Postum, a grain-based beverage that is served hot, is celebrating its 90th anniversary this year.

Robert Sansone, vp-general manager, beverage division, said it is still selling reasonably well and continues to be profitable. But he also believes that in today's marketplace, where there are more older people (the brand is skewed to the older consumer) and a demand for all-natural products, Postum may provide opportunities not yet realized.

The company has begun advertising the beverage mix in publications directed at older people, a program that could be expanded into other media.#

Special Report

Marketing to Hispanics

Making the most of media

By Craig Endicott

San Antonio is a market that is 52% Hispanic, a powerful political bloc that elected the city's first Hispanic mayor, Henry Cisneros, in 1982. They are people in the know. Yet, San Antonio cannot support a Spanish-language newspaper. But no one can accuse San Antonians of not trying.

Virtually every year someone announces plans for a Spanish-language newspaper, citing: "Look at all these Hispanics! What an untapped market!"

As if on cue, such plans dry up as quickly as a playa lake in mid-summer on the arid Texas plain.

This was not the case in the earlier part of the century when the local newspaper *La Prensa* addressed the city's Hispanics in their native tongue. What has happened to change things?

San Antonio inherited many Hispanics fleeing political unrest in Mexico at the turn of the century. They had enough formal education to read and write in Spanish. Today, their children are among the city's 17.7% Hispanics who are English-only speakers and 54.3% who are bilingual. Most likely they are not among the 28% who speak Spanish only and who largely can't read or write in their native tongue.

What is being naively said about newspaper potential in San Antonio is being said by media entrepreneurs about new ventures planned for other large Hispanic centers of the nation. They see dollar signs in tapping the estimated 20 million Hispanics with an aggregate family income of $70 billion, and the promise of even larger profits as the Hispanic population supplants blacks as America's largest minority group within 20 years. But implicit in the San Antonio experience is the fact that there is not necessarily strength in numbers; that to succeed, those seeking to tap into Spanish-language media will have to get a better fix on the nuances that drive the major subgroups within the Hispanic

Reaching a growing market where it lives

By Renee Blakkan

Outdoor advertising is "the only thing that makes sense aside from tv" in advertising to Hispanics, says Alvaro Montenegro, director/Spanish advertising, Foote, Cone & Belding, Los Angeles. This is because "newspaper and magazine readership is low [among Hispanics] and you need to get brand awareness with visuals." About 40% of FCB's Los Angeles accounts are in Spanish, Mr. Montenegro says.

> **"A spiral of enthusiasm" can develop when Hispanics see products advertised to them with care.**

There is wide agreement among advertising agencies that outdoor advertising is an effective way to reach Hispanics, although they stress that a number of pitfalls must be avoided.

"It makes a lot of sense to advertise to Hispanics with outdoor boards because you can place the boards where they live and have little wasted circulation," says Jeffrey Johnson, manager/marketing service, Gannett Outdoor Group, Phoenix.

Gannett is the largest outdoor advertising company in the world and the second largest in the U. S. (after Foster & Kleiser, which is a division of Metromedia).

The junior boards in particular, many of which are eight-sheets (5 ft. by 11 ft.) and smaller, can be "more centrally located in commercial and industrial areas and next to neighborhoods and can have almost a point-of-purchase capability," says Robert Smith, Gateway Outdoor Advertising's Chicago general manager.

Thomas Whelan, Gateway's Pittsburgh-based president, adds: "We can have a panel on or next to a building where a product is sold. A person going to make a purchase is exposed to it, and it has real strength that way. It's the last suggestion before they go into the store."

All the outdoor board companies surveyed for this article said their Hispanic showings are growing rapidly, and some said they're even turning down business. Roughly a third of the 25,000 boards measured nationwide by the Out-of-Home Measuring Bureau (OMB), New Canaan, Conn., are dedicated to Hispanic advertising, says OMB head Julian Sloan. The OMB measures mainly eight-sheets for both amount of passing traffic and effectiveness of showing. The Traffic Audit Bureau, New York, which measures the larger boards (usually on highways and called 30-sheets, measuring 12 ft. by 25 ft.), couldn't estimate the number of its Hispanic boards.

Gateway's Mr. Whelan says more than half his Los Angeles inventory is Hispanic, and in Chicago, 25% of his boards are in Spanish.

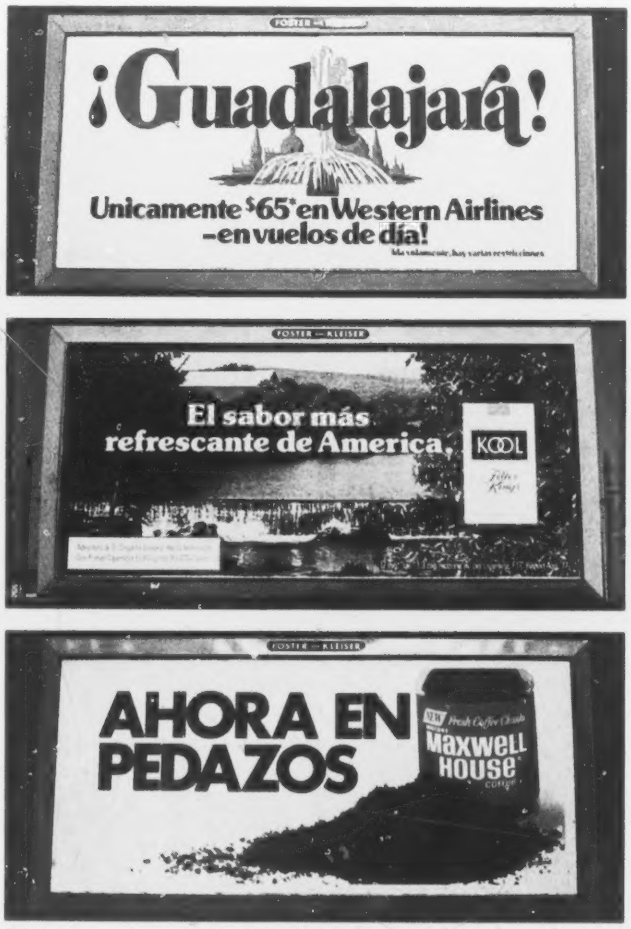
Another indicator of Gateway's growth in Hispanic boards is that since 1980 this area has increased 100% in Chicago alone, says Mr. Smith.

Hispanic advertising "is one of the fastest-growing segments of our operation," Mr. Smith adds. "Eight-sheets had emphasized black advertising in the last few years, but now there is a growth in the Spanish-speaking area."

At New York-based Villepique Co., another eight-sheet company, sales manager Stan Langer says his advertising to Hispanics has increased about 60% to 75% in the last four or five years.

At Foster & Kleiser in Houston, Gary Kelley, manager/eight-sheet division, says, "Our Spanish business is fantastic. We sell out in early January for the year." He says most Hispanics in Houston live in "two well defined areas," Northeast and Near North, and advertisers can reach 75% of Spanish-speaking people in the city with showings in these two areas. "I turn down more business every year," he says, "because no more boards can be built due to local ordinances."

A brief look at demographics shows why advertising to Hispanics is growing so rapidly. Hispanics in the U.S. have increased rapidly in the past decade, and experts predict that by the year 2020 they will surpass blacks as the largest minority in the country—46.6 million Hispanics and 44.4 million blacks—according to research by Gannett titled, "Gannett Outdoor Delivers the Hispanic Force."



There's a common perception that outdoor boards targeted to Hispanics center mainly on beer, liquor and cigarets. However, a wide range of other products also is advertised through this medium.

With about 75% of U.S. Hispanics concentrated principally in five states—California, Texas, New York, Florida and Illinois—a relatively few showings can reach large numbers of the market, says OMB's Mr. Sloan.

Moreover, U.S. Census figures show 88% of Hispanics concentrated in metro areas, compared with 81% of blacks and 75% of the total population. Boards in urban Spanish areas will thus not only be seen by those counted in the census, but also by the "missing million" undocumented aliens believed to be in the country and uncounted in the census.

Today, says Gannett's research, Hispanics' total income is about $55 billion, but by the end of this decade it should increase to $200 billion. A 1981 Yankelovich, Skelly & White study showed about 30% of Hispanics earning $20,000 or more. They're younger than the total population (54% are under age 35), and their households are larger (about 3.7 persons compared with 2.8 for all U.S. households). Younger, larger families of course buy more.

And their brand loyalty has been documented as higher than that of Anglos. As the Yankelovich study noted: "The U.S. Hispanic population is more likely than Anglos to value name or advertised brands [and] be brand loyal, yet at the same time [they] seem receptive to new products."

Outdoor boards used to reach Hispanics are most often eight-sheets or smaller. Zoning ordinances generally prohibit the larger boards within cities and in the neighborhoods where Hispanics live. The 30-sheets thus are generally found on the high-

Media

(Continued from Page M-9)

population.

The Hispanic market defies the kind of generalization one can get away with in defining Anglo society after years of media-molding. The U.S. Census identifies Hispanics as young, having large families, living in urban clusters, and being increasingly mobile as they fan out from Hispanic enclaves of California where 4.5 million Hispanics live, Texas (3 million) and New York City (some 2 million). They are largely Mexican, Cuban and Puerto Rican, although Central Americans, particularly Salvadorans, are flooding into California.

The census does not say that among subgroups Hispanic may mean white, black, Indian or any combination; it may mean Spanish as a second language; it may mean Catholic, although not necessarily the devout churchgoer found among European ethnics, and it may mean increasingly Protestant. Nor does it show that there may be as many as 10 million undocumented aliens, and not all from Mexico and Central America.

Idiomatic language separates them as do varying education and socio-economic backgrounds. Those motivated to immigrate permanently for economic reasons are moved differently than those fleeing political persecution who ultimately seek to return to their homeland. When they came to the U.S. and at what age also has a bearing on their Americanization and hence their market potential to the Spanish-language press.

Given these characteristics, Spanish-language media growth will primarily be affected by where Hispanics draw the line between assimilation and cultural ethnicity, and to a lesser

Hispanic market advertising expenditures by media in 1983

Media	Expenditures
National tv (SIN, Spanish International Network)	$40.5 million
National radio	30.5 million
Local tv (SIN)	40.5 million
Local radio	50.0 million
Independent tv	11.7 million
Print	23.0 million
Outdoor	6.0 million
Promotion	20.0 million
Transit	2.2 million

*Total expenditures include production, talent and administrative costs.

ways, where the traffic isn't heavily Spanish.

City ordinances are more relaxed when it comes to the smaller boards, and these are what one sees next to the supermarkets, smaller stores, banks, factories and in empty lots.

"Eight-sheets make a lot of sense" for Hispanics because "they're in the inner city," says Gannett's Mr. Johnson. The smaller boards are suitable for "stop-and-go traffic."

Mr. Langer of Villepique says less than 15% of Hispanics own cars. "They're constantly on the street, so there's no wasted circulation. The advertising is almost 100% effective, and it's there 24 hours a day."

FCB's Mr. Montenegro says the smaller boards "are a better way to penetrate. People walk and have more time to read, and if they go to a supermarket or bank, at a strategic moment it's there to remind them."

These boards have been in some cities for many decades and "really took off" in the 1950s, says Mr. Whelan. But the junior boards' black and Hispanic "image" has come about because so many whites moved to the suburbs and so many blacks and Hispanics moved into the cities. The junior boards were in the cities first, and the goal of most junior board companies, Mr. Whelan says, is to build more of them in the suburbs as well.

Another image problem is the common perception that advertising to Hispanics on outdoor boards consists mainly of beer, liquor and cigarets. But a wide range of products including toothpaste, soft drinks, oranges, autos, banks, radio stations and the lottery, as well as public service announcements, can be seen. And Tere Zubizarreta, head of Zubi Advertising, Miami, says that liquor and cigarets also may be the main products advertised with outdoor in English, too. With cigarets having been prohibited from tv and the Distilled Spirits Council having imposed a ban on tv for itself, outdoor boards are one of the few remaining options.

Outdoor boards used to reach Hispanics are most often eight-sheets (5 ft.-by-11 ft.) or smaller. Zoning ordinances generally prohibit the larger boards within cities and in the neighborhoods where many Hispanics live.

Of course, eights aren't the only size board to use for Hispanics. Ms. Zubizarreta says she uses 30-sheets for the extensive seasonal liquor ads she places to Hispanics in Miami. The eights don't have enough impact for the short duration (usually August to January) of these campaigns, she says.

Does an advertiser need to use different idioms to reach the different groups of Hispanics—Cubans, Mexicans, Puerto Ricans and South Americans? No. They all speak Spanish and can be reached with the same ad, although there are a few words that translate differently in different parts of the country. Gannett's study mentions how, in a campaign for brown sugar, the word "brown" had to be translated four different ways: One for New York, one for Miami, one for California and one for other parts of the country. But such cases are rare.

Also, while "taste in food and music may vary [among the different Hispanic groups] preferences in cars, appliances or almost anything durable are much less subject to ethnic skews," Gannett's research notes.

The advertiser does have to be careful to use the Spanish language correctly, however. "The more Hispanics feel the advertising is specifically for them," rather than just translated, the better, says Dale Dauten, founder and partner, Research Resources, Atlanta.

This advertising research company has found that "a spiral of enthusiasm" can develop when Hispanics see products advertised to them with care. When this happens, "an incredible brand loyalty is built up," Mr. Dauten says. Nevertheless, this raises an "interesting conflict" because most agencies like to see a "synergy" between the Spanish and English advertising, he says. Yet often ads won't translate literally and another message must be written.

Common mistakes on Hispanic outdoor boards include literal translations, says Ms. Zubizarreta. A literal translation usually requires a paragraph in Spanish for what was said in English in two words, she notes. Also, the copy must be clean and simple in Spanish as well as in English.

Other mistakes she's seen include using a French "grave" accent mark (the Spanish mark is acute), and putting an English-style question mark at the beginning of a Spanish sentence (the Spanish opening question mark should be upside down).

When the copy is good, purchases "can literally explode beyond belief," says Richard Dillon, president of Mendoza, Dillon & Asociados, Newport Beach, Cal., whose $15 million in annual billings are exclusively from Spanish accounts. Mr. Dillon says one big mistake caused by tight budgets is "relying on outdoor boards only to carry the message. This is a difficult burden to place on outdoor."

While liquor and cigaret companies have little option, "other companies have a choice, and it would be our opinion to take an electronic medium first for the basic campaign [tv is the medium most used by Hispanics, the Yankelovich study says] and to use outdoor boards as a reminder."

Mr. Dauten says he "just shakes [his] head" when he sees outdoor boards—a "classic reminder medium"—being used as the *only* medium in Spanish. The advertisers are "doing it on the cheap," he says. Using only outdoor boards doesn't "remind" Hispanics of anything, he says, because there wasn't any main campaign in another Hispanic medium.

Showing a big picture of the package on an outdoor board with no copy may be "useful," Mr. Dauten adds, but it "doesn't convey caring." FCB's Mr. Montenegro says: "I would never do only outdoor" for a campaign.

To those advertisers who believe Hispanics will get the message anyway in the English media, Mr. Dillon says yes and no. While many Hispanics use English media, they are getting "awareness" of the product, but not "motivation," he says. To build motivation, you've got to advertise in Spanish, preferably using broadcast with outdoor boards as reminders.

One company that built awareness among Hispanics and won a first prize from the Eight-Sheet Outdoor Assn. was Ensslin & Hall, Tampa. Lykes Meats of Florida had the greatest share of hot dog sales in the state, says Ensslin's chief operating officer and executive vp, Patrick Hill. But sales among Hispanics were "depressed." Ensslin and Lykes realized they had overlooked the constant influx of new Spanish-speaking people into Florida, while continually advertising in English. This was easy to do because Hispanics "commingle so closely with the population at large," Mr. Hill says.

There in Florida, rubbing shoulders with the English-speaking population, was "a very good and untapped market . . . hungry for more information, especially if you have products that are in their consumption category," he says.

The prize-winning illustration of the Lykes hot dog with "Florida's favorite" and "Made fresh in Florida," printed in Spanish have built awareness, says Mr. Hill. His company is researching whether follow-through purchases are resulting.

---

extent by immigration quotas and policing of border areas by beefed-up patrols.

Meanwhile, the getting's good for advertisers given media development at this point.

Total Hispanic market ad expenditures in 1983 were $224.4 million, up 35% from $166 million in 1982, according to *Hispanic Business* magazine, a national publication in English based in Santa Barbara, Cal.

About 22% of total ad expenditures came from 25 top advertisers ranging from $6.1 million by Philip Morris to $500,000 for H.J. Heinz Corp.

The Spanish-language expenditures of the top 25, however, are less than 1% of the aggregate general market expenditures of those companies.

Most of the advertising has been harvested by broadcast, notes *Hispanic Business*.

National tv or Spanish International Network (SIN) took in $40.5 million; local tv (SIN) added another $40.5 million; independent tv $11.7 million; national radio $30.5 million, and local radio $50 million. This represented $173.2 million or 77% of the total media expenditures.

Spanish-language broadcast may be the best way to reach the Hispanic audience, as marketers claim.

Spanish-language tv stations, overwhelmingly dominated by SIN, are located in the major Hispanic markets and total 23 stations.

The Hispanics moving away from those powerful cultural signals are being tracked by Spanish-language subscription tv and cable.

The largest of the specialized programing services on tv is Spanish-language cable, according to the National Cable Tv Assn. Yet, despite the surge in programing, cable as a Spanish-language medium remains more potential than reality as it does in many Anglo markets. This is because cable systems exist largely in suburban areas where Hispanics are beginning to move (in the top five Hispanic markets, 35% are in suburbs, 50.8% in the central cities) and cable has yet to tap East Los Angeles, Chicago and the New York boroughs of high Hispanic density.

Budget constraints have meant tv programing also is of poor quality compared to English-language network programs and is heavily imported from Spanish-speaking countries, facts that figure into the sales spiel of Pat Michell, Midwest sales representative for Caballero Spanish Media Inc. of New York: "When it comes to television, Hispanics would rather watch 'Hill Street Blues' than a Spanish station."

Ms. Michell may be right, but there are few nonproprietary

Cable

(Continued from Page M-39)

(like soap operas but with a known ending date instead of endlessly evolving); live sports; theater and variety shows.

The GalaVision cable service, now with more than 100,000 subscribers, carries no commercials and feature materials such as movies are presented uncut. According to Andrew Goldman, the "economy of scale" (both audience size and ad revenue in the Hispanic market are too limited) dictates that GalaVision obtain its programs from sources in Latin countries where production costs are lower than in the U.S. "The volume of Spanish-language movie tv production for the U.S. cable market," he says, "will never be large enough to justify original production in this country. So we buy from Mexico and South America, for example."

GalaVision's parent organization, SIN transmits 24 hours of programing daily, including news, current affairs programs and special events. SIN is owned 75% by Televisa, S.A., a Mexican communications conglomerate, and 25% by its founder and president, Rene Anselmo.

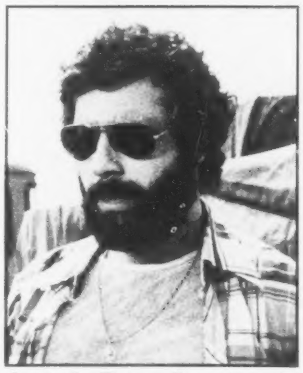
"I am convinced the lack of a national medium . . . is the principal ingredient that keeps Hispanics from gaining recognition," Mr. Anselmo says. "And this is what I envision SIN as doing—becoming the voice that strengthens Latin pride in its cultural heritage.

Emphasis on significant programing, as Ms. Conill suggests, is the mark of the good Spanish-language cable franchises. "Mia Vision emphasizes local coverage in Hialeah," says Malcolm White of Colony Communications. "We have nightly news shows with Jose Yedra as anchor, [we] cover the local night club scene and boxing, and move the cameras out into the community, getting a lot of material locally."

A notable result of this coverage in 1982 was a National Cable Television Assn. ACE—Award for Cable Excellence—presented to Mia Vision for "outstanding commitment to serving a minority audience."

Although most of the Spanish-American Network programing in Houston comes from South American sources, Mr. Gomez de las Barcenas is developing some local shows, too.

And while Southwest Cable in Espanola, N.M., is not doing any local programing yet, it now is devoting one channel to the local community college and one to the public school. It would like to see SIN work with the college to produce local access programs.



Antonio Fagundes stars in "Carga Pesada," a GalaVision series about two Brazilian truckers.

Valley Cable Tv, in California's San Fernando Valley, is another ACE winner, this one a 1983 award for "Innovative Programing," recognizing its program, *Rasgado en Dos* ("Torn in Two") about Spanish poetry. And earlier this year the Los Angeles City Council presented an accolade to Valley for its special, "Un-Tattoo You," which started as a simple documentary on how to remove tattoos, then dealt with the lessening of this militant attitude in young Hispanics and how to get out of street gangs.

Spanish cable operators take various approaches to advertising, but except for SIN, these could be described as "early developmental."

SIN, with an average audience of 1 million, expects revenues of $45 million in 1984. The network is up 34% in sale of commercial time from 1983 (GalaVision cable programing carries no commercial advertising).

Of that total, $30 million is from national tv sales to television, low-power tv and cable. The balance of $15 million is placed in the 12 markets that accept national advertising, including the cable station in Harlingen, Tex., and also includes revenues from border markets with audiences outside the U.S. —Juarez, Nuevo Laredo, Tijuana and Mexicali.

Houston's Spanish-American network carries such major advertisers as Procter & Gamble, General Foods, Johnson & Johnson and the major brewers, while Southwest Cable is not now carrying any commercials but soon will be, including some on the channel with Television and will gradually increase this over the next six months.

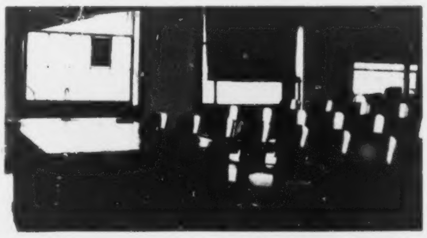
Like other components of its business, advertising is very much a local matter for Dynamic Cablevision's Mia Vision. "Advertising is very good," says Malcolm White. "It includes local businesses such as dry cleaners and restaurants. Early in the development of the channel the station management made contacts with affluent Cubans in the area and has good relations with them." Valley Cable in California is slowly picking up some advertising steam, feeling its growth rate is good as it goes from $10,000 a month in revenue for 1983 to projected monthly sales of $11,000 to $14,000 this year and $20,000 by 1985.

Is this the kind of ad revenue to expect from what Char Beals, NCTA programing and marketing vp, describes as "the largest of the specialized programing services on tv"? Perhaps a gradual increase is how it will happen.

"Spanish-language cable can be successful," says Ms. Conill. "It won't happen tomorrow—but it is going to happen." She pauses, and then adds with excitement, "Of course I think the most likely to succeed would be a Spanish-language version of MTV—Music Tv—but you couldn't make it by coming on and playing Latin rhythms of just any type. You would have to use the right balance of the *salsa* from South America, the *mariachi* from Mexico, the *ranchero* from our own Southwest. It could be beautiful and very successful."

She pauses and adds, "I'd better copyright that!" AA

Corporate giving.
Without it, a lot of important things might go out of business.



A lot of organizations in a lot of different fields could barely exist without help from corporations.

To their credit, a great many companies realize this.

Every year for the past ten years, corporate giving has gone up. And that's something the entire corporate community can take pride in.

There are so many ways a corporation can give. So many ways to lend a hand.

The fact is, when corporate giving thrives, so do the organizations it supports.

And everyone profits.

Media

(Continued from Page M-11)

marketing studies on the market that show the impact of English-language tv on primarily Spanish-speaking audiences and vice versa.

Clinical psychologist Andrew Erlich, whose expertise is in Hispanic market behavior, says English-language tv has as powerful an impact on monolingual Hispanic children as on society at large.

Pressure to watch the English channels comes partly from playmates; some is self-interest (the toys advertised), and a good deal is parental pressure on the child to be the "bridge" for the parent to the new culture.

The commitment of advertisers to reach the Hispanic market via tv also is less than enthusiastic, believes the national sales representative of a major Hispanic tv station.

Requesting anonymity, he estimates that advertising from 50% of the major advertisers on his station is tokenism.

Mr. Erlich traces this to a form of marketer's neurosis caused by the marketer's uneasiness about the impact of Latinos on society, the fear of the unknown, and xenophobia.

Print, the least developed of Spanish-language media, is only a discernible factor in New York, Los Angeles and Miami, a reflection of sheer numbers and the educational attainment of Hispanics before immigrating.

In Chicago, where the number of Hispanics approaches that of Miami, Spanish-language newspapers have had an uneven history.

The *Chicago Sun-Times* discovered the hard way that Hispanics do not necessarily read Spanish. It aimed a weekend section called "Los Vecinos" at the city's half-million plus Hispanics (Mexican and Puerto Rican) in 1981. It lasted two years.

The venture proved costly as the *Sun-Times* tried to reach the population, which is dispersed throughout the city, a fragmentation that killed local advertising by Hispanic merchants.

One reason the newspaper lacked support in the Hispanic neighborhoods was traced to its failure to receive the necessary blessing of the Hispanic social and political hierarchy before launching the product, says a local adman.

The ultimate blow was the discovery that Hispanics in Chicago can be reached by English-language tv, Spanish tv and radio and even English-language print—facts that were discovered in a poll taken to determine where Hispanics got the information that influenced their vote in the Chicago mayoral election in 1983.

The *Los Angeles Times* has been assessing a Spanish-language product in L.A., but is finding the same kind of dispersion and English-language capability factors among the city's Hispanics as found in Chicago.

In the aggregate, 20% of Hispanics in the top five Hispanic markets (Los Angeles, New York, Miami, San Antonio and Chicago) are monolingual in English, 30% are bilingual and 50% are Spanish-speaking only, according to Sosa & Associates, a San Antonio ad agency that tracks the Hispanic markets in the nation's 33 major Hispanic population centers.

That is a fairly strong endorsement for using a combination of English and Spanish-language media to reach them. Indeed, that is what is often recommended by Sosa & Associates.

The answer to reaching the Hispanic market rests in the kind of careful scrutiny Sosa recently took in preparing an ad for Canadian Club. Targeted at bilinguals, its headline was in Spanish as was a poem, lyrical and intimate. A recipe for Canadian Club and 7UP was in English, at the request of Hispanic focus groups, "because we're used to reading recipes in English." Hardly revolutionary. But effective. AA

Coming

Next week Advertising Age Magazine's special report will focus on Special Interest Magazines.

Announcing the Hispanic Almanac

The Complete Reference Guide To the Hispanic Market

Orders are now being accepted for this important, 160 page-plus reference book. Order yours now from our initial limited supply and receive a 20% prepublication discount

Developed by the Hispanic Policy Development Project

The Hispanic Almanac Contains:

- Studies of the 20 Largest U.S. Hispanic Markets, Including Hispanic Population and Growth, Age and Sex Distributions, Income Data, Educational Status, and Spanish Language Usage
- 1985 and 1990 Population Growth Projections
- Market Data Adjusted for Census Undercount
- Size, Growth, and Characteristics of the Overall U.S. Hispanic Population
- Comparative Analysis with Total U.S. Population and Black and White Subgroups
- Socioeconomic Data and Analysis of Hispanic Subgroups (Cuban Americans, Mexican Americans, Puerto Ricans, and other Hispanics)
- Area of Dominant Influence (ADI) Data
- Voter Participation Data And More . . .

A Must for: Advertising Agencies Businesses Media Service & Political Organizations Libraries Government

Hardee's

(Continued from Page 1)

cuit breakfast menu has been strong enough to force McDonald's to trade its English muffins for biscuits there and to consider adding them elsewhere. Estimated to account for as much as 25% of Hardee's per-store sales, breakfast should get at least a proportionate share of the new campaign's attention.

Served on a natural-grain bun and topped with lettuce, tomato and bacon, the new Turkey Club is positioned to appeal to customers (especially women) interested in lighter, nonbeef meals.

No plans for salad bar

Hardee's so far has resisted jumping on fast-food's salad-bar bandwagon, but the turkey item is intended to help broaden Hardee's customer base as it takes on McDonald's, Burger King and Wendy's more aggressively.

Broadcast and print advertising for the rollout, themed "Tackle a turkey," also is a part of the transition. Missing from the spots is the chain's longtime tag line, "Best eatin' all around," in anticipation of the network campaign's new, expectedly tougher "umbrella" theme.

A subsidiary of privately held Imasco Ltd., Montreal, Hardee's already has the size to merit membership in the Big 3 burger-chain club. It has converted to the Hardee's banner most of the 700-store Burger Chef chain it acquired in 1982 from General Foods, quickly moving it into new markets.

After cooling somewhat last year, new-store construction again is on the rise.

Industry sources estimate Hardee's 1983 systemwide (company and franchised stores) sales at about $1.5 billion. That keeps it within striking distance of No. 3 Wendy's (with nearly $2 billion in sales) and No. 2 Burger King (about $3 billion), while leaving it at least a respectable distance behind the unapproachable market leader, $8.7 billion McDonald's.

Where Hardee's traditionally has lagged behind the other major burger chains is in advertising spending, relying instead more heavily on promotions than have the others. But changes in that past strategy already are evident.

According to the Television Bureau of Advertising, Hardee's spent $17.6 million on tv advertising last year, compared with the $186 million spent by McDonald's, Burger King's $82.5 million and Wendy's $49.7 million. Yet Hardee's 63% increase in spending over 1982 greatly outdistanced the ad spending growth posted by any of the Big 3.

Heavy regional concentration

Hardee's heavily regional store concentration, which has kept it away from network tv until now, is generally seen as the chain's primary weakness in its efforts to take on its larger rivals.

Although strongly represented in the Southeast and part of the upper Midwest—Hardee's has no stores west of Salt Lake City—it is weak in the Northeast and has yet to enter such metropolitan areas as Chicago.

Benton & Bowles has been able to sell some of the future network feed in the West in order to minimize the cost-inefficiency of the buy, according to Hardee's senior vp-marketing Ron Wertheim.

The network advertising won't be funded by requiring an earmarked allocation of per-store sales, as do McDonald's, Wendy's and Burger King (commonly 1% and up).

However, regional co-ops do provide proportionate shares of a national production fund that produces advertising for systemwide use. But Hardee's is conceded to be one of the industry's masters at promotional marketing. A glass premium featuring the Smurfs and a Christmas season offering of stuffed Shirt Tales cartoon characters both did well, the company says.

Industry sources say Hardee's per-store sales were up an average 15% last November and December partly on the strength of the Shirt Tale promotion, despite an unusually high upcharge for the toys of $1.59 (and higher where demand allowed) with a sandwich and beverage purchase. Conventional wisdom at most fast-food chains holds that premiums priced above $1 don't move.

Future promotions uncertain

Although it already has run a children's meal promotion tied to the Biskitts cartoon characters this year, Mr. Wertheim said the extent of Hardee's future commitment to promotional marketing still is being debated.

One promotion Hardee's hasn't joined is the 39¢ hamburger offer still in effect in some McDonald's and Burger King stores (AA, Jan. 16).

Mr. Wertheim said sales haven't been hurt by the rivals' price-cutting, and he said Hardee's would rather coupon selectively than slash prices.

"My feeling is that kind of pricing cheapens a product everyone [in the industry] is trying to talk about and serve in a quality way," he said.#

NORTH CAROLINA ADVERTISING CONTRACT

The North Carolina Department of Commerce is statutorily required to review and evaluate periodically the contractual relationship between itself and the advertising agency that handles its travel and tourism and industrial development media promotional efforts. The current contract will expire on June 30 of this year. The firm of McKinney, Silver and Rockett of Raleigh, North Carolina is presently under contract with the Department of Commerce. The relationship with this firm has been quite satisfactory to the Department and the firm will be eligible for consideration in the selection of an advertising firm for the contract period beginning July 1, 1984. Firms interested in being considered for this contract should contact Charles Heatherly, Director, Division of Travel and Tourism, 430 North Salisbury Street, Raleigh, North Carolina 27611, in writing by April 11, 1984 for details and requirements associated with the contract.

PROJECT COORDINATOR, MARKETING

A San Francisco based paper company seeks talented individual to coordinate advertising, sales promotion and product publicity activities on a project basis in support of company marketing plans. The position will also assist Manager Marketing Services in other marketing activities including new product devlopment and market research.

The ideal candidate will be a highly motivated, results oriented college graduate and want career opportunity as well as present responsibility. An MBA degree and two years marketing experience is preferred. Send a letter of interest, resume and complete salary history to:

Box 8787, ADVERTISING AGE
740 Rush St. Chicago, Ill. 60611

ART DIRECTOR

Due to our continuing growth, the Dallas Times Herald has an immediate opening for a highly experienced Art Director.

The position requires a working knowledge of all phases of graphic art and print production processes as well as the ability to plan, organize, direct and control the advertising art department.

Successful candidates will have a minimum of 5 years experience in managing an art department. A proven and demonstrable record of superior managerial skills and organizational talents in supervising an entire department will be considered more important than creative ability. Prior responsibilities must include schedule control, budget planning and cost accountability.

If you feel you meet our needs and would like to work at the Southwest's most awarded newspaper, forward a cover letter, resume and salary history to:

Times were a lot happier for the Pizza Time Theatre family when they were the darling of Wall Street. The chain had everything going for it; now virtually everything goes against it.

Why the fun's all gone for the pizza-video king

By SCOTT HUME

Like an unskilled videogame player reacting too slowly to the changing action on the screen, Pizza Time Theatre is facing the end of the game.

But while some observers are calling the company's rapid rise and fall a classic case of marketing misjudgment, the product Pizza Time pioneered may survive.

The idea of using technological innovations to combine entertainment and dining in one package still has its advocates. However, those who continue to refine the concept agree that Pizza Time's decline has taught them important lessons about defining and reaching their market.

Last week's announcement that the Sunnyvale, Cal.-based Pizza Time would report fourth-quarter losses from continuing operations of at least $16 million was only the latest bad news from the franchiser of restaurant/entertainment centers.

The fourth-quarter report follows losses of $6 million through the first nine months of fiscal 1983, and the company said it will take an additional $35 million writeoff from the earlier announced closing of 19 Chuck E. Cheese's Pizza Time Theatre stores.

Without help from creditors, including a break on rental obligations, company president Randall Pike said the company would be forced to file for protection under bankruptcy statutes.

A spokesman adds that Pizza Time has no firm plan to reverse its fiscal slide. Company executives, the spokesman said, haven't had time to figure one out "since right now we're up to our necks in alligators."

As one analyst predicts, "Chapter 11 will be the last chapter for them."

The unraveling of Pizza Time's fortunes comes less than three

Miller stands behind prior substantiation

By RICHARD L. GORDON

WASHINGTON—The big flap over the Federal Trade Commission's ad substantiation policy wound down last week with a proposed policy statement that scotches the prospect of major changes in the forseeable future.

While FTC chairman James Miller talks of additional long-range studies, he told an invited audience of ad industry leaders March 23 he is settling now for changes in three major areas, which do not go beyond clarifying and simplifying the core requirement that advertisers must have a reasonable basis for claims before making them.

His challenge to ad substantiation, reflecting his fears that it chills the freedom of advertisers to make claims, has created tension between his regime and ad industry leaders. The key points he now recommends reflect fine-tuning primarily in areas where the industry itself agreed that changes were needed.

First, they attempt to give advertisers more guidance on the quantity of substantiation they must possess to have a "reasonable basis" for their claims.

Where ads explicitly or implicity claim a particular level of support (such as when an ad says "a laboratory test proves"), the Miller policy would have the FTC declare that the advertiser's substantiation must meet the standard.

Where it's unclear what kind of support consumers would expect for a claim, judgments still would have to be made by the FTC on a case-by-case basis.

Second, they call for the FTC to declare that it sometimes will consider evidence developed *after* a claim is made, even though the ad substantiation policy states that an advertiser must possess a "reasonable basis" for its objective claims at the time they are made.

Mr. Miller said the FTC's existing method of treating "post-claim" evidence has benefited large advertisers and agencies with sophisticated Washington lawyers "who knew how things really worked." His answer is to have the FTC publicly list four circumstances where post-claim evidence might be acceptable in an investigation.

But there will be no relief through "post-claim" evidence for

Part of belt-tightening move

Merrill Lynch slashes ads

By ROBERT RAISSMAN

Merrill Lynch & Co. will slash its estimated $25 million 1984 advertising budget by at least 16% and is said to be considering the layoff of 1,000 employes, both actions considered part of a companywide move to cut costs.

The advertising cut may be only the beginning, according to James W. Walsh Jr., vp-advertising, Merrill Lynch. He said the final determination on what percentage of the budget will be cut will depend on how expenditures can be trimmed without hurting the company's over-all marketing strategy.

"We are not only going to reduce the entire advertising budget, but we are going to try to assemble funds to introduce a whole new strategy," Mr. Walsh said.

He said the strategy could take the form of a new campaign for the brokerage company beginning in mid-September. Young & Rubicam is the agency, and Mr. Walsh said the agency "was safe."

Mr. Walsh said Merrill Lynch will maintain a "sizable but not huge" campaign to maintain its visibility. Contract spaces in such places as *Barron's* and the *Wall Street Journal* will not be dropped.

The company's corporate print campaign has been dropped.

"That campaign, which is quite new, may never see the light of day again," Mr. Walsh said. He added that Merrill Lynch had some "significant" tv commitments.

Speculation ran high last week that Merrill Lynch was planning to lay off about 1,000 employes, mostly clerical and administrative employes. A Merrill Lynch spokesman said the company was looking at its entire

last minute news

$10 million Commodore account to Drossman

NEW YORK—Anametrics Services, marketing agency for Commodore International, has awarded the computer marketer's estimated $10 million print account to Drossman Lehmann Marino Reveley, New York. Steven Greenberg, president of Anametrics, said Drossman was selected because it is highly creative, has strong track records and "is flexible, which is essential in the computer industry." Tv creative earlier was given to Dick Rich Inc., with placement going to Clifford Botway Inc. (AA, Jan. 30). Ally & Gargano lost the account last summer.

Johnson & Johnson airs spot for toothpaste

NEW BRUNSWICK, N.J.—Johnson & Johnson has aired a commercial on a cable station in San Diego for Prevent fluoride toothpaste, said to prevent "hard crusty buildup [on teeth] by 50% once your dentist has cleaned your teeth." It was not known at press time if the product is being sold at retail or if the spot was a concept test. The agency also is not known.

Magic Pan names D'Arcy for $2 million account

SAN FRANCISCO—Magic Pan International named D'Arcy MacManus Masius here to succeed Benton & Bowles, Los Angeles, on its $2 million account.

Kodak set to unfurl videotape

By GAY JERVEY

Eastman Kodak next week launches what is said to be a $15 million-to-$20 million campaign for its new line of blank tapes for videocassette recorders.

Kodak will begin marketing blank tapes in both the Beta and VHS formats (AA, Dec. 26).

The effort, which comes in time to steal some thunder from Polaroid's imminent videotape introduction, is expected to usher in a new wave of big spending in the $485 million videotape market, in the throes of its first price-cutting

Fleet-size ad dispute

Avis asks court to brake Hertz

By ROBERT RAISSMAN

The battle between Avis and Hertz once again has moved from the highway to the courtroom with the "Trying harder" bunch claiming that new Hertz ads contain false statements.

In a lawsuit filed last week in federal court in Uniondale, N.Y., Avis charges that the claim in a new national Hertz print and radio campaign—that Hertz has "more new cars than Avis has cars"—is false and will cause Avis irreparable harm.

The print ads ran in *American Way*, American Airlines' in-flight magazine, and the March 12 *Wall Street Journal*. Radio spots making the same claim also have aired, according to the court papers. Scali, McCabe, Sloves is agency for Hertz.

"The case is without foundation," a Hertz spokesman said. "Hertz' claim is correct and we intend to prove it in court."

The print ads are headlined, "Hertz has more new cars than Avis has cars." A small subhead reads: "We're rolling out over 135,000 1984 cars." In the *Journal* ad, a footnote says Hertz' claim is "based on car registration and major airport statistics."

Avis is asking the court to stop Hertz from continuing the campaign. Avis also is seeking an order that would force Hertz to initiate "corrective advertisements" and award Avis damages for Hertz' "wrongful acts."

Avis also is seeking all profits that Hertz will receive or has received from using the ad.

Industry sources said Avis initiated the suit to discover how Hertz executives gained informa-

Loss report cools off Ally stock

By MARK LIFF

New York—Ally & Gargano, in recent years one of the hottest ad agencies here, last week projected quarterly losses of about $200,000, a disclosure that caused the agency's stock price to plummet to its lowest level since it went public last December.

The loss for the quarter, which ends March 31, would be the agency's first since it began trading. A&G reported net income of $312,000 in the same period last year. In the fourth quarter of 1983, A&G reported income of $873,000, a 14.4% drop from 1982.

The agency attributed the latest loss to "an unanticipated curtailment of advertising expenditures for the last half of the fiscal year by three clients and the next by another client."

A&G refused to identify the clients, and none contacted by Advertising Age would comment.

Just a week ago, A&G said only two clients had curtailed advertising expenditures and another had transferred expenditures to the next fiscal year.

Amil Gargano, A&G's president-chief executive officer, said in a statement that the agency "expected to return to a substantial level of profitability during the fourth quarter of fiscal 1984." But he added, "net income for the full fiscal year. . .will be less than net income for fiscal 1983." The fiscal year ends June 30.

Wall Street analysts say it's impossible to tell just how low the price will tumble—or what it will mean to the company's future on the over-the-counter market.

"It [A&G] was never recommended by us," said Alan Gottesman, vp at L.F. Rothschild & Co. "We thought it was too risky. Why would you prefer Ally & Gargano to BBDO, which has a track record and substantial business experience?"

Mr. Gottesman said he didn't believe the company's current status was a result of its going public. "The company essentially is the same now as it was a year ago," he said. He was unable to explain the agency's plunging stock price—now 25% lower than when it opened.

On Thursday, the price of a share dropped half a point on trading of 500 shares. The bid was at 7½ and the asking price was 8.

Analysts said privately that they did not believe the company would revert to being privately held, as four

Travis seen heading GOP effort

New York—Madison Avenue is buzzing with reports that the Ronald Reagan/George Bush 1984 re-election account will go to an ad hoc advertising group reportedly to be directed by James D. Travis, president-chief operating officer of Della Femina, Travisano & Partners.

Mr. Travis was known to be in Washington Friday reportedly to discuss funding and staffing of the powerhouse of creative talent for the re-election effort. He could not be reached for comment.

Despite reports Mr. Travis would direct an "all-star team" consisting of admen from across the nation, Reagan campaign officials claim no decision has been made and none is expected until this week.
